GOVERNOR'S BUDGET

Edmund G. Brown Jr., Governor, State of California

GOVERNOR'S BUDGET

FOR 1976-77

Submitted by
EDMUND G. BROWN JR.
Governor

to the
CALIFORNIA LEGISLATURE
1975-76 Regular Session

State of California

GOVERNOR'S OFFICE
SACRAMENTO 95814

EDMUND G. BROWN JR.
GOVERNOR

January 10, 1976

Budget Message

To the Members of the Legislature of California:

I submit to you today a budget for an era of limits.

In July, I wrote to all agencies and departments, then about to start the process of preparing this budget, advising: "The basic fiscal policy of this administration is to redirect efforts without escalating costs. New programs which cost money require corresponding reductions in other programs."

This budget reflects that policy of redirection. In addition, it is balanced, requires no new taxes and provides a prudent surplus. The budget proposes increased spending of only 6.3 percent over the current year, less than the 6.6 percent expected cost-of-living increase for California and significantly lower than the average 12 percent budget growth recorded in recent years.

There are two significant areas I want to emphasize that represent new directions.

First, I am proposing a flat dollar salary increase of \$65 a month for all state workers, from judges to janitors. I believe this is the fairest way to give the vast majority of state employees equitable relief from inflation. The old percentage cost-of-living increase is no longer appropriate in this new era of limits. Groceries are purchased in dollars, not percentages.

Second, this budget provides a surplus of \$339 million based on

current fiscal projections. While there is a slight upturn in the economy, do not lull yourselves into thinking that hard times are over or ignore the lessons of other states which have raised taxes and cut vital services. Even in times of relative affluence we must be prepared to weather cyclical economic reverses that may be just around the corner. The projected surplus is a modest sum in the context of the over-all budget. It must be guarded carefully. If we suddenly find ourselves in more difficult times, we can bail ourselves out and not have to turn to the taxpayers for help.

At the moment, however, the economy is taking a turn for the better. This, combined with savings achieved by trimming back or consolidating wherever possible will enable us to give tax relief for working Californians who need help the most.

I propose that we abolish the lower brackets of our state income tax so that a married couple earning less than \$10,000 and a single person with less than \$5,000 will be totally exempted from state income taxes. This will increase the paychecks of 1.7 million taxpayers beginning July 1. To put it another way, this proposal would eliminate all state income tax liability for the 10.9 percent of taxpayers in the bottom income brackets and reduce the tax burden for the next 9.6 percent of taxpayers.

For the governor's office itself, no increase whatsoever has been budgeted.

The major budgetary increases meet needs which have expanded through workload and inflation. These items total well over half a billion dollars: for example, \$100 million for Medi-Cal and other health programs, \$98 million for aid to the needy, \$199 million for state aid to local schools, \$62 million for the university and state college systems, and \$159 million for the flat \$65-a-month cost-of-living increase for state workers.

This past year, we have contained runaway costs in one area, adult education, by putting a five percent growth limit on state aid to adult education in high schools and community colleges. This budget continues that cap. It is imperative that adult education programs be critically reviewed and restructured so that our increasingly scarce resources can be channeled into the most essential education priorities. Removal of that cap without needed reform would require another \$162.4 million in state funds, nearly half the projected surplus. We cannot afford that.

Despite the fixed costs that limit a governor's ability to innovate in the budget, we have achieved savings that allow for some significant new directions.

First, I will put effort into programs which benefit our citizens most in need, especially those which encourage people to help themselves or improve the quality of their lives.

—The tax reduction is part of this. It helps those at the lower end of the income ladder without creating any new bureaucracy; without any new forms or paperwork.

—This budget proposes a 50 percent increase in college and university scholarship programs for those from low income families.

—I also propose a \$25 million start on a multi-year program to acquire parks in our major metropolitan areas where 85 percent of the people live.

—The federal government is abandoning operation of its migrant housing facilities in California. I recommend that we now take over this program, at a cost of \$3.7 million: \$2 million for rehabilitation of the housing and \$1.7 million for their operation.

Second, we need programs that give citizens the chance to use their energies to help their neighbors.

—The major investment here is a \$35 million expansion of the Early Childhood Education program developed by Superintendent of Public Instruction Wilson Riles. With this boost, more than half the children in kindergarten through third grade will benefit from this special program.

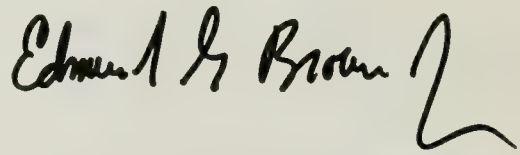

—In a like vein, I propose setting aside \$9.6 million for a consolidated youth employment program in the Resources Agency to be known as the California Conservation Corps. The energy of young people can be captured by the challenge of improving state forests and parks, wildlife preserves and our other natural resources.

—Half a million dollars is proposed for expanding the foster grandparent program in the state hospitals. This addition would add more than 200 low-income senior citizens to this very successful effort.

I have budgeted \$21 million to start a new state building program, along with \$5 million to make up for long-deferred maintenance at the University of California. Until recent years, California had the foresight to invest public money in state buildings because it would save taxes in the long run. That effort lapsed and now we waste millions of dollars in rent for office space.

New money also will go to combat air pollution, primarily in control of pollution from stationary sources. I also am expanding general fund allocations to the Fish and Game Department to protect the unique non-game wildlife of California.

This, in outline, is the budget I present to you. I pledge my help in the months of deliberation ahead.

Governor

¹ The General Budget Summary includes the revenues and expenditures of all state funds and activities that reflect the cost of state government and selected bond fund expenditures. The transactions involving other nongovernmental cost funds are excluded.

² Special Fund revenue and transfers for 1974-75 have been reduced by \$65,366,000 for accrued transfers to the State Highway Account to comply with the provisions of Section 183 of the Streets and Highways Code and Chapter 402, Statutes of 1973. See Schedule 4.

³ The Federal Revenue Sharing Act of 1972 requires the funds received by each state to be deposited in a trust fund and expended in accordance with state laws. These funds are reserved until appropriated by the Legislature.

⁴ There is a revenue gap of \$283 million for 1975-76 and a revenue surplus of \$67 million for 1976-77:

	1975-76	1976-77
General Fund Unrestricted:

General Government

Modest increases to the *MILITARY DEPARTMENT* support budget are proposed to support the state's 20 or 25 percent share of programs, for which the federal share is 80 or 75 percent. These increases are primarily required for maintenance and operation of the Fresno and Ontario Air National Guard Bases. A full-time position is also proposed to enable effective planning and preparation for military support during state emergencies, including civil disturbances and natural disasters.

A \$94,400 increase in the California Cadet Corps budget is proposed to support an increase in the number of cadets from 3,200 to 4,800 and an increase from 68 to 102 in the number of schools in which the program is conducted.

The proposed budget contains a General Fund appropriation of \$1.4 million for the *ARTS COUNCIL*, created by Chapter 1192/1975. The new council will provide increased recognition to the arts in California through broader membership and a more varied program.

The *PUBLIC UTILITIES COMMISSION* has redirected its efforts of personnel formerly involved in Transportation Rate Fund activities to General Fund activities. This program shift will result in increasing General Fund requirements by \$588,000 in 1975-76. The Commission is proposing to continue this changed level in 1976-77 thereby requiring an additional \$941,-

000 from the General Fund. As this redirection has not been approved by the Legislature, the budget presentation does not reflect this change. The Commission is proposing to have legislation submitted in the 1976 session to assess a fee on gross revenues of utility companies. They are also proposing to use this fee to offset the increased cost and new emphasis of direction in 1975-76 and 1976-77.

An energy conservation team is being created to monitor and evaluate measures which energy utility companies are taking to assist and encourage consumers in the efficient use of energy in existing buildings and by existing appliances. The duties of this team have been outlined so as not to duplicate efforts of the Energy Commission.

After many years of strife and controversy in California's farming community, the Legislature passed in 1975 the *AGRICULTURAL LABOR RELATIONS ACT*. The act was written to assure the state's estimated 240,000 farm laborers of a free choice in whether they wish to be represented by a labor organization and, if so, which labor organization. This is now possible through a secret-ballot election process on a farm-by-farm basis.

Jurisdiction over this task is the responsibility of the Agricultural Labor Relations Board (ALRB), along with the board's General Counsel. The ALRB writes and promulgates regula-

tions, hears cases, and hands down decisions and opinions pursuant to the act. The General Counsel's office acts as chief prosecutor and is responsible for field operations, including the conduct of elections.

The act itself, and many of the policies and procedures of the board, are patterned after the National Labor Relations Act of the 1930s, as amended, but there are distinct differences in the area of agriculture, where the industrial labor situation resembles only remotely the work force and conditions in California's number one industry.

The ALRB began operation August 28, 1975 and by the end of November had held more than 300 secret-ballot elections and received 500 charges of unfair labor practices. By way of comparison, the National Labor Relations Board, in its first full year of operation in 1936, held 43 elections, and received approximately 865 complaints of unfair labor practices.

Based on projected workload, \$6,688,000 is proposed for support of the ALRB in 1976-77.

With more than 60,000 farms in California, the board expects its heavy workload to continue for the next several years. However, the absence of strikes and violence in the initial period of operation is evidence of benefits which the act and the board have brought to the farm workers and people of California.

The 1976-77 fiscal year budget for the *SECRETARY OF STATE* contains an increased appropriation of \$1,331,585 to implement and comply with Chapter 704/1975 which provides for voter registration by mail. The legislation provides that necessary forms be furnished to local officials and that local governments be reimbursed for expenditures mandated by the registration program legislation.

Chapter 682/1975 completely revised provisions of the Government Code which govern corporations in California. An additional \$36,165 is proposed for the Secretary of State to absorb the impact of two changes in this law which become effective January 1, 1977. However, this additional expenditure will be offset by increased revenues of approximately \$320,600 which result from the legislative changes.

REVENUE MANAGEMENT. Under the *STATE BOARD OF EQUALIZATION* \$754,199 is included to increase field audits in the Sales and Use Tax program, which should result

in an increase in State revenues of more than \$3 million annually.

An investment analyst was added to the *STATE TREASURER'S* staff as a result of Chapter 639/1975 which made surplus money from negotiable certificates of deposit eligible for investment. The new analyst is needed to assist in making investment decisions on these certificates.

Nine positions and \$307,495 are being added to the State Controller's office budget to strengthen administration of the *UNCLAIMED PROPERTY LAW*. Chapter 578/1975 reduced the holding period for unclaimed demand deposits from 15 to 7 years and for stock certificates from 20 to 7 years. The positions will allow the State Controller to undertake a vigorous effort to collect the increased amount of abandoned and unclaimed property resulting from the new law. The increased effort, undertaken in cooperation with other state departments examining the financial records of holders of abandoned property for other purposes, may well increase revenues to the General Fund by millions of dollars.

Under Government Code Section 75101, the State makes *JUDGES' RETIREMENT FUND* contributions equal to 8 percent of the salaries of all authorized justices in the state's judicial system. A like amount is deducted from the salaries of all active justices for deposit in the fund.

Section 75110 of the Government Code declares that the Judges' Retirement System shall be fully funded and actuarially sound on and after January 1, 2002. Based on proposed 1976 legislation, the 1976-77 fiscal year budget reflects an increase in the contributions of judges and the State from 8 percent to approximately 15 percent, effective January 1, 1977. This will provide an increasing contribution each year as the judges' payroll increases, so that the system should be fully funded and actuarially sound on January 1, 2002.

The *DEPARTMENT OF JUSTICE*, through the constitutional office of the Attorney General, is responsible for insuring uniform interpretation and enforcement of laws and for representing the state in civil and criminal proceedings.

The proposed General Fund budget for the 1976-77 fiscal year totals \$46,774,844, an increase of \$1,360,169 over the revised 1975-76

General Fund budget proposal. Workload increases include staff for criminal identification and records purging, for legal services for state agencies and staff to process a growing number of criminal writs and appeals.

The budget reflects a change in the funding of antitrust actions from the General Fund to the Attorney General's Antitrust Account which is a depository for recoveries in such actions. A current year deficiency appropriation is budgeted to provide for an expansion of antitrust actions.

The budget contains an increase of \$1,038,959 in General Fund support for criminalistics laboratory services at Riverside, Salinas and Santa Barbara. These laboratories are currently supported by an LEAA grant from the Office of Criminal Justice Planning which terminates June 30, 1976.

The Department of Justice through its Advanced Training Center, offers training for local and state peace officer personnel in a variety of subjects. A direct appropriation is proposed for the 1976-77 fiscal year from the Peace Officer's Training Fund to partially support the costs of this training.

The Department of Justice processes non-criminal fingerprints for applicants for teaching credentials, for the purchase of firearms, etc., and pursuant to Penal Code, Section 11105 (e) applicant fees collected are available for the support of the department. With the enactment of Chapter 1222, Statutes of 1975 (Assembly Bill 1674) which is effective January 1, 1976, such fees are available only upon appropriation by the Legislature. A current year deficiency appropriation is budgeted and will be sought by the Department of Justice to provide the authority to continue such work in the current year. For 1976-77, a budget bill appropriation is proposed to provide for full year support costs.

The *COMMISSION ON PEACE OFFICER STANDARDS AND TRAINING* is a 10-member body appointed by the Governor. It is responsible for raising the level of competence of specified state agency and local law enforcement officers. Commission administrative expenses and reimbursements to local agencies for training expenses are funded from revenues to the Peace Officers' Training Fund, which are derived from penalty assessments on criminal and traffic fines.

With the enactment of Chapter 1172/1975, the commission will begin to set training standards for selected state agency peace officer personnel. A position is proposed to review these training needs in 1976-77. A staff analyst is also proposed for this budget year to evaluate law enforcement personnel data, with the goal of improving responsiveness to local agency needs. The budget for administration is proposed at \$2,276,917, an increase of \$9,564 over current year estimated expenditures. The local assistance budget remains at \$9,152,392.

The *OFFICE OF CRIMINAL JUSTICE PLANNING*, created by Chapter 1047/1973, is the state planning agency which coordinates federal grants received through the federal Omnibus Crime Control Act of 1973. The office also was designated by Chapter 1230/1975 to be the state planning agency for grant administration pursuant to the federal Juvenile Justice and Delinquency Prevention Act of 1974, Public Law 93-415.

The budget provides for \$3,909,168 from the General Fund to match \$72,277,094 in federal funds which will be allocated during the 1976-77 fiscal year. Of these federal funds, \$58,528,250 are allocated to the 21 planning regions throughout the state and \$14,759,398 to state and private agencies.

The *JUDICIAL COUNCIL* has sponsored many pilot programs supported by the Office of Criminal Justice Planning during the past several years. The purpose of these programs has been to find new methods for improving the effectiveness and efficiency of the judicial system. Beginning July 1, 1976, three of these programs are budgeted for full state funding and continuation on a permanent basis. They are: (1) Center for Judicial Education and Research, (2) Court Automation-Information System Coordinator, and (3) Fourth Appellate District Defender Project (transferred to new State Public Defender budget).

The denial of certiorari by the United States Supreme Court in the *Gordon vs. Justice Court* decision (1974) 12 Cal. 3d 323 created a need for additional attorney judges in the justice courts to handle the criminal trial caseload. Chapter 1493, Statutes of 1974, was enacted into law to meet this need by creating a temporary circuit justice court judge program. This program, in conformance with Chapter 1493/74, is

funded only for the first half of the budget year.

Recent legislation authorizes parties in specified civil cases to utilize arbitration as an alternative to a superior court trial, effective July 1, 1976 costs of the arbitrator are to be borne by the State thus saving time for litigants and trial court costs for the local jurisdiction. This budget includes \$150,000 for the 1976-77 fiscal year for this program.

A major relocation/remodeling project will be initiated in the current year from savings identified in this budget (\$198,422) which will involve the Judicial Council, Supreme Court, First District Court of Appeals and the Commission on Judicial Qualifications. The Department of General Services has budgeted \$200,000 in the budget year to complete this project.

The office of the *STATE PUBLIC DEFENDER* was created by Chapter 1125/1975 to become effective January 1, 1976. The primary objective of the office is to provide continuing legal representation for indigents in the Supreme and appellate courts through a state office.

The budget allows \$76,720 from the Emergency Fund in the current year to provide for the Public Defender and a small staff who will establish the office, interview prospective staff, and prepare to provide services starting July 1, 1976. A General Fund appropriation of \$3,036,682 is proposed for the 1976-77 fiscal year.

The *CALIFORNIA CRIME TECHNOLOGICAL RESEARCH FOUNDATION* was created by Penal Code Sections 14000-14017 in 1967 to foster the application of science and technology in the criminal justice field.

The foundation has been abolished for the 1976-77 budget year because all projects are scheduled for completion by January 15, 1976, with no prospects of new projects in the foreseeable future.

Four administrative positions and related operating expenses will cost the General Fund \$136,969 in 1975-76. Abolishment of the foundation will result in savings of approximately \$150,000 to the General Fund in 1976-77.

The *LOCAL MANDATED PROGRAMS* cover State reimbursements to local government entities (under authority of Chapter 1406/1972 as amended) for increased costs associated with new or expanded programs or for property tax revenue losses resulting from mandates con-

tained in state laws or executive regulations effective after January 1, 1973. As a result, the State Controller paid \$13.5 million to local governments during the 1974-75 fiscal year, and payments of \$26.9 million and \$22.9 million are anticipated for 1975-76 and 1976-77, respectively.

The Department of Finance is responsible for estimating the reimbursable costs associated with the Local Mandated Programs. The department has formed a separate unit for this purpose and has developed policies and procedures to assist local governmental agencies in implementing provisions of Chapter 1406.

The State Controller's budget displays for information purposes individual items of legislation containing appropriations to reimburse local entities for additional costs or property tax revenue losses due to state mandates. Departments which administer the programs affected by or related to the mandates show the expenditures in their budgets.

The *OFFICE OF EMPLOYEE RELATIONS* in the Governor's office was established in 1975 by an executive order of the Governor. This office will assume those functions previously assigned to the Secretary for Agriculture and Services which involve serving as the Administration's representative in the "meet and confer" process with state employee organization representatives.

The *EDUCATIONAL EMPLOYMENT RELATIONS BOARD* was established by Chapter 961/1975 to become operative January 1, 1976. The board will govern collective bargaining between public school employers (including community college districts) and public school employees, with the exception of elected officials, management, and confidential employees.

A total of \$300,000 has been appropriated for start-up costs prior to July 1, 1976 when the entire statute becomes effective.

This budget includes an additional \$1.7 million to complete the remaining subsystems of the *PERSONNEL INFORMATION MANAGEMENT SYSTEM (PIMS)* and to support the first-year operation of subsystems previously developed. The multiyear PIMS project, started in 1973, will establish an automated data system for payroll, personnel transactions, and benefits administration. PIMS is a joint effort of the State

Controller, State Personnel Board, Public Employees' Retirement System, and the California State University and Colleges. The completed system will ensure a timely and efficient response to the needs of both management and employees.

The *FAIR POLITICAL PRACTICES COMMISSION* has primary responsibility for administration of the Political Reform Act of 1974. Proposition 9 of the June, 1974 election, which is the authority for the Commission, also provided for an annual one million dollar appropriation for their support to be augmented yearly based upon increases in the consumer price index. For 1976-77 the Commission is proposing an augmentation of \$96,280 to its statutory budget allocation for a total of \$1,296,280 for its operations. Total proposed costs of Proposition

9 in 1976-77 for all departments concerned is approximately \$5 million.

EMPLOYEE COMPENSATION

The 1976-77 Budget contains a total of \$204,-372,000 for improvements in employee compensation. This amount includes sufficient funds for the equivalent of a \$65 per month salary increase for all categories of employees (with the exception of highway patrolmen) including judicial, college and university professors, professional and clerical employees. This approach is in furtherance of the objective of the Governor for closer equalization of compensation within state government. An amount equivalent to \$125 a month is included for highway patrolmen in recognition of special legislation enacted in 1974. The balance of funds in the amount of \$34.7 million is included for special salary adjustments or employee benefits.

Agriculture and Services

The *DEPARTMENT OF GENERAL SERVICES* continues to provide services at the lowest possible cost by infusing sound business practices into its operations. Improved systems and procedures have provided increased management accountability and aided the department in meeting client needs.

The department is increasing its efforts to encourage small businesses to participate in state procurement operations. Emphasis also is being placed upon greater interdepartmental cooperation in the reutilization of equipment and the use of office copiers.

The objective of the *DEPARTMENT OF INDUSTRIAL RELATIONS* is to foster, promote, and develop the welfare of California's wage earners, to improve their working conditions, and to advance their opportunities for profitable employment. An addition of 60.5 positions is proposed for the 1976-77 fiscal year to meet the net increase in workload in the department's various program areas. The Governor's Reorganization Plan No. 2 of 1975 consolidated the Divisions of Industrial Welfare and Labor Law Enforcement into a new Division of Labor Standards Enforcement to make the program more effective and efficient. This consolidation will result in a savings of \$85,000 in 1976-77, with additional savings anticipated in future years.

The Industrial Relations Unpaid Wage Fund program (established by Chapter 714/1975) permits the Labor Commissioner to collect un-

paid wages for workers who have not specifically requested collection aid and provides that all such collections will revert to the State when workers are not located within seven years.

The *DEPARTMENT OF FOOD AND AGRICULTURE* is continuing the policy established in last year's budget of relating government costs more closely to those who benefit from public expenditures. General Fund support of predatory animal damage control is being reduced, and the livestock industry will be encouraged to participate in funding the program. Similarly, General Fund support of the market news service is being reduced, and the department will explore methods of establishing user fees.

A new program display has been added to the 1976-77 fiscal year budget to present a complete picture of the department's programs, including certain activities and marketing trusts exempted from the normal budget process by Chapter 284/1970. Expenditure figures for the exempt programs are not included in the overall budget totals.

Eradication of Dutch elm disease, which threatens 1.6 million trees in California, started in August 1975, with funding provided by Chapter 1000/1975. In addition, the department's emergency fund resources are being used for 1975-76, and \$670,000 of the Chapter 1000 appropriation is being reallocated to provide funds for the 1976-77 eradication effort.

General Fund savings of \$2.8 million will re-

sult, in 1976-77, from federal takeover of most meat inspection activities formerly performed by California under a federal-state cooperative agreement. There will be no reduction in consumer protection quality.

The 11-member *CALIFORNIA PUBLIC BROADCASTING COMMISSION* was established by Chapter 1227/1975. The commission's objective is to develop and support a statewide policy encouraging the orderly growth and development of public radio and television services that respond to the needs of California's citizens. Three positions are included in the budget for administrative support to the commission. Full support requirements for the 1976-77 fiscal year are estimated at \$130,000.

DEPARTMENT OF CONSUMER AFFAIRS. Legislation enacted during the special session on Medical Malpractices (1) extensively reorganizes and renames the Board of Medical Examiners to the Board of Medical Quality Assurance, (2) increases powers of the board's disciplinary committees, (3) adds provisions pertaining to the continuing education of physicians, (4) revises requirements pertaining to the reporting of judgments and settlements against healing-arts licensees, and (5) authorizes the board to increase fees to support implementation of the above provisions within the Board of Medical Quality Assurance. In order to implement the above requirements, the board's budget was increased \$1,045,426 in the current year and \$1,500,000 in the 1976-77 fiscal year.

The primary objective of the *Division of Consumer Services* is to assist in the representation of consumer interests at the local, state, and federal levels. A \$400,000 budget augmentation in the current and budget year will enable the division to implement a more effective consumer-oriented program. Of the augmentation amount in 1976-77, \$50,000 is from the General Fund making this the initial support from the General Fund for this program.

The *Board of Registered Construction Inspectors* is discontinuing operations in the current year due to inadequate revenue for its support. Legislation will be introduced to repeal the board's enabling legislation and to provide funds to effect the board's closure.

The primary change in the 1976-77 fiscal year budget for the *DEPARTMENT OF VETERANS AFFAIRS* is elimination of the program providing educational assistance to veterans. This reduction of \$2.5 million was made possible by recent federal legislation which increased GI Bill educational benefits.

Another departmental change will be in the Cal-Vet home loan program. Effective January 1, 1976, the maximum home loan will be increased from the current \$25,000 limit to \$30,000 and, in certain cases, \$35,000.

The *PUBLIC EMPLOYEES' RETIREMENT SYSTEM (PERS)* is ready to schedule its long-overdue PERS System Redesign Project. The project is planned for three years and is composed of 15 subsystems. Twelve positions are being added in the current year and 17 in the 1976-77 fiscal year. These positions will enable PERS to develop the various planning documents needed to determine the number of positions and the level of funding needed for the project.

The 1976-77 fiscal year budget for the *FRANCHISE TAX BOARD* includes \$148,246 for additional auditor positions in the New York City and Chicago offices to increase the number of audits conducted in the out-of-state field audit program. Adding these positions will produce \$1.5 million in additional annual revenue, by conservative estimate.

Under the Political Reform Act of 1974 (Proposition 9), the board is responsible for making audits and field investigations of reports and statements that have been filed with the Secretary of State. This budget includes an additional \$713,019 to provide full-year funding for this function.

Business and Transportation

Every California resident and visitor benefits directly from the State's interest in (1) promoting a sound financial and business community while protecting the public from economic loss and illegal or unethical business practices and (2) providing efficient, rapid, and safe movement of people and goods. These two broad areas are the primary concerns of the Business and Transportation Agency.

BUSINESS

Budgets of the business regulatory departments will provide sufficient resources for all these departments to meet their regulatory responsibilities during the 1976-77 fiscal year. Shifts in emphasis have been made in some departments to cope with the uncertain business outlook, the continued high rate of inflation, and the economic slowdown, as well as the Administration's express interest in fair lending practices, migrant housing, and job development.

The *DEPARTMENT OF ALCOHOL BEVERAGE CONTROL* has the primary function of enforcing the state liquor laws. The department will make a systems analysis and study of its licensing work methods to determine whether there is any need to update or improve its internal control mechanisms. A formal plan of reorganization will be submitted to merge this department's constitutionally established programs with the Office of Alcohol Program Management within the Health and Welfare Agency.

The number of banks, bank branches, and trust offices licensed by the *STATE BANKING DEPARTMENT* is increasing at a slower pace than in years past. However, the effects of economic conditions on these institutions has caused a significant increase in the department's work load, particularly for the examination and legal staff. The market analysis function has been increased by two positions to improve the ability to anticipate and respond to changing conditions. The budget increase will enable the department to meet the statutory requirement for annual examinations of state chartered banks.

The budget request of the *CALIFORNIA JOB CREATION PROGRAM BOARD* reflects a growing concern for expanded market participation by minority-owned firms. The objective is to increase opportunities for minority enterprise to maintain and expand a share of markets, centering on the procurement potential in state government and the private sector. The existing Loan Guarantee program will be de-emphasized during the 1976-77 fiscal year in favor of greater leverage for state guarantee dollars. A formal plan of reorganization will be submitted, transferring all existing Cal Job authorities and programs to the Department of General Services.

The *DEPARTMENT OF CORPORATIONS* has had to increase its enforcement activity in suspected violations or evasions of the

Corporate Securities Law, as well as to expand its efforts to recoup investor losses by pursuing civil remedies. Additionally, enactment of the Knox-Keene Health Care Service Plan Act of 1975 gave the department principal and primary regulatory authority over the state's prepaid health plans. The 1976-77 budget reflects the staff required to implement this considerably expanded regulatory responsibility.

The functions of the *DEPARTMENT OF HOUSING AND COMMUNITY DEVELOPMENT* were significantly expanded by enactment of the Zenovich-Moscone-Chacon Housing and Home Finance Act of 1975. The department's responsibilities and authority have been expanded in the area of rural development, State Housing Plan, technical assistance to local government, and economic development. The department continues its responsibilities for the regulation of mobile home and recreational vehicle construction, as well as for enforcement of the Mobile Home Parks Act. In conjunction with the Departments of Health and Industrial Relations, the Department of Housing and Community Development has included 12.5 man years for the enforcement of the Employee Housing Act.

Inflation, increased claims experience, investment losses, and high interest rates continue to have an adverse effect on the reserves and assets of many insurance companies, particularly those writing casualty insurance. The *DEPARTMENT OF INSURANCE* continues to involve itself in crises of medical malpractice, other professional liability lines, and automobile liability, as well as alarming trends in municipal liability insurance. Increasing surveillance of these companies has been necessary to detect events or conditions which could lead to insolvency.

In the *DEPARTMENT OF REAL ESTATE*, subdivision activity has showed signs of improvement. Regulatory activity has continued to increase but has been absorbed by inter-departmental efficiencies. The department has intensified its consumer protection activities substantially, particularly in the area of condominiums. No significant budgetary increase was necessary to achieve this objective.

The appreciable increases in the *DEPARTMENT OF SAVINGS AND LOAN* budget for the 1976-77 fiscal year are the result of asset

growth, increased examination work load, emphasis on retrieving unclaimed property, and attention to significant consumer protection programs such as response to redlining, disclosure of information, and complaint handling. Considerable attention has been focused on increasing the department's market analysis and surveillance functions to keep in step with the dynamics of changing conditions in today's financial markets.

Legislation establishing the *CALIFORNIA HOUSING FINANCE AGENCY* became effective with enactment of the Zenovich-Moscone-Chacon Housing and Home Finance Act of 1975. The principal function of the agency will be to sell tax-exempt bonds and use the proceeds to finance housing development and rehabilitation of existing housing units with low-interest loans. The agency functions as a source of mortgage capital and also must fulfill its mandated social role of responding to the housing needs of low- and moderate-income groups.

TRANSPORTATION

The overall goal of the *DEPARTMENT OF TRANSPORTATION* is to provide a safe and efficient transportation system that permits free flow of people and goods in all essential areas. The system is vital to such activities as jobs, education, shopping, recreation, and medical services. It also must be compatible with California's economic and environmental objectives. The department continues to work toward this goal, but the realities of a limited revenue base have forced modification of complicated past planning practices and program directions.

The 1976-77 fiscal year budget begins a new era in California transportation. Although large by any standard, the budget has to absorb the impact of inflation which has seriously eroded the purchasing power of the dollar during the last few years. Revenues also are substantially lower than prior projections, and an increased amount of money is required to maintain an aging and expanding highway network.

These facts will not end a progressive California transportation program but they do signal a practical limit to available capital resources. Emphasis, therefore, will shift from constructing new highways to concentrating on making full-

est use of existing facilities. New construction will be limited to the operational integrity of the existing system. Projects will be examined not only from the traditional standpoint of movement of people and goods but also for their impact in such broad areas as energy conservation, growth, land use and transportation relationships, equalization of transportation opportunity, and housing.

The department is engaged in developing a comprehensive multimodal plan involving all levels of government and the private sector. The California Transportation Plan is to be submitted to the State Transportation Board early in the 1976-77 fiscal year.

The 1976-77 fiscal year budget for the *Division of Transportation Planning* proposes a 25 percent reduction (a 111 man-year decrease and an approximate \$4.2 million reduction in funding). This reduction anticipates submission of the California Transportation Plan to the board by July 1, 1976, or soon thereafter. Funds provided should allow for planning maintenance and for updating the plan periodically. It is deemed appropriate that the Legislature review and respond to the plan in advance of additional planning effort.

The 1976-77 fiscal year budget for the *Division of Mass Transportation* includes \$10 million for project costs attributable to Chapter 1130/1975, which appropriated \$18.9 million from the Transportation Planning and Research Account for the period 1975-76 to 1978-79 for a variety of transportation-oriented projects. This division will administer the bulk of these funds.

The commitment to new directions in this transportation budget is characterized by (1) making the fullest use of existing transportation systems, (2) preserving and rehabilitating existing systems, (3) redirecting and reducing the planning program with emphasis on optimum use of existing transportation resources, and (4) re-evaluating the aeronautics programs in terms of regulatory roles versus airport development and promotion.

The *DEPARTMENT OF THE CALIFORNIA HIGHWAY PATROL* is responsible for assuring the safe, lawful, rapid, and economical use of the state highway system. The primary objectives are to minimize death, injury, and property loss from traffic accidents, to minimize

traffic delays, and to provide protection and assistance to the motoring public. The department also seeks to protect the public from the operation of unsafe vehicles, from vehicle theft, and from the environmental blight of abandoned/public nuisance vehicles. To meet these responsibilities, a support budget of more than \$190 million, along with capital outlay of \$2.6 million, is proposed for the 1976-77 fiscal year.

The budget for 1976-77 reflects adjustments to match program benefits with program costs. The significant adjustments are as follows:

1. Reduction of 180 man-years through attrition by not accepting new cadets at the Highway Patrol Academy.
2. Funding of the Vehicle Theft Program with state funds only, due to expiration of the current Federal grant.
3. Purchase of 200 radar units to provide a new enforcement tool.

The department's capital outlay budget includes funds to purchase facilities currently leased at Bridgeport, Indio, and Victorville. The department can continue to update the statewide communication system with a proposed expenditure of more than \$980,000.

It is estimated that during the budget year the *DEPARTMENT OF MOTOR VEHICLES* will register and collect fees on 16,841,000 vehicles and maintain the records of 14,316,000 outstanding drivers licenses, including the processing of 827,000 original licenses and 3,216,000 renewal licenses. These major workload indicators reflect an estimated 0.64 percent increase in vehicle registration and an estimated 3.25 percent increase in outstanding drivers licenses in the 1976-77 fiscal year over the current year.

If the results of a feasibility study are favorable, the department will explore, with the support of a Federal grant, the use of administrative adjudication of traffic citations. If effective, this program will relieve the state court system of much of its traffic case burden.

In the capital outlay budget, construction funds are included for office buildings at Simi Valley/Thousand Oaks and Capitola (Santa Cruz). Funds are also provided to purchase leased facilities at Turlock and Hollister.

The *OFFICE OF TRAFFIC SAFETY* provides leadership, planning, and guidance to coordinate efforts to solve the problem of traffic

safety. This office, which is fully supported by federal funds, annually updates a comprehensive statewide plan to coordinate the activities of public and private agencies involved in traffic safety. The office also reviews and approves National Highway Safety Act project grants to state, local, and private agencies in California.

The overall traffic safety program in California is proving to be effective. This is the result of (1) increased freeway construction and increased travel on freeways, with a corresponding reduction in conventional highway (nonfreeway) miles, (2) increased use of improved median barriers, guard rails, and signs and lamp posts of breakaway design, (3) increased state and local traffic enforcement (including apprehension of drinking drivers), (4) use of safety equipment as required by the Motor Vehicle Safety Act of 1966 (such as seat belts, shoulder harness, collapsible steering, and improved safety glass and vehicle body construction), (5) driver improvement programs, and (6) educational and public information efforts.

The *STEPHEN P. TEALE CONSOLIDATED DATA CENTER* was established in response to legislation which mandated the centralization of state computer facilities. Through centralizing all electronic data processing, the center is beginning to provide efficiency and economy to users of computing services.

The center incorporates a large-scale computing facility with remotely located satellite mini-processors of varying size and capability. The main objective is to make available to each user the portion of a computer required to effectively process that organization's data and applications. Thus the consolidated center becomes available to the largest or smallest user at a price compatible with its requirements.

During the 1975-76 fiscal year a billing system for services is being implemented. As in the past, customer departments will transfer funds budgeted to finance interagency agreements. In the event charges computed under the billing system are less than funds transferred, departments will receive a credit against billings during 1976-77.

Resources

The Resources Agency programs are directly concerned with protecting, preserving, enhancing, and developing the state's environmental wealth for the benefit of all Californians. Programs funded range from those designed to attain and maintain desirable standards of air and water purity, to forest fire fighting, forest management, flood control, water development, oil drilling regulation, and the creation of recreational opportunities.

The Resources Agency, under the direction of the Resources Agency Secretary, is composed of the Departments of Water Resources, Parks and Recreation, Conservation, Fish and Game, Navigation and Ocean Development, Reclamation Board, Air Resources Board, Solid Waste Management Board, State Water Resources Control Board, San Francisco Bay Conservation and Development Commission, State Energy Resources Conservation and Development Commission, and the Colorado River Board.

The budget proposes the establishment of the *CALIFORNIA CONSERVATION CORPS* within the Resources Agency. This corps will be a successor to the existing Ecology Corps which has been operating within the Department of Conservation and the Youth Conservation Corps which has been under the Department of Parks and Recreation. The new corps will not only provide the traditional conservation services of the present Ecology Corps but will expand its programs to provide services in both

urban and rural areas, including health and social services.

A total of \$9.3 million from the General Fund is proposed for this new program in the 1976-77 fiscal year. It is expected that from 1,000 to 1,200 young men and women will be employed during the first year of operation.

A brief description of highlights of the 1976-77 fiscal year budget for some of the departments in the Resources Agency follows.

The *AIR RESOURCES BOARD* is charged with establishing motor vehicle emission standards and ambient air quality standards for the state, and is responsible for achieving those standards.

The board forms a close relationship with local air pollution control agencies to curtail air pollution in California. The board also controls motor vehicle emissions statewide and coordinates state and local programs to control stationary sources of emissions.

The 1976-77 fiscal year budget reflects an increased emphasis on enforcement, primarily stationary emission regulations. The proposed increase in the enforcement effort provides for continuous monitoring of in-stack emissions, inspection of stationary source operations without prior notice, and the review of applications to construct or modify sources of emissions. An increased effort will be devoted to certification and testing of gasoline vapor recovery systems, in accordance with Chapter 1042/1975, along

with an increased effort to evaluate emission control systems of 1978 vehicles.

Responsibility for control of stationary sources lies primarily with the local air pollution control districts, with the board having approval jurisdiction over their plans for implementation. To ensure the effectiveness of local air pollution control efforts, \$4.3 million will be provided in 1976-77 to assist local agencies in these efforts.

The research budget is proposed at the same level as the current year, approximately \$3.8 million. The primary objectives are to explore the effects of air pollution and to evaluate and develop control measures.

A moderate Strategy Planning and Testing increase is proposed to revise current pollution strategies and to test and coordinate new control strategies, specifically to study the catalyst "storage" phenomenon, to develop a sulfate emission surveillance program, and to develop air quality models.

Emissions from motor vehicles are a major source of air pollution. To control these emissions a substantial budget increase is proposed in 1976-77. This will consist of adding 23 vehicle inspection test facilities for a total of 25. These facilities will be located primarily in the South Coast Air Basin. This activity will be funded through a loan from the Motor Vehicle Account, State Transportation Fund.

The total air pollution control program cost for the 1976-77 fiscal year is \$40.8 million including the \$4.3 million to provide financial assistance to local air pollution control districts. Of this total amount, an estimated \$18.9 million for the mandatory vehicle inspection program is scheduled to be repaid at a future date by fees charged for the inspection.

The principal goals of the *DEPARTMENT OF CONSERVATION* are the protection, conservation, and development of California's natural assets—its forests (both commercial timber and wild land), watersheds, and rangelands, its mineral deposits and soil resources. Protection of life, property, and resources from fire and geologic hazards is stressed.

The Watershed and Fire Protection program is managed by the *Division of Forestry*. Within this division certain economies and program redirection are proposed for the 1976-77 fiscal year that result in a net savings of \$505,000. Specifically, five 2-engine fire stations are to be

reduced to 1-engine stations, one lookout is to be eliminated, and seasonal cooks are to be reduced to a level which will provide service for only the peak fire season and special winter training needs. A portion of the savings is to be redirected to strengthen fire-prevention efforts.

In the past emergency fire suppression services required an Emergency Fund augmentation of \$4 to \$6 million annually. For 1976-77 it is proposed to include a \$5 million appropriation in their base budget subject to allocation by the Department of Finance for fire emergencies.

The Forest Practice Act of 1973 established a new Board of Forestry and mandated new logging procedures and more concise inspection reporting procedures. The program implementing this act was fully instituted during 1975-76. It is proposed that 25 percent (\$500,000) of the cost be funded by reimbursements from the forest products industries. This amount is felt to represent an equitable share of the cost of administering the program.

The Geologic Hazards and Mineral Resources Conservation program is managed by the *Division of Mines and Geology*. The budget provides for a continuation of the current program level for this division.

The Oil, Gas, and Geothermal Protection program is managed by the *Division of Oil and Gas*. Chapter 1049/1975 provides for funding this program from the General Fund, with the oil and gas industry continuing to support the cost through fees deposited as revenue to the General Fund. In 1976-77 an increase of \$500,000 is proposed to provide means to properly abandon hazardous derelict oil wells. Many of these wells were drilled prior to the existence of the Division of Oil and Gas.

The department's budget contains \$83.2 million in state funds for all programs in 1976-77 including approximately \$1.9 million for Capital Outlay projects. These projects are primarily for replacement of fire stations.

This budget proposes the termination of the *COLORADO RIVER BOARD* as a state funded agency. This board has represented the interests of six California public agencies with rights to Colorado River water, a function properly considered to be more of a regional nature rather than a state responsibility. The broader state interests in regard to the Colorado River are proposed to be represented by the Department

of Water Resources.

The *ENERGY RESOURCES CONSERVATION AND DEVELOPMENT COMMISSION* was established in 1975 to ensure continuation of a reliable supply of energy for California at a level consistent with the state's needs.

During the 1976-77 fiscal year the commission's principle objectives are: (1) to forecast and analyze the effects, growth, and distribution of the energy demand in California and the resources to meet this demand; (2) to process an estimated five Notices of Intent and Applications for Certification of electrical generating facilities; (3) to promote more efficient use of energy in buildings, appliances, utility and industrial processes, and in transportation through development of standards and other conservation measures; and (4) to carry out a program of research, development, and demonstration in energy sources, supply, consumption, and facility siting to make available new and useful energy systems and technologies.

Also, on January 1, 1977, and every two years thereafter, the commission is required to submit to the Governor and the Legislature a comprehensive report designed to identify emerging trends related to energy supply, demand, conservation, and public health and safety factors. This report will provide the basis for state policies and actions relating to energy.

To meet continuing program costs, \$13.6 million is provided for the commission, of which \$5.9 million will be expended in the research and development effort. The work is principally funded through a surcharge on electrical energy consumption in California.

The *DEPARTMENT OF FISH AND GAME*'s purpose is to perpetuate and enhance our fish and wildlife resources for the use and enjoyment of all California citizens. To meet this objective the department proposes a budget of \$29.7 million for the 1976-77 fiscal year to operate its six programs: enforcement of fish and game laws and regulations, wildlife, inland fisheries, anadromous fisheries, marine resources, and environmental services.

In 1976-77 the department proposes a program at substantially the same level as the 1975-76 fiscal year. Increased operating costs have caused a serious strain on the Fish and Game Preservation Fund. Estimated revenue of \$27.7

million in 1976-77 from fishing and hunting license fees is not sufficient to maintain the current program. This budget proposes that \$1 million from the California Environmental Protection Program Fund be used to support a portion of those programs in the department which are devoted to environmental protection and management of nongame species. It is also proposed that \$1.5 million from the General Fund be used to meet the cost of the balance of these nongame activities. This will provide adequate funds for the department to maintain its current level of activity.

Within the Environmental Services program the department will initiate an evaluation of the review currently being given land and water projects to determine the program's effectiveness in protecting fish and wildlife.

The *STATE LANDS DIVISION* administers policies established by the Legislature and the State Lands Commission in managing more than four million acres of school lands, swamp and overflow lands, lands underlying navigable rivers and lakes, and other sovereign lands belonging to the State. Primary objectives established by the Legislature and implemented by the commission include (1) comprehensive land-use planning; (2) location of the precise boundaries of tide, submerged, and other land acres; (3) effective development of oil, gas, geothermal, and other mineral resources on state owned lands; (4) surveillance necessary for effective management and title protection of these lands; and (5) maintenance of records on the acquisition, disposition, and uses of the lands.

The Extractive Development, State Leases program, which accounts for about one-fourth of the approximately \$5.6 million 1976-77 fiscal year budget, involves leasing land for oil, gas, geothermal, and other mineral extraction purposes and for monitoring such leases to assure that environmental and property considerations are respected. During the last three years this program has generated more than \$74 million in revenue for the State.

The Extractive Development, Long Beach Operations program, which also uses about one-quarter of the proposed budget, involves monitoring the State's interest in the Long Beach oil and gas field. This program has accounted for about \$276 million in state revenue during the past three years.

The division's third program, Other Land Operations, is responsible for determining property ownership and for general land management not included in the other two programs. This program's responsibility was recently increased by passage of Chapter 706/1975, which allocated \$260,000 during the 1975-76 fiscal year to expand division operations on ungranted tidelands. For 1976-77, \$325,000 is budgeted for this program. In addition, \$210,000 has been provided for gathering tide datums in conjunction with a similar federal program effort along the California coast.

The objectives of the *DEPARTMENT OF NAVIGATION AND OCEAN DEVELOPMENT* are to develop and improve the waterways and boating facilities of the state, to promote safety of persons and property connected with the operation of vessels in state waters, to license yacht and ship brokers and salesmen, and to conduct a beach erosion program in cooperation with the federal government and agencies of local government. In the 1976-77 fiscal year the budget provides slightly more than \$15 million to meet these objectives.

The Boating Facilities program comprises over 80 percent of the department's budget. For the 1976-77 fiscal year, grant funds are proposed for seventeen new launching facilities in various counties throughout the state. In addition, small craft harbor construction loans are planned for Benicia, Foster City, Oyster Point, Humboldt Bay, Pittsburg, Richmond, Port of Oakland, Port San Luis Obispo, and Long Beach.

Slight increases in staff are proposed for the Boating Facilities program to meet increased workload and to monitor completed projects to ensure their proper operation and maintenance. Also, \$35,000 is proposed for a contract to develop a fluidization pipe system which would assist in clearing and maintaining launching ramps subject to siltation.

The Boating Safety and Regulation program promotes uniform boating law enforcement. Under this program financial aid will be provided to 29 counties and the Department of Parks and Recreation. Although the rate of boating accidents on a per capita basis is decreasing, education of the boating public on safe boating practices continues. Educational activities consist of developing and disseminating boating

safety literature and boating safety research, and coordination of the State's safety and regulation program with organizations concerned with boating safety enforcement. The 1976-77 budget proposes additional work on the problem of white-water boating fatalities and in providing assistance in the training of local boating law enforcement officers.

The *DEPARTMENT OF PARKS AND RECREATION* budget provides for expenditures of \$85.4 million during the 1976-77 fiscal year for support and local assistance plus \$15.1 million for capital outlay.

The major activity of the department is to develop and operate the State Park System, which is expected to attract 51 million visitors in 1976-77. The department is changing emphasis to acquire, develop, and operate parks nearer the urban areas to meet the recreational needs of California's ever-increasing population, which has resulted in accelerated urbanization. While 85 percent of the state's population is urban, these areas contain only 36 percent of the department's total units. Major emphasis will be placed on reducing this disparity.

In 1976-77, \$2.7 million is proposed for workload increases related to operation of the State Park System. The largest items provide additional staffing and operating expenses at Hollister Hills, Lake Perris, Bolsa Chica, San Onofre, and El Capitan State Beach. A total of 35 units will be opened or expanded, requiring an additional 173.1 man-years. In addition the budget proposes \$1.3 million in minor capital outlay projects and an increase of \$72,000 for water replenishment at Lake Elsinore State Recreation Area, both of which are funded from the Collier Park Preservation Fund.

In order to help offset the increased costs of operating the State Park System campsite and day-use fees are proposed to be increased by 50 percent. This fee increase will result in approximately \$3.5 million in added General Fund Revenue during the 1976-77 fiscal year.

In 1976-77 the department plans to continue development of recreation facilities at state water projects and to acquire, plan, and develop beach and park units. The total capital outlay budget is \$15.1 million, which includes \$1.7 million in previously authorized expenditures. New appropriations requested include \$6.6 million from the 1974 State Beach, Park, Recreational

and Historical Facilities Fund for major developments throughout the state; \$5.2 million from the Collier Park Preservation Fund for major acquisitions; and \$1.6 million in planning and statewide programs funded from various sources.

The local assistance budget of the department contains \$13 million from the allocation of \$90 million authorized by the 1974 Bond Act program and \$800,000 from the Off-Highway Vehicle Fund. Actions taken by the 1975 Legislature and proposals made in this budget will have appropriated \$78 million of the authorized funds, based on requests received from local agencies.

A new item of expenditure includes \$25,000,000 for a program to assist various local jurisdictions in the acquisition and development of parks and other public recreation areas in or near the urban areas of California. It is the intent of this new program that such areas become the operational responsibility of the local jurisdiction.

The *CALIFORNIA EXPOSITION AND STATE FAIR*, although budgeted separately, is operated as a unit of the Department of Parks and Recreation. The 1976-77 budget provides for a slight increase for maintenance and special events at the State Fair, the cost of which will be offset by anticipated increases in admissions revenue.

The *SOLID WASTE MANAGEMENT BOARD* has the basic responsibility to establish and maintain a comprehensive state solid waste management and resources recovery program. Program objectives are to manage solid wastes so as to protect the public health, safety, and well-being, to preserve the environment, and to provide for the maximum reutilization and conversion to other uses of the resources contained in the waste products. Statewide standards, guidelines, and policies relating to solid waste management have been adopted, as was a statewide resources recovery program.

The 1976-77 budget is proposed with no increase to the current level of service; however, the budget reflects a shift in emphasis from review of county solid waste management plans to the resources recovery implementation effort.

The primary objective of the *DEPARTMENT OF WATER RESOURCES* continues to be maximum beneficial use of California's

water resources consistent with a public concern for the environment.

In the past few years the department has redirected its programs to emphasize the following four areas: (1) identifying alternative sources of supplemental water supplies, including ground-water recharge; (2) enhancement of environmental resources through water management; (3) development of criteria for assessing the impact of water projects on the environment; and (4) improvement of the quality of water. This emphasis continues in the budget proposal for the 1976-77 fiscal year, with the addition of the development over the next two years of a Water Management Plan for the revision of the Water Management element of the California Water Plan, envisioned to be a specific design or road map for the future. In this plan, emphasis will be given to alternatives such as conservation, pricing, waste-water reclamation, and conjunctive use of groundwater basins in lieu of additional surface water development.

Although the construction of the initial stage of the State Water Project is complete, several facilities still remain to be developed. In addition, there are ongoing design and construction activities to correct deficiencies uncovered during operational testing, modifications to original designs, and planning design and construction of phased facilities. The 1976-77 budget proposal reflects the delay of any sort of Delta facility for at least two years, during which time the department will study all viable alternatives to the Peripheral Canal. This study will result in a recommendation to the Governor of an action plan, including timing and staging of such project facilities as may be recommended. Funds for repayment of the principal and interest on the outstanding general obligation and revenue bonds continue to be the largest item in the State Water Project budget.

The department will continue to administer the Public Safety and Prevention of Damage program which contributes the state's share of approved flood control projects constructed by the federal government by reimbursing local agencies for acquiring lands, easements, and rights-of-way for these authorized flood control projects. Within this program, the 1976-77 budget proposes to transfer the support staff and functions of the *RECLAMATION BOARD* to the department, at a savings to the General

Fund of approximately \$127,000. The department will also meet its statutory responsibilities for the safety of dams within the state.

The objectives and responsibilities of the *STATE WATER RESOURCES CONTROL BOARD* and the nine regional water quality control boards are to preserve and enhance the quality and to provide for the conservation and effective utilization of state water resources. These objectives are achieved by two action programs: water quality and water rights.

Passage of the Porter-Cologne Water Quality Control Act, voter approval of the Clean Water Bond Laws of 1970 and 1974, congressional passage of the federal Water Pollution Control Act amendments of 1972, and increased interest by citizen groups at all levels of government continue to expand the responsibility and work load of the board. The Porter-Cologne Water Quality Control Act, which became operative on January 1, 1970, was the first major overhaul of California's water quality control law in 20 years and is regarded as the toughest water quality control law in the nation.

The budget proposal for the 1976-77 fiscal year represents the required resources to accommodate rapidly expanding workload requirements generated by recent state and federal water quality legislation. An additional \$65 million from the State Clean Water Bond Fund will be allocated to local communities for assistance in the construction of waste-water treatment facilities. Allocation of federal, local, and state funds for facilities construction in 1976-77 will total approximately \$1 billion.

Under the provisions of Chapter 804/1974, the board will continue to accelerate administration of grant applications in order to produce a

substantial savings in inflationary construction costs and to more quickly upgrade the quality of the state's waters. This increase will be funded from the State Clean Water Grants Administration Revolving Fund, which was created by Chapter 804 and is a nongovernmental cost fund.

The objective of the Water Quality program is to end water pollution and to achieve and maintain the highest possible quality of California water consistent with the variety of its uses. To achieve this objective, the board must formulate and adopt water control plans and policies which will: provide guidance for water management decisions; require of waste dischargers those actions necessary to prevent and abate water pollution, inspect discharges to determine compliance with requirements, and carry out enforcement actions to obtain full compliance; review applications for federal and state financial assistance for the construction of waste-water treatment facilities; and define and develop solutions to special water quality problems in California. Because the number of dischargers operating under state permit has increased, a moderate increase in staff is proposed to keep abreast of work-load increases in surveillance, monitoring, and enforcement.

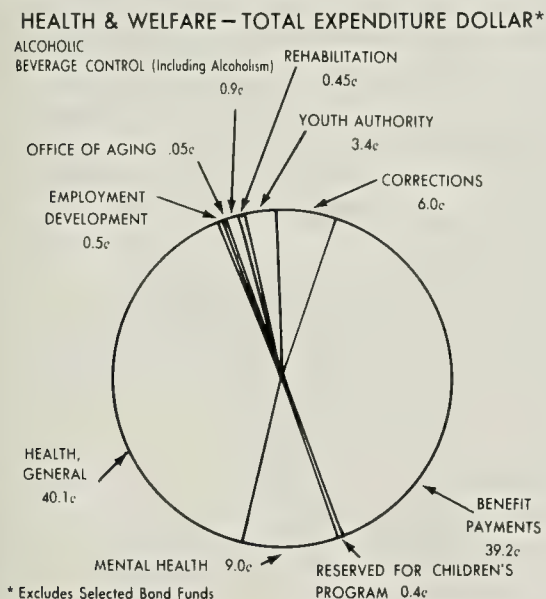

Objectives of the Water Rights program are: to obtain the greatest beneficial use of waters of the state, to administer appropriate laws to prevent waste and unreasonable use of water, to provide assistance to the courts in determining water rights, and to maintain records of water diversion and use throughout the state. An increase in staff is proposed for this program in order to reduce the period required to obtain a water rights permit.

Health and Welfare

The lives of all Californians are affected daily through the services and programs administered by the Health and Welfare Agency and its departments. A central concern of the related state, county, and federal operations is the well-being of every resident. Federal and State funds in excess of \$10 billion flow through these people-oriented programs. The total is second only to education in the size of State expenditures.

Aggressive efforts are underway to channel forces and make better use of scarce resources to meet the health and welfare needs of the state's population. Aggregate expenditures and the most significant redirections are described here.

ALCOHOLISM is a problem of increasing concern. In the past, two separate state organizations have had responsibility in the area of alcohol-related problems. The Department of Alcoholic Beverage Control (ABC) has performed a regulatory function, while the State Office of Alcoholism (OA) has administered community services. In light of the serious nature of alcoholism, consolidation and redirection of the state's focus, energy, and resources are mandatory. Therefore, under the provisions of a Governor's Reorganization Plan soon to be submitted to the Legislature, the OA will be merged with the ABC. Since the control of alcoholism and alcohol abuse is primarily a health problem, the Department of Alcoholic Beverage Control will be relocated within the Health and Welfare Agency.

ABC will continue to exercise its control function, but the emphasis will shift from regulation of the liquor industry to protection of the people. For example, Section 23001 of the Business and Professions Code (the ABC Act of 1933) specifically requires the department to promote temperance. Until now ABC has done little to support this statutory mandate.

Reorganization alone will not cause the rate of alcohol abuse to stabilize or decline. However, consolidation of ABC and OA offers a more rational and consistent approach and can reasonably be expected to achieve responsible attitudes toward the use of alcohol and to minimize the tragic effects of alcohol abuse on the individual and the community.

A budget total of \$37,249,459 in federal and

state expenditures is being proposed to fund this consolidated department in fiscal year 1976-77. By merging state forces and redirecting available resources, a substantial effort can be made without the need for increased taxes.

Publicly subsidized *CHILDREN'S SERVICES* are an area of growing concern. Costs have risen 150 percent since 1969-70 and now average \$2,625 per child for a standard day-care year. The \$102 million currently budgeted for child care provides services to only 72,000 children. According to recent studies, publicly subsidized day care costs twice as much as nonsubsidized day care in California, yet program quality does not appear to vary significantly.

Two major objectives of child care should be (1) to aid economically dependent families attain self-sufficiency and (2) to enhance the development of economically disadvantaged children. Present programs appear to have only minor impact in these areas, which signals a need to assess the merits of a new course. For 1976-77, \$10 million has been added to the \$4,448,000 in the Health and Welfare Agency budget for Special Assistance for Children's Programs.

California has a *RURAL AND MIGRANT* population of nearly two million persons. Several departments have provided programs and services impacting on rural areas, but no single agency has had leadership responsibility. Duplication, overlap, and gaps in service have resulted. In order to coordinate efforts and focus new energy on this population, the Governor has designated the Health and Welfare Agency to take the lead in all state activities related to rural and migrant affairs. Although the numbers are preliminary, this new emphasis will supply coordinated effort for services in excess of \$400 million.

Health Services

The *DEPARTMENT OF HEALTH* is a consolidation of the duties, powers, purposes, responsibilities, and jurisdiction of the former Departments of Mental Hygiene, Health Care Services, Public Health, and the social services functions of the Department of Social Welfare.

It provides a broad range of services that affect the health and well-being of all the people

of California. Services include: prevention and control of disease and disability; control of environmental health hazards; assurance of high-quality health services through inspection and licensing; comprehensive planning for optimum use of health resources; coordination of direct treatment programs for the developmentally disabled, the mentally ill, and drug and alcohol abusers; provision of social services to economically and socially deprived citizens; and administration of the Medical Assistance Program (Medi-Cal).

The department is exploring alternative systems to improve the delivery of health services. Current emphasis is being placed upon providing needed services to citizens who have been traditionally underserved, such as farm workers, American Indians, children from low-income families, senior citizens, and persons affected by unique genetic diseases.

The major goals of the department are to:

- Identify health needs and develop programs to meet them, giving consideration to relative priorities and effectiveness.
- Promote an environment that will contribute to human health and well-being.
- Assure the availability of comprehensive health services for all Californians, utilizing both public and private health resources.
- Assure that quality standards for health programs and services are established and maintained.
- Assist in coordinating the activities of health agencies—state and local, public and private—along with medical schools, hospitals, and private practitioners, in providing health services.
- Promote the development of new knowledge concerning the causes and cures of illness and the means of delivering health services to the public.
- Help all California citizens understand the essentials of positive personal health and the effective use of available health services.
- Provide maximum protection of the general public health environment.

The department maintains several programs to support these goals.

The *MENTAL DISABILITIES* program is responsible for management of state and federal resources expended through the community

mental health programs in every county. The program provides a wide range of services, including crisis intervention, inpatient and outpatient care, state hospital services, and in-home supportive services to the mentally ill. To accomplish essential operations, \$317,184,500 in funds from all sources is proposed for 1976-77.

There are an estimated 290,000 developmentally disabled children and adults in California. The *DEVELOPMENTAL DISABILITIES* program provides services to assist these persons to attain their full potential. A major program emphasis is the prevention of these disabilities through early screening and genetic counseling. For those who are affected, every effort is made to develop each individual to his maximum potential, to increase his capacity to adapt to normal community living, and to maintain his health and well-being. A budget total of \$235,720,481 is proposed to maintain the total program. Of this, \$498,000 is budgeted from the General Fund to augment the current federally funded foster grandparent program.

The *DRUG ABUSE* program provides assistance to counties and local agencies in the development, implementation, coordination, and funding of community-based drug prevention, treatment, and rehabilitation programs. Approximately 22,900 clients are being treated. The program also reviews, approves, monitors, and evaluates the use of methadone in the treatment of narcotic addiction. State and federal funds totalling \$26,032,859 are included in this budget to provide these services. The Health and Welfare Agency is currently considering alternative actions to consolidate at the Agency level the operations of the Department of Health, Substance Abuse Branch and the State Office of Narcotics and Drug Abuse.

MEDI-CAL provides the full range of health care for some 2.6 million low-income Californians. Included are cash grant welfare recipients who qualify for any of the four classifications of categorical aid. These are old age security, aid to the blind, aid to the totally disabled, and Aid to Families with Dependent Children. Also served are persons who do not receive welfare assistance but who qualify for Medi-Cal as either medically needy or medically indigent, including persons whose income and/or resources exceed specified maintenance levels but are insufficient to meet health-care needs.

Three significant changes will occur in Medi-Cal during the 1975-76 fiscal year. First, the Institute for Medical Service will replace the Prepaid Health Plan Program and introduce changes centered around consumer involvement and a systematic monitoring of plans to assure a stable and effective program. Second, a pilot project on volume purchases of health-care commodities on a competitive bid basis from manufacturers will be implemented, with a potential for saving up to \$1,250,000 a month. Third, monitoring of drug utilization will be expanded statewide through a post-audit of prescriptions. Total expenditures for this program in 1976-77 are estimated to be \$2,226,086,713.

More than 50,000 children receive *CRIPPLED CHILDREN SERVICES* from private and public providers who meet quality standards. The services are available throughout the state in cooperation with county health departments. The program provides high-quality, comprehensive medical and related services (including case management services) to correct, ameliorate, or eliminate physical handicaps. State and federal expenditures for this program are estimated to be \$28,343,699 in fiscal year 1976-77.

ENVIRONMENTAL HEALTH SERVICES seeks to protect California's population from various types of environmental hazards and pollutants. This is done by preventing or mitigating, to the extent possible, hazards in the areas of chemical, microbiological, or physical pollutants; natural vectors such as disease-transmitting insects; and unsafe products such as food, drugs, x-rays, and cosmetics. A laboratory is maintained which aids state and local agencies in monitoring and investigating potentially hazardous substances and conditions. The total proposed budget for fiscal year 1976-77 is \$16,557,046.

PREVENTATIVE MEDICAL SERVICES is responsible for preventing disease and disability through a variety of specific programs, including immunization and child health screening programs. Family health services are promoted through family planning and maternal and child health. Services are provided through county health departments and a network of private nonprofit agencies delivering specified preventative medical services. An estimated \$66,454,351 in funds from all sources is

expected to be expended in fiscal year 1976-77.

Social Services

The *SOCIAL SERVICES* program provides services to California's elderly, blind, and disabled citizens and to children and families who need help. The Homemaker/Chore element of Social Services provides in-home supportive services to the aged, blind, and disabled who need assistance with personal care and/or essential housekeeping tasks. Under state guidelines, county and private agency staff provide homemaker and chore services designed to improve the individual's self-sufficiency and thus avoid institutionalization. Approximately 110,000 persons are served annually. The Homemaker/Chore program reflects a proposed augmentation for both current and budget year to meet a continuing increase on demand for services. Legislation will be supported to further define program priorities and state-county funding responsibilities.

ADOPTIONS SERVICES directly and indirectly (via county staff) provides relinquishment and intercountry adoption services and studies all independent adoption placements processed through the courts. Placements for 1976-77 are estimated at approximately 3,300, with another 2,100 studies performed for independent adoptions.

A total of \$365,391,570 is proposed to provide these social services in the 1976-77 fiscal year.

The *DEPARTMENT OF REHABILITATION* provides a variety of outreach, counseling, medical, training, placement, and follow-up services to help rehabilitate and find suitable employment for the largest possible number of seriously disabled persons.

Beginning in 1975-76, the department will move to implement the federal Rehabilitation Act (Public Law 93-112) by establishing a service priority system for maximum use of resources, emphasizing the severely disabled. Within the resources available, this priority shift is already underway to serve the severely disabled and those who are moderately disabled but have substantial vocational handicaps. The department also has increased its outreach efforts to assure that the severely disabled are aware of its services and has trimmed back its services to the mildly disabled who have less need for assistance. Approximately 24,100 severely hand-

icapped Californians will be helped during the budget year, representing nearly 70 percent of the department's case load.

To accommodate these major changes \$1,302,620 from the General Fund, matched by over \$5 million federal dollars, have been made available to the department during the budget year.

Of these resources, \$736,000 are new General Fund dollars, while an additional \$566,620 of General Funds have been redirected from other agencies. For this reason, cooperative programs with other departments for services to public offenders and alcoholics are being terminated July 1, 1976. To the extent that public offenders and alcoholics meet the department's new priorities, the disabled will be clients of rehabilitation.

In order to streamline the department and prepare it for the difficult work ahead, the administrative structure has been reorganized and one level of administration eliminated. In addition, 100 vocational counselor positions will be abolished during the next several months, as a result of program reorientation. In order to reduce the social and economic impact, eligible employees who retire from the department will be granted special service credit under provisions of Chapter 1167/1975, and Executive Order No. B11-75. All of the resultant savings in positions and dollars will be redirected to support and expand services to the severely disabled.

The *OFFICE ON AGING* administers funds allocated to California under provisions of the federal Older Americans Act of 1965 and its amendments. Of California's 2.9 million persons 60 years or older, 20 percent are in need of one or more services related to physical and mental well-being. In 1976-77, more than 77,000 persons will participate in the nutrition program, which will serve approximately 22,500 meals daily. The lives of another 1,086,000 individuals will be enriched by their sharing in comprehensive service projects designed to satisfy one or more of their needs.

Senior citizens are reached directly through community organizations, volunteer and professional groups, private businesses, service clubs, councils on aging, educational institutions, church organizations, governmental jurisdictions, and other interested groups and individu-

als, who in turn work with the State Office on Aging.

The state office, through local groups, provides consultive services for development and implementation of the Community Planning and Nutrition Programs. The State aids local groups in making effective use of existing resources and available services offered to the elderly at state and community levels.

There are two major programs in the *DEPARTMENT OF BENEFIT PAYMENTS*: the *Welfare Operations Program* includes Aid to Families with Dependent Children, Food Stamps, Child Support, and the Supplemental Security Income/State Supplementary Program; the *Audits and Collection Program* includes Unemployment Insurance, Disability Insurance, and Personal Income Tax withholding.

The *Aid to Families with Dependent Children* program (AFDC) provides financial assistance to eligible children and the parents or other eligible relatives with whom they live. There are three major parts to the program: *aid to family groups (FG)*, *aid to families with unemployed parents (U)*, and *aid to children in boarding homes and children's institutions (BHI)*.

Approximately 1.2 million low-income people will receive AFDC-FG grants to meet the basic needs of children and their caretakers. A family of four (composed of a mother and three children) will receive \$380 a month to meet these needs; additionally, they will receive other program benefits such as food stamps, Medi-Cal, and needed social services, in an effort to maintain the health and integrity of the family.

An estimated 165,000 individuals will receive AFDC-U grants, where the income of the unemployed family is not sufficient to meet its needs. The basic premise is that providing aid to unemployed needy families will sustain the basic family unit. The AFDC-U case load typically turns over at a high rate as the program serves its purpose of providing temporary aid to families whose income has been interrupted.

More than 29,500 children who cannot receive adequate care in their own homes are placed in foster homes or private institutions (AFDC-BHI). Included in the 1976-77 Department of Benefit Payments Budget is \$2.7 million to fund proposed legislation increasing the state's share of costs for boarding homes and institutions.

The total General Fund cost of the AFDC program is estimated at \$563.8 million for 1976-77, an increase of \$47.1 million over 1975-76. This increase is due mainly to the cost-of-living adjustments effective July 1, 1976.

An estimated \$466.4 million in federal funds will help Californians purchase food during the 1976-77 fiscal year as the bonus value of *Food Stamps*. Approximately 345,000 households receiving Aid to Families with Dependent Children and General Relief (1.1 million persons) plus 218,000 households not drawing welfare (650,000 persons) will be offered the opportunity to purchase food stamps. The cost of the stamps to recipients will average 57 percent of the redemption value when used to buy food.

The food stamp program was expanded when Benefit Payments, in accordance with an "outreach" plan required by the U.S. Department of Agriculture, stepped up its efforts to ensure that all low-income persons know about food stamp benefits and how to apply for them. Each county is responsible for carrying out a local outreach program. New regulations also require intensive review and evaluation of the entire delivery of food stamps.

A new *Child Support* program begun in the 1975-76 fiscal year is designed mainly to increase interstate cooperation and involvement in locating absent parents to recover child support payments. The new program is mandated by Title XX of the federal Social Security Act.

The *Supplemental Security Income/State Supplementary Program (SSI/SSP)* is a federal-state program providing grants to cover the basic needs of eligible aged, blind, and disabled individuals. Effective July 1, 1976, an aged or disabled person will receive \$266 and a blind person \$301 per month. More than 734,000 Californians will receive these payments during the year, at a cost to the General Fund of \$679.6 million.

In addition to the basic SSI/SSP grants, *Special Adult Programs* are available to augment or replace the basic grant. The programs can be characterized as serving two purposes: (1) to provide grants to individuals who are not eligible due to federal eligibility requirements, such as an otherwise eligible person with a home valued in excess of \$25,000, and (2) to recognize individual needs not recognized by the basic grant, for example, to repair a roof damaged by a storm,

a special monthly allowance for feeding the guide dog of a blind recipient, and loans made to recipients when the basic grant check is lost, stolen, or not delivered in a timely fashion.

The costs in 1976-77 for these Special Adult programs is estimated at \$3.8 million.

The General Fund will reimburse \$74.5 million to counties for meeting the costs of administering the Food Stamp, AFDC, and Special Adult programs. At the request of the Administration and the Legislature, the department will establish means to control county welfare department administrative expenditures. The purpose will be (1) to measure efficiency and effectiveness and (2) to provide reliable fiscal and statistical data from which decisions can be made.

The *Audits and Collections Program* of the Department of Benefit Payments collects *Unemployment Insurance (UI)*, *Disability Insurance (DI)* taxes, and *Personal Income Tax* withholding (*PIT*) from 450,000 employers doing business in California.

UI is part of a national plan administered by the Department of Labor under the Social Security Act. The State collects money from employers to finance benefits. California offers UI tax rate reductions to employers who maintain stable work forces and payrolls, and also administers a separate state UI program for classified employees of public schools through the community college level.

Recent state legislation extended UI coverage to agricultural workers. California and Hawaii are the only states offering this coverage. Disability Insurance, funded by a 1 percent tax on each covered employee's wages to a maximum of \$9,000, and Personal Income Tax withholding are also administered by Benefit Payments.

Other activities include registering employers, maintaining individual employer records for UI "experience rating," notifying employers of tax obligations, processing tax returns and payments, and collecting delinquent taxes. From 6 to 8 percent of employers' records are audited annually, but the department relies primarily on voluntary compliance.

Benefit Payments audits 11 Department of Health programs involving more than \$1 billion annually. These programs include Medi-Cal, tuberculosis and renal dialysis centers, hospital construction projects, mental health programs,

and crippled children services. Auditors evaluate the validity of claims for additional funds and review records substantiating funds already received. They initiate payments to health-service providers, based on audit findings, and recover overpayments. An automated billing system is reducing a three-year backlog of bills to private insurance companies.

The *EMPLOYMENT DEVELOPMENT DEPARTMENT* provides manpower services to the nine million persons in California's labor force, the largest of any state in the nation. Employers are assisted in filling job vacancies, the job-ready in finding employment, welfare recipients in becoming self-sufficient, and the economically disadvantaged and unemployed in becoming employable and obtaining jobs. The department also provides income maintenance for the involuntarily unemployed through unemployment insurance and disability insurance benefit payments.

Employment Services provides a labor exchange for employers and job-ready applicants to reduce the time in which jobs go unfilled and job-ready applicants are unemployed. Approximately two-thirds of the labor force in California is covered by the job bank network, a computerized list of jobs by labor area, updated daily, which matches job seekers and jobs. Approximately 436,000 agricultural and nonagricultural placements will be made.

The *Work Incentive Program (WIN)* is designed to find unsubsidized jobs for employable welfare recipients. With some exceptions called for by federal law, registration with the Employment Development Department is a condition of eligibility for benefits from the Aid to Families with Dependent Children program. Approximately 176,000 persons will be registered in WIN.

Eight offices are designated as *Service Centers*: East Los Angeles, South Central Los Angeles (Watts), Venice, San Diego, East Fresno, West Fresno, Richmond, and San Francisco. Job Agents help long-term unemployed or vocationally handicapped residents through a range of coordinated governmental and nongovernmental services.

The *State Manpower Planning Office* administers the Governor's Special Grant funded by the Comprehensive Employment & Training Act of 1973 (CETA). This office provides staff

support to the State Manpower Services Council, reviews and coordinates all CETA programs in the state, and funds innovative and special manpower and vocational education programs. The office plans to serve 13,500 participants.

The Employment Development Department's *Balance-of-State Office*, as prime sponsor, administers CETA programs in the 28 smaller California counties. The office works with local governments and community organizations to deliver manpower services to the work force in the prime sponsorship area. Manpower services include public service employment, on-the-job training, classroom training, and work experience programs. With the end of Title VI Emergency Employment program in fiscal year 1976-77, the number of clients served will decline from 13,550 to 7,330.

Comprehensive Employment & Training services provide for the development of training, education, and job opportunities to disadvantaged individuals. Under the Comprehensive Employment & Training Act of 1973 (CETA), manpower training services are the responsibility of local prime sponsors. Funds formerly allocated to the Employment Development Department for statewide manpower programs under Manpower Development & Training Act/Economic Opportunity Act are now included in allocations to the 37 prime sponsors. The department, as one of the prime sponsors, receives approximately 5 percent of the Title I manpower funds for the 28 smaller counties, while 95 percent of the funds go to the other 36 urban prime sponsors. Under CETA, the Employment Development Department is involved in bidding for reimbursable contracts with prime sponsors, in competition with other potential program operators. EDD has currently contracted for 10.6 percent of total 1975-76 Title I funds allocated to California's 37 prime sponsors.

The *Unemployment Insurance* program provides a system of income maintenance based on insurance principles to alleviate the economic suffering of involuntary unemployment. It thus acts as a stabilizer of the economy. Approximately 75 percent of the labor force is covered by state or federal unemployment insurance programs. Unemployment benefits varying from \$30 to \$104 a week are paid to claimants found eligible on the basis of claimant earnings in Cali-

fornia employment covered by Unemployment Insurance. The average number of regular insured employees is estimated to be 7,115,000, up 232,000 from fiscal year 1975-76.

The department provides a system of wage-loss indemnification through the state plan of *Disability Insurance* for workers disabled by nonoccupation illness or injury. Employers may substitute a voluntary plan for the state plan as long as the voluntary plan provides at least equal benefits at a cost not exceeding that of the state plan. The department reviews these voluntary plans to ensure compliance. Benefits to be paid from the state plan are expected to be \$458,754,000, up \$24,285,000 from fiscal year 1975-76. The average number of people in covered employment is anticipated to be 6,235,000, which is 135,000 more than in fiscal year 1975-76.

Migrant Services provides temporary housing and other work-related services, including child care, at low cost to migrant farm workers and their families during peak harvest seasons. In 1976-77 the program will provide 25 migrant housing camps, replace 310 migrant houses, construct 115 sanitation facilities, and provide day-care services to 2,100 children. With the termination of federal aid in 1976, this program will be supported by an initial appropriation of \$3.76 million from the General Fund for 1976-77. This includes \$2 million from the General Fund as the first increment of a three-year program to rehabilitate housing. While this is primarily a restoration program, it will afford opportunity for off-season employment to families who desire winter work.

The Office of *Economic Opportunity* analyzes antipoverty programs, determines alternate sources of funds, and provides technical assistance on management, fiscal accounting, and program planning to increase the performance and accountability of community action programs. In fiscal year 1976-77, 350 grants totaling more than \$110 million will be reviewed, and 250 agencies will be assisted.

Corrections and Youth Authority

Under the jurisdiction of the *DEPARTMENT OF CORRECTIONS*, the adult inmate population in institutions was expected to continue growing in the 1975-76 fiscal year. However, with recent term-setting and parole-granting decisions by the Adult Authority, the

institution population decreased from 23,998 on June 30, 1975, and is expected to reach a low (similar to mid-1972) of 19,550 by March 31, 1976. An increase in population is projected for the 1976-77 fiscal year to 21,775 by June 30, 1977.

In the current fiscal year, the department and the Adult Authority will implement two California Supreme Court decisions which provide inmates and parolees with added due process and safeguard of rights. Under *Gee v. Brown*, inmates will be provided a hearing, and a limited right to an attorney at such hearings, if action is taken to rescind an inmate's parole date. This effort will become part of the ongoing program of the department and the Adult Authority. Per *in re Rodriguez*, the Adult Authority is required to set a primary term for all felons based on the person's culpability at the time of committing the offense. The primary term must be set for all felon prisoners and parolees. Funding is being proposed in the current year to set primary terms for the present population. The setting of primary terms for future commitments will be handled through the normal hearing process, at no additional cost.

This budget proposes a \$100,000 augmentation of the inmate pay budget to maintain inmate purchasing power at prison canteens. In support of inmate welfare, the Administration is proposing a \$300,000 augmentation of the department's budget which should benefit inmates and their friends and relatives in two ways. Special quarters for family visiting have heretofore been paid for from the Inmate Welfare Fund (prison canteen operations). This budget allows for 37 additional family visiting units located at the institutions and paid for from the General Fund. Not only will inmates have an expanded opportunity for extended and private visits with spouses, children, and parents, but this will also relieve the Inmate Welfare Fund of the cost and hold the line against increased canteen prices.

This year approximately 5,200 youth offenders will enter and eventually leave facilities of the **DEPARTMENT OF THE YOUTH AUTHORITY**. A variety of programs are offered to meet the needs of a wide range of wards. Examples of such programs are (1) academic: remedial through junior college, (2) vocational: prevocational through highly skilled, (3) counseling and treatment: supportive techniques

DEPARTMENT OF CORRECTIONS POPULATIONS

INSTITUTION AND PAROLE
JUNE 30, 1960 THROUGH 1980

through medical-psychiatric, and (4) custodial: open camp setting through protective custody and lockup.

Prior to release, a specific parole plan is developed for each ward. The plan usually involves additional schooling, vocational training, or full-time employment. The ward is placed with parents, other family members, or in a structured environment such as a group home or halfway house.

Parolees are provided with a full range of services, including school and vocational counseling and placement, family counseling, referral to drug treatment programs, and employment counseling and referral, as well as individual counseling. Upon successful completion of parole, which averages 24 months, wards are discharged by the Youth Authority Board and are then eligible to apply for sealing of their records and restoration of civil rights.

The Youth Authority Board has increased length of stay from an average of 8.6 months in 1961 to 12.3 months in 1974. The median age of wards housed in Youth Authority facilities on June 30, 1962 was 17.8, while on June 30, 1975 it was 19. The department, as a result of increased commitments and longer length of stay, is planning to activate three living units during fiscal year 1975-76, two at the Youth Training School and one at the Ventura School. Based on projected population increases for 1976-77, the Youth Authority may need to activate additional living units. To relieve overcrowding in male processing beds, one living unit at the Youth Training School will be converted to a diagnostic unit, and the female processing unit at the Ventura School will be modified to process males. During the next few months, the department will examine institutional length of stay with the view of reducing length of stay as an alternative to continuing these units or activating additional units.

The 1976-77 budget includes funds for additional psychiatric services at the Youth Training School, dental services at the DeWitt Nelson Training Center, and educational services for the five youth conservation camps.

In fiscal year 1976-77, the department and the Youth Authority Board will implement a

number of court decisions which will provide wards with added due process and safeguard of rights. Per *Wolff vs. McDonnell*, wards accused of institutional rule violations will be provided a hearing and investigation of facts before disciplinary action is permitted. Per *La Croix and Valrie*, if parolees are arrested for a crime with a pending court trial and are held by the Youth Authority, they will be provided with a prerevocation detention hearing. However, the department will undertake such procedures only for parolees charged with committing very serious and violent crimes. Wards will have the right to counsel and to cross-examine and be heard at such hearing. Per *in re Love* and *in re Olsen*, wards will have the right to review their files and raise questions regarding disclosed material in those files. Per *Gee vs. Brown*, wards will be provided a hearing and a limited right to an attorney at such hearings, if action is taken to rescind the ward's parole date.

Education

Education in California is entering a new period, challenged by the need for reform, redirection, and change. This is a marked departure from the 1960s when the problems were associated with rapid growth. School financing methods for all segments of education continue to be of essential importance, and changes will have to be considered that will provide quality education at a cost consistent with available state resources.

The major emphasis for the 1976-77 fiscal year is aimed at improving education for young students by expanding Early Childhood Education (ECE) and assisting disadvantaged students by providing significant state funding increases to student aid programs which support students pursuing postsecondary education.

ELEMENTARY AND SECONDARY EDUCATION

During the 1970's, there have been two central themes in California's education policy for children in kindergarten through grade 12 (K-12). One theme has been to place greater emphasis on teaching the basic skills in the early grades, in order to build a firm foundation for continued educational success. The second theme has been to develop a comprehensive educational planning process which seeks to combine at the local level the various state and Federal programs, and build from those pro-

grams a consolidated approach for meeting the needs of all children in each school.

Three major reform efforts are currently in operation which reflect this movement for change in California's education system: the consolidated application process; early childhood education; and the Master Plan for Special Education Pilot Program.

The *Consolidated Application Process* was initiated in 1973 as a means of coordinating many of the state and Federal categorical programs which had been established to meet specific needs of children throughout the State. Included in the consolidated application are funds provided by early childhood education, ESEA Title I, Miller-Unruh, educationally disadvantaged youth (SB 90), American Indian Early Childhood Education, state preschool, and state bilingual—funds totaling over \$361 million in 1976-77 for elementary and high schools throughout California.

The process itself requires individual schools to develop a comprehensive school plan for coordinating the categorical program funds received by the school. The State Department of Education then reviews these plans (approximately 2,800 elementary and 250 secondary school plans in 1975-76) and conducts field visits to insure that the various programs are being coordinated effectively to serve students' individual needs.

Table I
EXPENDITURES FOR ELEMENTARY AND
SECONDARY EDUCATION K-12

GENERAL FUND (in thousands)			
	<i>1974-75</i>	<i>1975-76</i>	<i>1976-77</i>
STATE OPERATIONS

Total Expenditures, Capital Outlay	\$3,427	\$159	\$39,242

^a Reflects \$14 million provided to Master Plan for Special Education through apportionments in 1975-76. In 1976-77, the \$14 million is provided in the separate appropriation for the Master Plan for Special Education.

^b Includes \$19,942,000 available from Item 389, Budget Act of 1974.

Figure I

Statutory Increases in The State Foundation Program
For Elementary and High Schools

Early Childhood Education

1976-77 will be the fourth year of operation for ECE and will be the first year in which a majority of California children in grades K-3 will be enrolled in ECE programs. The proposed budget for 1976-77 includes the largest one-year expansion of ECE in the history of the program—an increase of \$35 million to serve 218,000 additional students. This expansion will result in a total budget of \$98.8 million being provided for ECE to serve 618,000 students in grades K-3. This major expansion of ECE reflects the high priority given by the Superintendent of Public Instruction and the Governor to the goal that upon completion of the third grade, all students will have the skills necessary for continued educational success in California public schools.

The Early Childhood Education (ECE) reform effort was authorized in 1972 with the adoption of SB 1302 (Chapter 1147/72). The objective of early childhood education is "that all pupils who have completed the third grade of the State's educational system will have achieved a level of competence in the basic skills of reading, language, and mathematics sufficient to continued success in their educational experiences".

A fundamental element of the ECE reform effort is the requirement that each participating school must develop a plan for providing individualized instruction to each pupil in grades K-3 of that school. The concept of individualized instruction moves away from the large-group approach to education, and requires instead that each pupil be given instruction that emphasizes his or her strengths and weaknesses in reading, language, and mathematics. A second major element of ECE is the required school plan which must be developed jointly by the parents and staff of the school, rather than just by the school administration.

Master Plan for Special Education Pilot Program

In the 1976-77 fiscal year, the Department of Education will continue the *Master Plan for Special Education Pilot Program*. The 1976-77 budget contains \$24,000,000 to serve 23,000 exceptional students in the Master Plan Pilot Program. Six responsible local agencies have been funded to test this concept of educational reform. The six responsible local agencies are: Santa Barbara County, Humboldt/Del Norte

counties, Stanislaus County, Contra Costa County (excluding Richmond and Mt. Diablo U.S.D's), Sacramento City, and Santa Monica City school districts.

The Master Plan is an effort to deliver special education services to individuals with exceptional needs by providing services based upon identified educational needs rather than their handicaps. The flexible funding mechanism in the Master Plan allows schools to pool resources to meet the varied needs of these children, either within a single district or by coordinating the special education programs in small school districts into a regional program.

The plan also stresses integrating special education children into regular classrooms. Currently, most of them are segregated into special classes where they have little opportunity to meet and interact with other pupils. Under the Master Plan concept, special education children are no different from the others since all children have special educational needs.

Development Centers for the Handicapped

Development Centers for the Handicapped provide training in functional self-help skills for severely mentally retarded and physically handicapped pupils between the ages of 3 and 21. There are 104 such centers operating in the current year.

Chapter 407/74 (SB 1782) requires that during the period between July 1, 1974 and September 1, 1978, there will be an orderly phase-in of pupils presently not served but identified as being eligible for enrollment in a development center. All eligible pupils will then be enrolled in a Development Center at the completion date.

The 1976-77 budget includes an increase of \$1,595,191 to provide state support for 472 additional enrollments under this phase-in plan.

Child Nutrition

Along with overall reforms in the educational process, there are also major changes in support activities such as *child nutrition*. Chapter 1487/74 (SB 2020) established a per-meal reimbursement for meals served to students in public schools. With passage of Chapter 1277/75 (SB 120), the reimbursement was extended to include meals served in private schools and certain child development agencies. This chapter also requires that by 1977, public schools will serve

at least one nutritious meal daily to all needy pupils. An additional per-meal reimbursement is provided for meals served to needy students in low-wealth school districts.

The proposed levels of funding for the Child Nutrition Program in 1975-76 and 1976-77 (\$34.5 million and \$45.5 million respectively) represent a cumulative \$48.2 million increase over the estimated program levels (\$14.9 million and \$16.9 million) that existed prior to the passage of SB 120.

Of this amount, \$10.1 million was appropriated by Chapter 1277/75, for 1975-76. However, program growth has been greater than anticipated and revisions of previously incomplete data on meal participation now indicate that increased funding is necessary. Also, the passage of a Federal Child Nutrition bill, HR 4222, over a presidential veto, will greatly increase the number of reduced price meals served. School districts are eligible to receive the State reimbursement for these meals. HR 4222 took effect January 1, 1976.

Due to these factors, an additional \$9.5 million for 1975-76 will be requested through deficiency legislation. The Governor further proposes an additional \$28.6 million increase to provide the full funding now estimated to be needed for 1976-77.

Program Management

The Department of Education on July 1, 1975, made a change in its *Educational Program Management* structure to establish more direct administrative authority and accountability at the associate superintendent level. This reorganization was a significant change from the matrix management structure used in 1974-75. The primary effects were to strengthen the roles of the associate superintendents, to clarify the management roles of the various program units, and to make explicit the department practices concerning utilization and redirection of staff.

The department has made significant progress in coordinating formerly fragmented management activities and in improving the cooperative relationships of the various managerial units through the use of this new organization which is proposed to be continued in 1976-77.

School Finance

California's system of *School Finance* is based upon a sharing of expenses between the State

and local school districts. The State's participation is governed by the *Foundation Program*, which determines the level of General Fund support of public schools. Apportionment of funds is based on the average daily attendance (ADA) of pupils.

The Legislature has enacted cost-of-living adjustments to the Foundation Program to help local school districts deal with inflation. Chapter 208/73 provided automatic annual increases of \$63 per pupil for the 1975-76 fiscal year and \$66 for 1976-77 for both elementary and high schools. Another \$21 was added by Chapter 277/75. Figure I shows the increases in the Foundation Program since 1972-73.

Chapter 277/75 also provided a Foundation Program for summer school ADA at 80 percent of the level for the regular school year because of the lower costs of summer school. Largely as a result of these statutory annual cost-of-living adjustments, General Fund apportionments are projected to be \$2,216 billion in the 1976-77 fiscal year, an increase of \$111.7 million over 1975-76.

The 1975-76 Budget Act placed a 105 percent "cap" on the growth in ADA which the State would fund in nonmandatory adult education programs and the Regional Occupational Centers and Programs. This action was prompted by the dramatic annual ADA increases in these programs and by a growing concern over whether scarce State funds were being directed toward the most essential educational priorities. The Budget Act "cap" is proposed for continuance in the 1976-77 fiscal year until statutory reforms are enacted. It is estimated that removal of the "cap" on these programs would result in a \$65 million increase in K-12 and \$97.4 million increase in grades 13-14 in state apportionments, a total of \$162.4 million, in 1976-77.

Much attention at the state level has been focused on the August 1974 *Serrano vs. Priest* decision of the Los Angeles County Superior Court. This decision holds the present K-12 state school financing system to be in violation of the equal protection clauses of the California Constitution. The judgment is being appealed to the State Supreme Court, and a final decision is expected in the spring of 1976.

If the lower court's judgment is upheld, major changes in California's system of school finance may be necessary. In considering additional

funding for K-12 local assistance programs, the Legislature, the Superintendent of Public Instruction, and the Administration must weigh carefully the potential impact of the Serrano decision and avoid actions that would compound the difficulty of meeting its mandate.

POSTSECONDARY EDUCATION

Higher education in California has entered a period when growth alone is no longer the major driving force. Greater attention must now be given to seeking answers to questions and developing new plans for the coming years. There must be a redefinition of the purpose of the various segments of higher education and their responsibilities toward California's citizens. Of particular importance must be the review of the current state financing of the California Community Colleges for the purpose of effecting necessary reform and changes.

TABLE II
EXPENDITURES FOR HIGHER EDUCATION
(In thousands)

^a Salary increase funds for organizations other than UC and CSUC are excluded from totals.

California Postsecondary Education Commission

Ongoing responsibilities of the *California Postsecondary Education Commission* are maintained in the budget for fiscal year 1976-77 at essentially the same level as 1975-76, although the total funding is somewhat reduced due to completion of several special studies in the current year. The highest priority of the commission in 1976-77 will be the implementation of electronic data processing for its state-level information systems, to provide data for special studies.

When this information system is developed, it should help in making intelligent decisions about postsecondary education. Commission review functions provide coordination among institutions of postsecondary education, prevent duplication, and provide for efficient transmittal of state and federal financial support for programs and facilities. Through its planning and special projects division, the commission annually updates its five-year plan for postsecondary education and conducts special studies pertaining to current planning needs.

University of California

The 1976-77 fiscal year budget provides a total of \$619.0 million from the General Fund for the *University of California*. This is an increase of \$31.9 million (5.4 percent) above the amount appropriated in 1975-76.

In addition, \$25.2 million is proposed in 1976-77 for a salary increase for faculty and non-faculty employees of the University.

In 1975-76 the University experienced an unanticipated overenrollment of 3,266 FTE on the general campuses. As provided in Section 28.9 of the Budget Act, a deficiency appropriation in the amount of \$1,853,000 will be requested from the legislature to finance the unanticipated current year enrollments. This overenrollment is not expected to continue in the budget year. The budget provides a \$3.8 million enrollment workload increase in 1976-77 for enrollment increases of 315 FTE on the general campuses and 464 FTE on the Health Sciences campuses over the 1975-76 planned enrollment levels of 106,672 FTE on the general campuses and 10,642 FTE on the Health Science campuses.

In addition, the budget proposes a \$3.9 mil-

lion increase in the on-going level of instructional support. The budget also proposes a \$5 million appropriation from the Capital Outlay Fund for Public Higher Education, available for three years, to be used to fund the cost of instructional equipment replacement and building maintenance. The unscheduled nature of this latter appropriation will give the University added flexibility in meeting its high priority needs in these two areas.

Increased funds in the amount of \$21.6 million are proposed for fixed cost increases which include general price increase, library book price increases, utilities price increases, merit salary adjustments, promotions and malpractice insurance premium increases. With respect to the latter, the budget provides an increase of \$3.1 million in general funds to finance the State's share of the premium increase experienced in 1975-76 over 1974-75 and to anticipate further premium increases in 1976-77 over 1975-76. Total state funding proposed for malpractice insurance in 1976-77 is \$7.3 million.

\$1.1 million is proposed to fund the workload associated with new space coming on line during the budget year. \$1.6 million is provided to update the actuarial assumptions of the University of California Retirement System (UCRS) and \$3.7 million is provided to fund the cost of merging the UCRS with Social Security. \$2.5 million is provided to fund the full year costs associated with the proposed takeover of the Orange County Medical Center on July 1, 1976.

The budget proposes in 1976-77 a 50 percent (\$275,000) increase in the level of state support for the EOP program in addition to the funds made available as a result of the enactment of AB 2412 (Chapter 1017). As in the case of the legislation which initiated funding for this program, the Regents are required to provide equivalent matching funds from nonstate sources. The 1976-77 budget, therefore, proposes a program level of \$1,650,000 for the EOP program of which \$825,000 are state funds. This augmentation reflects the Governor's priority of providing increased services to disadvantaged students."

Hastings College of Law

In the 1976-77 fiscal year budget \$3.6 million

from the General Fund is proposed to support *Hastings College of Law*. Major increases include the addition of one faculty position to accommodate a curriculum change requiring an independent research project or special seminar for each third-year law student, and one clerk position to enable the college to maintain its high quality audiovisual program. \$74,903 is added to reflect the Governor's priority for increased financial aid to economically disadvantaged students. This 50 percent increase in funding for this program will allow the college to award 88 additional grants at an average cost of \$850.

California State University and Colleges

The *California State University and Colleges* budget for 1976-77 provides a total of \$576.3 million in General Fund support for CSUC. This is an increase of \$36.5 million (6.3 percent) above the amount appropriated for the 1975-76 fiscal year.

In addition, \$27.4 million is proposed to provide a salary increase for faculty and nonfaculty employees.

The full-time equivalent (FTE) student enrollment for 1975-76 is now expected to total 236,800, up 6,795 (3 percent) from the originally budgeted level of 230,005. As provided in Section 28.9 of the Budget Act, a deficiency appropriation in the amount of \$2,195,000 will be requested from the Legislature to finance the unanticipated current year enrollments.

This budget anticipates a 1976-77 enrollment level of 239,410 FTE students, up 2,610 (1.1 percent) from the revised 1975-76 level. This reflects the continued projection of a "steady state" enrollment condition. It is not possible to ascertain the reasons for the sudden surge in enrollments in 1975, but one factor appears to be economic conditions in general. The unemployment rate for college-aged persons continues to be high and it is believed that this has caused increased numbers of persons to remain in or return to school. Enrollments, therefore, are expected to stabilize once again as soon as the economy improves.

The CSUC budget for 1976-77 includes an approximate 50 percent increase in funding for the Educational Opportunity Program (EOP)

reflecting the Governor's priority of increasing programs serving disadvantaged students. As is the case with other higher education segments, this significant increase in funding will permit greater numbers of disadvantaged persons to enter an institution of higher learning and achieve the education necessary to compete in society. The number of EOP grants issued to first-year students will increase from 4,270 in 1975-76 to 8,426 in 1976-77.

California Maritime Academy

The *Academy*, located at Vallejo, was established in 1929 and became an independent public institution of higher education in 1972. In the 1974-75 fiscal year the academy was upgraded from a three-year to a four-year institution with the goal of being accredited by the Western Association of Schools and Colleges (WASC), and the Legislature appropriated \$6.2 million for improvement of the physical plant. It is anticipated that \$5.7 million will be expended on such improvements during the 1975-76 fiscal year. The academy has already been granted candidate status by WASC and is hopeful of full accreditation in 1976-77. Enrollment has increased from 312 in 1974-75 to an anticipated 414 in 1976-77 (32.7 percent), and the 1976-77 budget reflects continued upgrading of the academy.

Student Financial Assistance

In the 1976-77 fiscal year, state *student financial assistance* will total approximately \$93 million, an increase of \$17 million. The bulk of this aid (approximately \$63 million) is provided through the Student Aid Commission. An additional \$22.9 million will be expended on Educational Opportunity programs and services in public higher education, as indicated in Figure II. Recognizing the special needs of California's disadvantaged students, the 1976-77 budget places a priority on providing increased funds to meet the needs of such students. The Educational Opportunity and College Opportunity Grant programs will increase by nearly \$12 million in 1976-77—the largest single-year increase in aid for disadvantaged students since the beginning of these programs.

EOP Funds have been increased 50 percent in all segments of public higher education.

The number of new awards in the College Opportunity Grant program have been in-

creased 50 percent based on anticipated legislation to be requested by the Governor. This will increase the number of new grants by another 2,275 for a total of 6,825 new awards in 1976-77. The total number of college opportunity grants during 1976-77 will be 12,783, an increase of 4,621 over 1975-76, and the total program funding increases from \$9.8 million in 1975-76 to \$14.7 million in 1976-77. These changes reflect the Governor's priority of increasing programs for disadvantaged students.

Community Colleges

The California *community college system* consists of 103 colleges in 70 districts and serves more than one million individuals. The doors of community colleges are open to high school graduates and persons over 18 years of age, with a varied curriculum which permits individuals to choose the program best suited to them. In 1975-76 the Legislature established a 105 percent "cap" on state-supported ADA (average daily attendance), but even with this limitation the State's funding of community colleges continues to grow at a relatively faster pace than ADA. This is due primarily to annual statutory

increases in the Foundation Program authorized by enactment of Chapter 209/73. This trend continues in the 1976-77 fiscal year, with this budget proposing continuation of the "cap" until effective statutory reforms have been enacted (see Table III).

In 1976-77, with continuation of the "cap", state apportionments to community colleges will increase by over \$64 million (16.9%). Addition-

ally, there will be an increase of approximately \$15.4 million in assistance to new community colleges due to the incorporation of additional territory into existing districts. Without the 105 percent "cap", state apportionments would have increased by an additional \$97.4 million, or 46.4 percent over 1975-76 for community colleges and apportionments for K-12 would have increased an additional \$65 million, for a total increased cost of \$162.4 million.

^a The 1976-77 Budget proposes continuation of the five percent "cap" on state supported average daily attendance.

CAPITAL OUTLAY

Deciding upon the proper amount and timing of capital expenditures for education is a complex and difficult task. Problems relating to construction technology and design are different for each project, but beyond that are the questions of the number and mix of students to be served and the most equitable method of financing the facilities ultimately approved.

Resources of three funds are proposed to fund the most critical state-supported capital outlay programs for education in the budget for the 1976-77 fiscal year. They are: (1) the Capital Outlay Fund for Public Higher Education, (2) the Health Science Facilities Construction Program Fund, and (3) the Community College Construction Program Fund.

Income for the Capital Outlay Fund for Public Higher Education comes from tideland oil revenues, although these revenues are not entirely restricted to use for educational capital outlay. Revenues in the fund for 1976-77 are proposed to be expended for capital outlay facilities for special schools of the Department of Education, the California Maritime Academy, the California State University and Colleges, the general campuses of the University of California, and a portion of the health sciences facilities projects of the University of California.

The Health Sciences Facilities Construction Program Fund receives its income from the sale of general obligation bonds and is used exclusively to finance health science capital outlay projects for the University of California. The expenditures proposed in this budget will substantially exhaust the bonds authorized for this purpose by the electorate in 1972. There are no current plans to seek legislation to authorize additional health sciences bonds.

The Community College Construction Program Fund was created by Chapter 1066/1975. Proceeds from the sale of general obligation bonds will be placed in this fund to be used exclusively for capital outlay projects for the California Community Colleges. Sale of the bonds are subject to approval by the electorate in June 1976.

Table IV illustrates the relationship between fund sources and the use of those funds by the education segments.

SPECIAL SCHOOLS for blind and deaf children, now located in Berkeley, have been

deemed unsafe because of earthquake hazard, and a new site has been selected at Fremont. The site has been purchased at a cost of \$3,185,000, and the 1974-75 Budget Act appropriated \$19,942,000 for working drawings, construction and equipment for the new facilities. The budget for the 1976-77 fiscal year proposes an additional \$19.3 million, funded from the Capital Outlay Fund for Public Higher Education, bringing the total cost of the new facilities to \$42,427,000.

It is anticipated that \$5.7 million will be expended in 1975-76 for expanding and improving the physical facilities of the *CALIFORNIA MARITIME ACADEMY*. For the 1976-77 fiscal year a total of \$291,900 is proposed, primarily to begin planning for the next construction phase. Funding is proposed from the Capital Outlay Fund for Public Higher Education.

Capital outlay recommended for the 1976-77 fiscal year for *COMMUNITY COLLEGES* totals \$62,039,344 and is funded partially by the State (\$34,059,600) and partially by the various community college districts, (\$27,979,744) in accordance with a formula prescribed by statute. In June 1976, a bond issue to provide funding for California Community Colleges capital expenditures will be voted on by the public. Proceeds from the bond issue will be used to fund the State's share in the following projects: (1) \$289,300 to protect life and safety, (2) \$2,708,400 to make existing and previously funded facilities operable (including equipment, utilities, and site development), (3) \$31,061,900 to meet the most critical needs for capacity space in general academic, science, vocational technology, and library and resource center areas.

State expenditures proposed for the *CALIFORNIA STATE UNIVERSITY AND COLLEGES* for the 1976-77 fiscal year total \$23,232,000. Included are \$4 million for minor construction projects, to be allocated by the system; \$500,000 to continue the system's program to remove architectural barriers to the handicapped; \$490,000 to continue orderly planning; \$5,055,000 to make existing or funded facilities operable (mostly equipment); and \$13,187,000 for other critical projects directly related to educational program needs. Funding is proposed from the Capital Outlay Fund for Public Higher Education.

The *UNIVERSITY OF CALIFORNIA* has two major capital outlay budgets: one pertains to

the eight general campuses and the other to campuses which have health science programs.

General Campuses. The 1976-77 fiscal year budget recommends total direct state support of \$13,708,000 from the Capital Outlay Fund for Public Higher Education for the general campuses, allocated as follows: \$4 million for minor construction projects, \$400,000 for university-wide planning, \$1,845,000 for equipment, \$759,000 for utilities and site development, \$1,114,000 for code and life-safety projects, \$268,000 for energy conservation projects, \$2,122,000 for alterations, and \$3.2 million to replace the Scripps Institution of Oceanography research vessel R/V *Agassiz*.

Health Sciences. For the 1976-77 fiscal year, \$32,874,000 will be allocated for the health science capital outlay program from the 1972

health sciences bond fund. Combined with the \$113.2 million already appropriated from the authorized \$155.9 million, the 1976-77 program will commit a total of \$146.1 million, leaving a balance of \$9.8 million in the bond fund. An additional \$1,071,000 is proposed for allocation from the Capital Outlay Fund for Public Higher Education for two projects not related to the original health science program, making a total health science capital outlay of \$33,945,000.

The 1976-77 program emphasizes equipping the relatively new schools of medicine at Davis, Irvine, and San Diego, providing for expansion of the Veterinary Medicine school at Davis, and constructing new facilities for the Optometry School at Berkeley. Funds are also provided to correct life-safety deficiencies of existing facilities.

^a Includes \$19,942,000 available from Item 389, Budget Act of 1974.

State Construction Programs

Capital outlay construction is divided into several programs. The most encompassing is the State Building Program which includes proposed capital outlay requirements for publicly supported higher education, health, corrections, and office space. It also provides for meeting the requirements of several agencies, including the Department of Conservation, Department of Motor Vehicles, Department of the California Highway Patrol, State Highway Program, and the Department of General Services.

The District Fair Construction Program provides the funding for construction of facilities for district agricultural associations.

The Wildlife Conservation Program, as administered by the Department of Fish and Game and the Wildlife Conservation Board, provides for the protection, propagation, and management of the state's fish and wildlife resources.

The Parks and Recreation Acquisition and Development Program consists of the continuing development of facilities to meet California's recreational needs. The 1976-77 budget of this program includes funds from the State Beach, Park, Recreational and Historical Facilities Bond Acts of 1964 and 1974, the Recreation and Fish and Wildlife Enhancement Bond Act, the Hostel Facilities Use Fee account in the General Fund, and the Bagley Conservation Fund.

The California Water Facilities Program reflects the funding of the State Water Project as it enters its 15th year. Construction work for those facilities necessary for the initial deliveries of water in Northern California, the San Francisco Bay Area, the San Joaquin Valley and Southern California are initially complete. However, there is still considerable on-going de-

sign and construction activities to correct deficiencies uncovered during operational testing modification to original design and planning design and construction of phasing facilities.

The Department of General Services' Capital Outlay Program of \$21,774,100 for the 1976-77 fiscal year, covers a number of priority projects, including revitalization of the State Office Building Program. This will begin to reverse the use of existing high-cost, privately owned, state-leased office space. Plans call for new state office buildings to be more responsive to human, environmental, cost, social, and community concerns. To reflect this change of philosophy, the Office of Architecture and Construction has been changed to the Office of the State Architect.

The Employment Development Department capital expenditures in the budget year represents a resumption of construction of field offices for departmental activities. During 1976-77, one building addition is funded along with site-acquisition for three future offices and one parking lot. The cost of the projects will be recovered by the fund from which it is financed by monthly payments from federal grants.

The Department of Health 1976-77 construction program will include funds for implementation of fire and life safety improvements, electrical power systems in the state hospitals, and conversion of office space to laboratory space at the public health building in Berkeley. New construction is not planned although a thorough review of the state's hospital facilities and patient population is currently in progress to determine the future demands on the system.

The sources from which the capital outlay

budget is funded are described below.

1. Current revenues and any accumulated balances in governmental cost funds are moneys collected in the form of taxes, license and permit fees, interest on investments, and similar items of income.
2. Proceeds from the sale of general obligation bonds which bonds are secured by the "full faith and credit" of the state. Outstanding bonds of this kind are (a) State Construction Program bonds, and (b) State Beach, Park, Recreational, and Historical Facilities bonds. The repayment of principal and interest on such indebtedness constitutes a preferred claim on the financial resources of the state. Within this classification falls a special category referred to as "self-liquidating" bonds. Bonds in this category are the California Water Resources Development bonds. In the case of this special grouping, such bonds although legally possessed by the characteristics of general obligation bonds are serviced from the revenues produced by the ventures or projects financed in this manner.
3. Revenue bonds are those that are secured solely by the income derived from the use or operation of the facilities thus funded.
4. Trust certificates represent a form of capital financing which makes use of the large balances accumulated in trust accounts or funds of the state. Because such funds are dedicated to meet future obligations, sound fiscal management dictates the investment of the currently unneeded cash in these accounts and funds. One way of investing these moneys is to purchase trust certificates issued by the state for the

construction of general purpose office buildings.

5. State funding for education capital outlay is from two sources: (1) the Capital Outlay Fund for Public Higher Education and (2) proceeds from sale of bonds. Capital outlay projects for the special schools of the Department of Education, the California Maritime Academy, the California State University and Colleges, and the general campuses of the University of California are to be funded from the Capital Outlay Fund for Public Higher Education. Health science facilities for the University of California are, with certain exceptions, to be funded from the Health Sciences Facilities Construction Program Bond Fund. For the fiscal year 1976-77 and in future years the California Community Colleges capital outlay program is to be funded from the Community College Construction Program Fund. A bond issue in the amount of \$150 million to finance the program has been authorized by the Legislature (Chapter 1066/75) and will be placed before the electorate in June 1976.

To provide a complete and comprehensive picture of the state's capital outlay program all proposed projects are included in the capital budget regardless of the source of financing.

Following the generally accepted principles of governmental accounting, however, only expenditures from governmental cost funds are included in the budget totals. Expenditures from bond proceeds and other forms of borrowing are excluded—such expenditures are reported as expenditures of the fiscal years in which the payments on principal and interest are made.

Tax Expenditures

The Governor's Budget traditionally reflects only those expenditures which are direct outlays. A tax expenditure, on the other hand, is a revenue reduction that occurs as a result of a preferential tax rate, deduction, exclusion, credit, or exemption from a tax. These indirect expenditures are essentially equivalent to budgeted expenditures in that they diminish the amount of revenue available for other purposes. Because they are reductions in revenue, tax expenditures are less visible than direct appropriations. Furthermore, they are not subject to annual review as are budgeted items. Consequently, these expenditures which are written into the tax laws have the effect of constricting the tax base and, theoretically, of keeping tax rates high. In many instances, these special provisions reduce tax equity. California's tax codes are cluttered with these special provisions, many of which no longer serve any useful purpose, are incongruous with state objectives, or are unreasonably costly in terms of foregone revenue in relation to the benefits received.

If tax expenditures are considered, in their entirety, as a kind of subsidy or appropriation, it becomes apparent that the poor and the needy are often not the main, or even the primary, beneficiaries of those government expenditures. Oftentimes special provisions were enacted to encourage certain private activities or to support particular industries or certain organizational structures by offering reductions in tax liabilities

at the expense of the sound tax policy of maintaining a broad and stable tax base. Any details to prove that this encouragement or support was in the public interest were held to a minimum. In many instances, the stated purpose was simply to improve the business climate. Tax expenditures sometimes do benefit the ordinary individual, as in the cases of excluding from taxable income employer contributions for medical insurance, the standard deduction, and of exempting from the sales tax food products and prescription medicine. It is also obvious that some special provisions benefit wealthier individuals and corporations as in the cases of the percentage depletion allowances for minerals, the expensing provision for intangible drilling costs, and the special treatment allowed capital gains.

While many tax expenditures might be both socially and economically desirable, others serve no purpose except to relieve certain taxpayers of tax liability and can, therefore, best be termed "tax loopholes". If, instead of continuing these special provisions, the State collected the taxes and then appropriated the funds in an amount equal to the tax expenditures, it would be difficult to discern the difference between the deduction, exclusion, or tax credit and the direct government appropriations for the public welfare.

In most instances, direct expenditures do have advantages over indirect tax expenditures. Most

tax exemptions are inefficient in the sense that the cost of the tax expenditure depends on the actions of those for whom it was designed. Thus, there is no guarantee that a particular objective will attain an optimal level of funding. By making a direct appropriation, the Legislature can accurately determine the intended recipient and control the amount of the subsidy. Another inefficiency of tax expenditures is that they often provide tax relief for an activity which would occur in any event. A subsidy, on the other hand, would be more efficient in that it could be directed at a narrowly defined group for a needed purpose. Lastly, most special provisions are added to the tax codes for an indefinite duration. Because they are not direct government programs they are not regularly reviewed by the Legislature. This situation compounds the inefficiency since the effect is to obscure their cost and inequity and to set a precedent for further erosion of the tax base.

In recent years, tax expenditures have become recognized as being essentially equivalent to direct expenditure programs. Most notably, the Congressional Budget Act of 1974 required that tax expenditures be a part of the federal budget commencing with fiscal 1976. The California Legislature also recognized, by enactment of Chapter 1762, Statutes of 1971, that the Governor's Budget does not reflect a clear and accurate picture of total state spending. This Act requires the Department of Finance to prepare a biennial report of tax expenditures as a step toward their inclusion in the State Budget. The first tax expenditure report made by the Department of Finance to the Legislature in 1972 basically outlined the concept of tax expenditures, explored various methods of presenting the tax expenditures in a budget format, summarized the state and local tax systems, and identified and briefly described the various tax expenditures embodied in the tax structure. The 1974-75 Tax Expenditure Report expanded the preliminary report. Included in the later report was a presentation of tax expenditures in program areas which are compatible with the Governor's Budget on the basis of which agency would most likely administer an equivalent direct subsidy program. Within each program area, the tax expenditures were arranged by tax and wherever possible an estimate was made of the amount of the expenditures in terms of foregone revenue.

Tax expenditures were also presented by major tax source. The report recommended that tax expenditures be reviewed on a regular basis.

Tax expenditure programs were not identified in the Governor's Budget until last year. Consequently, these indirect expenditures could not be examined by the Legislature. In contrast, direct expenditure programs are annually reviewed to measure their efficiency and their effectiveness in terms of benefits obtained for the State and the public against the amounts expended. Now that it is recognized that indirect expenditures are similar to direct expenditures, they should be considered in the same manner, since the revenue impacts of these special provisions may have changed substantially due to fluctuations in the economy and changes in tax rates. Also, the importance and priority of the various special tax provisions could change and periodic scrutiny would ensure that the ineffective and outdated provisions would not remain in the tax laws indefinitely. By applying the same tests that have been developed for the evaluation of direct budget expenditures, the Legislature would be able to determine whether the tax provision still serves a valid public purpose, determine whether the public benefits generated by the provision exceed its cost, and compare the provision with alternative means of achieving the same public end and deciding on the best choice among these. Only those tax expenditure items which meet these three tests should be retained as a part of California's tax system.

It is recommended that certain tax expenditure provisions be given triennial expiration dates so that they can be reviewed in the same manner as direct expenditures under the budgetary procedure. The cut-off date technique is particularly appropriate for future tax expenditures and those which affect a relatively small segment of the economy. Under this approach the indirect expenditure would lapse if the Legislature chose not to affirmatively re-enact the special provision or if, after evaluation, the provision proved to be not worth its cost. It is recommended that the following provisions be subject to triennial cut-off dates:

Sales and Use Taxes

Candy and chewing gum

Vending machines—15¢ or less provision

Vending machines—33 percent provision

- Leases of motion pictures
- Hot food sold to airlines
- Vehicles, house cars, trailers delivered in California for out-of-state use
- Sales by optometrists and podiatrists
- Certain cargo containers
- Factory built housing
- Periodicals—subscriptions and over-the-counter sales
- Lease of photo for one-time use
- Sale of reproduction proof

It should be emphasized that the Legislature has not been derelict in reviewing and evaluating the propriety of certain tax expenditure programs. In the 1975 Regular Session, the Legislature enacted four major loophole closing measures which were proposed by the Administration. Chapter 938 repeals, subject to the vote of the people in the general election in June, 1976, the special provision which allows insurance companies to deduct from their gross premiums tax the amount of real property tax paid on their principal or home office in California. Chapter 75 limits the amount of the oil and gas depletion allowance that may be claimed annually. This is a meaningful first step towards the eventual elimination of excess percentage depletion deductions for other minerals. Chapter 575 imposes vehicle registration and license fees on bank-owned vehicles and eliminates the offset for such fees against the bank tax previously allowed savings and loan associations and other financial institutions. Chapter 1033 increases the tax on items of tax preference, expands the definition of preference income to include farm losses taken against nonfarm gains, requires all fruit and nut groves to be capitalized, and repeals the farm loss recapture provisions. A fifth tax expenditure also repealed by the Legislature in Chapter 1235, was the cigarette tax exemption on sales made to United States military installations. The Legislature enacted only one new tax expenditure during its last session. This is Chapter 1116, which adds to the Sales and Use Tax Law a provision excluding from the determination of gross receipts on a sale of a master tape or master record embodying sound any amounts paid for the copyrightable, artistic, or intangible elements.

While the Administration recognizes the commendable success rate of the Legislature last year in the elimination of the above unwarranted

special provisions from the California tax codes, which will concomitantly increase the General Fund by approximately \$66 million in 1976-77, it is believed that there are other tax expenditure items that require evaluation by the Legislature. The Department of Finance studied the structures of the sales and use taxes and the various excise taxes. It found the Sales and Use Tax Law replete with special exemptions that effectuate inequities and internal inconsistency within the tax structure and that serve as vehicles by which the tax base can be further eroded. The ultimate consequence is the necessity of increasing the tax rate on the sale of those nonexempt items in the tax base in order to generate a given amount of revenue. This adds incentive to avoidance and intensifies the compliance problem. Nevertheless, many of the tax expenditures can be justified on the ground that they enable distribution of the tax burden in line with prevailing standards of equity regarding low income groups.

Certain commodities are exempted from the sales and use taxes on the basis that it reduces regressivity of the tax structure and that it is, therefore, worth the potential adverse consequences resulting from the special provisions. Examples of this type of exemption are food, prescription medicine, gas, electricity and water. There are, however, other types of exemptions from the sales and use taxes and the excise taxes which are granted to certain sectors which should be presently examined in light of the current needs for state funds. It is recommended that the following tax expenditure items be given legislative scrutiny at this time.

SALES AND USE TAXES

Option to Pay on Cost Rather than Rental Receipts: Prior to 1965, leases of taxable personal property were not subject to the sales tax. In 1965 the law was amended to expand the tax to leases measured by the amount of rental receipts, an option was provided in the law to those who acquired tangible personal property in substantially the same form as it was ultimately leased to pay on cost rather than rental receipts. In 1966, the law was further amended to extend the option to persons who acquired the property to be leased through certain occasional sales. The option was allowed in the interest of equity for those lessors who had already paid the tax as measured by the purchase price of the

item being leased.

The option provision at the present time is the source of administrative problems and inequities, both for the state and the taxpayer. In many instances, a lessor leases similar property some of which was acquired tax paid and some of which was not. Consequently, he must charge tax on some leases or rentals and not on others, identify the property separately, and segregate his receipts. The lessee, who generally pays the tax, is not in a position to know whether the lease is subject to the tax. Furthermore, this option provision creates inequities between competing lessors since it allows a lessor with sufficient capital to pay the tax on cost and thus obtain a competitive advantage over another lessor who finds it necessary to forego paying the tax on the purchase price and to collect the tax on rental receipts.

There appears to be no justification for this confusing and unequal treatment and it is recommended that the law be changed to provide that all lessors be required to collect the tax on rental receipts. With respect to those lessors who have already paid the tax on the purchase price, it is suggested that in fairness a credit be allowed for those taxes paid prior to the proposed law change.

It is estimated that since the inception of this special provision, the state has expended approximately \$71 million in terms of foregone sales tax revenues. For 1976-77 it is estimated that the state will lose approximately \$8.7 million and local governments will suffer a loss of approximately \$2.3 million.

Monetized Bullion: Effective January 1, 1974, sales in bulk of monetized bullion (face value of \$1,000 or more) were exempted from the sales and use taxes. These sales are generally those of coins for speculative purposes. This exemption was prompted by one specific coin exchange which had not properly collected the sales tax on its transactions with customers and had a large deficiency determination against it. This exemption not only is inequitable, but also creates compliance problems. Speculators in bulk coins benefit over those engaged in other speculative transactions which are subject to the tax, most notably numismatists buying single collector coins. Problems effectuated by this special provision are those of determining the face value of foreign and out-of-circulation coins and

of intermingling rare and valuable coins with bulk bags of coins to avoid taxation.

Due to the highly speculative nature of the coin business, it is difficult to project an accurate revenue loss. However, it is estimated that approximately \$2.0 million in state revenue and \$0.5 million in local revenue is lost annually.

Gold and Silver Bullion: The sale of gold bullion, concentrates, or precipitates by producers and refiners was exempted from the sales and use taxes in the original laws in 1933 and 1935. The sale of silver bullion, concentrates, or precipitates by producers and refiners was exempted in 1939. When these exemptions were enacted, gold and silver held a more important position in the California economy than they do today; California gold and silver producers and refiners are not currently among the top 25 producers in the country. Thus, the group presently benefited by these exemptions is very small. Since most of the gold and silver bullion purchased from producers and refiners is for re-sale purposes and is, therefore, not subject to the sales or use tax even if the exemption were removed, it appears that no high priority public interest is being served by continuing the special provisions. Furthermore, as the exemptions now exist, the Board of Equalization reports that there are many who are claiming to be refiners and thus attempting to use this exemption in order to avoid the tax. If the exemptions were repealed, it would preclude potential extension to these people.

Ice Used in Packing and Shipping: This exemption was added to the sales and use tax laws in 1945. It originally applied only to ice used in packing and shipping or transporting food products in interstate commerce. In 1954, the exemption was extended to dry ice. According to the Board of Equalization's annotations, the exemption is limited to ice used in connection with *both* packing and shipping. For example, dry ice sold and used in refrigerating food served as meals on aircraft is not within the exemption. Rather, the exemption applies only in cases where food products are shipped as cargo to an out-of-state destination. There does not seem to be any constitutional problem with the interstate commerce clause if the exemption should be repealed. As long as the shipper/packer takes delivery of and title to the ice in California, it is subject to the sales tax absent the exemption.

The ice exemption, as noted earlier, applies to ice used in packing and shipping food out-of-state. Hence, there is no real benefit to the California consumer. The real benefit accrues to that particular California grower who packs and ships his produce to an out-of-state market and uses ice as a means of keeping it fresh. In this case, the exemption allows California agricultural produce to be price competitive in out-of-state markets since it eliminates some of the shipping costs from the price. However, the Board of Equalization indicates that this exemption is not as significant today because ice is rarely used now in packing and shipping food products. It would thus appear that the other methods, which are not exempt, are not so cost prohibitive as to put California produce at a competitive disadvantage in out-of-state markets. By repealing the ice exemption, its potential extension to these modern coolants would be precluded.

It is estimated that for 1976-77, the ice exemption will result in \$100,000 of foregone sales tax revenue to the state and approximately \$26,000 to local governments.

Banks: Prior to 1969, Federal law restricted the states to the use of one of four alternative methods of taxation of national banks as specified by Section 5219 of the Revised Statutes (12 U.S.C. 548). California chose to impose a tax upon all banks measured by net income and this provision was added to the California Constitution. This tax was in lieu of most other taxes, including the use tax. This exemption, founded in the State Constitution, has been a part of the sales and use tax law since its inception in 1933. The passage of PL 91-156 in December, 1969, removed the federal prohibition against the imposition of the sales and use taxes upon banks. However, no comparable provision has been provided in the California tax code. Last year the voters approved a constitutional amendment which gives the Legislature the authority to make such a change.

Banks have obviously benefited from this special treatment since they are not required to pay the use tax on their purchases of tangible personal property where title passes out-of-state. Out-of-state retailers, accordingly, benefit since there is an economic incentive for banks to purchase from them. California retailers who are required to collect the sales tax suffer a competitive disad-

vantage which also results in a loss of revenue to the local business community. Thus, if the banks did not receive this economic incentive to make their purchases outside of California, it could be assumed that their purchases would be made locally. This would stimulate the local economy thereby creating additional state and local revenues in an amount of approximately \$1.0 million annually and reducing unemployment.

Waterborne Vessels and Aircraft: Currently, purchases made by commercial waterborne vessels and aircraft are exempt from the *local* sales and use taxes. These exemptions can be traced back to the days when local sales tax rates were not uniform. At that time, the common carriers and the public utilities contended that the various rates produced competitive disadvantages and disruptions of trade because the tax burden of businesses depended on their location. This argument is specious in light of the enactment of the Bradley-Burns Uniform Local Sales and Use Tax Law in 1955. In fact, when Senate Bill 90 was enacted in 1972, the exemption for public utilities and other common carriers was repealed because all California counties had long since conformed to the uniform local tax law. It should be noted that these changes were made contingent upon the adoption by Board of Equalization of a 25 percent property tax assessment ratio on public utility property.

There is no current logical or equitable basis for continuing this exemption. Because of its existence, aircraft common carriers and waterborne vessel operators have a tax advantage enjoyed by no other segment of the transportation industry. Accordingly, the special provision now causes a restraint of trade and places other types of common carriers at a competitive disadvantage. These exemptions do *not* exist in the state Sales and Use Tax Law. By extending the local tax base to these special interests, it is estimated that local governments will experience a \$2.5 million increase in revenues in 1976-77.

ALCOHOLIC BEVERAGE TAX

Military Beer: Commencing in June, 1951, beer distributions to military exchanges, messes, and commissaries were exempted from the Alcoholic Beverage Tax. Prior to this time, military beer distributions were subject to the tax. In 1965, the exemption was extended to include the Marine Corps and the Coast Guard. The appar-

ent rationale underlying the enactment of this tax expenditure was that during the period of the draft, military personnel were relatively low paid and served involuntarily. To help alleviate this situation and to demonstrate public appreciation of military personnel sacrifices, many exemptions and special privileges were bestowed upon the military, of which the beer exemption was one. The exemption, like the other special privileges, was a form of economic incentive and income redistribution provided to military personnel. Even at that time, however, the desired effects of the exemption were more cosmetic than real because of the low tax on beer.

With the recent adoption of an all volunteer military and higher military compensation, the original rationale for this exemption has been eliminated. Military personnel are presently in an economic position in which it would be more proper for them to support themselves. The Legislature recognized this fact when it enacted Chapter 1235, Statutes of 1975, which eliminated the cigarette tax exemption on sales made to federal military installations. The military beer exemption will amount to a \$500,000 tax expenditure in 1976-77.

ENERGY RESOURCES SURCHARGE LAW

Banks: Because of the in-lieu provision in the California Constitution, banks are not subject to the imposition of the energy surcharge. As indicated in the above discussion regarding the bank exemption from the operative provisions of the Sales and Use Tax Law, the in-lieu provision is no longer required by federal law. The Energy Resources Surcharge exemption is yet another example of preferential treatment afforded to banks.

TAX EXPENDITURE ITEMS RECOMMENDED FOR IMMEDIATE EXAMINATION BY THE LEGISLATURE

1976-77 Foregone Revenue
(In millions)

State	Local	Total	
\$8.7	\$2.3	\$11.0	<i>Sales and Use Tax</i>
			Option to Pay on Cost Rather than Rental Receipts
2.0	.5	2.5	Monetized Bullion
	Negligible*		Gold and Silver Bullion
.1	.03	.13	Ice Used in Packing and Shipping Food Products
.8	.2	1.0	Banks
-	2.5	2.5	Waterborne Vessels and Aircraft
			<i>Alcoholic Beverage Tax</i>
.5	-	.5	Military Beer
			<i>Energy Resources Surcharge Law</i>
	Negligible*		Banks
\$12.10	\$5.53	\$17.63	TOTALS

* Less than \$100,000

The following table summarizes the 1976-77 major tax expenditures. Estimates were made on each tax expenditure individually and no allowance was made for their interaction. In some areas it is very difficult to obtain data for estimating tax expenditures. A variety of data sources were used in order to prepare estimates of these costs. In some cases it may not be possible to collect the amounts that have been identified as a tax expenditure because of such factors as federal law or administrative costs which make collection uneconomical.

MAJOR TAX EXPENDITURES

1976-77

(In millions)

<i>Sales and Use Tax</i>	
Food	
To be consumed at home.....	\$640
Candy	35
Vending machines—33% provision	9
Gas, electricity, and water.....	336
Vessels, freight cars and aircraft.....	160
Cargo and returnable containers.....	90
Prescription medicines	50
Leases of motion pictures	13
Newspapers	10
Periodicals	9
Option to pay on cost rather than rental receipts	9
Monetized bullion.....	2
Sales by charitable organizations	2
Consumers	
Vending machine operators	2
Optometrists and podiatrists	1
Hot food sold to airlines	1
Total	\$1,369
Vehicles, house cars and trailers delivered in California for out-of-state use	†
Factory-built housing	†
Motion picture equipment partnership.....	†
Ice used in packing and shipping	†
Lease of photo for one-time use	†

Costs not available—Sales to U.S. government, sales to banks, common carriers, out-of-state contractors, printing materials, certain meals, property loaned to educational institutions and occasional sales.

Bank and Corporation Tax

Accelerated depreciation.....	\$27*
Exploration and development expenses.....	20*
Research and experimental expenses.....	15
Depreciation of low-income rental housing	8*
Percentage depletion	5
Bad debt reserves.....	4
Certain agricultural costs	2*
Pollution equipment	1*
Total	\$82

Cost not available—Cooperatives; lessee im-

provements; foreign sea or air carriers; periodical circulation expenses; deferral or organization expenses; certain dividends; real estate investment trusts; consolidated filing; installment sales; trademark expenses; exemption from preference tax; life insurance proceeds; charitable contributions; tax exempt organization; interest on government bonds.

Personal Income Tax

Interest expense.....	\$255
Property, sales and vehicle taxes	200
Standard deduction.....	160
Employer contributions to pension plans.....	125*
Capital gains exclusion.....	120
Charitable contributions.....	95
Employer contributions to health plans.....	80*
Medical expenses.....	70
Head of household status.....	45
Capital gains at death	35
Interest on government bonds.....	30*
Income averaging	27
Expensing of certain agricultural costs	24*
Compensation for injuries or sickness	20*
Professional corporations	10
Casualty and disaster losses.....	7*
Meals and lodging furnished by an employer	7*
Accelerated depreciation	7*
Depreciation of low-income rental housing.....	5*
Taxes paid to another state	5
Sick pay exclusion	5
Moving expenses	5
Self-employed retirement plans	5
Exploration and development expenses	3*
Scholarships and fellowships	3*
Political contributions	2
Military pay and pensions	2
Retirement income credit.....	2
Timber valuations.....	2
Income splitting for surviving spouse.....	2
Percentage depletion.....	1
Employee death benefits	1*
Total	\$1,360

Cost not available—Small business first-year depreciation; periodical circulation expenses; research and experimental expenses; trademark expenses; exemption from preference tax; pollution equipment; rental value of parsonages; depreciation of child care facilities; child support and alimony payments; sale of residence.

Horseracing Tax

Preferential breakage treatment	\$4
Parimutuel license fee—small tracks.....	1
Total	\$5

Inheritance Tax

Preferential rates: class A and B	\$260
Charitable contributions	80
Marital exclusion	80
Specific exemptions	110
Total	\$530

Cost not available—Public pensions; armed services; war risk insurance; life insurance; non-resident intangible property; open-space land valuation; powers of appointment.

Gift Tax

Cost not available—Preferential rates, class A and B; community property; charitable contributions; specific exemptions; annual exemption; intangible property.

Insurance Tax

Principal office deduction	\$19
Nonprofit hospital service plans	15
Pensions and profit-sharing plans	8
Fraternal benefit societies	1
Total	\$43

Alcoholic Beverage Taxes

Military beer exemption.....	\$0.5
------------------------------	-------

Cost not available—Industrial spirits and wine; distilled spirits used in food products; sales to government agencies for scientific uses.

Motor Vehicle Fuel Taxes

Certain aircraft uses	\$37
Sales to military	30
Total	\$67

Cost not available—Rapid transit systems.

Motor Vehicle Fees

Cost not available—Government vehicles; local passenger common carriers; privately owned schoolbuses.

* Estimates derived by allocating federal estimates of similar tax expenditures to the California tax system. Federal estimates prepared by the Treasury Department and the Joint Committee on Internal Revenue Taxation.

† Less than \$1 million.

NOTE: Refer to 1974-75 Tax Expenditure Report for more detailed presentation.

Revenue Estimates

THE NATIONAL ECONOMY

The 1973–75 recession is over. It now appears that the downturn, which started in November 1973, ended in April 1975. The rapid reduction in inventories which occurred, the severe erosion of consumer confidence and resulting decline in spending, and rising unemployment were manifestations of the most severe recession since the thirties. The recovery in the second-half of last year was not unexpected, although the magnitude was greater than had been forecast as recently as last summer. The foundation has been established for significant growth in the coming year.

This forecast was predicated on five assumptions:

1. Monetary policy will be designed to accommodate a moderate but sustained economic recovery with the intent also of preventing a resurgence to double digit inflation. M_1 will increase between 7 and 8 percent during 1976.
2. No new price or wage controls will be imposed during the forecast period.
3. The 1975 tax cuts will be extended through 1977. No additional tax cuts will be enacted.
4. The New York City situation will not disrupt financial markets.
5. Federal job programs, including CETA, will be continued at present levels with gradual phaseout in 1977 as the employment situation improves.

The economic forecast is for a sustained recovery and expansion through 1977. In summary, Gross National Product is forecast at

\$1,650 billion for 1976 and \$1,840 billion for 1977. Real growth will amount to 5.4 percent in each year, with the GNP deflator increasing by 6.0 and 5.8 percent, respectively, in the two years.

The rate of recovery will depend primarily on three factors: the consumer, residential investment, and plant and equipment spending.

Consumer spending has improved sharply since last spring, reflecting a return of confidence in the economy. Confidence levels are expected to accelerate sharply during the coming year, due in part to expectations of more moderate increases in the consumer price index. This price trend will lead to gradual improvement in real per capita income. Also supporting higher personal consumption are steadily rising savings levels and the improving employment situation. The unemployment rate peaked in May at 9.2 percent, and has declined since then to slightly more than 8 percent. More important, however, is the fact that employment nationally is picking up. The fear of potential unemployment has, therefore, been greatly reduced.

Autos are expected to lead the recovery, with 10 million cars sold during 1976, and 11 million in 1977. The 1975 total was approximately 8.8 million. Durables related to housing—appliances and furniture—will be slower to improve due to the lag in housing investment. Nondurables and services are showing significant gains at the present time, and are expected to lend strength to consumption through 1977.

Housing historically has led economic upturns. At the present time, however, it appears that housing will be slow to respond until the

last half of 1976, due primarily to a slow recovery in apartment construction. Housing starts for all of 1975 amounted to approximately 1,130,000 units, and have been forecast at 1.45 million for 1976 and 1.7 million for 1977.

The delayed recovery in housing will be attributable less to financial developments than to consumer hesitation or inability to meet the financial requirements of new homes and to builders' reluctance to speculate on large-scale apartment projects. The rate of personal saving, although down somewhat from the strong situation of last summer, when the tax rebates were paid, is nevertheless expected to remain high by historical standards. It appears that disintermediation—substantial outflows of funds from savings and loan associations—will not recur during the forecast period as alternative investment opportunities are not expected to be sufficiently attractive to divert a substantial volume of funds from the S&L's. Mortgage interest rates, expected to range from 8½ percent to 9½ percent during 1976, are likely to be a minor influence in housing demand, since borrowers appear to have become adjusted to higher rates. Cost factors, on the other hand, may hold down immediate recovery.

Capacity utilization apparently remains substantially below optimum rates and pressures to expand facilities will not become significant until after mid-1976. At that time, however, strengthening demand is expected to lead to a substantial improvement in investment. This will contribute to sustained expansion through 1977.

The moderate nature of the recovery will be reflected in employment developments. Non-agricultural wage and salary employment has been projected at 78.8 million for 1976, a gain of 2.3 percent from the estimated 1975 level. In 1977, employment is expected to average 81.7 million, a rise of 3.6 percent. The labor force will continue to increase significantly in both years as marginal workers not now in the labor force are drawn back into the job market by the improving situation. This, coupled with a moderate growth in civilian employment, will retard the drop in unemployment. The unemployment rate has been forecast at 7.8 percent for 1976 and 6.6 percent for 1977.

Much of the growth in personal income this year will be attributable to sharply higher wages

and salaries. This will be due both to the rise in employment and to average wage gains, expected to amount to 8.6 percent. The latter will result from substantial pressures to make up for losses in real income during the prior years—pressures which will be accentuated because of the improved profit situation.

Other components of income will also be expanding strongly. Interest payments have been growing rapidly in recent years and are expected to continue to increase at above average rates, given the current level of savings and interest rates. Dividends will improve, particularly during 1977, reflecting corporate profits. Growth in this component will be held down somewhat, however, as corporations attempt to increase liquidity to facilitate internal financing and reduce dependence on financial markets. Non-farm proprietors' income will rise sharply as business activity improves. An increase is also forecast for farm proprietors' income.

The growth in transfer payments will moderate. Social security benefits have been increased each year in line with gains in the consumer price index for the preceding year. Veterans' benefits and various pensions are also expected to be up. On the other hand, unemployment insurance payments will decline gradually as the employment situation improves.

The income forecasts given here indicate real per capita gains in both 1976 and 1977. Extension of the 1975 cuts in tax rates will also continue to provide a stimulus. These will be major factors in sustaining the expansion in consumption. Concurrently, the personal savings rate will drop from an estimated 8.4 percent in 1975 to 7.4 percent in 1976. A moderate increase towards the latter part of 1977 will bring the average for that year to 7.5 percent.

Corporate profits will extend their recovery which started in the third quarter of 1975. Rising productivity will be a major factor, along with moderate price increases. In addition, firms will be cautious in extending operations during the coming year, so that employment and inventories build up only gradually. As a result, improving final demand will be reflected strongly in earnings. This situation will continue through 1977, with profits before taxes in that year expected to be 38 percent higher than during 1975.

Inflationary pressures have been abating in recent months. In general, it now seems likely

that the recovery can proceed without sharp price rises. While the consumer price index has been forecast up 6.9 and 5.5 percent in the next two years, quarter-to-quarter changes will be considerably more moderate.

THE CALIFORNIA ECONOMY

To date economic recovery in California has been proceeding at a slower pace than in the nation. Nevertheless, it is anticipated that recovery will gather momentum during the coming quarters. This is attributable to the fact that, as in the past, the recession was less severe in this state than in many other areas, due primarily to California's traditional orientation toward services, finance, trade and government activities rather than heavy manufacturing which fluctuates more widely during business cycles.

Manufacturing employment in the State is expected to increase gradually. It appears that gains will be moderate until economic recovery accelerates. An additional consideration is the trend in aerospace employment. Defense contracts received by California producers were up 14 percent in fiscal 1975. Much of the increase, however, represented price rises, and therefore will not be reflected in increasing employment. Of particular concern is the situation of the commercial aircraft firms in the State. Backlogs are declining as delivery is completed on previously ordered craft. The situation is compounded by the fact that air traffic, until recently, has been declining and there is little need for additional wide-bodied equipment in the near-term. These developments have already been reflected in employment trends. Employment in aircraft production has fallen by approximately 10,000 during the past year, and is expected to drop further during the coming 12 months. Partly offsetting this will be an improvement in the electrical equipment sector. Aerospace employment is projected at 460,000 for 1976 and 455,000 for 1977.

Other manufacturing activities will expand on a broad base, however. Employment in such major industries as nonelectrical machinery, fabricated metals, primary metals and chemicals is expected to grow steadily. Employment in a few industries, such as furniture, will see recovery delayed until the housing situation improves.

The finance and construction outlooks are also related to the housing situation in the State.

That part of the finance group tied to real estate activity will recover gradually in line with the housing situation. Finance employment per se will be experiencing only moderate gains, as various financial institutions attempt to improve profit margins by holding down new hirings. There are indications, however, that residential building is recovering somewhat faster in California than in the nation. Authorizations of single-family units in particular have picked up sharply, although multiple units continue to lag. Earlier fears that renewal of disintermediation would impact adversely on the California residential market now appear to be less justified. Savings rates were exceedingly high during the summer months, setting all-time records, and savings have continued to be received by the S&L's at a substantial pace. This should guarantee that funds will be available for the mortgage market in the State. Housing authorizations in California amounted to 135,000 for last year. The forecast for 1976 is for a total of 175,000 units. Of these, 120,000 are expected to be in the single-family market and 55,000 in multiples. By 1977, housing will be one of the stronger sectors, with substantial improvement evident in apartment construction in response to steadily declining vacancy rates. A total of 210,000 new units are forecast for that year: 85,000 multiple units and 125,000 single-family homes.

Nonresidential investment declined approximately 15 percent during 1975 in real terms. Improvement will depend on business investment plans, and, as in the national forecast, no substantial gains are expected until the latter months of 1976. By 1977, however, real investment for industrial building, and office, bank and other professional buildings should again be rising strongly. On balance, therefore, the construction sector is expected to record moderate employment gains in both 1976 and 1977.

Overall, employment for 1976 is forecast at 8,050,000, a rise of 3.0 percent from the estimated 1975 level. A further increase of 3.5 percent is projected for 1977.

The civilian labor force continues to increase on trend. This, coupled with a slow growth in civilian employment, has been responsible for the rise in the unemployment rate in the State during the past year. Labor force growth is expected to accelerate somewhat during the next year as marginal and currently discouraged

workers re-enter the labor force. As a result, the unemployment rate will decline only moderately from present levels. It is expected to average 9.2 percent for 1976 and 7.9 percent for 1977.

Personal income data for 1975 suggest that income gains in California have been slightly greater than those which have occurred nationally. At an estimated \$137.08 billion, income in 1975 was up 8.7 percent from the 1974 level.

This represented a decline in real per capita income, however, of 2.8 percent.

Substantial gains in wages and salaries, interest, and dividends will be largely responsible for the 10.2 percent increase projected for 1976, with income amounting to \$151 billion for the year. By 1977, with income totaling more than \$167 billion, real per capita income will be up significantly, contributing to the overall improvement in the state's economy.

^a Disposable income of California residents represents personal income less federal and state personal income taxes. Other personal tax and nontax payments have not been deducted.

NOTE: Totals may not add due to rounding.

Revenue Estimates *

Tax yields generally follow changes in economic activity. The revenue estimates for 1975-76 and 1976-77 reflect recovery from the 1973-1975 recession. Total state revenue for 1976-77 are estimated at \$12,106,771,862, approximately \$1,231 million over 1975-76 and \$1,917 million above actual 1974-75 receipts.

Revenue for the General Fund in the budget year is estimated at \$10,176,074,708, or 13.5 percent more than in 1975-76 and 21 percent above 1974-75. The unusually large increase is due to the anticipated recovery in corporate profits, increasing employment and stepped up consumer spending.

Special fund revenue for 1976-77 is estimated at \$1,930,694,154, or 1 percent more than the current year and 8 percent over 1974-75. The gain in the current year is due primarily to the implementation of year-round motor vehicle registration.

Receipts for the General Fund and the special funds for the past, current and budget years are shown in the table below.

TABLE 2
State Revenue Collections

1975 Tax Legislation

All of the loophole closing measures requested by the Administration were adopted by the Legislature in 1975. These provisions were:

1. Changed tax rates and reduced allowable deductions for the minimum tax on preference income in the Personal Income Tax Law;

2. Eliminated the excess depletion allowance enjoyed by oil and gas producers, except for the small producer;
3. Required that banks pay motor vehicle license fees; and
4. Give the voters the opportunity in June, 1976, to remove the special tax credit which allows many insurance companies to reduce their tax liability by the amount of property taxes paid on their home or principal office in this state.

Changes in revenue attributable to the above legislation are shown below:

TABLE 3
Estimated Revenue Effect of Tax Legislation
(In millions)

	1975-76	1976-77
1. Minimum tax	\$25.0	\$31.0
2. Excess depletion allowance	43.0	34.0

GENERAL FUND REVENUE

Over 84 percent of aggregate state revenue is deposited in the General Fund. This includes collections from such levies as those on sales of tangible personal property, personal income, corporate profits and insurance premiums. For the most part, these taxes are related directly to business conditions. Hence, the estimates of revenue from each source flow directly from the economic assumptions outlined above. The influence of these economic factors upon the various tax bases and the methods used in preparing the budget revenue estimates are summarized in the following material.

Sales and Use Tax—\$4,112,200,000

The sales tax—an excise tax imposed on retailers for the privilege of selling tangible personal property in California for final consumption in the State—is the largest single source of revenue for the state's General Fund. The sales tax was enacted in 1933 and was levied at a rate of 2½ percent. The use tax was enacted in 1935 as a complement to the sales tax, and has always been at the same rate as the sales tax. In 1955, the Bradley-Burns Uniform Local Sales and Use Tax Law was enacted, allowing cities and counties to impose a state-administered sales and use tax at 1 percent. The sales tax is based on gross receipts from sales of tangible personal property for final consumption, and the use tax is measured by the sales price of tangible personal prop-

* Totals in the following tables may not add due to rounding.

erty which is stored, used, or otherwise consumed in this state.

There were five exemptions in the original sales tax law:

1. Sales of tangible personal property which the State is prohibited from taxing under the United States or California Constitutions;
2. Sales of gas, electricity, and water when delivered to customers through mains, lines, or pipes;
3. Sales of gold bullion, gold concentrates, or gold precipitates by a producer or refiner;
4. Sales of tangible personal property used for the performance of a contract in public works executed prior to the effective date of the act; and
5. Sales of motor vehicle fuel taxed under the Motor Vehicle Fuel License Tax Law and not subject to refund. (This exemption was repealed, effective July 1, 1972.)

Many exemptions have been enacted since these original exemptions; some of the most important and their dates of enactment are food for home consumption (not including hot take-out food), 1935; newspapers and periodicals, 1941; prescription medicines, 1961; and candy (which was defined as a food product), 1971.

The sales tax rate has increased from its original $2\frac{1}{2}$ percent to a rate of 6 percent ($6\frac{1}{2}$ percent in Alameda, Contra Costa, and San Francisco counties, with the additional $\frac{1}{2}$ percent imposed to raise revenue for the Bay Area Rapid Transit District). This rate includes the $4\frac{3}{4}$ percent state rate, 1 percent uniform local sales and use tax rate, and a $\frac{1}{4}$ percent county tax to be used for the support of local transit systems.

The $\frac{1}{4}$ percent county tax was enacted in 1971 (effective July 1, 1972) at the same time the gasoline exemption was repealed and the state sales tax rate was decreased from 4 percent to $3\frac{3}{4}$ percent. (The state rate has been at its current level of $4\frac{3}{4}$ percent since April 1, 1974.) The $\frac{1}{4}$ percent tax was levied to approximate revenues collected from extending the sales tax to gasoline. Each year an estimate is made to determine

if $\frac{1}{4}$ percent of all taxable sales raises the equivalent of taxing gasoline at 4 percent. If more is raised by the state sales tax on gasoline, the excess is transferred from the General Fund to the Transportation Planning and Research Account in the State Transportation Fund. If less is raised, the deficit is absorbed by the General Fund.

In 1975 there were three major legislative changes that will affect sales and use tax revenues during 1975-76 and 1976-77. First, Chapter 661 (AB 2306) increased the interest rate on delinquent taxes from 6 percent to 12 percent per year. This will bring in \$4 million in additional sales tax revenue in 1975-76 and \$6 million in 1976-77.

Second, Chapter 1116 (SB 512), exempted the sale or lease of "master tapes or master records embodying sound" from the sales and use tax. This legislation will reduce sales and use tax revenues by \$1,250,000 in 1975-76 and \$2,500,000 in 1976-77.

Third, Chapter 1130 (SB 283), provided that the estimate of the transfer from the General Fund to the Transportation Planning and Research Account in the State Transportation Fund will be based on calendar year sales rather than on fiscal year sales beginning with the last half of calendar year 1975. This effectively changes the time of the transfer from January to July and facilitates planning and budgeting for the State Transportation Fund.

Taxable sales are estimated by two methods. One method utilizes a multiple regression equation to estimate total sales in constant dollars, using as independent variables disposable personal income in constant dollars, wage and salary workers in manufacturing and construction, new vehicles sold and the savings rate. Sales in constant dollars are then converted to current dollars by application of the appropriate price factor. A second estimate is made by classifying taxable sales into 15 homogeneous groups, each of which is regressed on an appropriate economic factor. The two estimates are then reconciled. The final results are shown below.

TABLE 4 Taxable Sales in California (In millions)

	1974 Actual	1975		1976		1977	
		Estimated	Percent change	Estimated	Percent change	Estimated	Percent change
Retail stores except automobiles and building	\$29,038	\$31,692	9.1	\$34,806	9.8	\$38,137	9.6
Motor vehicle dealers—auto parts, etc.	14,125	15,418	9.2	17,608	14.2	19,711	11.9
Building materials including contractors	6,617	6,635	0.3	7,630	15.0	8,500	11.4
Manufacturing, wholesaling, miscellaneous	18,290	19,930	9.0	21,946	10.1	24,092	9.8
Totals	\$68,070	\$73,675	8.2	\$81,990	11.3	\$90,440	10.3

Taxable sales in 1975 are estimated at \$73.7 billion, up 8.2 percent from 1974; however, this is a decline in real terms of 0.7 percent. The only major industry showing a decline in current as well as real terms is the construction segment of the building materials group with a decline of 2.6 percent in current dollars. Growth in the automotive sector was due both to increases in gasoline prices and a resurgence in new automobile sales in the last quarter of 1975.

In 1976, total taxable sales are estimated at \$82.0 billion, up 11.3 percent from 1975. This represents an increase in real terms of 3.7 percent as the rate of inflation slows down and economic activity picks up. New car dealers will lead the recovery with a 20 percent increase in taxable sales; the growth in the automotive group is tempered somewhat, however, by the leveling off of gasoline prices and a moderate growth in gasoline distributions. The building material segment is also expected to post a substantial gain as building activity increases in 1976.

Total taxable sales in 1977 are estimated at \$90.4 billion, up 10.3 percent in current dollars and 4.3 percent in real terms. New car sales are expected to again register a substantial increase of approximately 15 percent over 1976. Most of this gain will be due to increased volume of sales. The building materials group will register a gain of 11.4 percent as the rise in building activity continues.

The transfer made to the Transportation Planning and Research Account in the State Transportation Fund due to Chapter 1400, Statutes of 1971, was \$7.4 million in 1974-75 and will be \$24.2 million in 1975-76. Due to changes made by Chapter 1130, Statutes of 1975, the transfer in 1976-77 will be for a six-month period only and will be \$12.2 million.

Sales and use tax revenues, prior to the transfers to the State Transportation Fund, including revenue attributable to audit activities of the Board of Equalization and the effects of legislation, are:

1974-75 (actual)	\$3,376,152,510
1975-76 (estimated)	\$3,724,196,592
1976-77 (estimated)	\$4,112,200,000

Personal Income Tax—\$3,405,000,000

The personal income tax was enacted in 1935 at a rate which was graduated from 1 percent on

net income over \$5,000 to 15 percent on incomes in excess of \$250,000. Both rates and levels of income subject to tax have been modified extensively over the years. The most recent extensive modification was in 1971; it included withholding and declaration of estimated tax, imposed a tax on preference income, revised capital gains treatment and added an 11 percent tax rate on taxable income above certain levels.

The personal income tax is the state's second largest revenue source producing about one-third of the total General Fund revenue. The tax is imposed on net California taxable income (gross income less exemptions and deductions) and the tax rates range from 1 to 11 percent. A personal credit of \$25 and \$50 for single and joint or head of household returns, respectively, plus \$8 for each dependent is allowed against the computed tax to derive the taxpayer's actual liability; low income taxpayers receive a 100 percent credit if income is below \$4,000 for single and \$8,000 for joint or head of household returns. In addition, a tax on preference income, equal to one-half the regular rates is levied on the following items of tax preference: depreciation and amortization in excess of the straight line method; excess investment interest; stock options (the amount by which fair market value exceeds the option price); depletion taken in excess of adjusted cost basis; the excluded portion of capital gains and farm losses taken against non-farm gains.

Income tax revenue is determined primarily by the amount and type of income. The revenue attributable to each type of income fluctuates from year to year in response to changes in the amount of income received from each source, and changes in the distribution of income among income brackets. Distributions for 1974, 1975, and 1976 are shown in the following table.

TABLE 5
Percent of Tax Attributable to Each Type of Income

Type of Income	1974	1975	1976
	Preliminary	Estimated	Estimated
Wages and salaries	70	71	72
Proprietors.....	14	13	12
Capital gains	3	3	4
Dividends	4	4	4
Interest.....	5	5	5
Rent and miscellaneous.....	4	4	3
Totals	100	100	100

Tax attributable to wages and salaries and capital gains is distributed differently among income brackets, as illustrated in Table 6.

TABLE 6

Percent of Tax Attributable to Wages and Salaries and Capital Gains by Income Class, 1974

Adjusted Gross Income	Wages and Salaries	Capital Gains
\$0 - \$9,999	6	1
10,000 - 24,999	49	10
25,000 - 49,999	30	22
50,000 - 99,999	9	22
100,000 and over	6	45
Totals	100	100

Because of such differences in distribution, changes in the various income components have different impacts on income tax revenue. For example, capital gains are for the most part received by taxpayers in higher income tax brackets while wages and salaries are mainly reported by taxpayers in lower and middle tax brackets. Therefore, a fluctuation in capital gains will have a greater impact on revenue than a similar dollar variation in wages and salaries because of the different marginal tax rates.

For this reason revenue from each type of income is estimated separately. The estimates of tax attributable to wages and salaries, dividends, interest, and proprietors income are derived from equations relating receipts from each tax to its personal income component. Estimated receipts from rental and miscellaneous income are based on an analysis of past trends. The estimate of tax attributable to capital gains during 1975 takes into consideration the price level and the number of shares traded on the New York Stock Exchange.

The income tax is collected through a system of withholding and declarations of estimated tax. Withholding requires that the employer deduct state income tax from pay checks, and remit these amounts to the state to be credited against the employees' income tax liability. Quarterly payments of estimated tax are required for income not covered by withholding.

In 1975 Chapter 1033 (AB 1206) was enacted which significantly affects personal income tax revenues in the current and budget years. This act removed the flat 2½ percent rate on preference items and substituted a graduated tax schedule with rates that range from ½ percent to 5½ percent. The \$30,000 deduction was replaced by different deductions for each type of return (\$4,000 for single and \$8,000 for joint, or head of household). This law will increase revenue by \$25 million during 1975-76 and will raise budget year revenues by \$31 million. The 1976-

77 estimate assumes passage of an expansion to the current 100 percent special credit for low-income taxpayers. This credit will be increased to \$5,000 for single taxpayers and \$10,000 for those filing joint or head of household returns. This change would eliminate the income tax for approximately 900,000 taxpayers; and will reduce taxes for 800,000 individuals. The credit diminishes from 90 percent to 10 percent as income increases from \$5,000 to \$5,900 for single returns and from \$10,000 to \$11,800 for joint and head of household returns.

Total revenues for the years covered in this budget, after adjusting for legislation and adding collections due to audit activity of the Franchise Tax Board, are:

1974-75 (actual)	\$2,581,584,058
1975-76 (estimated)	\$2,910,000,000
1976-77 (estimated)	\$3,405,000,000

Bank and Corporation Tax—\$1,375,000,000

The bank and corporation franchise tax, enacted in 1929, is a privilege tax levied on corporations doing business in California. The tax is measured by net income and is imposed at a 9 percent rate. A minimum tax of \$200 is imposed on all corporations except banks. The corporation income tax was enacted in 1937 to complement the franchise tax. It is levied, at the same rate as the franchise tax, on the net income of corporations which are not doing business in California but which derive income from California sources (primarily foreign companies engaged wholly in interstate commerce and holding companies).

Beginning in 1933, banks and other financial corporations were required to pay an additional tax on net income not to exceed 4 percent. This tax is determined annually as the ratio of personal property taxes paid divided by net income for all corporations other than banks, financial corporations, and utilities. The bank tax rate for the 1974 income year is 3.7 percent, down from 4 percent in the previous year.

The tax on banks is in lieu of all state and local taxes except those on real property and motor vehicles. Other financial corporations are subject to state and local taxes and fees, but they may offset all but real property taxes and motor vehicle fees against their bank tax.

The following table shows the history of bank and corporation tax rates:

<i>Year</i>	<i>Tax Rate on General Corporations (Percent)</i>	<i>Maximum Tax Rate on Banks and Financial Corporations (Percent)</i>
1929-32.....	4.0	4.0
1933-34.....	2.0	6.0
1935-42.....	4.0	8.0
1943-49.....	3.4	7.4
1950-58.....	4.0	8.0
1959-66.....	5.5	9.5
1967-71.....	7.0	11.0
1972-73.....	7.6	11.6
1973-*.....	9.0	13.0

* Beginning July 1, 1973

The Bank and Corporation Tax Law was amended in 1971 to impose a 2½ percent minimum tax on tax preference items. These items include depreciation and amortization in excess of the straight line method, depletion taken in excess of cost and the amount of "excess" additions to bad debt reserves by financial corporations. The tax applies to the amount by which items of tax preference, less \$30,000, exceeds any net losses for the year.

In 1975, there were three significant legislative changes that will affect bank and corporation tax revenues during the current and budget period.

Chapter 75 (AB 177) limits the allowance for oil and gas depletion. Under this plan, depletion would be computed as under the present law (at 22 percent of gross income); however, the allowance would be limited to a maximum of \$1,500,000 per year on all properties. The maximum allowance declines when total authorized deple-

tion exceeds \$1,500,000; at \$7,500,000 the amount allowed would be zero. This law change will increase revenue by \$43 million in the current year and by \$34 million in the budget year. Cost depletion is not limited by this plan.

Chapter 661 (AB 2306) increases the interest rate on delinquent taxes from 6 percent to 12 percent per year. This change will yield an additional \$6 million in 1975-76 and \$10 million in 1976-77.

Chapter 575 (AB 931) imposed motor vehicle fees on banks and removed the offset for such fees against the bank tax allowed savings and loan associations and other financial institutions. The effect of these changes will increase General Fund revenue by \$500,000 in the budget year.

Revenue collections in the current and budget years depend upon corporate profits attributable to California during 1974, 1975, and 1976. Profits for 1975-76 were estimated from responses to a questionnaire sent to a sample of firms doing business in California. The survey indicates a wide variation in corporate profits among the several industry groups. The financial and service industries are expecting the strongest gains, while the utilities and oil industries are anticipating sharp declines. The companies included in the sample approximate 50 percent of the corporate tax base. Actual and estimated corporate profits are shown in the following table:

TABLE 7
Taxable Corporate Income in California *
(In millions)

<i>Industry</i>	<i>1973</i>	<i>1974</i>		<i>1975</i>	
	<i>Actual</i>	<i>Actual</i>	<i>Percent change</i>	<i>Estimated</i>	<i>Percent change</i>

* These figures represent income of corporations with accounting periods ending from August of the year shown through July of the following year. This method of reporting approximates the federal system of reporting corporate profits in the year earned.

A comparison of the annual change in national and California corporate profits was used to estimate the California corporate tax base for 1976. In general, taxable corporate income in this state varies less from year-to-year than corporate profits nationally because a larger percentage of such income in California is outside the volatile manufacturing sector. According to the 1975 survey, corporate profits for 1975 will decline by 4 percent whereas nationally profits dropped approximately 14 percent. Based on a forecast of a 20 percent increase in national profits for 1976, California corporate income will total \$12.9 billion, up 13.2 percent from \$11.4 billion in 1975.

After adjusting for legislation and adding payments attributable to audit activities of the Franchise Tax Board, total revenue is estimated as follows:

1974-75 (actual)	\$1,253,673,257
1975-76 (estimated)	\$1,115,000,000
1976-77 (estimated)	\$1,375,000,000

Inheritance and Gift Taxes—\$279,500,000

California's Inheritance Tax Law, adopted in 1879, was extensively modified in 1905 with the initiation of a progressive rate schedule which, for the first time, covered transfers to family members. While there have been many modifications of the tax provisions over the years, its general structure has not changed. It is a tax on the right to succeed to property transferred at death and includes gifts made either in contemplation of death or with the intention that the transfer take effect at or after death. The primary responsibility for the tax liability rests with the decedent's estate.

The base of the inheritance tax is the market value of the property being transferred less certain deductions and exclusions. Taxable property includes all real and tangible personal property in the State, and, in the case of a decedent who was a resident of this state at date of death, intangible personal property wherever located. A progressive rate schedule, which varies according to the relationship of the transferee to the decedent, is applied to the taxable base.

Since enactment of the tax, various exemptions, deductions, exclusions, and credits have been added. The widely used exemption for charitable transfers initially surfaced in 1897. The credit for previously taxed property was put

into effect in 1921. In 1935, the exclusion for the proceeds of life insurance policies was enacted. The exclusion for public pensions dates from 1956. In 1961, the wife's community property exemption was extended to all community property passing to a surviving wife. In 1967, the exemption for transfers to donees who are not related was increased from \$50 to \$300. In the same year, however, the specific exemption for aunts, uncles, and cousins was reduced from \$500 to \$300.

The treatment of transfers to a surviving wife has changed substantially since 1893 to reflect changing legal interpretations of community property. Today, there is no distinction between husband and wife or widow and widower for inheritance tax purposes.

California's Gift Tax Law was enacted in 1939 as a supplement to the inheritance tax on the grounds that large transfers made during the lifetime of a donor would otherwise escape tax. The tax is applied on the transfer of property by an individual to the extent that the transfer was made without full consideration. The property is valued at its market value on the date of the gift.

The Gift Tax Law presently provides for an annual exemption of \$3,000 from a donor to the same donee. In addition to the annual exemption, the law provides a specific, one-time exemption which varies in amount according to the relationship of the donee to the donor. If the exemption exceeds the net gift in any calendar year, the residue may be applied to net gifts in subsequent years until the maximum allowable exemption has been exhausted.

The tax rate varies according to the relationship of the donee to the donor. Both the specific exemptions and the rates of tax are the same as those provided in the Inheritance Tax Law.

On January 1, 1976, a major change in both the inheritance and gift tax laws regarding transfers of property between spouses occurred. The distinctions between community, quasi-community, and separate property were eliminated and the specific exemption increased from \$5,000 to \$60,000. There should be only a minor revenue gain due to these changes, as the increase in the specific exemption should nearly offset the gains caused by the other changes.

An increase in inheritance tax receipts is projected for 1975-76 and 1976-77, consistent with the current economic outlook. Estimated reve-

nues for the inheritance and gift taxes are:

(In thousands)			
	1974-75 Actual	1975-76 Estimated	1976-77 Estimated
Inheritance tax	\$226,698	\$242,000	\$261,000
Gift tax	15,929	15,900	18,500
Totals.....	\$242,627	\$257,900	\$279,500

Cigarette Tax—\$272,900,000

The cigarette tax was enacted in 1959 at a rate of 3 cents per pack, and imposed on the distributor for the privilege of selling cigarettes in California. The rate was subsequently increased to 10 cents per pack in 1967, with 30 percent of the revenues going to local governments. Cigars and other tobacco products are not subject to this tax.

A projection of the total number of taxable cigarettes distributed in the current and budget years is the basis for the cigarette tax estimate. Using population 16 years of age and older, consumption of cigarettes in 1975 will be approximately 142.3 packs per capita, down from 142.95 packs in 1974. Because per capita cigarette consumption appears to have reached a plateau in 1975, total cigarette consumption will increase only moderately, reflecting increases in population. Taxable distributions of cigarettes are estimated at 2.706 billion packs in 1975-76 and 2.750 billion packs in 1976-77. Revenues based upon these factors are:

(In thousands)			
	1974-75 Actual	1975-76 Estimated	1976-77 Estimated
General Fund	\$184,042	\$188,000	\$191,000
Special Fund	77,933	80,600	81,900
Totals.....	\$261,975	\$268,600	\$272,900

Insurance Tax—\$254,000,000

The taxation of insurance companies doing business in California began in 1853 when foreign and domestic insurers were required to pay a quarterly license fee of \$500 and \$250, respectively. In 1862, a gross premiums tax was enacted and levied on foreign insurers with less than \$50,000 invested in California property. In 1910, a constitutional amendment subjected all insurers to a 1.5 percent gross premiums tax which was in lieu of all other taxes except taxes on real estate. Since its inception there have been relatively few rate changes in the gross premiums tax. Currently, the tax is imposed on the gross

premiums written in the preceding calendar year less return premiums and dividends. The tax has been levied at the rate of 2.35 percent since 1949. Some pension and profit-sharing plans and annuities are taxed at 0.5 percent whereas surplus lines are taxed at 3 percent. Ocean marine insurers are taxed at 5 percent of underwriting profits.

Beginning in 1911, insurance companies were allowed to deduct all real estate taxes from their state tax liability. This deduction became quite large as a result of acquisitions by foreclosure during the 1930's. Accordingly, a 1942 constitutional amendment limited the deduction to the real estate taxes paid on an insurer's principal or home office. In 1966, a constitutional amendment was adopted with the intent of restricting the principal office deduction. Specifically, if a California-based company, organized prior to January 1, 1967, has occupied or commenced construction of a principal office before January 1, 1970, it may deduct the full amount of the property tax on the home office from the gross premiums tax regardless of the space occupied. However, it had the opposite effect, as many companies started construction of home offices prior to January, 1970. All other insurers may deduct only a portion of real property taxes based on the amount of office space occupied by the insurer.

In 1974, 127 insurers reduced their state tax liability by \$16.7 million, up 3.5 percent from the prior year. This offset, in effect, reduced the gross premiums tax rate for these insurers from the statutory 2.35 percent to an average of 2.03 percent. Fifteen of these insurers paid no tax on premiums because their deductions were greater than the tax, and ten companies account for over 40 percent of the total deduction. It is estimated that the principal office deduction will reach \$17,500,000 for the current year and \$19,000,000 in the budget year.

Legislation passed during the 1975-76 Legislative Session will place on the June 1976 ballot a constitutional amendment which, if approved by the voters of California, would eliminate the principal office deduction commencing in the budget year.

The insurance tax estimate is based on projections of premium growth for specific lines of insurance. Responses were obtained from a survey of 98 companies which account for a majority of the insurance written in California.

The estimated tax for the current and budget year and the actual tax collected in 1974-75 are as follows:

1974-75 (actual)	\$202,991,054
1975-76 (estimated)	\$230,000,000
1976-77 (estimated)	\$254,000,000

Alcoholic Beverage Taxes—\$153,115,000

The alcoholic beverage tax was enacted by the Alcoholic Beverage Control Act in 1935. In general, the tax is levied on distributions of distilled spirits, beer and wine from wholesaler to retailer.

The various rates applicable to alcoholic products have changed infrequently since 1935. The rate for still wines has remained unchanged since 1937 when it was reduced from 2 cents per gallon to 1 cent per gallon. The tax on beer has changed only once, in 1959 when it was doubled from 2 cents to 4 cents per gallon. The rate on distilled spirits of 100 proof or less has changed twice—in 1955 when the rate was increased from \$0.80 to \$1.50 per gallon, and in 1967 when it was increased to its current level of \$2.00 per gallon. The rates for sweet and sparkling wines have remained constant at 2 cents and 30 cents per gallon, respectively.

The alcoholic beverage tax estimate is based on a projection of the total number of gallons distributed in the current and budget years for each type of beverage. Estimated per capita consumption of each beverage is shown below:

Apparent Per Capita Consumption (In gallons)

	1974-75 <i>Actual</i>	1975-76 <i>Estimated</i>	1976-77 <i>Estimated</i>
Distilled spirits.....	2.41	2.45	2.50
Beer.....	21.32	21.84	22.54
Dry wine	2.88	2.98	3.10
Sweet wine.....	0.55	0.56	0.57
Sparkling wine.....	0.19	0.18	0.18

Revenues from liquor license fees are divided between the General Fund and the Alcohol Beverage Control Fund. The General Fund receives all levies for new and transfer licenses, service charges, and fees for the enforcement of fair trade regulations. All other charges, mainly those for license renewals, accrue to the Alcohol Beverage Control Fund. Ten percent of this fund is transferred to the General Fund; the remainder is apportioned to cities and counties.

Estimated revenues for the current and budget years, compared with the actual revenue

for 1974-75, are shown below:

(In thousands)

	1974-75 <i>Actual</i>	1975-76 <i>Estimated</i>	1976-77 <i>Estimated</i>

<i>General Fund.....</i>	<i>129,101</i>	<i>133,315</i>	<i>137,815</i>
<i>Alcohol Beverage Control Fund</i>	<i>15,665</i>	<i>15,300</i>	<i>15,300</i>

Horse Racing Fees—\$93,590,000

Parimutuel betting on horse racing in California was authorized in 1933. The major portion of state horse racing revenue is derived from a license fee imposed on the total parimutuel handle (the amount wagered) and breakage (the odd cents not paid to winning ticket holders). Other sources of horse racing revenue are unclaimed parimutuel tickets, occupational license fees, fines and penalties.

The original law provided that the state parimutuel license fee be 4 percent. The current schedule of rates provides for a base rate of 6.10 percent on the first \$20 million handle and one other rate, ranging from 5.70 to 7.45 percent depending on the total handle in excess of \$20 million.

Beginning in 1947, the State received the breakage attributable to the handle in excess of \$27 million. Breakage was defined as the odd cents by which the amount payable on each dollar exceeded a multiple of five cents. In 1959, the breakage was changed from 5 cents to 10 cents, and the State received one-half of the breakage attributable to the first \$24 million wagered and all of the breakage on the handle in excess of \$24 million at each track. However, in 1967, a special provision was added that allowed all race meets which handle less than \$125 million (all meets except Santa Anita and Hollywood Park) to remit only the breakage attributable to the handle in excess of \$50 million to the State.

From July 1, 1970, to July 1, 1975, all meets which handled less than \$20 million were subject to a 5.5 percent rate rather than the normal 6.1 percent. This special treatment was permanently extended to the California State Fair and Exposition and all district and county fairs, but this provision was not extended for other tracks.

In setting the racing calendar for 1976 and

1977, the California Horse Racing Board redefined racing weeks allowed. The Board has always allowed partial weeks at the beginning *or* end of a horse racing meet, in addition to the full weeks allocated by law; but recently, however, they have determined that extra days may be run at the beginning *and* the end of a meet without constituting an additional week of racing. This will result in 14 more days of racing in 1976-77 than in 1975-76.

Chapter 1149, Statutes of 1975 (AB 1734) allowed an extra eight weeks of quarter horse racing at the California Exposition and State Fair, to be run by a private racing association. It was assumed for estimating purposes that this meet will be run in the fall of 1976 for eight five-day weeks. This will result in additional General Fund revenue of \$175,000.

Union contracts for parimutuel clerks expire May 1, 1976. For revenue estimating purposes, it was assumed there will be no strike and that all meets will be able to run their allotted days.

In the past, some tracks approaching a total handle which would change their tax rate have curtailed their racing days to remain in a lower tax bracket. This is expected to occur during the budget year. Three thoroughbred tracks could be expected to have a total handle of over \$75 million for the first time in 1976-77 and one harness meet would likely handle over \$40 million for the first time during that fiscal year. Passing these total handles would substantially increase the taxes due to the State; and decrease the track operators commission, as these rates would change on the handle in excess of \$20 million, as shown in the schedules below. The 1976-77 estimate assumes that these four tracks would keep their total handle below \$40 million or \$75 million. This would reduce anticipated revenues by \$1.5 million for the budget year.

Only two rates will be applied to the total handle, a base rate on handle up to \$20 million, and the appropriate rate for the estimated handle in excess of \$20 million. Total take-out for all meets is 15.75%. Thoroughbred meets pay breeders and stallion awards of .2%

Table 8
Horse Racing Rate Schedules
SCHEDULE 1

Thoroughbred Associations			
<i>Handle (In millions)</i>	<i>State license fees</i>	<i>Track operators commissions</i>	<i>Purses</i>
\$ 0-\$20.....	6.10%	5.29%	4.16%
\$ 20-\$ 40.....	5.70%	5.52%	4.33%
\$ 40-\$ 75.....	6.55%	5.04%	3.96%
\$ 75-\$120.....	6.85%	4.87%	3.83%
\$120-\$180.....	7.15%	4.70%	3.70%
over \$180.....	7.45%	4.54%	3.56%

SCHEDULE 2
Harness and Quarter Horse Associations

<i>Handle (In millions)</i>	<i>State license fees</i>	<i>Track operators commissions</i>	<i>Purses</i>
\$ 0-\$ 20.....	6.10%	5.74%	3.91%
\$ 20-\$ 40.....	5.70%	5.98%	4.07%
\$ 40-\$ 75.....	6.55%	5.48%	3.72%
\$ 75-\$120.....	6.85%	5.30%	3.60%
\$120-\$180.....	7.15%	5.12%	3.48%
Over \$180.....	7.45%	4.94%	3.36%

Total handle of all race meets is estimated to increase by 9.0 percent in 1975-76 and 7.8 percent in 1976-77. Total revenue from horse racing will be up by 10.0 percent in 1975-76 and 8.4 percent in 1976-77, while General Fund revenue from horse racing will post gains of 15.5 percent and 7.7 percent for the same periods.

The projection of horse racing revenue is based on estimates of the average daily handle for each race meet, taking into consideration economic conditions, past trends, law changes, and the racing calendar.

Total parimutuel pools, receipts from horse racing, and the final distribution of such revenue among the various funds are shown below.

TABLE 9

Wildlife Restoration Fund.....	750	750	750

Other General Fund Revenue—\$348,900,000

Miscellaneous receipts for the General Fund will total \$348.9 million in the budget year; a decrease of 1.5 percent from the corresponding figure for the current year and down 8.4 percent from 1974-75. Miscellaneous revenue is made up of six categories: Medi-Cal aid reimbursements—\$98.9 million; interest income—\$115.2

million; pay patients and county board charges at hospitals—\$15.1 million; traffic penalties—\$21.5 million; royalties from oil and gas production on state-owned lands—\$3.5 million; and other—including the electric energy tax, charges for certain services to business and individuals and sales of property—\$94.7 million.

SPECIAL FUND REVENUE

Provisions of the California constitution, codes and statutes restrict the use of certain revenue for specified purposes, and these receipts are separately accounted in various special funds. In general, they comprise three categories of income: (1) receipts from tax levies which are allocated to specified functions; (2) charges for special services to specific groups; and (3) rentals, royalties and other receipts earmarked for particular purposes. Motor vehicle taxes and fees illustrate the first of these classes. License fees for the regulation of business and professions are typical of the second. Oil and gas royalties are examples of the third. Interest received by the investment of special fund money is deposited in the fund for which the investments are held.

Motor vehicle taxes and fees account for 82 percent of all special fund revenue. Principal sources of this income are the motor vehicle fuel taxes, registration and weight fees and vehicle license fees. During the 1976-77 fiscal year, \$1.6 billion will be derived from the ownership or operation of motor vehicles. Approximately \$735 million of this revenue will be returned to local governments. The remainder will be available for various state programs related to transportation and services to vehicle owners.

Thirty percent of cigarette tax revenue is deposited in a special fund for distribution to cities and counties. In 1976-77, receipts for this fund are estimated at \$81.9 million.

Charges for special services to industry, business and the professions, together with hunting, fishing and liquor licenses and other regulatory fees, will amount to \$118.9 million in 1976-77. Rents, royalties and other miscellaneous receipts are estimated to total \$116.6 million. The transfer or sales tax revenue to the State Transportation Fund is estimated at \$12.2 million. Interest from investments held for the various special funds is projected at \$22.6 million.

Motor Vehicle Fuel Taxes—\$791,000,000

The motor vehicle fuel license tax and the use fuel tax provide the major source of excise tax revenue for maintaining, replacing, and constructing state highway and transportation facilities.

The motor vehicle fuel license tax, commonly called the gasoline tax, is a tax on the distribution of gasoline, natural gasoline, and other flammable liquids which are used in propelling motor vehicles, aircraft, and vessels. Distributions of diesel fuel, liquid propane gas, and bunker oil are not included under this tax. The current tax rates per gallon are shown in the following table:

Motor vehicle fuel for highway use	7¢
Motor vehicle fuel for off-highway recreational use	7¢
Aircraft jet fuel	2¢
Fuel used in aircraft	7¢
Fuel used in vessels.....	7¢

When the motor vehicle fuel license tax was first imposed in 1923, it was limited to the distribution of fuels used for motor vehicles. In 1969, the tax was widened to include distributions of jet fuel; the rate was set at 2 cents per gallon. In recent years, the total or partial repeal of certain refund provisions has in effect further extended the tax. Thus, since 1965, refunds for the distribution of fuel used in aircraft have been limited to 5 cents per gallon. In 1968, the refund provision for fuel used in vessels was repealed. In 1972, refunds for the distribution of fuel used in off-highway recreational vehicles were discontinued. These revenues are apportioned, however, to the fund which reflects the fuel's use; for example, revenues collected from the distribution of motor fuel used in aircraft are apportioned to the Aeronautics Fund.

Gasoline tax revenues are estimated on the basis of average gasoline consumption per vehicle and total vehicle registrations. Consumption levels in 1974-75 declined to 618 gallons, down 1.0 percent from 1973-74. Average consumption per vehicle is projected at 615 gallons for the current year and 617 gallons for the budget year. The estimate of gasoline tax revenues assumes that the supply of gasoline will be adequate to satisfy demand through the forecast period.

The use fuel tax is imposed on diesel fuel, liquefied petroleum gas, and natural gas for use on state highways. Motor vehicle fuels subject to the tax are all those which are not covered under the motor vehicle fuel license tax. The use fuel

tax complements the gasoline tax in raising revenues for the construction and maintenance of highways.

The enactment of the tax in 1937 was limited to diesel fuels reflecting the increasing importance of diesel-powered motor vehicles. Originally, only diesel fuels were taxed. In 1959 the tax on liquefied petroleum gas was shifted from the gasoline tax law to the Use Fuel Tax Law. In 1970 this tax was extended to natural gas.

The current rates are 7 cents per gallon of motor vehicle fuel (except for local transit systems which pay 1 cent per gallon), or per 100 cubic feet of compressed natural gas, and 6 cents per gallon of liquefied petroleum gas or liquid natural gas.

Chapter 807 (AB 2149), Statutes of 1975, established an annual flat rate fuel tax to be imposed on the owners or operators of vehicles which utilize a gaseous fuel system in lieu of the use fuel tax. The owners or operators of such vehicles can elect to pay either the flat rate which is an annual tax for a calendar year or the use fuel tax. This law change will generate revenue approximately equal to the revenue under the current law. These vehicles were exempted from paying the use fuel tax in 1970. This exemption expired on December 31, 1975, and, as a result, revenue in the current and budget years will increase approximately \$3 million.

Highway consumption of diesel fuel is estimated by projecting past tax collections adjusted for changes in economic activity. Diesel consumption in 1974-75 fell 3.3 percent below the 1973-74 level of 774 million gallons. Consumption should increase to 800 million gallons in 1975-76 and to 860 million in 1976-77 as the economy recovers.

Revenues from motor vehicle fuel taxes are shown below:

(In thousands)			
	1974-75 Actual	1975-76 Estimated	1976-77 Estimated
Gasoline	\$700,716	\$710,000	\$730,000
Use fuel	51,518	57,000	61,000
Totals	\$752,234	\$767,000	\$791,000

Motor Vehicle Fees—\$778,100,000

California has imposed motor vehicle registration and weight fees in their present form since 1923. Originally the Legislature granted permission to local governments to license mo-

tor vehicles and to charge a flat fee of \$1.00 per vehicle. In 1913, the State took over the task of registering vehicles and instituted a registration fee based on horsepower. By 1923, it was concluded that weight was a better indicator of use than horsepower. When the state's highway user taxes were revised by the Vehicle Act of 1923, registration fees for all vehicles were established at a flat rate and additional fees based on weight were imposed on commercial vehicles.

Registration fees are levied on all motor vehicles, trailers, semi-trailers and certain types of dollies if they are driven, moved, or left standing on a highway. In addition to registration fees, commercial vehicles pay fees based on their unladen weight. The registration fee for most motor vehicles is \$11; since 1975, additional charges ranging from \$50 to \$300 are levied on vehicles with high compression engines. Weight fees range from \$5 to \$413 reflecting both the weight of the vehicle and its classification.

Starting December 1, 1975, California began registering vehicles on a year-round basis. Under this system, vehicles will be registered for a 12-month period rather than on a calendar year basis. Vehicles already registered will be converted to year-round registration (by being licensed for a term of 7 to 18 months) when renewed for 1976; subsequent renewal terms will be for 12 months. After November 1975, new and nonresident vehicles will be registered for a 12-month period.

New vehicle sales in California are estimated to total 1,220,000 units in 1975, the lowest level since 1967. For the most part, this decline is attributable to the energy crisis and the recent recession. Sales in 1976 are expected to reach 1,380,000 units, up 13.1 percent from last year. New automobile sales are estimated at 825,000 for 1975, increasing to 935,000 and 1,030,000 in 1976 and 1977, respectively.

Allowing for scrappage and vehicles entering and leaving California, total fee-paid registrations at year-end are estimated at 16,232,000 for 1975 and 16,648,000 for 1976. Based on these estimates, registration and weight fees are expected to total \$342,000,000 in the current year and \$328,000,000 in the budget year. The current and budget year estimates are not comparable because of the impact of year-round registration.

The vehicle license fee, established in 1935, is

imposed for the privilege of operating a vehicle on the public highways of California. Only registered vehicles are subject to the license fee. Prior to the imposition of the license fee, motor vehicles were taxed as personal property under the property tax. However, because local administration of the tax on vehicles proved inequitable and easy to evade, the vehicle license fee was established, and the local property tax on vehicles was repealed. Although it is a state imposed fee, all revenues collected, less administrative costs and 2½ percent of the remaining fees, are distributed to local government on a population basis.

The vehicle license fee is calculated on the vehicle's "market value"—the manufacturer's suggested base price, not including options, adjusted by a depreciation schedule. For motor vehicles, the schedule is based on a nine-year depreciation period, while for trailer coaches an 18-year depreciation period is used. A rate of two percent is applied to the market value to determine the fee. Revenue from this source is therefore contingent on the number of vehicles

in the State, the age distribution of those vehicles, and their original base price.

Drivers' license fees and various other charges related to vehicle operation make up the balance of motor vehicle fees. Total revenues from motor vehicle fees are:

(In thousands)			
	1974-75 <i>Actual</i>	1975-76 <i>Estimated</i>	1976-77 <i>Estimated</i>
Registration, weight, and other fees	\$341,160	\$374,000	\$363,100
Vehicle license fees	323,294	370,000	415,000
Totals	\$664,453	\$744,000	\$778,100

Other Special Fund Revenue—\$257,800,000

For the most part, nontax revenue flowing to special funds represents regulatory fees on business and professions, charges for special services to designated groups and royalties from oil and gas production on state-owned land.

For the budget year, these revenues will total \$257.8 million compared with \$284.9 million in the current year. Actual receipts in 1974-75 were \$266.0 million.

¹ Includes the corporation income tax.

² Motor vehicle fuel tax (gasoline), use fuel tax (diesel and liquefied petroleum gas).

³ Registration and weight fees, motor vehicle license fees and other fees.

⁴ Repealed as of July 1, 1973.

* Beginning in 1966-67 most state revenues were placed on an accrual basis. Beginning with 1973-74, accounts receivable only are accrued.

† Estimated.

NOTE: Data are shown for 1966-67 on both bases in order to facilitate long-term comparisons.

LEGISLATIVE COUNSEL BUREAU

The objective of this activity is to provide the two houses of the Legislature and the Committees and Members thereof, legal assistance in resolving a large volume of complex legal problems arising in connection with the legislative process, all of which must be resolved within a critical time span. The legal services furnished include opinions, bill drafting, counseling, attendance as Counsel at meetings of committees of the Legislature, and representing the Legislature in litigation. The Attorney-Client relationship is maintained, and all work is confidential.

In addition, this office provides necessary indices and appropriate tables necessary to identify legislative measures, and compiles and indexes statutes and codes.

This office is continuing in the development of a processing system to permit utilization of data processing in bill drafting and other operations of this office. Ultimately it should provide a computer file consisting of a text of all codes which can be used in research by the various state agencies as well as bill drafting.

CALIFORNIA LAW REVISION COMMISSION

PROGRAM REQUIREMENTS	74-75	75-76	76-77	1974-75	1975-76	1976-77
California Law Revision Commission (General Fund)	7.9	8	8	\$220,673	\$248,489	\$256,087

Program Objectives and Description

The primary objective of the California Law Revision Commission is to study the statutory and decisional law of this state to discover defects and anachronisms and to recommend legislation to effect needed reforms.

The commission consists of a Member of the Senate appointed by the Committee on Rules, a Member of the Assembly appointed by the Speaker, and seven additional members appointed by the Governor with the advice and consent of the Senate. The Legislative Counsel is an ex officio nonvoting member of the commission.

The commission assists the Legislature in keeping the law up to date by intensively studying complex and controversial subjects, identifying major policy questions for legislative attention, gathering the views of interested persons and organizations and drafting recommended legislation for legislative consideration. The efforts of the commission permit the Legislature to determine significant policy questions rather than to concern itself with the technical problems in preparing background studies, working out intricate legal problems, and drafting needed legislation. The commission thus enables the Legislature to accomplish needed reforms that otherwise might not be made because of the heavy demands on legislative time. In some cases, the commission's study discloses that no new legislation on a particular topic is needed, thus relieving the Legislature of the need to study the topic.

At the 1975 session, two resolutions and 21 bills were introduced upon recommendation of the commission. Both of the resolutions were adopted; one bill was held over to the 1976 session; and three bills were held in committee. The 17 bills enacted in 1975 (which added, amended, or repealed approximately 750 sections) dealt with a wide variety of subjects: a new comprehensive eminent domain law was enacted and also bills relating to evidence, modification of contracts, unclaimed property, payment of judgments by local public entities, and out-of-court views by judge or jury.

The commission plans to submit approximately 10 recommendations to the 1976 session. Major topics now under active study include nonprofit corporations, enforcement of judgments, evidence, and child custody and adoption.

The commission may study only topics that the Legislature, by concurrent resolution, authorizes it to study. The commission now has an agenda of 22 topics, including five new topics added by the Legislature at the 1975 session.

COMMISSION ON UNIFORM STATE LAWS

In conjunction with other states, the commission drafts and presents to the Legislature uniform laws deemed desirable and practicable by the National Conference of Commissioners on Uniform State Laws. The commission is composed of four members appointed by the Governor, the Legislative Counsel as a member ex officio, and two legislators. The program is maintained at the same level as previously authorized. Provision is made for the attendance of the commissioners at meetings of the national conference, and California's contribution to the conference.

CONTRIBUTIONS TO LEGISLATORS' RETIREMENT FUND

Established in 1947, the Legislators' Retirement System provides retirement and death benefits for legislators, constitutional officers and legislative statutory officers. The state's contribution to the Legislators' Retirement System is an annual appropriation from the General Fund. In addition, the system is also financed through member contributions and interest earnings. Administration of the system is provided by the Public Employees' Retirement System.

SIGNIFICANT PROGRAM CHANGES

Chapter 655, Statutes of 1975 (AB 1636), provided for the costs of administration to be paid from annual appropriations from earnings of the Legislators' Retirement Fund and appropriated \$20,000 for the period of January 1, 1976 to June 30, 1976.

JUDICIAL

Article VI of the Constitution creates the Supreme Court of California and the Courts of Appeal to exercise the judicial power of the state at the appellate level, creates the Judicial Council of California to administer the state's judicial system and creates the Commission on Judicial Qualifications to consider complaints against judges.

Chapter 1006 Statutes of 1975 authorizes parties in specified civil cases to utilize arbitration as an alternative to a superior court trial, effective July 1, 1976. The estimated number of cases for the first fiscal year is 1,000. The proposed fee for the attorney arbitrator is \$150 per case which is to be a state expense.

The Judicial Council indicates that they will identify \$198,422 of the \$478,478 of current year savings to start a major relocation of the Council, Supreme Court, 1st District Court of Appeals and Commission on Judicial Qualifications in the State Office building in San Francisco. The Department of General Services will propose \$200,000 in fiscal year 1976-77 to complete the remodeling of these offices.

Present law provides that judges receive an automatic annual salary increase based upon increases in the Consumer Price Index. Legislation proposed in 1976 will terminate this automatic feature in law and permit annual legislative review of judges' salaries.

Judicial Council Special Projects—O.C.J.P. Grants

General Description

During the past several years, the Judicial Council has received grants of federal funds through the Office of Criminal Justice Planning (OCJP), the Office of Traffic Safety and directly from the Law Enforcement Assistance Administration to augment its services to state and local courts. These grants are for the purpose of funding studies and providing essential services designed to improve judicial administration. Accordingly, their focus has been on such key areas as calendar management, reduction of congestion and delay, improving the effectiveness of judicial procedures, training judges and nonjudicial personnel, improving management information systems, expediting trials, and judicial reorganization.

Applications for and acceptance of grant funds are made only after a careful assessment of each proposed project in terms of its relevance to judicial administration priorities, potential impact on the courts and enunciated Judicial Council goals.

Budget year expenditures of the California Center for Judicial Education and Research, and the Court Automation-Information System Coordinator projects were transferred to the General Fund and are not included in the totals shown below.

A schedule of past, current and proposed projects, along with man-years and expenditure information follows:

SALARIES OF SUPERIOR COURT JUDGES

The purpose of this budget is to provide the state's share of the salaries and health and death benefits for 520 superior court judges in 1975-76 and 522 in 1976-77. The budgeted expenditure for salaries does not exceed the state's share of the monthly salary rate effective on September 1, 1975 and provides for 19 additional judgeships authorized in 1975 legislation^a (at \$308,300 during 1975-76). The budgeted expenditure for health benefits includes the state's share of health benefits for those superior court judges enrolled in a state health plan. The level of expenditure may be affected by a recent Attorney General's opinion which states that superior court judges are eligible to participate under the Meyers-Geddes Act (state health plan) but not under county health insurance programs.^b Since this opinion has not been tested in court, it is unknown whether any change will occur during the budget year.

Present law provides that judges receive an automatic annual salary increase based upon increases in the Consumer Price Index. Legislation proposed in 1976 will terminate this automatic feature in law and permit annual legislative review of judge's salaries.

The following table shows the contributions by the state and by the county towards the salary of each judge as provided under Sections 68202, 68203, and 68206 of the Government Code as of September 1, 1975.

<i>Population of County</i>	<i>State Share</i>	<i>County Share</i>	<i>Total</i>
250,000 or more	\$35,799	\$9,500	\$45,299
40,001 to 249,999	37,799	7,500	45,299
40,000 or under	39,799	5,500	45,299

^a Two judgeships are authorized in the 1976-77 fiscal year.

^b Attorney General Opinion CV 75-82 dated September 30, 1975.

STATE BLOCK GRANT FOR SUPERIOR COURT JUDGESHIPS

The state block grant for Superior Court judgeships reflects state policy that, effective January 1, 1973, the state will provide a \$60,000 annual block grant for each new Superior Court judgeship created.

This block grant shall be deemed to be the full costs of the establishment of each new judgeship created but shall not diminish payment by the state pursuant to Sections 68206 and 75101 of the Government Code.

Past year total expenditures do not include \$120,000 which was available in Chapter 1298, Statutes of 1974, but never disbursed by the Controller. The allocation of these funds by the Controller is contingent upon a county resolution agreeing to absorb any costs in excess of the funds available in the chapter. To date such a resolution has not been enacted and therefore this is being reverted in the current year.

The 1976-77 budget act appropriation contains a block grant appropriation for each of 35 judgeships authorized since January 1, 1973. (One judgeship was authorized in 1973-74; fifteen in 1974-75; seventeen in 1975-76; and two in 1976-77.)

CONTRIBUTIONS TO JUDGES' RETIREMENT FUND

Program Objectives and Description

The Judges' Retirement fund receives contributions from the state in the amount of 8 percent of the salaries for the established judgeships of the justices of the Supreme Court, district courts of appeal and the superior and municipal courts. A like amount is deducted from the salaries of active justices and judges and deposited in the fund.

In addition, filing fees of \$3 from specified civil cases and investment income are used to help maintain the solvency of the retirement fund.

Section 75110 of the Government Code declares that the Judges' Retirement System shall be fully funded and actuarially sound on and after January 1, 2002. Based on proposed 1976 legislation, this budget reflects an increase to the judges' and state's contribution to the fund from 8 percent to approximately 15 percent effective January 1, 1977. This additional 7 percent will provide an increasing contribution amount each year as the judges' payroll increases.

Present law also provides that judges receive an automatic annual salary increase based upon increases in the consumer price index. Legislation will be introduced in 1976 to repeal this automatic feature in law and permit annual legislative review of judges salaries.

The budget provides contributions for the following numbers of judges by type of court:

Type of Court	Number of Judges		
	1974-75	1975-76	1976-77
State Operations:			
Supreme	7	7	7
Appellate	51	56	56
Local Assistance:			
Superior	503	520	522
Municipal	407	427	429

NATIONAL CENTER FOR STATE COURTS

The National Center for State Courts was established in 1971 to act as a focal point for judicial reform; to serve as a catalyst for setting standards for fair and expeditious judicial administration; and to find and disseminate answers to the problems of state judicial systems. The National Center consists of a headquarters office which is located in Denver, Colorado ^a and six regional offices. (One of which is located in San Francisco, California.) The National Center is funded through grants from the Law Enforcement Assistance Administration with the necessary cash match provided by donations from private foundations and more recently from state membership fees. California's membership fee of \$14,000 was set by the Centers' Board of Directors, as in all states, on the basis of population and represents approximately 7% of the total state fees requested.

In return for membership fee payment, each state will receive basic services provided by the National Center including copies of current publications of its research and study teams; short-term consultative services; responses to requests for information hard to get elsewhere; judicial salary reports; and various states views on federal legislation and other national programs affecting the judicial system.

Governor's Office SECRETARY FOR AGRICULTURE AND SERVICES

The Secretary for Agriculture and Services provides communication, coordination, and policy guidance between the chief executive and departments within the agency and is the "conglomerate" agency of state government. The Secretary has the power of general supervision over, and is directly responsible to the Governor for the operation of Department of Food and Agriculture, the Department of Industrial Relations, the Department of Consumer Affairs, the Department of Veterans Affairs, the Department of General Services, the Office of the State Fire Marshal, the Franchise Tax Board, the State Personnel Board, the Public Employees' Retirement System, the State Teachers' Retirement System, the Museum of Science and Industry, and the California Public Broadcasting Commission.

In addition to these powers and duties, the Secretary is responsible for administering the state plan for the development and enforcement of occupational safety and health standards (Cal/OSHA), and the Intergovernmental Personnel Act Advisory Council. The Secretary has also been designated liaison between the Governor and the Agricultural Labor Relations Board.

In addition to powers of supervision over the departments, the Secretary functions as an adviser to the Governor, a communications link between the Governor and the departments, a coordinator of the activities of these departments and other units of government, and a member of the Governor's Cabinet.

The Agriculture and Services Agency Secretary has been the administration's representative in the "meet and confer" process with state employee organization representatives for the past several years. These functions were transferred to the Office of Employee Relations in the Governor's Office during 1975-76, and handled these as a reimbursement for 1975-76 resulting in a reduction of 4 positions in the Secretary's Office.

Authority

Government Code, Sections 12800 and 12804.

Governor's Office SECRETARY FOR BUSINESS AND TRANSPORTATION

The Secretary of Business and Transportation is a member of the Governor's Cabinet and the personal advisor to the Governor on policies and programs relative to transportation and business regulatory activities. The Agency consists of the following departments:

- The California Highway Patrol
- The Department of Motor Vehicles
- The Department of Transportation
- The Office of Traffic Safety
- The Department of Banking
- The Department of Corporations
- The Department of Housing and Community Development
- The Department of Insurance
- The Department of Real Estate
- The Department of Savings and Loan
- The Housing Finance Agency

Also within the Agency is the Teale Data Center and the California Job Creation Board.

Governor's Office SECRETARY FOR HEALTH AND WELFARE

The Health and Welfare Agency provides the basic "people" services for the state's health, employment and welfare programs. It is also responsible for the state's correctional activities for both juveniles and adults. The Secretary of the Agency insures coordination among six departments of: Benefit Payments, Corrections, Employment Development, Health, Rehabilitation, and Youth Authority and Offices for Aging, Narcotics and Drug Abuse and Alcoholism. A Governor's Reorganization Plan will propose the merger of the Office on Alcoholism with the Department of Alcoholic Beverage Control within the Health and Welfare Agency in order to give new impetus to problems of alcoholism.

The Secretary for Health and Welfare provides a focal point for major policy and program formulation in health and welfare matters for millions of California's citizens. Approximately 50,000 employees work in the departments of the agency administering programs with a combined budget total in excess of \$10 billion in state, federal and county funds.

The Health and Welfare Agency will be involved with several new programs in the current and budget years, the most important of which are Special Assistance to Children's Programs and Rural and Migrant Affairs. Special Assistance to Children's Programs includes a new local assistance item which will make available \$14,488,000 to the Agency Secretary. The Secretary will contribute this amount toward expanding, continuing or creating new services for children. The Secretary will also be providing leadership for the State's numerous activities involved with Rural and Migrant Affairs coordinating efforts so that expenditures will bear on problems of rural life. Both of these programs are displayed elsewhere in the budget.

The Agency will administer Chapter 1063, Statutes of 1975, which mandates the development of a pilot program to train displaced homemakers. An EDP Feasibility Study and Implementation Task Force will operate during the current and budget years, scheduled to analyze and plan for Agency EDP needs for the next five years. Five new positions are proposed for this purpose to be funded by reimbursements from the responsible departments and offices.

The Agency is administratively establishing one Senior Stenographer position for support operations during the 1975-76 fiscal year and is proposing to continue this position during the budget year.

Governor's Office SECRETARY FOR RESOURCES

The Secretary for Resources assists the Governor in establishing objectives of the administration and in formulating programs and policies governing the acquisition, development, and utilization of resources to obtain these objectives. Towards this goal the Secretary strives to ensure the protection and balanced management of California's natural resources and environment.

The Resources Agency consists of the Departments of Conservation, Fish and Game, Navigation and Ocean Development, Parks and Recreation, and Water Resources, the State Lands Division, the Air Resources Board, the Colorado River Board, the San Francisco Bay Conservation and Development Commission, the State Reclamation Board, the State Water Resources Control Board, the nine regional water quality control boards, the Solid Waste Management Board, the Energy Resources Conservation and Development Commission, and Special resources services and studies.

The Secretary is responsible for communicating the Governor's policies and program objectives to the organizations within the Resources Agency, and for advising the Governor on major policy and program considerations relative to the Resources Agency. The Secretary represents the Governor in the coordination of Resources Agency programs, and in relations with other state, federal and local jurisdictions.

This budget provides for the addition of twelve positions to the Secretary for Resources staff for the general purpose of improving coordination and cooperation among the Resources Agency departments, with other governmental agencies, and with the Legislature. These positions will also provide specific assistance to the Secretary in programs recently assigned to the Resources Agency, such as the Energy Commission, and in program areas which have been relatively neglected in the past. These latter program areas include the coastal zone, the Tahoe region, land use generally, wilderness and public lands, and the Indian's rights on public lands in particular. Six of these positions were established administratively during the current year, and they were financed by reimbursement received from operating departments within the agency. These reimbursable contracts will terminate as total staff requirements for the Secretary are being funded directly in this budget for 1976-77. In addition, the Secretary will be responsible for developing policy direction and providing leadership in the proposed new California Conservation Corps for 1976-77.

Program Objectives and Description

The objectives of this program are: to provide comprehensive information services to the public and the news media concerning the programs, services and other activities of state government; to coordinate information activities of the various agencies and departments to ensure that the information system is fully responsive to public and news media needs and desires for information; to provide common services wherever possible to avoid costly duplication and waste; to continually upgrade the professional skills of state information officers; to advise and assist department administrators and information officers on problems concerning communications with the public, the news media and state employees.

The office provides: (a) a convenient point of contact in Southern California for news organizations seeking information about all agencies and activities of state government; (b) a consolidated service to all radio stations in the state, providing news releases furnished by departments as tape recorded statements suitable for broadcast, but avoiding political statements, controversial materials or advocacy statements; (c) professional development opportunities through workshops and other methods for state information officers; (d) coordination services on the acquisition and uses of video for information purposes among agencies and departments; (e) information program planning, evaluation and problem-solving services for department administrators and their information officers.

A study is currently underway to determine the continuing structure of the Office of Information Services. Pending such review, specifically budgeted positions are not included in this budget and the equivalent dollars and position count are shown as temporary help.

Authority

The Office of Information Services was established by Executive Order 39-73 of the Governor.

Governor's Office OFFICE OF EMPLOYEE RELATIONS

Program Objectives and Description

The objective of this program is to assume those functions previously assigned to the Secretary of Agriculture and Services Agency under Executive Order R-25-71. The office functions include: meeting and conferring with employee organization representatives concerning salary and benefits, representing the Governor in all matters concerning state employer-employee relations, and developing future state policies and procedures designed to improve employer-employee relations.

The Office of Employee Relations in the Governor's Office was established on October 10, 1975, by an executive order of the Governor. Funds for the remainder of the 1975-76 fiscal year are being reimbursed by the Agriculture and Services Agency. Funds for the 1976-77 fiscal year will be appropriated to the Office of Employee Relations, with a related decrease in the budget of the Agriculture and Services Agency.

Authority

Executive Order B-7-75 of the Governor.

Governor's Office OFFICE OF PLANNING AND RESEARCH

In creating the Office of Planning and Research (OPR) the California Legislature declared that the future growth of the State should be guided by an effective planning process and should proceed within the framework of officially approved statewide goals and policies directed to land use. It was also the expressed intent of the Legislature that OPR have primary responsibility for developing land use policies and for assuring orderly operation of the process of environmental policy development and implementation within state government.

The Office of Planning and Research serves the Governor and his cabinet for long-range planning and research and coordinates the environmental planning activities of other State agencies and departments. The primary responsibilities of the office are to: (1) assist in developing long-range goals and policies for land use in the State of California; (2) assist in the orderly preparation of functional plans by state departments for the protection and enhancement of the State's environment; (3) evaluate functional plans and programs of State departments to identify conflicts, recommend new state policies and actions to resolve conflicts, and advance statewide environmental goals; (4) assist the Department of Finance in preparing an integrated program of priority actions to implement state functional plans and to achieve environmental goals and objectives; (5) prepare and revise a comprehensive State Environmental Goals and Policy Report for the Governor; (6) provide financial and technical assistance to local governments and native American communities to improve local planning and management capabilities; (7) operate the State Clearinghouse which manages the review of federally funded state plans, federal grant projects, and environmental impact reports.

To fulfill these responsibilities, OPR has divided its activities into five program areas: Plan and Policy Development, Planning Evaluation and Review, Local Planning Assistance, Research, Executive and Administration.

Authority

I. PLAN AND POLICY DEVELOPMENT

Program Objectives and Description

The State Planning effort of OPR is currently focused on the development of an Urban Growth Policy for the Administration.

The Urban Growth Policy will be presented to the Governor in the spring of 1976. It will form the basis for recommended administrative and legislative actions to achieve better land use goals in and around California's urban areas. This policy will be presented to the Legislature upon approval by the Governor.

OPR's State planning efforts in 1976-77 will be to: 1) prepare a Rural Development Policy; 2) based on the current year's needs analyses, establish a coordinated environmental data base consisting of existing information to be used to assist State, local and public decision-makers; 3) analyze and develop recommendations for revising the local planning law.

c. Pass-through to other state agencies.....	-	-	-	147,220	115,000	120,000

II. PLANNING EVALUATION AND REVIEW

Program Objectives and Description

The objective of this program is to make recommendations to the Governor, the Department of Finance, and other state agencies, on the effectiveness of selected plans, programs, and projects in meeting the State's statutory goals and administrative policies. The intent is to make short term plans and programs consistent with longer term objectives.

OPR is responsible for evaluating and coordinating the review of selected 1) state plans, 2) state programs, 3) projects, and 4) environmental documents filed under National Environmental Protection Act (NEPA) and CEQA.

During the current year, OPR is 1) evaluating various plans including the Coastal Plan, Transportation Plan, Water Quality Plan, Air Quality Maintenance Plan (AQMP), 2) analyzing the effectiveness of the California Environmental Quality Act (CEQA) and making recommendations on state and local procedures, 3) preparing analyses and recommendations on State departments permit granting procedures, 4) preparing regular reports for the Department of Finance on expenditures of federal funds by state agencies, and 5) coordinating state review of 2,200 environmental documents and 6,000 federal grant requests, and 6) preparing analyses of selected environmental documents.

**Governor's Office
OFFICE OF PLANNING AND RESEARCH—Continued**

In 1976-77 fiscal year, OPR will 1) continue to evaluate and coordinate the review of state plans, programs, projects, capital outlay, federal grant applications, and environmental documents against existing goals and policies including the State's Urban Growth Policy, 2) implement recommendations of the Urban Growth Study, 3) implement recommendations of the CEQA study and the permit study, 4) implement recommendations of the State plan evaluations, 5) analyze, make recommendations and coordinate executive review of selected significant environmental documents, and 6) make reports as necessary to the Department of Finance.

1. Evaluate plans, programs and projects which implement state policies, resolve identified conflicts						
2. Coordinate State agency review of environmental documents—federal grant requests						
b. Implement urban growth policy recommendations—set priorities for State capital outlay expenditures	—	2	1.5	—	43,732	29,577
c. Implement Calif. Environmental Quality Act evaluation recommendations—assist State and local agencies to revise existing procedures	—	4	1.5	—	87,465	29,549
d. Implement permit procedures evaluation, recommendations—assist State agencies to cut red tape in issuing permits	—	3	1.5	—	65,599	29,486
e. Analyze selected environmental documents—select and coordinate executive review, review environmental documents on projects of major significance	—	0.5	1.5	—	10,933	29,453

III. LOCAL PLANNING ASSISTANCE

Program Objectives and Description

The Local Planning Assistance program administers Housing & Urban Development "701" grants to local jurisdictions and Indian Reservations and provides technical, advisory, and information services to local officials, planning staffs, and public administrators. In FY 1975-76 OPR is funding 56 cities, counties, Councils of Government, and Indian Reservations for a total of 2.7 million. In addition, the General Plan Element Guidelines, adopted in 1973, are being updated and guidelines for the optional Historic Preservation Element are being prepared in accordance with Chapter 1267, Statutes of 1974 (SB 2309). A report on "701" projects funded in the past is being prepared to apprise local jurisdictions in California of information which may be used in their localities. A brief survey of the status of local planning in California is also being conducted. A demonstration Integrated Grant for the Sacramento Regional Area Planning Commission has been successfully implemented.

In 1976-77 Community Assistance anticipates funding a similar number of jurisdictions as in 1975-76 and conducting an update of the local planning survey. The Community Assistance staff will seek to initiate demonstration projects with local jurisdictions which have significance for more than one locality. These will include projects in the areas of energy conservation, coastal planning, historic preservation, housing and growth management. Special studies (IPA) in the areas of local government problems will be undertaken as in the current fiscal year.

In accordance with Executive Order B4-75 the Intergovernmental Personnel Act of 1970 function was transferred under the Agriculture and Services Agency. This program has kept 3 positions funded by contract in the current year budget to aid it in the transition of the program.

IV. RESEARCH

Program Objectives and Description

The Research function is responsive to special research needs of the Governor and Cabinet and serves as a coordination office for research activities in the Executive branch. OPR is concentrating its research efforts on definition and solution of selected priority problems for the Administration. OPR's legislative analysis function is also part of the research program. Research projects now in progress include: 1) analyzing and developing the Administration's position on the Outer Continental Shelf; 2) analyzing and developing the Administration's position on the 160 acre limitation relating to the sale of federal water, and 3) analyzing and preparing recommendations on how to improve the State's response to California Indian problems.

Research activities in FY 1976-77 will be determined by the Governor, Cabinet and Director of OPR as issues arise. It is anticipated some activities currently underway will continue into next fiscal year. Legislative analysis will be prepared on bills assigned by the Governor and initiated by the office in the areas of local government, planning and environment.

V. EXECUTIVE AND ADMINISTRATIVE

Program Objectives and Description

The Executive Office consists of the Director and Deputy Director. It directs staff efforts, works with the Governor and Legislature, and local, State and federal officials on matters of concern to the office and Administration.

The Administrative function provides the general management and staff support services for the Office which include: personnel, purchasing, budget preparation and control, and other office services.

Governor's Office OFFICE OF EMERGENCY SERVICES

The principal objective of the Office of Emergency Services (OES) is the coordination of emergency activities to save lives and reduce property losses during disasters, and to expedite recovery from their effects.

On a day-to-day basis, OES provides leadership, assistance, and support to state and local agencies in planning and preparing for the most effective use of federal, state, local, and private sector resources in emergencies. This emergency planning is based upon a system of mutual aid, in which a jurisdiction relies first on its own resources, then calls for assistance from its neighbors. OES plans and programs are coordinated with those of the federal government, other states, and the state agencies and political subdivisions of California.

OES functions as the immediate staff and coordinating organization of the Governor to carry out the state's responsibilities under the Emergency Services Act and applicable federal statutes and it acts as the conduit for federal assistance through natural disaster grants and federal agency support.

Authority

Government Code, Section 8550 et. seq.

SUMMARY OF PROGRAM REQUIREMENTS

	1974-75	1975-76	1976-77

I. EMERGENCY MUTUAL AID SERVICES

Program Objectives and Description

This program's objective is to achieve and maintain operational readiness at all levels of government, including provision and effective use of federal, state, and local resources by and for the benefit of jurisdictions whose resources and services are overextended in a disaster situation.

Program Requirements	74-75	75-76	76-77	1974-75	1975-76	1976-77
Continuing program cost	101.2	73.4	65.1	\$17,686,238	\$28,706,379	\$33,628,799
Workload adjustments	-	25.4	12.2	-	531,412	440,675
TOTALS, EMERGENCY MUTUAL AID SERVICES	101.2	98.8	77.3	\$17,686,238	\$29,237,791	\$34,069,474
General Fund				1,952,624	1,959,695	1,721,493
Federal funds				1,721,355	1,530,780	1,422,212
Federal funds (local assistance)				13,306,117	25,327,925	30,866,122
Reimbursements				706,142	419,391	59,647

Program Elements

a. Provision and coordination of mutual aid	22.5	26	27	\$13,908,698	\$26,084,892	\$31,636,266
b. Development and utilization of emergency communications systems	18	20	15	1,416,283	1,089,005	988,843
c. Development and implementation of emergency plans	49.2	39.6	26.7	1,419,563	1,214,947	865,198
d. Management and maintenance of state mutual aid resources	11.5	13.2	8.6	941,694	848,947	579,167

a. Provision and Coordination of Mutual Aid

OES maintains fallout protected emergency operating centers at its headquarters and in each of four mutual aid regions. These operating centers are the focal points through which emergency information is disseminated to affected areas, operations coordinated, mutual aid assistance provided, and intelligence gathered for the Governor and his staff.

In addition to various communications facilities, specialized equipment is prepositioned throughout the state, to be made available to local governments in support of mutual aid agreements.

OES administers federal programs that provide funding for disaster relief and contributions for civil defense equipment and personnel and administrative expenses. OES also coordinates the federal surplus and excess property programs for local emergency organizations. The organizational units which manage these programs are being consolidated for more efficient use of personnel.

Ch. 290, Stats. 1974, placed the administration of the Natural Disaster Assistance Act with the Director of OES, as well as creating the Natural Disaster Assistance Fund in the State Treasury and abolishing certain other funds. (See page 163).

Two positions are being transferred in the budget year from the Department of Health to coordinate emergency medical mutual aid at the regional level. In addition one position is being continued in the Firescope Contract and two positions are being reduced in the Emergency Assistance Programs Division.

Output	1974-75	1975-76	1976-77
Mutual aid equipment resources dispatched (fire, rescue, law enforcement, and communications)	4,893	5,150	5,237
Law enforcement intelligence (interviews, exchanges, and direct liaison)	3,000	3,000	3,000
Federal matching funds for personnel and administrative expenses: federal funds disbursed	\$2,462,610	\$3,386,391	\$3,676,725
Federal contributions for civil defense equipment and training: federal funds disbursed	\$675,365	\$1,608,950	\$1,689,397
Federal surplus property for civil defense purposes: acquisition cost of property donated	\$7,439,195	\$9,500,000	\$8,500,000
Federal disaster relief: federal funds disbursed	\$10,168,142	\$20,332,584	\$25,500,000

**Governor's Office
OFFICE OF EMERGENCY SERVICES—Continued**

Input	74-75	75-76	76-77	1974-75	1975-76	1976-77
Expenditures.....	22.5	26	27	\$13,908,698	\$26,084,892	\$31,636,266

b. Development and Utilization of Emergency Communications Systems

The federal National Warning System (NAWAS) extends to the California terminal at OES headquarters, and to 31 key warning points throughout the state. Interstate emergency communications are also provided through the federal Defense Civil Preparedness Agency's national radio communications equipment.

At the state level, a local government radio system using state microwave facilities provides a communications tie with local governments and selected state agencies for primary direction and control purposes in disaster situations; a fire services radio network provides an emergency communications system for interdepartmental fire communications during mutual aid operations; the intercity law radio network serves as a backup for the NAWAS and for the Department of Justice California Law Enforcement Telecommunications System; a private line teletype system interconnects six of the OES regional operating centers, the Governor's Emergency Operating Center, and OES headquarters; and a second closed teletype system provides interagency communications between the Department of Justice, Military Department, Highway Patrol, Governor's Office, and OES.

Replacement of the law enforcement mutual aid communications net which started in 1973-74, will be completed during fiscal year 1975-76. Five positions were abolished in the budget year to reflect cancellation of the Law Communications Network Program which is funded by OCJP.

Output

State Warning System:	1974-75	1975-76	1976-77
Counties being served	54	54	54
Local Government Network:

Mutual aid regions where OES has operational capability	6	6	6

Input	74-75	75-76	76-77	1974-75	1975-76	1976-77
Expenditures.....	18	20	15	\$1,416,283	\$1,089,005	\$988,843

c. Development and Implementation of Emergency Plans

This element's objectives are to review and revise the Governor's orders and regulations, the state emergency plan and supporting plans, and community emergency plans; to assist state agencies and local governments in the preparation of emergency plans to ensure consistency in planning at all levels of government; to maintain and update emergency operating manuals and assist in the preparation of subject matter for training courses and test exercises; and administration of the Dam Safety Act, Ch. 780, Stats. 1972.

OES received a \$250,000 federal grant on August 1, 1975, extending over 30 months to revise the emergency plan, develop legislation which will allow California to implement new federal programs, and to improve our capability to assist local jurisdictions.

This program element was reduced by a net of 12.9 positions in the budget year. The dam safety and earthquake study elements were reduced 3.8 positions, 4.4 were discontinued in the Radiological Instrument Maintenance Contract, 1.8 positions were abolished in the Community Shelter Program contract, 4 positions were abolished in the Communications Resources Assessment for California Law Enforcement Contract and 0.7 were abolished in the Federal Financial Assistance and Firescope programs. 1.8 positions were added to the Disaster Planning Program.

Output

Changes in state government organization and other factors require continual revising of the State Emergency Plan, and supporting plans and the Governor's executive and administrative orders to state departments. A biennial review of local plans and annexes for compatibility with the state plan is also required. Approximately 460 plans or orders are written, revised, or reviewed each year.

Dam Safety Program (Ch. 780, Stats. 1972):	1974-75	1975-76	1976-77
Inundation maps submitted and processed	227	254	47

Expenditures.....	49.2	39.6	26.7	\$1,419,563	\$1,214,947	\$865,198

d. Management and Maintenance of State Resources

The state has procured a stock of emergency equipment which has been prepositioned throughout the state. In addition to installed communications equipment, this includes fire pumpers, communications vehicles, portable radio transceivers, police support equipment, and portable aluminum water pipe.

The state also maintains and controls a stock of federally provided radiation detection equipment strategically positioned throughout the state. *The fire pumper replacement program is to be completed in the budget year by acquisition of three new pumper units at \$64,000 each.*

The number of positions in this program element are reduced by 4.6. 4.4 positions in the Radiological Instrument Maintenance Contract were abolished and 0.2 clerical positions were transferred to the Earthquake Study in Region II.

Governor's Office
OFFICE OF EMERGENCY SERVICES—Continued

Output

This program includes continuing inspection, inventory, and maintenance of prepositioned fire and law enforcement equipment, as well as servicing and exchange each year of about one-third of the over 15,000 radiation detection instrument kits on loan to federal, state, and local agencies. The fire pumper replacement program is to be completed this budget year by acquisition of three new fire pumper units at \$64,000 each.

Expenditures.....	11.5	13.2	8.6	\$941,694	\$848,947	\$579,167

II. ADMINISTRATION**Program Objectives and Description**

Achievement of the overall objectives of OES requires a systematic process of program development, management, and direction. This includes leadership and policy determination in the conduct of emergency activities throughout the state; internal guidance and control in management of the agency's functions; and office services and administrative support for day-to-day operations.

Two organizational units are grouped under this program: (1) Executive: responsible for adoption of departmental policy, direction of ongoing programs, organizational administration, and public information; and (2) Personnel and Office Management: personnel, fiscal administration, accounting, and office services. A modest program to replace and upgrade office equipment is being continued.

Positions (0.6) are added during the current year for a WIN-COD contract which is limited to the 1975-76 fiscal year. The number of positions in this program are reduced by 1.4 in the budget year to reflect abolishment of 1 steno in the Executive Office, 0.6 Assistant Clerk position in the Fiscal and Administration Division, and the addition of 0.2 man-year in the Fiscal and Administration Division to make the Junior Staff Analyst position full time.

OFFICE OF THE LIEUTENANT GOVERNOR

The Lieutenant Governor becomes Governor when a vacancy occurs in the office of the Governor. He is President of the Senate. He provides leadership in the administration of programs assigned to him by statute and administrative directive.

PROGRAM REQUIREMENTS

	1974-75	1975-76	1976-77
Office of the Lieutenant Governor (<i>General Fund</i>)	\$490,833	\$551,276	\$607,269
Personnel man-years	21.8	22	22

SIGNIFICANT PROGRAM CHANGES

Description	Dollars
Reimburse Highway Patrol for officer assigned to Lt. Governor.....	\$26,000

Program Highlights

The work of the Office falls into four categories:

- (1) General government functions
- (2) Staff support to the Lieutenant Governor as a member of statutory boards and commissions
- (3) Public assistance
- (4) General office services

Program Objectives and Descriptions

The Lieutenant Governor has vowed to help make state government more meaningful and more attentive to the needs of all of California's citizens, and to help bring its diverse groups together.

Most of the attention and focus of the office is being directed toward jobs programs, economic development, efforts to define or examine the need for future economic goals and paths for the State of California, to help avoid the boom-and-recession cycles of the past.

A total of \$26,000 is being added to the Lieutenant Governor's budget in order to reimburse the Highway Patrol for all expenditures incurred by assignments to the Lt. Governor.

Boards and Commissions

The Lieutenant Governor serves on the three-member State Lands Commission which oversees leasing and control of millions of acres of state-owned land, including the vital offshore oil resources. He is Chairman of the State Economic Development Commission which is responsible for proposing over-all economic plans and approaches for California's future. He heads the Commission for the Californias, an organization of California and Mexican citizens devoted to improving cultural and economic ties and goodwill between California and Mexico.

He also serves on other boards and commissions handling state problems such as land use planning, interstate cooperation and disaster preparation. He serves on the Board of Regents of the University of California and on the Board of Trustees of the State College and University system.

He also handles special assignments and special tasks as assigned by the Governor.

Authority

Constitution, Article IV, Section 6; V, 9, 10; IX, 9. Government Code Sections 8000, 8575, 8700, 13502; Education Code, Section 22600; Motor Vehicle Code, Section 2600; Public Resources Code, Section 6101, Governor's Executive Orders.

COMMISSION OF THE CALIFORNIAS

PROGRAM REQUIREMENTS

	1974-75	1975-76	1976-77
Commission of the Californias (<i>General Fund</i>)	\$50,862	\$65,073	\$68,983
Personnel man-years	2	2	2

Program Objectives and Description

The objective of the Commission of the Californias is to cooperate with Mexican delegations from the State of Baja California and also the State of Baja California Sur in the development of mutually beneficial in the areas of: (1) agriculture and livestock—its growth and development (2) economic plans and projects (3) U.S.-Mexico-California tourism (4) bilingual education (5) social and cultural affairs (6) environmental protection and (7) drug abuse.

A major organizational principle is to promote the mutual development of the three governmental entities to allow development of their human, technical, cultural and economic resources by improving goodwill, coordination and working relationships among the three Californias. Further, the Commission has developed a high degree of cooperation on official government levels with the Governors of Baja California and Baja California Sur as well as with Mexican Federal Agencies headquartered in Mexico City.

The Commission has proposed the following activities for fiscal year 1976-77 which complements the Commission's objectives:

The compilation of laws, rules, and regulations regarding immigration and customs as pertains to hunting, small boats and yachts.

The development of a Border Region Economic Plan that takes into account such matters as low cost housing, the use of solar energy, cattle breeding, bilingual communications, and the cultivation of plants that produce a substitute for whale oil and synthetic rubber. These and similar projects are being looked at in terms of producing meaningful employment along the border region.

The development of an international center for the study of marine biology in cooperation with United Nations' efforts.

Improved U.S. Customs procedures for Mexicans entering California and U.S. citizens entering Mexico.

Support and cooperation for the development of the Peninsula's ten new national parks as well as the protection of geological and fossil deposits.

Authority

Government Code, Chapter 8, Division 1, Title 2.

Output

Restructured committee membership as well as re-definition of goals and objectives.

Assisted and supported the opening of new border gates along the Mexico-California border.

Researched and reported on the feasibility of a border region economic plan.

Organized a Border Cities Conference, setting up priorities for action by local and state governments from both sides of the border.

The Commission has continued to pursue and monitor various programs established in prior fiscal years. Examples of these programs can be described as follows:

Established a viable search and rescue operation on Baja Peninsula to aid Americans traveling by plane, boat or automobile. Provided ambulances and an emergency radio network (hot line) for the peninsula.

Eased clearance requirements for exportation of remains of U.S. citizens who die in Mexico.

Eased restrictions on charter and private aircraft flying into Baja California and generally improved and standardized airfield facilities and runways.

Aided in the establishment of a committee to coordinate the development and preservation of the ecology of the Baja Peninsula.

Updated a compilation of U.S., California and Mexican drug laws, earlier published as a result of Commission work. Currently, the Commission's drug abuse committee continues as one of its most active.

Assisted in gaining approval for further extension of a program for exchange of teachers and administrators between California and Mexico, initiated by the Commission in earlier years.

DEPARTMENT OF JUSTICE

The Department of Justice, through the constitutional office of the Attorney General, as the chief law officer of the state, has the responsibility to ensure the uniform interpretation and enforcement of the laws and to represent the state in civil and criminal proceedings. The Attorney General represents the people of the State of California in all matters before the appellate and supreme courts of the state and of the United States. The Attorney General is the legal representative of all beneficiaries of property dedicated to charitable purposes.

The objectives of the Department of Justice are as follows: To provide skillful and efficient legal and investigative services in assuring that all state laws are adequately and uniformly enforced and in providing assistance to district attorneys in the administration of justice and in serving as legal counsel for state officers, boards and commissions; to eliminate fraudulent, unfair and illegal activities from all phases of public activities and to enforce compliance with legal requirements; to provide identification, criminalistic, informational, investigative, statistical, and communication services to agencies administering criminal justice and to suppress the traffic in narcotics and dangerous drugs.

II. Law enforcement		431.2	8,680,967
III. Administration		23.3	539,897

I. LEGAL SERVICES

Program Objectives and Description

The Department of Justice, under the direction of the Attorney General, provides legal advice, assistance in representation for and to the various state departments, boards and commissions. The department represents the state on all criminal matters before the appellate and supreme courts. It investigates and assists local agencies in prosecution of investment frauds and business crimes; registers and reviews all charitable trusts; enforces antitrust laws; assists in protection of the public from fraudulent and unethical practices and investigates complaints of discrimination in order to ensure the constitutional rights of all individuals.

The program's primary objective is to maintain uniform and adequate enforcement of the laws of the state and protection of the citizens' interests by providing skillful and efficient legal services:

Authority

d. Grant projects	2	-	-	259,949	372,500	-

Workload adjustments in the current year include a one-time adjustment of four man-years in civil law and two man-years in special operations for reimbursed legal services to client agencies. One man-year has been added in criminal law for parent locator services to the Department of Benefit Payments. Two man-years are reduced from Grants.

The budget year reflects a reduction of five man-years from special operations for prepaid health plan enforcement which function has been transferred to the Department of Corporations pursuant to Chapter 941, Statutes of 1975 (Assembly Bill No. 138).

DEPARTMENT OF JUSTICE—Continued

a. Civil Law Element

Five attorney positions and supporting clerical staff are proposed for 1976-77 for workload increases in Civil Law. Eleven attorney positions are reduced to match available Consumer Affairs Department legal services funding.

Professional and Vocational Licensing

The professional and vocational licensing administrative law section represents each of the 30 licensing agencies within the Department of Consumer Affairs and also represents the Department of Health on certain matters. This representation includes the issuance of formal and informal opinions, the analysis of files sent by clients to determine if a cause of action is presented, the prosecuting of administrative trials, and the representation of the client agencies on writs of mandate, injunctions and declaratory relief action in superior court and in the courts of appeal and the Supreme Court of California seeking compliance with regulatory laws of these agencies, as well as appearing for such agencies in the municipal court and in the federal court system, when the need arises.

Public Licensing Section

The public licensing section provides court representation, formal and informal legal opinions and general advice to state agencies in the fields of liquor regulation, vehicle sales and registration drivers' licenses, horse racing board matters, real estate concerns, civil service law and discipline.

This section also represents those agencies which are concerned with employee-employer relationships such as State Personnel Board, Department of Industrial Relations, Public Employees Retirement System and State Teachers' Retirement System. Because most of the work of these agencies centers about administrative law problems, this section also represents the state college system, the Commission for Teacher Preparation and Licensing and the California Community Colleges.

Business Law Section

This section provides legal advice for and represents in litigation those departments administering laws designed to protect the public in their business transactions and the safekeeping of their funds. These departments are the Departments of Insurance, Banking, Corporations, Real Estate, and Savings and Loan. In many instances, the litigation is complex, time consuming, involves many millions of dollars, and concerns the interests of thousands of investors.

This section also carries out the Attorney General's responsibility for maintaining a continuing investigation of statewide business frauds and assisting district attorneys in the prosecution of persons engaged in fraudulent business schemes. This area of concern relates to investments in real estate developments, franchises, securities, syndications, and generally the efforts of promoters to secure funds from unsophisticated investors. Where possible, the Attorney General seeks to recover these funds for the defrauded investors.

Government Law

The Government Law section acts as counsel for a variety of clients including the Governor, Lieutenant Governor, Secretary of State, Controller, Treasurer and the Director of General Services as to matters which do not fall within the expertise of the department's sections. It prepares legal opinions, formal and informal, and provides day-to-day legal advice to these clients and to members of the Legislature and civil counsel pursuant to Government Code, Section 12519 for the 58 California counties. In addition to handling litigation not involving the specific duties of other sections, the government law section has expertise in and handles construction contract litigation and election matters.

Public Welfare Law

This section provides legal services to the state agencies concerned with health, education and welfare: the agencies that spend the bulk of the tax dollars. Services include extensive litigation in federal and state trials and appellate courts, administrative proceedings, written opinions, informal advice, drafting or approving proposed legislations and regulations. Litigation includes complex constitutional issue of national importance. The section's successful defense of these actions has saved the state over a billion dollars.

Tax Law

The tax law section protects state revenues by representing state taxing agencies in collection actions as well as in refund matters in which the validity or application of a tax statute is challenged. Some of the refund actions involve millions of dollars in state revenues. This section is also involved in the property tax field in advising the State Board of Equalization as well as in advising county legal representatives. Advice on tax matters to the legislature, state agencies and appropriate county officials is often rendered.

Tort and Condemnation Section

This section is responsible for the preparation for trial and trial or settlement of (1) tort actions filed against the state or its employees except those actions involving highways or vehicle accidents covered by insurance of state-owned vehicles, (2) condemnation matters for the principal departments of the state except for the Department of Transportation, and (3) actions against the state for damage to property, such as inverse condemnation actions. Most of the trial work is jury trial work. Appellate work is also handled. The section supervises investigations, renders advice to the State Board of Control and makes appearances before that board in connection with claims filed against the state.

This section defends the Subsequent Injuries Fund. It is also charged with the responsibility of representing the state in the "Death Without Dependents" Program, a program which seeks to collect for the state those workmens' compensation benefits when a workman dies without dependents as a result of an industrially caused death.

b. Criminal Law Element

Seven attorney positions and related clerical staff are proposed for Criminal Law to accommodate increased writs and appeals workload. Six positions are proposed for the Parent Locator Service with costs to be reimbursed on a 75 percent basis through the Department of Benefit Payments. One position for the Legal Information for Law Enforcement program is proposed on a reimbursement basis.

The Criminal Law Division carries out the Attorney General's duty to represent the prosecution on all appeals filed by defendants in criminal cases in the courts of appeal and the Supreme Court of California. The division also represents the state and its officers in actions in both federal and state trial and appellate courts in which writs of habeas corpus, mandate, prohibition and coram nobis are sought by prisoners or defendants in criminal cases. When the United States Supreme Court grants review in any of these cases, lawyers assigned to appeals and writs appear in the high court on behalf of the people of the State of California.

The duties of the Attorney General under Article I, Section 13 of the California Constitution, to assist district attorneys to investigate and prosecute crime in cases of disqualification or other inability of the district attorney to act are performed by lawyers of the Criminal Law Division. These lawyers also defend the state and its officers in actions filed by state prisoners in federal court under the Federal Civil Rights Act. They investigate misconduct by judges at the request of the Judicial Qualifications Commission and marshal and present evidence of such misconduct to special masters, the commission and the California Supreme Court. The enforcement of the criminal provisions of the Political Reform Act of 1974 is the responsibility of the Criminal Law Division.

Criminal Law Division attorneys review all extradition requests before action by the Governor. The division provides the Governor, legislators and both state and local law enforcement agencies with opinions and advice relating to the interpretation and enforcement of the criminal law. The Criminal Law Division also operates the parent locator service which collects and distributes information concerning the location of absent parents to aid in the enforcement of the parents' duty to support their children.

A summary of the caseload and attorney assignments is set forth below:

Output	1974-75	1975-76	1976-77

Expenditures.....	299.2	314.1	305.9	\$7,276,271	\$8,269,124	\$9,052,176

c. Special Operations Element

The special operations element is primarily responsible for the protection of the public's rights and interests through legal representation in the following program components. Three attorney positions and related clerical staff are proposed to accommodate workload in Public Resources, Land Law, Constitutional Rights, and Charitable Trusts. Six staff positions are proposed to pursue antitrust actions with funding from case recoveries. A current year deficiency appropriation for antitrust work is budgeted, which appropriation will be sought by the Department of Justice through separate legislation.

Public Resources Law

The Public Resources Law component provides court representation, formal legal opinions, and informal legal advice and consultation to the various state agencies responsible for administering and enforcing the laws and programs adopted for the purpose of securing the beneficial use and protection of the state's natural resources—its fish and wildlife resources, and its water, air and timberland resources, beach and state parks, and its coastal zone resources. It is also responsible for all water rights litigation on behalf of all agencies of the state. In addition, it provides legal services to the Department of Food and Agriculture.

Land Law

The Land Law component handles all litigation and advises on all major legal problems arising from the administration of state-owned lands by the State Lands Commission. These lands consist of 4,000,000 acres of tide and submerged lands and lands underlying navigable rivers and lakes and 600,000 acres of lands in the public domain granted to the state. The value of these lands, including minerals and timber therein, is estimated at \$10.5 billion. Annual revenues therefrom aggregate over \$30,000,000 and constitute the state's largest source of non-tax revenue. This component is also deeply involved in the question of public rights in private lands arising by implied dedication. Because of a recent landmark decision, this doctrine may affect a substantial portion of all privately owned, unenclosed lands throughout the state. Especially affected are littoral lands, including 3,400 miles of frontage on tidal waters and 1,400 miles on navigable, nontidal waters.

This component also represents the Division of Oil and Gas and the Geothermal Resources Board. The imposition of new responsibilities upon the supervisor, especially in the area of environmental regulation of surface oil and gas operations, has increased the work load of this component in this area as well.

DEPARTMENT OF JUSTICE—Continued

Statutory Compliance

The statutory compliance component is responsible for the protection of all charitable gifts. It is incumbent upon this component to investigate and discover all instances of maladministration and wrongdoing by charitable trustees, individual and corporate. The law requires charitable trustees and charitable corporations, with certain exception to register and file periodic financial reports. The Registry of Charitable Trusts receives these records which are processed, audited, and examined for any indications or irregularity in administration.

This component is also responsible for representing the state in probate proceedings which have the possibility of charitable gifts and escheats. This component also represents the Controller in recovering unclaimed or abandoned property.

The antitrust unit is given the authority and obligation to enforce the antitrust laws of the state and the federal government to foster the free enterprise system. This involves bringing criminal proceedings and civil actions.

The antitrust unit brings actions to recover treble damages suffered by government agencies and sometimes the public. In addition to proving liability a major task is to establish and prove the dollar amount of the financial injury. This involves the determination and comparison of the prices actually charged with the price that would have been charged under competitive conditions. In addition to recovery of treble damages, identifiable costs involved in the investigation and prosecution are also recovered.

Another component of this section is the constitutional rights unit which represents the Fair Employment Practices Commission and the Commission on the Status of Women. It also investigates activities which may deprive individuals or organizations of their constitutionally protected rights and may file lawsuits in behalf of the people of the State on the basis of facts disclosed by such investigations.

Environment and Consumer Protection

Consumer protection unit acts initially as a clearinghouse for complaints which come from other law enforcement agencies, business organizations, businessmen, and from individual consumers. Complaints received are either investigated, or in many cases litigated, or referred to other government agencies for appropriate action. Advice is also provided to state and local agencies on problems relating to consumer protection laws. Meetings are held with district attorneys and other enforcement agencies to inform them of recent statewide fraud operations and methods for dealing with them.

The environment unit is primarily responsible for legal enforcement of environmental laws in the unregulated and poorly regulated areas. The major areas of legal enforcement action are air pollution, land use, aesthetic nuisance and enforcement of the National Environmental Policy Act and the California Environmental Quality Act.

Legal Information for Law Enforcement (LILE)

This project provides law enforcement personnel in California with supplemental legal education commensurate with their responsibilities as members of the criminal justice system.

Organized Crime Trials Unit

This project created, on a statewide level, an organized crime trials unit which engages in the prosecution of significant organized crime cases investigated and developed by federal, state and local enforcement agencies.

II. Law Enforcement

Program Objectives and Description

The Division of Law Enforcement provides efficient and effective statewide services in the following fields: Identification of persons and property, criminalist services, technical and special investigative training, statistical and communication services and selected special operational investigations. The division also works to suppress the traffic in narcotics and dangerous drugs and to identify and prevent infiltration of organized crime.

The division is organized into five branches and an executive office. Enforcement and Investigation branch supports other law enforcement agencies through investigative assistance, liaison and training, as well as performing special investigations. Identification and Information branch provides identification services on individuals and property along with relevant information, including statistics relative to crime and delinquency. Investigative Services branch furnishes specialized criminalistics and other technical services to law enforcement agencies. Organized Crime and Criminal Intelligence branch gathers and disseminates information about organized crime. The Law Enforcement Consolidated Data Center provides data processing and telecommunications services to the division and acts as liaison with all users of division information services.

Workload adjustments in the current year include a reduction of 421 man-years for grants which have not been awarded, the addition of 4.8 man-years to Identification and Information for statistical services to the Department of Health, the addition of 8.5 man-years in Organized Crime pursuant to a contract with CCTRF and the addition of 3.5 man-years for grants.

One man-year has been reduced in the budget year in the Bureau of Investigation for prepaid health plan enforcement, which function has been transferred to the Department of Corporations.

a. Executive

The Division of Law Enforcement executive office is responsible for planning, organizing, directing, and coordinating the law enforcement activities of the Department.

The overall objective of the director's office is to provide, at the division level, those staff and administrative support capabilities necessary to accomplish division objectives. Activities include staff investigations, program evaluation, facility security, and policy analysis.

Input	74-75	75-76	76-77	1974-75	1975-76	1976-77
Expenditures	(12.7)	(13)	(13)	(\$1,333,555)	(\$2,231,117)	(\$2,314,135)

b. Enforcement and Investigation

Two major bureaus comprise the greater part of the Enforcement and Investigation branch. The bureaus of Investigation and Narcotic Enforcement seek to insure uniform enforcement of the law in California by providing to local agencies access to specialized training and investigative personnel which, for reasons of economy or practicality, would not otherwise be available to most of California's political jurisdictions. They also provide the capability to pursue investigations across local jurisdictional boundaries and serve as the investigative and enforcement arm of the Attorney General in the fulfillment of his constitutional and statutory responsibilities.

The Bureau of Investigation provides field investigative assistance to local enforcement agencies in the solution and prosecution of major crimes. These investigations are of extreme importance to the community and often involve multicounty offenses. Investigations are performed of organized crime activity throughout the state. Other investigations are conducted as directed by the Attorney General, upon the request of the Governor, Legislature, or state agencies. Special agents of this bureau also conduct investigations of claims made against the state and agencies administering special funds to prevent fraud and undeserved payments. Investigations are conducted and assistance rendered to local agencies in the areas of consumer and investment fraud. Many of these cases are investigated for other state agencies on a reimbursement basis.

Special agents within the Bureau of Narcotic Enforcement, assigned to the six area offices throughout the state, work undercover to infiltrate the narcotic traffic, develop intelligence and gather evidence which results in the apprehension of major narcotic violators and their sources of supply. They assist local agencies in controlled substances investigations that are beyond local capabilities and they pursue investigation of cases that are of statewide or multijurisdictional character. The bureau administers the triplicate narcotic prescription system, which prevents the diversion of licit supplies of narcotics into illicit channels; has direct responsibility, by law, for the control of drug violations among narcotic registrants and licensees; in cooperation with the Department of Justice Advanced Training Center provides on-the-job training seminars and formal classroom instruction in the techniques of narcotic enforcement for bureau personnel and personnel of local law enforcement agencies and makes public presentations before civic and professional groups.

c. Investigative Services

Forty-four positions are proposed in the second phase of the development of criminalistics laboratory services for state and local law enforcement agencies.

The Investigative Services branch provides criminalistics and related forensic science services to sheriff, police coroner, district attorney, state and local law enforcement departments and the courts of California. The specialized technical services furnished include the examination and analysis of physical evidence, questioned documents, latent fingerprints, photography services and polygraph examinations. The chief task is to process, examine, analyze and compare a wide variety of physical evidence and to interpret the significance of the scientific findings to law enforcement agencies and the courts.

DEPARTMENT OF JUSTICE—Continued

Scientific laboratory services have been furnished by the state on a limited scale to law enforcement agencies and the courts since 1931. Since 1971, a system of regional and satellite laboratories has been established, using federal funds made available through the Office of Criminal Justice Planning and the Governor's Office of Traffic Safety. Full-service regional laboratories are located in Redding, Santa Rosa, Sacramento, Modesto, Fresno, Salinas, Santa Barbara and Riverside. Satellite or limited service laboratories devoted mainly to blood-alcohol and controlled substances analysis are located in Oroville, San Rafael, Stockton, San Luis Obispo, West Covina, Santa Ana and San Diego.

An example of workload increase in analysis activity is in blood-alcohol, which has increased from approximately 4,500 in 1971-72, to a level of almost 20,000 analyses in 1974-75. This program has supplied the need of the California Highway Patrol and other police agencies engaged in the enforcement of traffic laws. Every county in the state is now equipped to carry out the provisions of the implied consent law concerning chemical tests.

The sum of approximately \$8.5 million, derived from federal sources will have been expended by June 1976 for salaries, training, equipment and the building of laboratory facilities. Federal funding for Santa Barbara, Salinas, Riverside and the federally funded portion of Sacramento will terminate on June 30, 1976, and for Modesto and Santa Rosa on June 30, 1977.

Specialized technical services, in addition to criminalistics, are provided in the fields of questioned documents analysis, latent fingerprint examination, polygraph examination and photographic services to the entire Criminal Justice System from the Sacramento office. Because of the increasing requirements for services in the far reaches of the state, some of these services are being provided to the other regional laboratories through the assignment of personnel qualified to carry out these duties. As workload factors dictate, additional personnel to perform these services will be implemented in other regional facilities. The department will make such assignments to assure prompt and efficient work on a cost-effectiveness basis in connection with major cases being handled by local agencies which are served by the regional laboratories.

Output				1974-75	1975-76	1976-77
Criminalistics cases				3,102	3,366	3,618
Controlled substances				20,071	21,777	23,410

Polygraph exams				701	834	917
Photographic service				2,253	2,468	2,715
Questioned documents				2,457	2,666	2,866
Latent fingerprints				2,485	2,684	2,899
Input	74-75	75-76	76-77	1974-75	1975-76	1976-77
Expenditures—investigative services ^c	52.5	99.7	139.9	\$1,319,011	\$2,499,941	\$3,667,772

^c Positions and dollars shown are expenditures of state funds and do not include grant expenditures for criminalistic regional and satellite laboratories (See h, Grant Projects)

d. Identification and Information

In the Identification and Information Branch, 25 positions have been deleted based on a forecasted workload reduction in criminal records processing due to changes in the marijuana penalty laws.

Eleven positions previously established on the basis of non-criminal fingerprint work are deleted and proposed new for the quality control of arrest information. Ten new positions are proposed to establish quality control over disposition documents.

A team of 32 personnel is proposed to establish an ongoing effort to purge non-retainable arrest and conviction information. Fifteen existing positions are deleted for a net need of 17 positions for this effort. Thirty-five additional positions are proposed to accommodate increasing criminal records workload.

In the current year, non-criminal fingerprint fees can not be scheduled as reimbursements after January 1, 1976. The Department of Justice will seek a bill with a deficiency appropriation of revenues derived from such work to accommodate cash flow needs in the current year.

The Identification and Information branch is comprised of three main components; the executive office, including Criminal Records Security Unit; the Bureau of Criminal Statistics; and the Bureau of identification all serve to provide identification and criminal information services to all law enforcement agencies.

The executive office is the administrative function of the branch, providing policy and direction to all branch activities performed by the two bureaus (BCS, BID). The Criminal Records Security Unit within the executive office is charged with devising rules and procedures that will insure the proper dissemination and use of criminal history information. The unit also provides training to all persons dealing with criminal offender information.

The Bureau of Criminal Statistics compiles, analyzes, interprets, reports statistical facts on crime and delinquency and the processes of criminal justice in California. To do this, the bureau collects data from city, county, and state agencies that administer criminal justice, including all levels of courts, prosecutors, correctional, and enforcement agencies. Annual reports are made to the Governor, the Legislature, criminal justice agency administrators and others concerned with crime and delinquency and the effectiveness of agencies that administer criminal justice.

The Bureau of Identification is composed of three major organization entities—Fingerprint Services, Record Analysis and Processing Services, and Special Services—each of which is divided into sections.

The bureau's fourth organizational entity, the criminal record purge, reviews and analyzes the bureau's criminal record folder file. Such review and analysis is necessary to identify the records of those subjects which no longer meet the department's retention criteria so that such records may be destroyed. The program is being supported by federal funds in fiscal year 1975-76. If the purge program is not completed, bureau files will continue to be clogged with obsolete information relatively useless to the criminal justice system, and the bureau will be unable to meet the level of service required by Penal Code Sections 13100-13202 which states the bureau will respond to inquiries within 72 hours by 1978. It may be necessary for the bureau to budget for continually increasing space, equipment and personnel needs which would not be required if the purge program is completed in a timely manner.

Fingerprint Services identifies people through two subprograms: the processing of criminal fingerprints submitted by law enforcement agencies and the processing of noncriminal fingerprints received from law enforcement, licensing and regulatory agencies.

Record Analysis and Processing Services is composed of the quality control section, the record section and the record analysis and coding section. The record section searches incoming fingerprint cards, crime reports, teletypes, etc., through its name index files to identify the subject with previously submitted information. It compiles a record of arrests chronologically on each person and maintains a file of the record in folders with supporting data. Each folder is numerically identified. The section establishes and updates folders in its typing unit and files, searches, and refiles rap sheets and other related information.

The record analysis and coding section is converting manual criminal history records on current offenders, creating records on serious offenders with no prior history, and updating all the records processed for the automated criminal history system. An estimated 780,000 records will be available to authorized agencies through inquiry of the file by the start of fiscal year 1976-77.

The quality control section scans all incoming arrest documents for errors and data omission and also resolves those errors by directly contacting the arresting agency.

DEPARTMENT OF JUSTICE—Continued

The special services section responds to requests for material and information to aid in determining what action is to be taken in regard to persons or property. It serves as a locator for persons wanted for felonies, high misdemeanors, absent fathers who fail to provide for their families or persons who may be missing. It processes registrations of persons convicted of narcotic violations and sex crimes and maintains files pertaining to paroled arsonists and child abuse cases. It maintains photo files on all convicted felons and other well-known habitual criminals. It serves as a coordinating agency between dealers in weapons and law enforcement. It processes permits to carry concealable weapons, permits to possess machine guns and tear gas devices and processes reports covering stolen or pawned miscellaneous items and firearms. To accomplish this wide variety of duties, special services is organized with a command-communications section and a property-licensing section, each headed by a manager. In addition, an assistant manager assigned to the evening shift serves as acting chief of the entire bureau during that shift.

Output	1974-75	1975-76	1976-77

e. Organized Crime and Criminal Intelligence

Five positions are proposed for the Organized Crime and Criminal Intelligence Branch to continue a grant initiated narcotics information network on a permanent basis.

The Organized Crime and Criminal Intelligence Branch provides the state-level support, leadership and coordination required to develop an effective criminal intelligence system based on mutual cooperation of state, regional, local and out-of-state law enforcement agencies.

The Organized Crime and Criminal Intelligence Branch operates under the authority of the Government Code, Part 6—Department of Justice, Chapter 1—Administration. Article 2, added by Statutes 1971, specifically covers the purposes and duties of the branch under Sections 15025, 15026, and 15028, as follows:

1. To gather, analyze and store intelligence pertaining to organized crime;
2. To provide this intelligence to local, state and federal law enforcement units;
3. To provide training and instruction to assist local and state law enforcement personnel in recognizing and combating organized crime;
4. To provide a research resource of specialized equipment and personnel to assist local, state and federal agencies in combating organized crime;
5. To conduct continuing analysis and research of organized crime in order to determine current and projected organized crime activity in California;
6. To initiate and participate in the prosecution of individuals and groups involved in organized crime activities.

The report of the Governor's Select Committee on Law Enforcement Problems, which was submitted to the California Legislature in August 1973, in reference to organized crime in California, further outlines the functions of the state. Six categories are noted for a successful program to combat organized crime. They are (1) to perform continual analysis to determine the nature and scope of organized crime as it changes, (2) to establish a central repository of reliable information about organized crime, (3) to develop a standard organizational pattern of organized crime units, (4) to maintain a mutual assistance program, (5) to conduct training courses for specialists in organized crime, and (6) to provide liaison with federal, state and local agencies.

DEPARTMENT OF JUSTICE—Continued

The organized Crime and Criminal Intelligence Branch of the Department of Justice is engaged in all these activities and works constantly to improve and expand its efforts and effectiveness.

This branch carries on a continuing program to determine and analyze the nature, characteristics, magnitude, and trends of organized crime in California. The basis is thus provided for the development of indicators of the presence of organized crime, tactical plans to combat priority organized crime areas, and strategic plans for the prevention of organized crime. Following is a description of the major activities of the branch.

Liaison agents provide a personal link between the Department of Justice and local law enforcement agencies, which makes possible a two-way flow of information and insures the obtaining of complete and accurate data for information. Specialized training programs covering matters relating to criminal intelligence gathering, analysis and dissemination are continually developed, resulting in the upgrading of knowledge and capabilities of law enforcement for effectively combatting organized crime.

A pool of specialized investigative equipment is maintained for loan to local law enforcement agencies. These equipment items are financially out of reach for most local agencies and would not otherwise be available to them. The equipment is used in investigations of fraud, bribery, narcotics, conspiracy, arson, vice, armed robbery and murder. A group of specialists provides technical assistance and training in the use of the equipment.

The branch is a law enforcement clearinghouse for all types of criminal intelligence. Information is received for criminal intelligence processing and for crime patterns analysis, and is correlated with existing information, analyzed and disseminated in the form of criminal intelligence to federal, state and local agencies. This is information not usually obtainable through regular police channels. A staff of criminal intelligence agents is responsible for gathering information and for establishing and maintaining liaison and communication links in a continuing move toward making the Department of Justice the central support and coordinating agency for the entire state. Dissemination of criminal intelligence is accomplished in a variety of forms and methods of distribution, including telephone, teletype, individual reports and letters, regular bulletins, special bulletins, computer terminals, personal contacts and regional meetings.

The branch furnishes administrative support for the nationwide law enforcement intelligence unit (LEIU) through the central coordinating section, which has responsibility for controlling the data base (LEIU subjects), developing, producing and disseminating LEIU subject cards, publication of regular and special bulletins, and coordination of various meetings. A 24-hour day, seven-day week operation is maintained in this section so that local agencies may receive and disseminate information at any time. This operation also provides criminal intelligence to the Governor's Emergency Planning Council consisting of representatives of the Governor's office, the Department of Justice, the California Highway Patrol, the Office of Emergency Services, and the California Military Department.

Correlated with the activities of OCCIB is the Interstate Organized Crime Index (IOCI). IOCI is an index of crime subjects, provided by LEIU members, of persons known to be active in organized crime activities. OCCIB's IOCI unit converts information for machine processing. It checks for errors and corrects errors, makes deletions and additions to the file, monitors the security of the transmission system, and develops criteria for establishing the data base. The project is federally funded.

Working in a similar relationship with OCCIB is the California Narcotics Information Network (CNIN). The CNIN is an organization formed to promote the exchange of information and criminal intelligence not available through regular police channels in relation to narcotics trafficking. The primary role OCCIB plays is (1) to establish and maintain the central files of information and (2) to provide for its analysis and dissemination to members of the network. OCCIB also provides administrative support services such as membership application processing publication and distribution of bulletins, and general coordination of member-agency efforts as needed. OCCIB is represented on the CNIN Board of Directors in an advisory capacity.

f. Crime Prevention and Control

The crime prevention unit offers a number of crime prevention programs relating to youth, senior citizens, retail business and general community groups, including ethnic groups. It is also responsible for research and coordination in the preparation and distribution of numerous crime prevention publications concerning consumer fraud, drug abuse, juvenile justice and the law, business security, school violence, crimes of force and a formal quarterly journal entitled "Crime Prevention Review" to law enforcement agencies throughout the state. Training and consultation to crime prevention law enforcement officers and police agencies is provided, as is specialized training to aging agency personnel throughout the state in the prevention of criminal victimization of the elderly. In all programs the unit emphasizes interagency cooperation and mobilization of community resources to assist law enforcement in effective implementation of crime prevention programs.

Input	74-75	75-76	76-77	1974-75	1975-76	1976-77
Expenditures.....	14.7	14.2	14	\$375,940	\$378,509	\$390,060

DEPARTMENT OF JUSTICE—*Continued*

g. Consolidated Data Center

Seven positions are proposed for Data Center workload and an additional six positions are proposed for a limit of two years to study computer hardware needs.

Chapter 787, Statutes of 1972, established the Law Enforcement Consolidated Data Center as one of four proposed data centers in state government. Division Order No. 73019 officially established the Law Enforcement Consolidated Data Center on May 21, 1973, to enhance the ability of operating criminal justice agencies to combat crime and criminality; to reduce the multiplication of effort now expended to maintain like criminal justice information in many agency files at all levels of government; and to develop a systematic method of getting complete, accurate criminal record information to the specific decisionmaker in time to be useful for some of the critical decisions relating to arrests, prosecution, court proceedings and custody.

The Law Enforcement Consolidated Data Center (LECDC) consists of administration, automated information services bureau, and the agency liaison-user support bureau which work as a closely coordinated team to implement the criminal justice information system (CJIS) and administer the California law enforcement telecommunications system (CLETS). They are responsible for all data processing and telecommunications activities related to the statewide system and provide agency liaison and user support services to assist criminal justice agencies throughout California in obtaining the maximum benefit from information services available. The major objectives are to increase the effectiveness of justice administration in California by providing an up-to-date, accurate, centralized criminal record data base; to provide a telecommunications system adequate to meet the needs of law enforcement agencies; to reduce turnaround time in responding to requests for criminal record information from minutes, hours, and days to seconds, minute, and hours, depending on need related to various data elements; to provide centralized data processing and information services to all bureaus within the department; to provide ready access to the central information source for all criminal justice agencies (large and small), thereby eliminating the need to proliferate the same data in many files throughout California; and to protect the rights of privacy of individuals by placing strict security and confidentiality controls on criminal justice information.

Program Activities

Law enforcement consolidated data center administration—plans, organizes, and directs all phases of the Law Enforcement Consolidated Data Center, including computer operations, systems analysis and design, programming, and data entry; analyzes and makes recommendations regarding proposed legislation affecting criminal justice processes; coordinates data processing and related training activities of other branches of the Department of Justice and user agencies such as local police and sheriff's departments, county district attorneys, state and local courts, California criminal justice agencies at the state level, and the FBI; represents the Department of Justice and the state in local, regional and federal liaison activities in regard to criminal justice information sharing programs; acquires, reviews, and processes information in the commission of administering the California law enforcement telecommunications system (CLETS) and the Criminal Justice information system (CJIS); provides expert technical and operational knowledge of CLETS/CJIS network; communicates daily on an ad hoc basis with all CLETS/CJIS interfacing elements; and responds to both short-range and long-range activities which influence the CLETS/CJIS network.

The Automated Information Services Bureau administers systems analysis, programming, automatic data transcription, and operations associated with the California law enforcement telecommunications system, criminal justice information system, criminal statistics, charitable trust, management information systems, national telecommunication systems (i.e., NLETS, NCIC, IOCI), and any other intradepartmental automation programs.

The performance of this function involves the following activities:

Operations Support (two large multi-computer centers, data transcription)—provides advice and consultation in preparation and evaluation of data processing equipment acquisitions, evaluates requests for data processing services; and acts as operational liaison between DOJ computer operations and other interfacing computer systems.

Administrative Support—administers to the needs of the automated information services bureau and, in part, of the Law Enforcement Consolidated Data Center, including systems analysis, staff support services, education, training, clerical support, property and supplies control, and personnel transaction.

Programming support (a group of highly skilled technical consultants, a resource pool of programmer/analysts, and a procedures/documentation group) coordinates and schedules the allocation of personnel between programs based on departmental needs and priorities; plans and budgets for future resource needs; and establishes and enforces bureau/division standards and policies.

Technical Support (a collection of interrelated technical data processing functions) provides services in the area of software, telecommunications, and data base administration.

Applications Support—designs, maintains, produces, and evaluates the on-line and batch processing automated criminal justice information systems; prepares program and project budgets; allocates personnel and equipment resources; organizes project teams as necessary to provide data processing services for user programs; and maintains primary responsibility for the success of data processing programs provided to intradepartmental units and other statewide criminal justice agencies.

The Agency Liaison-User Support Bureau, through its field staff, establishes and maintains lasting lines of communication between criminal justice agencies and the Division of Law Enforcement—in particular, the Law Enforcement Consolidated Data Center; conducts statewide training of local agency personnel in the use of criminal justice information system, California law enforcement telecommunications system, other criminal justice related systems, services, and preparation and processing of reports and data submitted by California criminal justice agencies to the division; aids local criminal justice administrators in obtaining services and information regarding related programs operating within the state; informs division management of local agency complaints; develops special proposals and programs within the agency liaison section; works with major agencies involved in complex criminal justice systems development to preclude local system duplication of conflict with systems of the division; assists individual agencies subscribing to areawide systems to insure working interface with division systems; develops and maintains working rapport with major agency or local criminal justice system administration; serves as an advisor to division management in the area of major automated criminal justice systems; provides support to the CLETS software unit by handling internal affairs such as scheduling, publications, and review and analysis of data; assists and coordinates user support activities, project definition and control, OBTS/JUS 8715 programs, and the DOJ Tour program; and studies, analyzes, and reports on automatic criminal justice systems as they develop at the local level.

DEPARTMENT OF JUSTICE—*Continued***h. Grant Projects**

Budget year increases include 332 proposed new positions for Law Enforcement Assistance Administrative funded grant projects.

Project Search—Organized Crime Index

This project provides for the computerization of a central index of organized crime intelligence information.

Visual Investigative Analysis Technique (VIA)

This project is a police improvement program for the development of the visual investigative analysis technique, a new and innovative charting technique, based on the principles of the program evaluation and review technique (PERT), which shows great potential as a tool for the control of major complex investigations.

Statewide Criminalistics Laboratory System

This project provides for the department to establish and support regional facilities to handle general criminalistic services in services in eight geographic areas throughout the state.

Uniform Blood-Alcohol Program

This project is aimed at insuring that all communities within the state have the complete capabilities of complying with Section 13553 of the California Vehicle Code by providing approved breath-testing equipment and the technical support for a complete blood-alcohol program.

Data Analysis Center

This project provides the state's criminal justice managers an adequate data base for realistic and rational planning for allocation of resources and insures the operational compatibility of systems with NCIC and the California Criminal History File (CCH).

Fingerprint Automation Prototype and Conversion

This project is to determine the feasibility of: (1) microfilming the master file of fingerprints, (2) a computerized file search, (3) an automated retrieval system.

Uniform Crime Reporting System (UCR)

This project will develop a more accurate knowledge of serious crimes by standardizing the methods and format of crime reporting; an adequate basis for auditing the inputs of 416 separate field agency systems supply supplying crime statistics; the foundation for a total statewide system; a quality control and audit system to insure uniformity to provide the state's criminal justice system managers and administrators with data to determine where, when and how crimes occur in the state.

Integrated Program to Combat Organized Crime

This project is designed to provide central intelligence capability; overall direction for operations, training, research and intelligence; training specifically oriented to the needs of officers in state and local agencies involved in organized crime control activities.

California Narcotic Information Network (CNIN)

This project provides for the establishment of a central clearinghouse for collating, analyzing and disseminating narcotics intelligence to the state's local law enforcement agencies.

Drug Diversion Investigative Unit (DIU)

This project forms a multiagency drug diversion investigation unit to investigate and reduce the incidence of drug diversion from legitimate channels. The agencies involved are: Federal Drug Enforcement Administration, State Department of Justice, Consumer Affairs, and the Board of Pharmacy.

Organized Crime Evaluation

The basic purpose of the evaluation program is to determine the present effectiveness of the programs to combat organized crime currently operating in California and to stimulate their improvement.

Management and Administration Statistics System

This project will provide a means of collecting systematic data on expenditures, employment, facilities and equipment in criminal justice agencies; providing this data for processing by the data analysis center; and disseminating reports to provide criminal justice managers with adequate management information for realistic and rational planning necessary for allocating criminal justice resources to achieve maximum benefit.

Criminal Record Purge

The criminal record files maintained by the Department of Justice have never been purged and contain the fingerprints of nine million persons with five million of these persons also having a record folder. In January 1974 the Attorney General established criminal record purge and retention criteria. This program will institute this criteria and reduce the above files by approximately 50 percent.

Record Quality Improvement

California criminal justice agencies rely upon the records maintained by the Bureau of Identification in the performance of their duties. The value of these records is directly related to the quality of the information they contain and the timeliness with which they are made available.

Offender Based Transaction Statistical System (OBTS)

The OBTS system is being developed by utilizing a method of uniquely identifying everyone arrested, then tracing their passage through the systems, recording pertinent information about each transaction during the process. OBTS is needed to assess criminal justice activities in order to meet any criminal justice standard which may be developed as a result of the National Advisory Commission on Criminal Justice Standards and Goals.

State Technical Assistance Capability

State technical assistance will serve the state's needs for a vehicle disseminating information on resources available to the criminal justice system.

DEPARTMENT OF JUSTICE—Continued

Uninterrupted Power Supply

The Department of Justice operates around-the-clock computer centers in Sacramento and Los Angeles to provide telecommunication and data base services for the entire state. The purchase of an uninterruptible power supply will allow the Department of Justice to switch from the commercial supplier of power to its emergency generators without stopping the system operation. The first-year grant was for the Sacramento computer site.

Ad Hoc Committee on School Violence

The Ad Hoc Committee on Management of Conflict and Crime in the Schools is formed to address the problem of school-related crime, conflict and violence. It is to advise the Attorney General and the Superintendent of Public Instruction about what can be done at the state level to address the major issues in crime and conflict on the campus. It will focus primarily on the policies, programs and relationships of the elementary and secondary school system and the law enforcement/justice system as they relate to juveniles.

Privacy and Security

This project will provide for the development of California's plan for complying with the LEAA regulations for implementing Section 524(b) of the Omnibus Crime Control Safe Streets Act of 1968, as amended.

Automated Criminal Intelligence Index

This project will provide an automated index to the criminal intelligence document file to enable inquiring criminal intelligence analysts rapid access to data and an ability to summarize data on organized crime activities in California.

Western Regional Training Institute

This project will develop the Regional Organized Crime Training Center, which will continue and expand California's organized crime training program. It will extend the benefits of training in the investigation and prosecution of organized criminal activity to Law Enforcement officers within California and throughout the nation.

Urban Terrorist

This project will provide courses of instruction on the subject of urban criminal terrorism for law enforcement officers who are specifically called upon to cope with urban criminal terrorism.

^a These amounts represent half year funding which completes these grants in the first 6 months of the fiscal year.

III. ADMINISTRATION**Program Objectives and Description**

Ten and one-half positions are proposed for Administration to accommodate accounting and control services workload, and to provide for case by case legal service billings for client agencies. Fifteen positions and temporary help staff for the Advanced Training Center which were deleted from the budget are proposed new for 1976-77 with partial funding from the Peace Officers' Training Fund.

The Attorney General, as stated in Article V of the Constitution, is the chief law officer of the state and functions as the director of the Department of Justice. The executive office, comprised of the Attorney General, his chief deputy and their immediate staff, provide the overall executive and managerial functions, policy determinations and direction of the department.

The Division of Administration provides the necessary administrative, management, and support services to enable the line programs to attain the highest level of performance. The division provides fiscal management services consisting of departmental accounting operations, budget development and management, and business services; legal office services which provide stenographic and clerical support to the three legal divisions; manpower services which provide for the management of human resources with responsibility for maintenance of employee records, position transaction control and payroll processing; a training center which coordinates and manages the interdepartmental training programs and provides a centralized location for training service local criminal justice and law enforcement units; management services and assistance is provided to departmental management relating to organizational improvements, work measurement and analysis, information services, legislative analysis, and EDP resource utilization; and library services to maintain the law libraries, provide legal research and general legal reference assistance.

COMMISSION ON PEACE OFFICER STANDARDS AND TRAINING

The objectives of the Commission on Peace Officer Standards and Training (POST) are to increase and maintain the level of competence of California peace officers and to provide such other services to local law enforcement as are authorized by law. To accomplish this, the Commission established minimum standards of physical, mental, and moral fitness for the recruitment, selection, and training of peace officers. The Commission on Peace Officer Standards and Training apportions revenue received from assessments on criminal and traffic fines to local law enforcement agencies to reimburse them for a portion of the cost of training peace officers.

SIGNIFICANT PROGRAM CHANGES

Program	Description	Man-Years	Dollars
I.	Review state agency training	1	\$29,811
II.	Analysis of local law enforcement training needs	1	18,676

I. STANDARDS AND TRAINING

Program Objectives and Description

Consultants of the Standards and Training Division coordinate efforts to increase the effectiveness of law enforcement personnel by developing education and training courses to meet needs identified through planning; by providing quality control and adequate scheduling of such courses; to assist police agencies to meet training requirements and to develop balanced training and career development programs; and to render other related miscellaneous services to enforcement agencies and training institutions.

Education and Training

Education and training courses are organized at local community colleges, four-year colleges, universities, police academies, and other institutions to meet the needs of peace officers. Courses offered are categorized as recruit officer, supervisory, middle management, advanced officer, executive development, and a wide variety of technical and special courses.

Consultants from this division establish the basic criteria that must be met for each of these courses before Commission certification. Advice and assistance is given to local educators and police trainers in preparing these courses and training plans.

Periodic field inspections are made to insure that instructors, coordinators, and trainers are adhering to established course outlines and are meeting all instructional standards. Failure to meet the educational and training standards may be cause for revocation of course certification. Implementation assistance is provided to local agencies to obtain the best results from available training programs.

One new position is proposed to review the training and to set standards for specified state agency peace officers pursuant to Chapter 1172/75.

Personnel Standards

Inspections are conducted to determine if law enforcement agencies receiving state aid are adhering to adopted standards for recruitment and training and assistance is provided to raise the level of competency through the recruitment, selection, and training process.

The procedures used by a jurisdiction to select, train and employ law enforcement personnel are audited and a counseling service is provided to improve the methods employed in this administrative process. If the result of the inspection reveals operational or structural defects, a program is provided to insure compliance. Those police personnel in departments selected to conduct background investigations of newly recruited officers are counseled and trained as necessary. Implementation of the Minority Recruitment Program has been functionally integrated as part of the field services provided by the Standards and Training Division.

II. TECHNICAL SERVICES

Program Objectives and Description

There is a continuing need for research into management problems confronting local law enforcement agencies. This research is necessary so that law enforcement can more effectively carry out its responsibility for maintenance of public order and protection of life and property. The quality and effectiveness of law enforcement services is directly related to a need for assistance in improving management functions, and many departments have turned to POST as a resource center for guidance and assistance relating to specific problems of police management.

In concert with other POST divisions, the objectives of the Technical Services Division are to provide management research assistance, develop workable solutions and assist in the implementation of selected research projects required by local law enforcement and POST.

The Technical Services Division conducts research to solve a variety of topics encountered in law enforcement operations. The Division also provides law enforcement with publications on the solution of specific management questions or problems. This is done through the Center for Police Management.

Within the POST organization, Technical Services Division provides research assistance to other divisions, coordinates internal programs, formulates and implements divisional procedures, researches legislative mandated programs, and provides staff services including graphic arts work.

The Division maintains a resource library which serves as an up-to-date resource center for POST personnel and local law enforcement agencies.

A current year deficiency of \$195,229 was authorized to continue the Center for Police Management and Crime Prevention Institute. These two projects had been budgeted for continuation as LEAA grants, but because of changes in OCJP policy, no grant funds were made available. In the current year, an adjustment of 0.5 man year temporary help is made to complete a medical evaluation study. The Crime Prevention Training Project (3 man-years) terminates May 31, 1976. One new position is proposed for the budget year to analyze statistical data on local law enforcement officer training needs.

III. ADMINISTRATIVE COUNSELING

Program Objectives and Description

The objectives of the Administrative Counseling Division are to survey, make recommendations, provide implementation assistance and prepare special studies to improve management and operational techniques of local law enforcement agencies. Three major services are provided to local jurisdictions upon request:

1. Identification, evaluation and recommended courses of action to solve specific administrative problems.
2. General surveys involving extensive review and analysis of an agency's total operation, and specialized surveys limited to an examination of specified areas.
3. Staff assistance to insure prompt and effective implementation of survey recommendations.

The conduct of the survey includes the preparation of a written report which provides an analysis of the problem and recommends actions to be taken for problem solution. Surveys are normally handled by POST staff members. However, in some cases, implementation of survey recommendations or analysis of unusual problems may entail the temporary employment of special consultants.

IV. ADMINISTRATION

Program Objectives and Description

The administration of a statewide program involving over 600 city and county jurisdictions and state agencies and the allocation of over \$8,000,000 in reimbursements to local governments requires competent management.

The Administration program provides direction and control over local assistance so that the Commission's overall objectives may be realized in the most efficient and economical manner possible.

The Commission's policies are executed by a permanent professional and clerical staff which operates under the direction of an executive director. Special programs may be executed by temporary or special staff under contract.

As officers complete certified courses, claims are submitted to POST by employing jurisdictions for reimbursement of moneys expended in training their officers. Upon receipt, the claim is checked to insure that the course is certified in the amount and for the number of hours claimed, and for arithmetical accuracy. Correct and valid claims are forwarded to the Controller for payment. Various statistical reports are also prepared for management use and for the Commission.

Applications by officers for professional law enforcement certificates, accompanied by college transcripts, certificates of course completion, and other supporting documents are reviewed to determine eligibility for a certificate and level of proficiency of each applicant. An appropriate certificate is completed and mailed to each qualified applicant.

A current year deficiency of \$55,990 has been authorized for increases in pro rata charges.

V. ASSISTANCE TO CITIES AND COUNTIES

Program Objectives and Description

The enforcement of laws and the protection of life and property without infringement on individual liberties is one of modern government's most pressing problems. Carefully selected, highly trained and properly motivated peace officers are important factors in the solution of this problem. To encourage and assist local law enforcement agencies to meet and maintain minimum standards in the selection and training of law enforcement officers financial assistance is given to those cities and counties which qualify for state aid for peace officer training. Each jurisdiction participating in the program is reimbursed from the Peace Officers' Training Fund in proportion to the number of officers who qualify for training reimbursement.

OFFICE OF CRIMINAL JUSTICE PLANNING

The Office of Criminal Justice Planning provides staff support to the California Council on Criminal Justice; coordinates planning efforts by private, state and local agencies in the criminal justice system; and administers federally-funded grants to those agencies in accordance with the plans they develop under federal and state guidelines.

The California Council on Criminal Justice has responsibility for setting broad policies and priorities for effective use of available grant funds to aid in the control and prevention of crime. That responsibility includes the review and approval of the annual comprehensive state plan as well as review and approval of grants funded under that plan. Twenty-one regional planning units coordinate planning activities, review and recommend proposals and monitor grant activities within their jurisdictions.

Authority

Penal Code, Section 13800 et sequiter.

Personnel man-years.....	194.1	46.6	38

^a Federal funds and expenditures therefrom are not included in budget totals.

I. OPERATIONS

This Division continues the essential functions formerly carried out by three programmatic divisions. Program technical assistance and evaluation are services provided to subgrantees as required by federal regulations. The State Plan section prepares the California State Plan for Criminal Justice in relation to the LEAA program. The section develops and recommends planning objectives, drafts guidelines, develops planning timetables, updates planning methodology, analyzes relevant data, and supervises planning activities. In the process of coordinating regional planning, it identifies laws, environmental trends, economic factors, demographic changes and local, state and national programs which will influence crime control activity and the criminal justice system in California.

The state and private agency function assists proponents in developing plans and projects to deal with specific crime-related problems; reviews grant applications for program content; provides grant management service to applicants and recipients; and provides staff support to the Executive Director of OCJP and to CCCJ in identifying practical, innovative approaches to reducing and preventing crime, improving the criminal justice system and solving specific problems in criminal justice.

The Manpower section recommends plans and policies in the personnel management process which relate to the selection, development and retention of qualified personnel in order to meet the individual, organizational, program and system needs of criminal justice in California. These factors include the general categories of recruitment, organizational development, employee benefits and services, position authorization and personnel development.

Current year adjustments include 7.6 man-years to develop suggested practices and procedures for criminal justice agencies; a comprehensive statewide survey of criminal justice manpower; funding for the Northern California Criminal Justice Training and Education System; and a federally-funded contract with CYA for Juvenile Justice Planning.

II. PLANNING AND PROGRAMS

Program Description

The functions of this division have been streamlined and consolidated into the Operations Division in the current year. The development of the California Comprehensive Plan for Criminal Justice has been retained at the state level, but responsibility for programmatic monitoring of individual grants has been delegated to the twenty-one regional planning units. Ancillary program services have been sharply curtailed in the current year.

OFFICE OF CRIMINAL JUSTICE PLANNING—*Continued*

III. STANDARDS AND EVALUATION

Program Description

The high-priority federally-required functions of this unit have been transferred in the current year to Operations for continuation at the minimum level needed for effective operation. Core staff has been retained for evaluation of programs and projects as well as for manpower and training. Review of information and communications systems have been transferred to the Department of General Services and the Office of Emergency Services. The development of statewide comprehensive standards and goals through a program called "Project: Safer California" has been curtailed.

General Fund				23,516	—	—
Federal funds				211,640	—	—
Reimbursements				1,667,362	—	—

IV. RESEARCH AND TECHNICAL ASSISTANCE

Program Description

The technical assistance function has been incorporated into the Operations Program as a part of the basic services required of the State Planning Agency by the Law Enforcement Assistance Administration. The work on development of a criminal justice research information system and the dissemination of information on high-technology gadgetry has been terminated. Further efforts to develop a computer based analytical model of the criminal justice system has been deferred as a low-priority task to be completed by LEAA.

Program Requirements	74-75	75-76	76-77	1974-75	1975-76	1976-77

V. ADMINISTRATION

Program Description

This program provides executive leadership and basic management services—council liaison, personnel, accounting, business services, budgeting, Grant processing and fiscal monitoring as well as technical guidance on legal, fiscal and affirmative action questions are also provided. The federally-mandated audit function is being performed under interagency agreement by the Department of Finance. Five temporary help man-years were added in the current year blanket and distributed to all programs during phase down.

Federal funds				1,638,184	669,172	721,118
Reimbursements				101,401	—	—

VI. STATE AND PRIVATE AGENCY AWARDS

The Omnibus Crime Control and Safe Streets Act, as amended in 1973, sets the maximum percentage of the block grant funds available which may be awarded to state agencies and private organizations. That maximum percentage matches the state's share of the total direct expenditures (excluding all federal funds) for criminal justice in California for the fiscal year before last. For Fiscal Year 1975-76 the maximum of 26.6 per cent is based on data for 1973-74. Notification of this "variable pass-through" percentage is usually distributed to all states in August or September of the fiscal year affected.

Beginning in the 1976-77 fiscal year, match funds for state agency awards are appropriated for allocation by the Department of Finance. Not included in the recipient of federal funds schedule are \$2,183,992 in federal funds available to state or private agencies for which no match funds have been requested in the budget year. These funds will be available until July 1, 1978.

State matching funds for discretionary grants are no longer appropriated in this item. These grants, and their match, will be shown in the appropriate departmental budget.

Program Requirements	1974-75	1975-76	1976-77
Continuing program costs	\$26,465,652	\$21,733,494	\$15,759,398

^a This table does not include Planning Grant (Part B) expenditures by the Office of Criminal Justice Planning (OCJP).

^b Match funds for this grant have been included in the budget of the department and thus are not included in this budget total.

^c No state match required for grants to private agencies. This is an anticipated grant level.

^d Subject to approval of California Council on Criminal Justice (CCCCJ).

VII. LOCAL PROJECT ALLOCATIONS

The Omnibus Crime Control and Safe Streets Act, as amended in 1973, provides a minimum percentage of the total block grant awarded to California which must be made available to units of local government or to combinations of local government. The minimum pass-through for 1975-76 is 73.4% based on the direct expenditures (excluding federal and state funds) by local governments on the criminal justice system during Fiscal Year 1973-74. The allocation to local units of government exceeds the minimum for the current year.

Program Requirements	1974-75	1975-76	1976-77

CALIFORNIA CRIME TECHNOLOGICAL RESEARCH FOUNDATION

The California Crime Technological Research Foundation is a state agency and functions as a nonprofit organization serving to foster the application of science and technology to the various components within the criminal justice field. Guiding CCTRF is a 20-member board of directors who represent law enforcement, corrections, judiciary, education, and research and technology disciplines. The members of the board are appointed by the Governor, with the advice and consent of the Senate.

The foundation's goals are to stimulate, encourage, conduct, evaluate, and sponsor research and development in the field of scientific and technological aids for the prevention and detection of crime, the apprehension and treatment of criminals, and the improvement of the administration of criminal justice in California.

General Fund support of CCTRF has been discontinued in the budget year and, if necessary, functions of the Foundation will be transferred to appropriate state agencies.

The Foundation projects no new grants to sustain the staff beyond the third quarter of the current fiscal year.

SUMMARY OF PROGRAM REQUIREMENTS

	1974-75	1975-76	1976-77

SIGNIFICANT PROGRAM CHANGES

Program	Description	Man-Years	Dollars
I.a.	Reduce federal funds—project SEARCH	-	-\$72,818
I.b.	Reduce federal funds—interstate organized crime index project	-2	-261,765
I.c.	Reduce other federal projects	-1.5	-184,297
I.d.	Reduce federal funds—criminal justice research information system	-0.5	-12,278
II.	Reduce Office of Criminal Justice planning—laboratory support	-5	-254,009
III.	Reduce General Fund support to reflect abolishment of CCTRF	-4	-136,969

Program Objectives and Description

The foundation has been directed to improve the administration of criminal justice and to assist criminal justice in determining the kind and quality of scientific, technological, and management processes needed to improve the effectiveness of criminal justice operations; to sponsor and conduct conferences and studies, collect and disseminate information and issue periodic reports relating to scientific and technological research.

Application of scientific and technological advances to the prevention and detection of asocial behavior and crime is needed if our society is to stem and reverse their increasing incidence.

No new grants are presently contemplated for 1976/77 fiscal year.

Authority

California Penal Code, Sections 14000-14017.

d. Criminal justice research information system	4	0.5	-	82,556	12,278	-

a. Project SEARCH

Project SEARCH (System for Electronic Analysis and Retrieval of Criminal Histories) is the code name for a 50-state consortium funded by the Omnibus Crime Control and Safe Streets Act of 1968, whose objectives are to establish national standards and goals for a criminal justice information and statistical system and development of prototype systems for the application of advanced technology. Projects sponsored include a requirements analysis of the identification operations in the U.S., development of a computerized laboratory collection system, design of a prisoner accounting information system that is compatible with a federal system, refinement of the standardized crime reporting system and development of a judicial information system.

CCTRF will not coordinate Project SEARCH after the 1974-75 fiscal year. This project has been transferred to a private, nonprofit corporation.

CALIFORNIA CRIME TECHNOLOGICAL RESEARCH FOUNDATION—Continued

Input	74-75	75-76	76-77	1974-75	1975-76	1976-77
Expenditures:						
Project SEARCH coordination	4	—	—	\$232,459	—	—
State identification bureau	—	—	—	3,091	—	—
Criminalistic lab info. system	2	—	—	102,431	72,818	—
Prisoner acctg. info. system	—	—	—	66,539	—	—
Standardized crime rpt. system	—	—	—	23,283	—	—
State judicial info. system	—	—	—	63,335	—	—
LEAA-sponsored symposium and conference	—	—	—	35,634	—	—
Totals	6	—	—	\$526,772	\$72,818	—

b. Interstate Organized Crime Control Index

The project expands the development of the Interstate Organized Crime Index (IOCI) based on the results of the prototype demonstration project completed under the auspices of Project SEARCH. The project includes maintaining the present demonstration and testing mode while the system undergoes an extensive independent evaluation, to include system design, hardware selection, software needs, organization structure, etc., and the feasibility of interfacing with a national law enforcement telecommunications system, while maintaining the IOCI requirements for security and privacy.

Input	74-75	75-76	76-77	1974-75	1975-76	1976-77
Expenditures:						
IOCI	5	6	—	\$189,783	\$261,765	—

c. Other Federal Projects

The Law Enforcement Assistance Administration (LEAA), CCTRF's federal cognizant agency, awards funds for projects pertaining to criminal justice activities. CCTRF has received funding for projects that involve conferences and studies to collect and disseminate information relating to the scientific and technological research, preparing prescriptive program handbooks, implementation of effective building or building related codes, develop a digital facsimile transmission device for the transmission of fingerprints, and conduct training courses for the creation and operation of crime analysis units.

Input	74-75	75-76	76-77	1974-75	1975-76	1976-77
Expenditures:						
Identification and documentation of building code enactment system	0.2	—	—	15,594	—	—

Crime analysis unit training course	3.3	3	—	91,028	108,764	—
Total	5	5	—	\$163,439	\$184,297	—

d. Criminal Justice Research Information System

Criminal justice research is being conducted throughout the nation by various entities. A centralized systematic library of easily retrievable and analyzable data of these research efforts does not exist.

The CJRIS project objectives are to develop a system that can quickly inform users of research efforts in any criminal justice areas, eliminate duplicate research efforts, direct attention to areas in need of research, and coordinate those parties interested in similar research efforts.

Input	74-75	75-76	76-77	1974-75	1975-76	1976-77
Expenditures	4	0.5	—	\$82,556	\$12,278	—

II. DEVELOP WAYS AND MEANS FOR REDUCING OR PREVENTING CRIME AND CRIMINAL ACTS

Program Objectives and Description

The objective of this program is to assist criminal justice agencies throughout the state and nation in finding new technological processes and equipment to improve the effectiveness of criminal justice operations and reduce crime and criminal acts.

No new grants are presently contemplated for 1976/77 fiscal year.

Authority

Penal Code, Section 14000.

CALIFORNIA CRIME TECHNOLOGICAL RESEARCH FOUNDATION—Continued

III. ADMINISTRATIVE SUPPORT FOR THE CALIFORNIA
CRIME TECHNOLOGICAL RESEARCH FOUNDATION

Program Objectives and Description

The executive director and his staff represent the foundation in meetings with national, state and local governing bodies, and various organizations concerned with the problems of crime, delinquency and improving the criminal justice system. This staff works with the foundation to identify areas in the criminal justice system where research and development are required. Staff also initiate work in the areas of foundation interests and catalyze other organizations in conducting programs in areas of mutual interest. Additionally, they function as liaison between the foundation and other concerned agencies.

Authority

Penal Code Section 14002.

STATE PUBLIC DEFENDER

Program Objectives and Description

The primary objective of the State Public Defender is to provide continuing legal representation for indigents in the Appellate and Supreme Courts.

The office of the State Public Defender was created by Chapter 1125, Statutes of 1975 (SB 1018). This bill, which went into effect January 1, 1976, requires the Governor to appoint a State Public Defender subject to confirmation by the Senate.

The State Public Defender will be appointed for a minimum of four years beginning January 1, 1976 but will remain in office until a successor is appointed.

The enabling legislation specifically provides that the State Public Defender shall: (1) employ such deputies and other employees and establish and operate such offices as he may need for the proper performance of his duties, (2) contract with county public defenders, private attorneys, and nonprofit corporations, (3) enter into reciprocal or mutual assistance agreements with the board of supervisors of one or more counties to provide for exchange of personnel, (4) formulate plans for representation of indigents in the Supreme Court and in each appellate district, and (5) represent any person who is not financially able to employ counsel in any proceeding where a person is entitled to representation at public expense.

Staff for the office is budgeted on a workload factor of 40 units (Appeals & Writs combined) per attorney per year.

ASSISTANCE TO COUNTIES FOR PUBLIC DEFENDERS

Section 987.6 of the Penal Code provides that the state shall pay to the counties an amount not to exceed 10 percent of the amount actually expended by counties in providing legal assistance to indigents charged with violation of state criminal law or involuntarily detained under the Lanterman-Petris-Short Act, Division 5 of the Welfare and Institutions Code. The subvention in the amount of \$775,000 represents the traditional level of state assistance to counties for public defenders.

PAYMENTS TO COUNTIES FOR COSTS OF HOMICIDE TRIALS

Section 4700.2 of the Penal Code provides that the state shall reimburse counties for the costs of trials relating to escape or conspiracy in a case where one or more objectives of the conspiracy is an escape from the custody of the Department of Corrections. The section applies only to trials based upon indictments filed between November 1, 1970 and June 30, 1971. The 1975-76 budget reflects a deficiency appropriation to fund estimated expenditures of \$339,000 to reimburse Marin County for costs incurred pursuant to Section 4700.2 Penal Code. Subsequent legislation (Chapter 254, Statutes of 1975) obviated the need for this deficiency appropriation since that legislation carried its own appropriation. No further expenditures are anticipated pursuant to this section in the budget year.

Sections 15201 through 15203 of the Government Code provide that the state shall reimburse the costs incurred by counties for homicide trials where the cost is in excess of the amount of money derived by the county from a tax of five cents (\$0.05) on each one hundred dollars (\$100) on the property assessed for purposes of taxation within the county.

These payments are in addition to those payable for court costs and county charges under Sections 4700 and 4700.5 of the Penal Code, in connection with trials of inmates charged with commission of a crime while incarcerated in a state institution or prison under the jurisdiction of the Department of Corrections.

ADMINISTRATION AND PAYMENT OF TORT LIABILITY CLAIMS

Chapter 1681, Statutes of 1963, established legislation governing the liability and nonliability of the state for tort actions of its officers and employees. This act also established rules governing the extent of duty of the state to pay judgments and to indemnify its employees.

The state, in general, has assumed liability for all losses up to \$2 million and has purchased insurance covering losses from \$2 to \$50 million. This budget provides for the administration of the program and for payment of claims against all General Fund agencies except the University of California, and a small number of agencies with unique liability problems which are covered under insurance policies. General Fund expenditures are proposed for awards and settlements, insurance for tort and aircraft settlements for amounts from \$2 to \$50 million, insurance for aircraft liability losses up to \$2 million and administrative costs in the Department of Justice and the Board of Control. The amount of settlement and awards varies, sometimes significantly, from year to year depending upon the cases in litigation and the amounts estimated to be awarded in each instance. The budget request is expected to cover those expenses which can reasonably be anticipated.

Additional funds are appropriated by special legislation and expended by the Department of Justice for tort defense and claims payments and are included in this presentation for comparison purposes.

INDEMNIFICATION OF PRIVATE CITIZENS

Program Objectives and Description

This program indemnifies those citizens who are injured and suffer financial hardship as a result of a crime of violence, or who sustain damage or injury in performing acts which benefit the public.

The victim of a crime of violence, a citizen performing an act beneficial to the public, his family, or any person dependent upon the victim or citizen for support may file a claim with the State Board of Control. Eligibility for an award is determined by the Board of Control after an investigation of the claim by the Attorney General. Awards may not exceed \$23,500 for each claimant including attorney's fees.

Chapter 1144, Statutes of 1973, increased the amount of awards which may be paid to victims of crime. The amounts payable have increased from a maximum of \$5,000 for losses sustained prior to July 1, 1974, to a maximum of \$10,000 for loss of earnings, \$10,000 for medical expenses, \$3,000 for rehabilitation services and attorney's fees up to ten percent of the award or \$500, whichever is less, for injuries sustained after June 30, 1974.

Chapter 1144, Statutes of 1973 has also increased the number of claims filed by victims of violent crimes, resulting in the expansion of required attorney and investigative services performed by the Attorney General in the current year.

In addition to services performed by the Attorney General the Board of Control administers the processing of such claims and makes the final determination on the acceptance, denial or continuance of such claims.^a These services will be reflected for the first time as expenditures in this budget for the 1976-77 fiscal year in order to present a complete display of all expenditures which are directly related to this program.

FAIR POLITICAL PRACTICES COMMISSION

Program Objectives and Description

The Fair Political Practices Commission has primary responsibility for the impartial, effective administration and implementation of the Political Reform Act of 1974. To fulfill this responsibility the Commission adopts, amends and rescinds rules and regulations to carry out the purposes and provisions of the Act; issues opinions to persons who request them with respect to their duties under the Act; prescribes forms for reports, statements, notices, and other documents under the Act; prepares and publishes manuals and instructions to facilitate compliance with and enforcement of the Act; explains the duties of persons and committees under the Act; provides assistance to agencies and public officials in administering the provisions of the Act; investigates possible violations of the Act; conducts hearings and applies sanctions provided by the Act; provides technical assistance to State and local agencies in the preparation of Conflict of Interest Codes; reviews and approves the Codes of state agencies, county boards of supervisors, city councils, and all local government agencies with jurisdiction in more than one county.

The Fair Political Practices Commission proposes an augmentation to its statutory budget allocation in the amount of \$96,280 which will provide six staff positions within existing programs for projected and necessary program expansions. These positions are: (1) Two Investigator positions in the Enforcement Division, one position to be located in Sacramento and one in Los Angeles to handle the high volume of alleged conflict of interest violations anticipated with the promulgation in 1976 of state and local conflict of interest codes covering some 150,000 state and local officials; (2) One Documents Examiner and one Clerk Typist II to handle the large volume of statements that must be filed by candidates and holders of state and local offices; (3) One Accounting Officer II and one Accounting Technician to provide accounting and fiscal data more expeditiously than can be obtained through the existing contractual arrangement.

AGRICULTURAL LABOR RELATIONS BOARD

The objective of the Agricultural Labor Relations Board, which was created by the Agricultural Labor Relations Act of 1975 (Chapter 1), is to ensure peace in the agricultural fields of California by bringing stability in labor relations through the guarantee of secret ballot elections to determine collective bargaining representation and the identification and elimination of unfair labor practices by employers and unions. The ALRB is patterned after the National Labor Relations Board and is divided into two major programs; (1) Board Administration of the Agricultural Labor Relations Act and (2) General Counsel Administration of the Agricultural Labor Relations Act.

Due to lack of precedent in the area of agriculture labor relations and the higher than anticipated number of elections, the 1975-76 budget of \$1.3 million was insufficient. The only other similar program, the National Labor Relations Board, held 35 elections its first year while the ALRB held 315 its first two and one-half months. Objections to elections were initially estimated at 30 percent, whereas 95 percent of the elections had objections filed. This workload will require a deficiency appropriation in 1975-76 of \$3,825,054.

I. BOARD ADMINISTRATION

Program Objectives and Description

The objective of the Board Administration program is to ensure that all parties concerned with agricultural labor are guaranteed their full rights under the ALRA and other applicable statutes. To accomplish this the board establishes policies and procedures for all activities related to the conduct of elections, the identification and resolution of unfair labor practices and the conduct of hearings on elections and unfair labor practices. It also conducts and/or reviews these hearings on elections, determines whether the results of such elections should be certified, and adjudicates complaints issued in unfair labor practices.

The State of California has over 250,000 farm workers working either permanently or intermittently on approximately 60,000 farms, 30,000 of which employ 50 or more people at some time of the year. The initial years of implementation of the ALRA will see a large continuing education process of all aspects and effects of the ALRA on the part of the Board, unions, growers, farm workers and the general public. This educational process will focus on the areas of public involvement in determining the policy and procedures and through the review of the conduct of elections and complaints of unfair labor practices. Until a body of decision in these areas is established to adequately define what does and does not constitute unfair labor practices and proper elections, a large volume of cases can be expected.

Program Elements

a. Policies and Procedures	-	3.7	2.8	-	149,952	110,978
b. Hearings and Board Review	-	36.9	50.5	-	1,516,184	2,003,661

a. Policies and Procedures

Board Administration is responsible for the overall policy direction of the agency. This involves the conduct of public meetings at which policy regarding the organization and operations of the agency is discussed and decisions made. Such policy decisions require input from the General Counsel, Executive Secretary, Chief Administrative Officer, the Board's own legal staff, and comments from growers, labor unions and the general public as well.

The establishment of procedures for the agency involves the development and promulgation of regulations required to implement, interpret, and make specific, provisions of the Agricultural Labor Relations Act. This process involves the conduct of public hearings throughout the State to facilitate public comment on the regulations, analysis of regulations by Board members and their staff, the development of recommendations for Board discussion, and the final adoption of regulations under procedures set forth in the Government Code. Because the Act has been in effect for a short period of time, the Board's regulations and their impact on the program area must be reviewed and evaluated on an ongoing basis in order to assure accomplishment of the purposes of the Act.

Output

Output consists of the rules and regulations needed to guide and direct all parties in the conduct of fair agricultural labor relations.

Input	74-75	75-76	76-77	1974-75	1975-76	1976-77
Expenditures	-	3.7	2.8	-	\$149,952	\$110,978

b. Hearings and Board Review

The primary role of the Board is to exercise the adjudicatory functions of the agency. The Agricultural Labor Relations Act assigns the Board the function of hearing objections to election cases, challenges and complaints of unfair labor practices.

Hearings are conducted by the Board or its agents to determine whether particular union representation elections are to be certified. There are several possible bases for an objection to an election case; and the Board rules on the merits of objections and if the facts of the case warrant decertification or certification of elections.

Hearings are also conducted on charges of unfair labor practices. The Agricultural Labor Relations Act defines unfair labor practices and authorizes the board, if the preponderance of the evidence taken warrants such a decision, to issue orders to prevent or remedy such practices. The Board acts as a court of appeals for unfair labor practice cases brought to it by either the parties in the dispute or the General Counsel. The Board is empowered to hear the disputes out of which unfair labor practices arise, decide on what constitutes a fair adjustment of the dispute, and seek compliance with its decisions. In these unfair labor practice cases, the Board has the power to petition the courts for appropriate temporary relief or restraining orders.

The general ministerial responsibilities of the Board include overall calendar control which in turn includes setting and coordinating the hearing dates

AGRICULTURAL LABOR RELATIONS BOARD—Continued

for all regional offices, selecting and notifying the hearing officer, determining the need for selecting and notifying the interpreter, assisting with site procurement, and answering all inquiries pertaining to all of the above responsibilities.

The Board has established the internal administrative structure to receive, log, and act, in a timely manner, upon all appeals, motions and requests made by the parties in the cases.

II. GENERAL COUNSEL ADMINISTRATION

Program Objectives and Description

The objective of the General Counsel Administration is to provide fair, secret ballot elections, to identify and bring resolution or prosecution in unfair labor practices, and to defend the Board in all court cases resulting from challenges to the Act, or policies and procedures and decisions of the Board, and to enforce decisions of the Board. The General Counsel is responsible for implementing the provisions of the Act and rules and regulations of the Board in the conduct of elections, challenges to ballots, objections to elections, and investigation, issuance of complaints and prosecution before the Board in unfair labor practice charges. He is also responsible for representing the Board in all court cases in which it is involved. The immediate staff of the General Counsel are primarily responsible, with assistance from the regional offices, for this latter activity while the staff of the regional offices have primary responsibility, under the direction and coordination of the General Counsel, for the activities related to elections and unfair labor practices.

c. Court Litigation	—	13.2	26.4	—	288,194	662,755

a. Representation Cases

The primary means of bringing peace and stability in labor relations is to allow employees the right to organize and bargain collectively. In order to assure that workers may exercise this right if they so choose, free, fair secret ballot elections must be available to them. Under this program the ALRB provides these elections.

Upon the filing of a petition for election in a Regional Office, the petition is investigated and, if appropriate, election arrangements are made and the election is conducted within seven days of the date of filing. An investigation is conducted to determine whether the petition meets all the requirements of the Act and the Board's Rules and Regulations. If the petition meets all requirements of sufficiency and if there is reasonable cause to believe that a bona fide question of representation exists, arrangements are made with the participating labor organization(s) and with the employer to conduct the election. If no choice on the ballot receives a majority of the ballots cast, a runoff election is conducted. If the election cannot be certified, another election may be held.

Additional elements may be required in the investigation of petitions during the seven days subsequent to filing including determining whether a valid election was conducted among the employees of the employer within the twelve months immediately preceding filing, whether a labor organization is currently certified as the exclusive collective bargaining representatives of the employees affected, and whether the petition is barred by an existing collective bargaining agreement negotiated by a certified labor organization and an employer. In addition to the filing of petitions for certification by labor organizations, the statute also permits the filing of petitions for decertification by an agricultural employee or a group of agricultural employees. The same additional elements may also be required in the investigation of such petitions during the seven days subsequent to filing.

Within five days after the completion of an election, any person may file with the regional office a signed petition objecting to the conduct of the election or conduct affecting the results of the election. The person filing such objections may also attack the allegations of the petition for certification, the determination of the geographical scope of the bargaining unit, declarations or other evidence establishing a prima facie case in support of its allegations. Objections petitions and accompanying evidence are analyzed to determine whether they meet the requirements of the act and the rules and regulations of the Board. An objections petition or any allegation contained therein which does not meet these requirements is dismissed by the regional director. Such action may, upon appropriate request, be reviewed by the Board. Any allegations on the objections petition which are procedurally and legally sufficient must be scheduled for hearing at which time the person filing the objections petition and any other party to the election may present evidence with respect to those allegations. The record of the hearing is sent to the Board in Sacramento.

Objections hearings are currently being conducted by hearing officers under contract with the Board. It is anticipated that in 1976, hearing officers will be hired as employees as qualified applicants are identified and given additional training. It is also anticipated that in the latter part of 1975-76 and in the 1976-77 fiscal year the functions associated with analyzing the objections petition and supporting evidence will increase as the Board continues to build a body of case law.

During an election, a Board agent or an observer of any party may challenge the eligibility of any person to cast a ballot. The ballots of challenged voters are set aside and if upon completion of the election, the tally of ballots discloses that the challenged ballots are sufficient in number to affect the results of the election, an investigation may be conducted to determine the challenged voters' eligibility and a report issued containing recommendations and conclusions. In the alternative, a hearing may be held on some or all of the challenged ballots. At such hearings, the hearing officer, parties or the Board or its agents may call, examine and cross-examine witnesses and introduce into the record documentary and other pertinent evidence. A transcribed record is made of such testimony and evidence. At the close of the hearing, the record is transferred to the Board in Sacramento.

	-	\$1,831,218	\$1,870,344

b. Unfair Labor Practices

An unfair labor practice charge may be filed by an individual, an employer, or a labor organization alleging that an agricultural employer or a labor organization is engaging in an unfair labor practice in violation of Sections 1153, 1154 or 1155 of the Act. The charge is filed in a regional office and a copy is served on the charged party. The charge is then assigned to a Board agent in the regional office to conduct an investigation of the charge. Initially, declarations are taken from the charging party's witnesses and where it appears that there is evidence of a violation, the charged party is requested to provide witnesses relevant to the investigation. After sworn declarations have been taken from all relevant witnesses, the regional office determines whether the investigation has established sufficient evidence to warrant issuance of a complaint. If the determination is made to issue a complaint, the charged party is contacted and requested to enter into a settlement agreement to resolve the alleged unfair labor practices. In the absence of settlement, the matter is set for hearing before an Administrative Law Officer. An attorney in the regional office then prepares the appropriate witnesses for trial and litigates the case. These hearings have ranged from one day to over two weeks in duration. A legal brief is ordinarily written by the trial attorney or an attorney in the General Counsel's office and submitted to the Administrative Law Officer after the close of the hearing. Exceptions to the Administrative Law Officer's decision may be taken by filing with the Board. In this circumstance, another legal brief, arguing the points on review by the Board, is prepared by the trial attorney or an attorney in the General Counsel's Office.

In 1976-77 it is anticipated that the unfair labor practice cases will be of a more factually and legally complex nature and will therefore take more time and effort.

Output	1974-75	1975-76	1976-77

c. Court Litigation

ALRB court litigation falls into three categories:

1. Suits against the Agency

This litigation involves suits against the Agency by employers and labor organizations seeking to enjoin the Agency from conducting elections, counting ballots, proceeding with unfair labor practice trials and attempting to obtain judicial review of a Regional Director's showing of interest determination or bargaining unit determination. These suits are in the nature of petitions for declaratory and injunctive relief, writs of mandate, and writs of prohibition and usually necessitate the Agency appearing on a few hours notice to defend against the issuance of a Temporary Restraining Order and then perhaps a week later appearing in an Order to Show Cause hearing on a request for a preliminary injunction. These suits have also resulted in appellate litigation where it has been necessary to seek extraordinary appellate review in the appropriate District Court of Appeals or the California Supreme Court in order to stay the effect of an adverse ruling in a Superior Court.

2. Petitions for Injunctive Relief filed by the Agency

Section 1160.4 of the Act provides that the Agency may seek injunctive relief to enjoin the commission of an unfair labor practice after a complaint has been issued. This provision is discretionary and is only utilized in the instance where the alleged unfair labor practices are extremely serious, involve acts or threats of violence, or involve the denial of access to a labor organization during an election campaign.

Section 1160.6 requires the Agency to seek injunctive relief whenever there is reasonable cause to believe there is a violation of Sections 1154(d) (1) (2) or (3), 1154(g) or 1155.

3. Enforcement of ALRB Decisions

Section 1160.8 of the Act provides for judicial review of Board orders in unfair labor practice decisions. In those cases where a respondent seeks judicial review in the appropriate court of appeals, attorneys in the General Counsel's Office appear on behalf of the Board and defend its decisions. If the respondent has not filed a petition for review but refuses to comply with the Board's order, the Agency will seek enforcement of the Board's order in the appropriate superior court.

STATE CONTROLLER

The State Controller is the elective state fiscal officer. As such the primary objectives of his office are: to provide sound fiscal control over receipt and disbursement of public funds; to report the financial operations and conditions of the state, and local government; to assure that money due the state is collected and to provide equitable, effective and economical tax administration; to provide fiscal assistance and guidance to local government; to administer the state's unclaimed property laws; and to serve as a member on fiscally oriented state boards and commissions.

The powers, duties and functions of the State Controller embrace (1) those expressed in the Constitution (Article XIII, Sections 20, and 21), (2) those inherent in the nature of his office, though not so expressed, (3) those unquestionably essential to the efficient operation of his office, and (4) such additional powers, duties, or functions as the Legislature may confer or impose upon him.

SUMMARY OF PROGRAM REQUIREMENTS

I. FISCAL CONTROL

Program Objectives and Description

The primary objectives are to maintain an effective system of internal control over the state's financial transactions through modern auditing and disbursing techniques and to report promptly and accurately the state's financial condition and operations to assure the fiscal integrity of state government and to provide timely financial information to the Legislature and public.

The major activities of the Divisions of Accounting, Audits and Disbursements are integrated into a system of internal control over the receipt and use of state, federal and other public moneys in the State Treasury. Agency documents are reviewed to determine the purpose for which the money may be used and to verify the program, fund or account prior to authorizing the deposit or transfer of funds. Agency claims against the Treasury are office audited for legality prior to disbursement, supplemented by field audit where necessary. All deposits, transfers and withdrawals are recorded in EDP control accounts, and a determination is made that there is an available appropriation and sufficient cash in the appropriate fund to pay each claim. The preparation and direct mailing of warrants to payees is the final link in the integrated claim and warrant process. Reports stating the state's financial operations and condition are issued periodically.

g. Data processing service	20.3	21	21	(289,910)	(479,344)	(509,246)

a. Control Accounting

Control accounts are maintained for all funds in the State Treasury and for the centralized state treasury trust system. Cash management is performed for all funds investing through the Surplus Money Investment Fund Program. This unit also initiates the transfers of money for loans to and from the General Fund on the basis of cash needs and loan authorizations. Both control and detailed accounts covering investments made from various state funds and from treasury-pooled money, as well as interest-bearing bank deposits, are maintained. Education Code requirements as to repayments by school districts of State school building aid loans are administered.

One Accounting Officer II is being added in the budget year based on the workload increases. Accounting documents processed increased 8% in 1973-74 and 7% in 1974-75.

Output	1974-75	1975-76	1976-77
Receipts issued	34,346	35,000	36,000
Transfers, journals and canceled warrant reports	58,142	60,150	62,150
Claims processed	224,530	231,000	238,000
Treasury trust deposits	214,371	216,000	218,000
Treasury trust account transactions	4,899,388	4,966,500	5,117,500

Input	1974-75	1975-76	1976-77
Expenditures	\$836,694	\$998,713	\$1,061,270
Personnel man-years	45.9	44.6	46

b. Financial Analysis

Comprehensive fiscal reports, the principal one being the Controller's Annual Report of the state's financial affairs, are issued regularly. Others include the preliminary annual report, the August governmental cost funds report, the month-end statements showing revenues derived from all major taxes, and the receipts and expenditures of the General Fund, and other periodic special reports. Data is compiled and computations made for apportionments to local agencies, such as highway users' taxes, cigarette taxes, motor vehicle license fees (in-lieu tax), property tax relief, mandated cost claims, and federal funds. Estimates of future cash receipts and expenditures are compiled for management of the Pooled Money Investment Program.

One Accounting Officer III position is being added in the budget year for increased mandated cost program workload and to assist in preparation of the Controller's Annual Report. Mandated cost workload has increased as follows:

	1973-74	1974-75	1975-76	1976-77
Number of claims	2,604	5,732	6,150	6,300
Number of letters	518	790	850	900
Man-years	0.75	1.59	1.75	2

Output	1974-75	1975-76	1976-77
Financial reports	25	26	26
Apportionments	80	84	84
Apportionment estimated	4	4	5

Input	1974-75	1975-76	1976-77
Expenditures	\$291,765	\$351,671	\$385,092
Personnel man-years	12.6	12.2	13.2

c. Claim Audit

All state expenditures, including contract services, personal services, equipment, materials, travel claims and investments, are audited prior to payment to assure charges are legal, for an authorized purpose and that an appropriation exists from which they can be paid.

Output	1974-75	1975-76	1976-77
Claim schedules audited	242,664	249,944	257,442
Amount of claims approved (millions)	\$59,942	\$61,740	\$63,593
Amounts questioned (thousands)	\$130,973	\$134,902	\$138,950
Amounts disallowed	\$1,139,150	\$1,184,716	\$1,232,105
Cost benefit ratio (disallowances per \$ of cost)	\$1.98	\$1.88	\$1.92

Input	1974-75	1975-76	1976-77
Expenditures	\$573,993	\$631,676	\$649,791
Personnel man-years	41.7	41.8	42.3

d. Field Audit

The staff field audits expenditures of state and federal funds subvented, loaned or granted to local jurisdictions under various programs. Municipal and justice court accounting systems are reviewed to insure that they are following a uniform system established by the Controller and that adequate audits of the courts are made.

Four governmental auditor positions are being deleted in the budget year due to a decrease in county welfare audit workload. Provision is also made to eliminate certain interagency contracts for subvention audits totaling \$105,200, presently reimbursed by the General Fund, and appropriated directly to the Controller. There is no increased cost to the General Fund.

STATE CONTROLLER—Continued

Output	1974-75	1975-76	1976-77
Audits performed	1,599	1,543	1,594
Amounts audited (thousands)	\$2,863,614	\$2,978,160	\$3,067,500
Recoveries	\$8,105,149	\$8,510,400	\$8,935,925
Cost benefit ratio (recoveries per \$ of cost)	\$5.02	\$4.82	\$4.96
Input			
Expenditures	\$1,614,973	\$1,765,896	\$1,736,378
Personnel man-years	72.9	72.6	69.3

e. General Disbursement

This includes the issuance of all Controller's warrants in payment of the state's obligations other than salaries and wages; the preparation and maintenance of warrant registers and an alphabetical warrant index; maintenance of controls over all disbursements, agency trust accounts and fund accounting transactions; and reconciliation of warrants paid by the State Treasurer.

Entries to the central control accounts reflecting disbursement transactions are automatically generated by electronic processes. Information returns summarizing reportable tax payments are submitted annually in magnetic tape form to the Internal Revenue Service and the State Franchise Tax Board.

Output	1974-75	1975-76	1976-77
Warrants issued	9,662,799	9,944,410	10,351,102
Claim schedules processed	224,633	231,344	238,256
Information returns prepared	298,227	307,174	316,389
Input			
Expenditures	\$1,681,350	\$1,985,574	\$2,028,350
Personnel man-years	42	42.3	42.2

f. Payroll

The Uniform State Payroll System was adopted by the Legislature to provide an effective, efficient, uniform and controllable payroll system which would meet the needs of management and employees. From reports submitted by employing departments, a roster is maintained reflecting the current employment status of state employees. Salary warrants are issued based on recorded transactions and are reconciled with attendance reports. A roster of established positions is also maintained together with a record of amounts encumbered for blanket positions. These rosters with the records of salary payments provide data for departmental accounting records and preliminary budget schedules. The state's contributions for federal wage tax and health insurance premiums is computed as a part of payroll preparation. The system performs all standard functions of payroll withholdings and wage reporting for state and federal taxes, for unemployment insurance for covered classes, and for the appropriate retirement system for each member. Voluntary reductions of wages are recorded and equivalent funds made available for the purchase of tax sheltered annuities, or investment as deferred compensation in the name of the employee. An employee account for the purchase of U.S. Savings Bonds is maintained and bonds are issued monthly by the payroll unit. Miscellaneous deductions authorized by employees are also withheld and disbursed to various insurance carriers, employee associations, charitable fund drives, credit unions and state agencies.

Eight clerks II and two man-years of temporary help (\$81,117) have been added for the current year only, to provide payroll audit support required by increased workload due to PIMS conversion delays, retroactive salary increase (including separate interest payments) and the clerical bonus pay.

Output	1974-75	1975-76	1976-77
Withholding tax statements	229,464	236,348	238,711
U.S. savings bonds issued	249,993	249,993	249,993
Payroll warrants issued	2,826,028	2,896,679	2,969,096
Payroll deductions	20,121,722	18,451,562	18,977,260

Personnel man-years	20.3	21	21

STATE CONTROLLER—Continued

II. TAX ADMINISTRATION

Program Objective and Description

The objectives are to provide equitable, effective and economical administration of inheritance and gift taxes, gasoline tax refunds, and certain minor taxes.

The Division of Inheritance and Gift Tax administers the inheritance tax, representing the state in the court determinations of the tax and supervising the activities of inheritance tax referees and county treasurers in the determination and collection of inheritance taxes, and also audits and collects gift taxes. The Division of Tax Collection and Refund collects certain delinquent taxes and audits and refunds taxes paid on gasoline used off-road.

Authority

Revenue and Taxation Code, Division 2, Parts 1.5, 2, 4, 7, 8, and 9.
Public Resources Code, Division 3, Chapter 1, Articles 5.5 to 7.

d. Gas Tax Refund	40.7	40.1	40.2	738,436	780,431	783,283

a. Inheritance Tax

An inheritance tax is levied upon the right to succeed to property upon the owner's death, or transferred in lieu thereof or in contemplation of death. To carry out this program, the Controller appoints from a list of prequalified applicants at least one person to a panel of inheritance tax referees in each county. The court appoints a referee to act in each proceeding. The referee appraises the property for both probate and inheritance tax purposes, after which he prepares the report of inheritance tax due. Completed reports are submitted to the Controller for an office review to determine the correctness of the tax, including distribution and computation. The report is then filed with the court, which may hear and determine any objections. Based upon the referee's report, and any hearing, the court makes its order fixing tax. The tax is paid to the county treasurer who periodically remits to the state.

On a workload basis three Legal Assistant positions are being added for the budget year, 40 percent of which is funded by reduced temporary help presently used for graduate student assistants. Since 1970-71 the number of staff attorneys has increased only 13%, while Inheritance Tax Reports have gone up 19%, rulings 28% and court appearances 53%.

Based on workload increases since 1970-71, 3.5 clerical filing positions are being added in the budget year. During this period there has been only a 10% clerical staff increase, while Inheritance Tax Reports have increased 19% and Consents issued 33%.

One Inheritance and Gift Tax Examiner II is being added to permit more extensive evaluation of closely held corporations and businesses. These audits return \$459 to the General Fund per audit hour expended.

Measures of Effectiveness

	1974-75	1975-76	1976-77
1. Percent of payments made timely	Estimated 56%	48%	56%

STATE CONTROLLER—Continued

b. Gift Tax

The Gift Tax prevents the circumvention of the inheritance tax through donations. Legislation in 1971 changed this tax to a quarterly self-assessed tax requiring payment with the return.

One clerical position is being added in the budget year to handle increased workload. Gift tax returns have increased 45% since 1970-71 without any increase in filing staff.

Measures of Effectiveness

		1974-75	1975-76	1976-77
1. Percent of examined returns found to have tax errors.....	Estimated	25%	25%	25%
	Actual	29%	-	-
2. Dollar corrections in Self-Assessments:				
a. Additional assessments	Estimated	15%	20%	20%
	Actual	29%	-	-
b. Refunds	Estimated	2%	2%	2%
	Actual	2%	-	-

Program Size Indicators

		1974-75	1975-76	1976-77
1. Net gift tax revenue		\$15,490,211	\$17,500,000	\$19,000,000
2. Increase in revenue resulting from compliance program action		\$358,673	\$400,000	\$425,000
3. Number of returns received		16,923	17,769	18,657
4. Number of returns examined.....		12,958	15,498	17,048
5. Returns submitted after compliance program action		431	500	525
6. Delinquent Accounts Receivable at Fiscal Year-End:				
a. Number		706	750	600
b. Amount		\$2,400,297	\$2,000,000	\$1,500,000
7. Uncollectible Accounts Written off:				
a. Number		4	5	5
b. Amount		\$9,856	\$2,000	\$2,000

Input

Expenditures	\$377,605	\$398,547	\$417,358
Personnel man-years	18.9	18.2	19.2

c. Tax Collection

Accounts are maintained and delinquencies are collected for four taxes assessed by other agencies—motor vehicle fuel license tax, the insurance premium tax, including the retaliatory tax, petroleum and gas charges and subsidence abatement charges.

Measurement of Effectiveness

		1974-75	1975-76	1976-77
Delinquent account collections as a percent of accounts available for collection during the year:				
(1) Amount	Estimated	85%	72%	71%
	Actual	72.1%	-	-
(2) Number of accounts.....	Estimated	75%	70%	72%
	Actual	63.3%	-	-

Program Size Indicators

Delinquent taxes collected during the year:				
(1) Amount		\$3,087,302	\$3,100,000	\$3,150,000
(2) Number of accounts.....		971	975	980

Input

Expenditures	\$60,374	\$40,415	\$41,693
Personnel man-years	3.3	2.4	2.4

d. Gas Tax Refund

The Motor Vehicle Fuel License Tax is levied on the distribution of gasoline to support the construction and maintenance of highways and rapid transit systems. The tax is paid at the time of distribution regardless of the purpose for which the fuel is being acquired. The tax is then passed on to the ultimate user. Users may file a claim with the Controller and obtain a refund of the tax paid on fuel used for certain non-highway purposes.

Measures of Effectiveness

		1974-75	1975-76	1976-77
Percent of proper claims paid within 30 days	Estimated	88%	80%	80%
	Actual	60.3%	-	-
Number of improper or invalid claims rejected before payment as a percent of claims received:				
(1) Office review:				
(a) Number	Estimated	16.2%	18%	20%
	Actual	20.3%	-	-
(b) Amount	Estimated	2.8%	2.5%	2.5%
	Actual	2.5%	-	-
(2) Field audit:				
(a) Number	Estimated	4.1%	4.5%	4.5%
	Actual	4.1%	-	-
(b) Amount	Estimated	1%	3%	3%
	Actual	3.1%	-	-
Dollars recovered from field audits as a percent of the refunds field audited after payment	Estimated	10%	14%	18%
	Actual	18%	-	-

III. LOCAL GOVERNMENT FISCAL AFFAIRS

Program Objectives and Description

The objectives are to secure uniform and effective local budgeting, accounting and property tax collection procedures and to report on a timely basis meaningful financial local governmental information.

This program includes the prescribing of uniform county budgeting procedures, and uniform accounting systems for counties and special districts; collection, compilation and dissemination of comprehensive fiscal data for all local agencies; reviewing and reporting on the use of state gas tax funds apportioned to local government; reviewing and approving county cost allocation plans; and preservation of the local property tax base by prescribing uniform collection procedures, assuring marketable tax titles and prompt restoration of tax delinquent properties to the local tax rolls.

To the fullest extent possible, the Controller involves local governmental officials in these activities through membership on various advisory and coordinative committees.

Authority

Government Code Sections 12410, 12416, 12422-12423, 12463-12463.1, 26909, 29020, 29065, 29108-29109, 30100 et seq., 30200-30201, 30300-30302, 40804-40805, 53890 et seq.

Streets and Highways Code Sections 186.3, 2104-2155.

Water Code Sections 20600 et seq.

Revenue and Taxation Code Parts 5, 6, 7, and 9 of Division 1.

Program Requirements

	74-75	75-76	76-77	1974-75	1975-76	1976-77
Continuing program costs.....	55.8	55.6	56	\$1,211,874	\$1,335,470	\$1,420,186
Workload adjustments.....	-	3.3	3	-	38,190	42,498
Totals, Local Government Fiscal Affairs	55.8	58.9	59	\$1,211,874	\$1,373,660	\$1,462,684
General Fund				621,662	731,619	811,128
Motor Vehicle Fuel Account				397,061	436,151	445,283
Reimbursements				193,151	205,890	206,273

Program Elements

a. Financial reporting, budgeting and accounting	21.1	23.2	23.4	491,690	574,359	639,725
b. Streets and roads	20.2	20.2	20	429,463	474,827	484,342
c. County cost plans	6	5.5	5.5	113,505	114,471	119,488
d. Tax-deeded land	8.5	10	10.1	177,216	210,003	219,129

a. Financial Reporting, Budgeting and Accounting

Local government financial data are collected, compiled and made available in a number of annual publications. County budgets are reviewed; forms, rules and regulations on the preparation of county budgets are prescribed. The bonds of eligible local agencies are certified in accordance with law. Two statutory committees of local government officials who serve without remuneration assist the Controller in these matters. Under Section 30200 of the Government Code the Controller must devise and supervise the installation of uniform accounting procedures for all counties. Assisting is a 10-man "Controller's Committee on County Accounting Procedures", all representatives of local government who serve without pay. Under Section 53891 of the Government Code, the Controller must prescribe uniform accounting and reporting procedures for all special districts.

Two Governmental Auditor II positions are being added in both the current and budget years to meet workload generated by a cooperative Federal-State data collection program related to local revenue sharing. This program insures uniformity and eliminates duplicate filings with federal and state offices. The 1975-76 costs are being funded out of savings.

Output

Annual Report of Financial Transactions Concerning:	1974-75	1975-76	1976-77
Bond certifications	20	4	4
Tax rate reviews	1,534	2,000	2,500
Revenue sharing reports	-	2,472	2,474
School and special districts, counties and cities	122	122	122

Input

Expenditures	\$491,690	\$574,359	\$639,725
Personnel man-years	21.1	23.2	23.4

STATE CONTROLLER—Continued

b. Streets and Roads

Data is collected, reviewed, compiled and published in an annual consolidated report concerning street and road financial transactions. By law the Controller must review and report on the use of state gas tax funds apportioned to local government to insure proper use and accounting. Audits performed under contract with the Department of Transportation are expected to increase from 160 in 1974-75, to 344 in 1975-76 and 540 in 1976-77. One new auditor position and 0.3 man-years of temporary help has been added in the current year. The auditor position is proposed for the budget year. The positions are fully reimbursable.

Output			
Gas Tax Reviews:	1974-75	1975-76	1976-77
Gas tax claimed (thousands)	\$235,132	\$246,000	\$246,000
Projects reviewed	7,516	7,500	8,000
Disallowances	\$2,406,011	\$3,700,000	\$3,700,000
Other projects	160	344	540
Input			
Expenditures	\$429,463	\$474,827	\$484,342
Personnel man-years	20.2	20.2	20

c. County Cost Plans

Under Federal Management Circular A-87, each county prepares a county cost allocation plan each fiscal year to receive federal reimbursements for indirect costs of federally supported programs. The federal Department of Health, Education and Welfare administers this activity while the Controller develops and issues procedures and supplemental instructions to counties and reviews and approves such plans.

Output			
County cost plan reviews	1974-75	1975-76	1976-77
	53	74	90
Input			
Expenditures	1974-75	1975-76	1976-77
Personnel man-years	\$113,505	\$114,471	\$119,488
	6	5.5	5.5

d. Tax-Deeded Land

Technical advise and assistance is provided to counties to assure uniform and effective interpretation and application of property tax laws and the collection of property taxes. This assistance aids counties in assuring sound marketable tax titles. Tax sales are authorized and approved. Tax collection procedures and forms are prescribed after consultation with the Committee on County Tax Collection Procedures. Counties collect a \$2 fee on each redemption, half of which goes to the General Fund, which also receives \$1.50 on each tax-deeded parcel sold. This pays the state's costs of this element.

Output			
Sales to state	1974-75	1975-76	1976-77
Deeds to state	194,032	185,000	185,000
Parcels approved for sale	7,063	6,500	6,500
Redemption and sales fees	7,125	10,000	10,000
	\$160,450	\$165,000	\$162,500
Input			
Expenditures	\$177,216	\$210,003	\$219,129
Personnel man-years	8.5	10	10.1

IV. PERSONNEL INFORMATION MANAGEMENT SYSTEM (PIMS)

Program Objectives and Description

In 1973 the Legislature approved a joint proposal of the Controller, Personnel Board, Public Employees' Retirement System and the California State University and College System to design and implement a modern computer personnel-payroll information system.

A project manager and the Chief of the Personnel Services Division receive general direction and policy guidance from the PIMS Steering Committee which is composed of the executive officer, or designee, from each of the participating departments. Liaison with operating departments is provided through user groups.

The major emphasis has changed from Systems Development to the operational Personnel Services Division (PSD), which began conversion of the first subsystem in the latter part of 1974. When all system design is completed, the System Development element will be eliminated and only PSD will remain.

Authority

All activities are within authority of the participating departments.

Program Requirements	74-75	75-76	76-77	1974-75	1975-76	1976-77
Continuing program costs.....	70.8	126.4	121.9	\$1,840,840	\$3,803,293	\$4,943,574
Workload adjustments.....	-	6	60.2	-	60,624	680,896
Totals, PIMS Project.....	70.8	132.4	182.1	\$1,840,840	\$3,863,917	\$5,624,470
General Fund				1,750,467	3,863,917	5,624,470
Reimbursements				90,373	-	-

Program Elements

a. Personnel services	44.8	86.4	146.1	828,752	2,154,585	3,889,011
b. System development	26	46	36	1,012,088	1,709,332	1,735,459

STATE CONTROLLER—Continued

a. Personnel Services

The nucleus of the Personnel Services Division (PSD) was established in July 1974 as the permanent structure to operate and maintain the various subsystems to be developed under PIMS, as follows:

1. Employment History Data Base—Civil Service and CSUC

This subsystem provides an on-line data base of both Civil Service and CSUC employees and interfaces with the current Payroll System. During the 1975-76 fiscal year, all Civil Service and CSUC employees will be on the new Data Base. New programs and program modifications will continue in order to meet the requirements of management and to improve the timeliness and accuracy of processing.

\$75,000 is being added in the current year to maintain the SPB Employment History Interim System for five additional months due to changes in the PIMS conversion schedule.

2. Examination/Certification Subsystems

These subsystems will provide an on-line applicant data base and facilitate the scheduling of examinations.

During the 1974-75 fiscal year an Examination Tracking System was developed and implemented for operation by the State Personnel Board as the first phase of the full Examination Subsystem to be implemented May 1, 1976.

A Certification Subsystem is scheduled for implementation by October 1, 1976. Both subsystems will be operated by SPB, but under PSD job control, Teale Data Center coordination and EDP program maintenance.

With State employees converted to the Employment History Data Base and transaction system, there was an offsetting reduction in activity in the former personnel processing system. Staff were transferred from the State Personnel Board and Controller's Disbursement Division to PSD. Twenty-nine positions were transferred to PSD during the first full year of operation of the Civil Service and CSUC Employment History Data Base.

Because of increased workload as conversions are made to new subsystems, the staff time devoted to personnel services will increase markedly from 82 to a net of 142.2 during the budget year. These are accounted for by adding 23 Personnel Assistant I positions for the audit operation and 13 Key Data Operators, together with related technical, supervisory and clerical support. Eleven of these positions resulted from transfers from the Systems Development element.

	1974-75	1975-76	1976-77
Personnel action requests audited and processed	55,000	230,000	324,000
Personnel/payroll transactions audited and processed	—	28,700	100,800
Employee action requests audited and processed	20,000	120,000	276,000
Retirement system transactions audited and processed	2,000	8,000	12,000
Total on-line transactions	600,000	2,214,000	3,600,000
Output			
Personnel action request documents	75,000	410,000	550,000
Personnel/payroll transactions documents	—	40,000	170,000
Employee action request documents	30,000	240,000	300,000
Retirement system transaction documents	20,000	80,000	120,000
Input			
Expenditures	\$828,752	\$2,154,585	\$3,889,011
Personnel man-years	44.8	86.4	146.1

b. System Development

This element is responsible for the design and development of authorized and funded subsystems. Scheduled completion dates are:

1. Examination—5/1/76

The examination subsystems will provide an on-line data base to facilitate scheduling of examinations from appointments (expiring TAU's), provide certification lists and management reports.

2. Payroll/Position Control—3/1/77

This subsystem will provide accurate and timely salary payments to State employees. The payroll system will be implemented in January 1978.

3. Certification—10/1/76

The certification subsystem will provide an on-line qualified applicant data base. Mandatory reinstatements and eligibles will be certified to departments, to whom applicant data will be available upon referral.

4. Health Benefits Data Base—10/1/76

To provide health plan information for civil service and CSUC employees, the system will maintain information pertaining to the employer insurance contracts administered by PERS and records and plans selected for employees and their dependents.

5. PERS Active Member Data Base—Roster Only, 4/1/77

This subsystem would maintain records of accounting, actuarial and statistical data and support processing for all active members. Contribution amounts, service credits, interest, pay rates and other information required under each plan of coverage would be available. It will interface with the payroll system.

Systems Development reflects a net reduction of 11 professional positions as the emphasis shifts from development to operation. Total costs remain as high, primarily due to increased consolidated data center charges.

	1974-75	1975-76	1976-77
Input			
Expenditures	\$1,012,088	\$1,709,332	\$1,735,459
Personnel man-years	26	46	36

STATE CONTROLLER—Continued

V. UNCLAIMED PROPERTY

Program Objectives and Description

The Unclaimed Property Program serves both revenue and custodial functions. Custody with individual accounting is maintained (1) of property due unknown or unlocated heirs until escheated permanently to the General Fund after periods prescribed by law and (2) of unclaimed property without limit as to years, meanwhile deposited in the General Fund. The law requires efforts to locate owners and restore their property to them, for which they pay certain administrative charges.

Authority

Code of Civil Procedure, Sections 1300-1615.

Program Requirements	74-75	75-76	76-77	1974-75	1975-76	1976-77
Continuing program costs.....	12.3	30.6	30.9	\$323,785	\$719,112	\$911,556
Workload adjustments.....	—	—	9	—	—	100,116
Totals, Fiscal Control	12.3	30.6	39.9	\$323,785	\$719,112	\$1,011,672
General Fund				316,176	719,112	1,011,672
Unclaimed Property Fund				7,609	—	—

Program Elements

a. Abandoned property.....	10.5	26.1	35.4	275,217	639,278	927,864
b. Estates of deceased persons	1.8	4.5	4.5	48,568	79,834	83,808

a. Abandoned Property

Under the Unclaimed Property Law, holders of unclaimed property (bank deposits, checks, money orders, traveler's checks, life insurance proceeds, dividends or other distributions of business as stock, tangible and intangible personal property, contents of safe-deposit boxes) must report and, after notice to the owners' last known addresses and publication, deliver to the state the items remaining unclaimed. Any owners who appear are entitled to refund, less an administrative service charge. It also generates revenue to the General Fund since many items are never claimed and the State retains the interest earned while custodian.

Chapter 578, Statutes of 1975 (AB 1986), effective January 1, 1976, will reduce the periods which financial organizations may hold demand deposits and stock certificates from 15 to 7 years and 20 to 7 years, respectively. As a result new accounts are expected to increase from 21,056 in 1974-75 to 55,283 in 1976-77. Five positions are being added in the budget year to handle the increase. Additional advertising costs of \$39,200 in the current year and \$155,160 in the budget year are included to meet the requirements of Section 1531(a) of the Code of Civil Procedure.

Four general auditor II positions are being added in the budget year for the compliance program to audit the records of holders of abandoned property. Each position is expected to generate \$250,000 annually in General Fund revenue.

Output	1974-75	1975-76	1976-77
Receipts	\$3,825,434	\$5,069,000	\$6,237,000
Claims Paid.....	\$565,196	\$565,000	\$712,000
General Fund revenue.....	\$3,296,899	\$4,504,000	\$5,525,000
New accounts established	21,056	27,000	55,283
Names published	18,143	27,000	55,283

Input	1974-75	1975-76	1976-77
Expenditures	\$275,217	\$639,278	\$927,864
Personnel man-years	10.5	26.1	35.4

b. Estates of Deceased Persons

Under the estates of deceased persons laws, assets for which there are no known heirs escheat to the State. Shares of known but unlocated heirs are delivered to the Controller, and if unclaimed after the legal waiting period and notice, are permanently escheated to the General Fund. The proceeds of such estates come from county treasurers, executors and administrators, public or private, and other custodians.

Output	1974-75	1975-76	1976-77
Receipts	\$2,665,965	\$2,700,000	\$2,700,000
Claims paid	\$1,740,697	\$695,000	\$695,000
General Fund revenue.....	\$1,062,295	\$1,114,00	\$855,000
New accounts established	1,712	1,729	1,746

Input	1974-75	1975-76	1976-77
Expenditures	\$48,568	\$79,834	\$83,808
Personnel man-years	1.8	4.5	4.5

STATE CONTROLLER—Continued

VI. LEGISLATIVE MANDATES

General Description

This program reimburses local governments for (1) property tax revenue loss, (2) new programs and (3) increased level of service of existing programs mandated by the Legislature. The amounts shown here are for information purposes only as they are appropriated in the related program budget.

Section 2229 of the Revenue and Taxation Code provides for reimbursement of lost personal property tax revenues while Section 2231 provides for reimbursement of costs of legislative-mandated programs. These apply only to mandates effective after January 1, 1973.

Full descriptions will be found under the appropriate program budget as shown in the following tables.

Chapter	Bill	Program budget	1974-75 Expenditure	1975-76 Expenditure	1976-77 Budget Act appropriation

VII. SPECIAL STATEWIDE ELECTION

General Description

Although the call for the special election held November 6, 1973, was not an executive regulation requiring reimbursement, the Governor concluded local governments should be reimbursed for actual additional costs. \$6,710,000 was included in the 1974-75 budget for this purpose. Claims submitted to the Controller and allowed after audit totaled \$4,576,392.

VIII. ADMINISTRATION

Program Objectives and Description

To provide executive direction, general policy determination and management for all office programs and to coordinate and provide major administrative and business management services to the operating units of the office. In addition the Controller serves on various fiscal boards and commissions including the Board of Equalization, Franchise Tax Board, State Lands Commission, Pooled Money Investment Board, Board of Control, and various bond finance committees.

Authority

Membership by State Controller on boards and commissions, principally:

State Board of Equalization, Const. Art. 13, 7, and 9.

State Board of Control, Gov. 13901.

Franchise Tax Board, Gov. 15700.

Pooled Money Investment Board, Gov. 16480.1.

State Teachers Retirement Board, Ed. 13851.

Various bond and finance committees, Ed. 19510; M.&V. 991; Ch. 765/27, Ch. 23/63, 1st Ex; Water 12933; H.&N. 3902-3; Gov. 17220.

California Exposition and Fair Executive Committee, Agr. 72.1.

State Lands Commission, Pub. Res. 6101.

Reapportionment Commission, Const. Art. 4, 6.

Reciprocity Commission, Veh. 2600.

Interagency Council for Ocean Resources, Gov. 8810-11.

California Commission on Interstate Cooperation, Gov. 8003-4.

Intergovernmental Council on Urban Growth, Gov. 34200.

STATE CONTROLLER—Continued

a. Executive Office

The Controller, with the assistance of his executive staff, establishes policy and provides general supervision and direction over the operating divisions, serves as a member of the various fiscal boards and commissions, and participates in the establishment of statewide fiscal programs and policies.

Input	1974-75	1975-76	1976-77
Expenditures	\$511,637	\$516,076	\$539,100
Personnel man-years	13.9	17	17

b. Administrative Services

Provides administrative services for the entire office including departmental accounting, budget, management analysis, personnel and training, mail service, supplies, filing and reproduction.

Two clerical positions are being added to the Central Services Section in the budget year due to increased workload.

One accounting technician is being added due to increased workload in departmental accounting.

STATE BOARD OF EQUALIZATION

The State Board of Equalization is the major revenue department for support of state programs. It administers business and excise taxes, assesses taxes on insurance companies and private railroad cars, and guides local property taxation. Four of the board's five members are elected from and represent separate districts of approximately equal population. The State Controller serves as an ex officio fifth member.

The board operates over 60 offices throughout this state and in New York, Chicago, and Houston. The board administers taxes exceeding \$5 billion for the State Treasury, plus some \$590 million in local funds derived from utility rolls prepared by the board and more than \$1 billion in local sales and use taxes.

In policymaking, the board adopts rules and regulations for the administration of taxes and for the 58 county assessors in valuing property. An executive secretary is appointed by the board to implement its policies and directives. The executive secretary is aided by assistant executive secretaries for business taxes, property taxes, and administration.

As a quasi-judicial body, it hears appeals from taxpayers on business tax audits; equalizes local property tax assessments; values public utility properties; assesses taxes on insurance companies and privately owned railroad cars; and considers appeals from actions of the Franchise Tax Board.

I. LOCAL PROPERTY TAX EQUALIZATION PROGRAM

Program Objectives and Description

California taxpayers will pay approximately \$8.5 billion in property taxes to local governments in 1976-77. Over 90 percent of these taxes will be based on ad valorem property tax assessments made by 58 county assessors. To insure equitable treatment of all property taxpayers, it is necessary that a central agency provide direction, supervision, and review of local assessment practices. The objective of this program is to bring about and maintain an acceptable degree of both intracounty and intercounty equalization at a reasonable cost.

The board assists local assessors in several ways to improve the quality of the original assessments placed on the assessment rolls as detailed below.

Authority

Constitution—Article 13; Education Code—Section 17261; Welfare and Institutions Code—Section 12400; Government Code—Sections 15606-15645, 54900-54903.1; Revenue and Taxation Code—Division 1, Parts 2, 3, 3.5, 10, 11, and 12; California Administrative Code—Title 18, Chapter 1.

a. Supervision of Local Assessment Administration

Training, technical consultation, assessment practices survey reports, uniform tax-reporting forms, rules, and manuals are provided assessors and their staffs by the board.

Element Requirements	74-75	75-76	76-77	1974-75	1975-76	1976-77
Continuing element costs.....	67	66.6	67.1	\$1,676,191	\$1,842,064	\$1,907,732

Exemptions.....	8.4	8.6	8.6	197,112	233,191	239,599
Contract auditing services.....	4.5	2.6	3.1	96,099	71,000	88,000

1. Assessment Practices Surveys

At least once each six years a survey is made of all aspects of the county assessor's appraising, mapping, recordkeeping, clerical, and personnel practices. A written report is then prepared containing recommendations for improvement, to which the assessor must respond within a year.

Output	74-75	75-76	76-77	1974-75	1975-76	1976-77
Number of surveys completed.....				10	10	10
Input	74-75	75-76	76-77	1974-75	1975-76	1976-77
Expenditures.....	13.5	13.5	13.5	\$361,500	\$428,474	\$440,248

2. Property Tax Forms and Rules

Property reporting and exemption claim forms must be filed annually with county assessors by thousands of taxpayers. The board designs and prepares these forms for county use with a concern for their adequacy and compliance with the law.

The board is also responsible for the preparation of rules governing assessors and county boards of equalization.

Output	74-75	75-76	76-77	1974-75	1975-76	1976-77
Forms						
Number of property statement and exemption claim forms prescribed.....				43	45	45

Input	74-75	75-76	76-77	1974-75	1975-76	1976-77
Expenditures.....	2.7	2.6	2.6	\$66,193	\$77,378	\$79,504

3. Technical Services

The board's staff replies to inquiries regarding property tax problems from assessors, their staffs, taxpayers, the Legislature, and other state and private agencies. Also, the staff researches and writes a continuing series of "letters to assessors" on statutory changes, court decisions, board rules and instructions, and salary studies. Field training and assistance are given to assessors on the appraisal of specialized properties such as timber and mines, in the use of data processing systems, for preparation of assessment rolls and processing of appraisal data, and in the installation and maintenance of a standard map system. In addition, the board issues and updates handbooks on assessment and general and special appraisal practices for assessors' use.

Output	74-75	75-76	76-77	1974-75	1975-76	1976-77
Number of directive and advisory "letters to assessors" transmitted.....				174	190	200
Number of pages in new handbook sections written.....				209	300	350
Number of pages in handbook sections revised.....				548	600	600

Expenditures.....	28.6	30	30	\$735,658	\$768,528	\$789,647

STATE BOARD OF EQUALIZATION—*Continued*

4. Certification and Training

Property tax appraisers must be certified by the board before serving as appraisers and must pass examinations either compiled, or approved by the board, prior to being permanently certified. Certified appraisers must then fulfill statutory annual training requirements. A file is maintained on the approximately 3,000 appraisers regarding civil service status, appraisal experience, and annual training. A series of appraisal courses is designed and presented by the board's staff in large counties and at regional and central schools. Training courses developed by county assessors and those conducted by schools and colleges are reviewed and approved for meeting statutory requirements.

Output	1974-75	1975-76	1976-77
Number of appraisers permanently certified.....	2,838	2,850	2,900
Number of appraisers on assessor's staffs who are not permanently certified	50	50	50
Number of appraisers attending board courses	1,198	1,200	1,225
Number of appraisers successfully completing courses	1,090	1,100	1,100
Number of course sessions offered.....	61	65	65
Input	74-75	75-76	76-77
Expenditures.....	9.3	9.3	9.3
	1974-75	1975-76	1976-77
	\$219,629	\$263,493	\$270,734

5. Exemption

The board has statutory administrative duties with respect to three categories of exemptions. First, each claim for a welfare or veterans organization exemption is reviewed, and a finding which cannot be overruled if it is negative is transmitted to the county assessor. Second, an intercounty match of homeowner's exemption claims is made, and lists of approved duplicates are sent to the county assessors involved for a determination of which claims are valid and which county is entitled to reimbursement by the Controller for the tax loss. Third, board representatives inspect exempt timber stands more than 40 years of age and serve on timber maturity boards which rule whether or not the stand should be returned to the tax rolls.

Output	1974-75	1975-76	1976-77
Number of veterans organization claims reviewed.....	194	194	194
Number of welfare exemption claims reviewed	6,222	6,460	6,700
Number of welfare properties in claims	10,298	10,550	10,790
Number of timber maturity board hearings	3	4	5
Number of acres of timber involved in hearings	12,269	50,000	20,000
Number of acres of timber returned to assessment rolls.....	10,359	30,000	15,000
Input	74-75	75-76	76-77
Expenditures.....	8.4	8.6	8.6
	1974-75	1975-76	1976-77
	\$197,112	\$233,191	\$239,599

6. Contract Auditing Services

The counties contract with the board to audit the accounting records of the taxpayers of their choice and reimburse the board for the costs of these audits. This service is designed to assist the assessors in meeting the legislative mandate that large accounts be audited quadrennially. Under legislation enacted in 1972, the Controller has contracted with the board to do some pilot auditing of taxpayers' records to test the accuracy of the reports on which inventory exemptions and state reimbursements of local governments' tax losses on such exemptions are based.

Output	1974-75	1975-76	1976-77
Number of county audits performed	327	320	320
Number of audits performed for Controller	116	120	120
Input	74-75	75-76	76-77
Expenditures.....	4.5	2.6	3.1
	1974-75	1975-76	1976-77
	\$96,099	\$71,000	\$88,000

b. Intercounty Equalization

Samples of locally assessable properties are selected and appraised in one-third of the counties each year. The sample results are then expanded to obtain an estimate of the full value of all locally assessable property in each county. The full value in a survey year is projected to the current lien date, and a ratio of assessed value to full value of property subject to local assessment is computed annually for each county. These ratios are used for inter- and intra-county equalization and to compute factors that are used in the control of intergovernmental payments and categorical aid totaling over 1½ billion dollars a year, including school equalization aid, repayment of state loans for school construction, county contributions to the Medi-Cal program, and other state, county, and district payments.

Output	1974-75	1975-76	1976-77
Number of average ratios computed	3,022	3,178	3,022
Number of coefficients of dispersion computed	912	960	912

STATE BOARD OF EQUALIZATION—Continued

1. Sample Selection and Full Cash Value Estimates

Statisticians classify the assessments on each of the 19 or 20 local rolls that are to be sampled during the year into 18 strata according to the amount of assessed value and make a random selection from each stratum. After the properties covered by the selected assessments have been appraised, the mean appraised and assessed values are computed for each stratum and applied to the total number of assessments in the stratum to derive an estimate of the total full cash value of all locally assessable property as of the survey year. The totals for all of the currently surveyed counties and those for all of the counties surveyed in the two preceding years are then projected to the current lien date by the use of trending techniques.

The adequacy of the sampling and trending can be measured by comparing each three-year projection of the full value total with the full value total for the same lien date as determined from the new appraisal survey.

Output

Gaps:	1974-75	1975-76	1976-77
Under 1 percentage point	-	9	9
1-1.9 percentage points	4		
2-2.9 percentage points	12	9	8

Input	74-75	75-76	76-77	1974-75	1975-76	1976-77
Expenditures	4.6	5.4	5.4	\$89,008	\$109,021	\$112,017

2. Property Appraisal

Appraisers estimate the market values of between five and six thousand individual properties in one-third of California's counties each year. Using professional appraisal procedures, these employees inspect, analyze, and value the properties in the sample. The types of property appraised include residences, vacant lots, farms and ranches, commercial and industrial enterprises, oilfields, and timber holdings as well as unsecured personal property. All appraisals are reviewed with the county assessor. After review, a value may be appealed by the assessor to the office of appraisal appeals and to the board. Property of significant value that appears to have escaped assessment is brought to the assessor's personal attention.

Three additional positions are proposed for this component to process increased workload in order to maintain the current level of appraisal coverage.

Output	1974-75	1975-76	1976-77
Number of appraisals completed	5,329	5,346	5,200
Market value of properties appraised (000)	\$5,405,791	\$4,000,000	\$4,000,000
Number of apparent escapes of over \$50,000 full value brought to assessor's attention	103	102	95

Input	74-75	75-76	76-77	1974-75	1975-76	1976-77
Expenditures	78.4	78.9	81.9	\$1,936,699	\$2,260,233	\$2,380,711

c. County Appeals of Appraisals

Assessors who do not agree with the appraisals may request reviews by the office of appraisal appeals shortly after the board's property tax department completes its appraisals of the sample properties. Members of the office of appraisal appeals staff review these appraisals, inspect the properties, interview county and state property tax appraisers, and identify the position each party takes in support of its estimate of value. The office prepares a written proposed finding on each appealed appraisal. If the county assessor or property tax department is dissatisfied with the findings, either party may request a conference. The office of appraisal appeals makes a final finding which includes any new substantiating information the parties contributed at the conference. If the two contending parties are still dissatisfied with the final findings, either may request a hearing before the Board of Equalization.

The objective of this office is to make findings and recommendations sufficiently supported that time-consuming hearings before the board are minimized. The degree to which this objective is achieved is measured by the number of findings that do not go to board hearings.

Output	1974-75	1975-76	1976-77
Number of appraisals initially appealed by assessors	311	300	350
Number of O.A.A. final findings requested by either party	130	113	132
Number of O.A.A. final findings appealed to the board	19	17	20

Element Requirements	74-75	75-76	76-77	1974-75	1975-76	1976-77
Continuing element costs	8.7	8.6	8.6	\$226,834	\$246,005	\$252,765

II. STATE-ASSESSED PROPERTY TAX PROGRAM

Program Objectives and Description

The nature of some taxable property is such that it cannot be valued in accordance with the standard appraisal practices applicable to all property unless it is valued as a unit by an agency whose jurisdiction is statewide. The program's objectives are to estimate the market value and assess annually intercounty pipelines and all of the taxable tangible properties owned or used by railroads, other public utilities, and private car lines.

The properties subject to state assessment are valued by the board, using standard appraisal techniques. In the case of public utilities, railroads, and the intercounty pipelines, the values thus determined are allocated among the taxing districts in which the property is located for inclusion on county and city assessment rolls so that taxes may be levied and collected. For private car lines (except fixed property) the values are placed on an assessment roll, and taxes are levied and collected by the state.

Authority

Constitution—Article 13, Section 19; Revenue and Taxation Code—Division 1, Part 2; Division 2, Part 6.

Program Requirements	74-75	75-76	76-77	1974-75	1975-76	1976-77
Continuing program costs (General Fund)	81	86.8	86.8	\$1,760,362	\$2,055,816	\$2,111,554

Program Elements

a. Assessment of public utilities	78.1	83.7	83.7	1,695,434	1,977,410	2,030,993
b. Private car tax	2.9	3.1	3.1	64,928	78,406	80,561

STATE BOARD OF EQUALIZATION—Continued

a. Assessment of Public Utilities

State assesses annually file property statements with the board which list all of their properties by situs with the associated costs and provide complete accounting and financial information on their properties and operations. From this and other information the board determines the value of each assessee's "unitary" property as a whole and the value of each nonunitary property. The values are allocated among taxing districts, using the situs information provided in the property statements. These allocated values are further processed to produce a "board roll" for each county and for each city that requires one, showing each assessee's assessments in each tax-rate area.

Output	1974-75			1974-75	1975-76	1976-77
Number of assessees.....				177	177	177
Market value of property assessed (000)				\$20,165,827	\$20,975,000	\$21,800,000
Number of state board rolls				62	62	62
Element Requirements	74-75	75-76	76-77	1974-75	1975-76	1976-77
Continuing element costs	78.1	83.7	83.7	\$1,695,434	\$1,977,410	\$2,030,993
Element Components:						
Derivation of unit value indicators	4.6	5.9	5.9	89,845	124,552	127,975
Field appraisals	23	24.4	24.4	508,801	575,902	591,727
Allocation of assessed values to taxing districts	30.7	32.6	32.6	679,221	804,668	826,780
Preparation and maintenance of tax-rate area maps	19.8	20.8	20.8	417,567	472,288	484,511

1. Derivation of Unit Value Indicators

Various indicators are used to determine the value of the unitary property. Four of the most important indicators are historical cost less depreciation, reproduction cost new less depreciation, capitalized earnings, and market value of stock and debt.

Output	1974-75			1974-75	1975-76	1976-77
Number of unit value indicators computed				463	486	490
Input	74-75	75-76	76-77	1974-75	1975-76	1976-77
Expenditures.....	4.6	5.9	5.9	\$89,845	\$124,552	\$127,975

2. Field Appraisals

Field appraisals are made of all land and all nonoperative and other nonunitary improvements and personal property. Nonoperative properties consist of properties owned but not used in the primary function of the company such as lands owned by a railroad but leased out for agricultural purposes. Properties held in a lessee capacity by state assesses and possessory interests are also considered nonunitary and are separately appraised.

Output	1974-75			1974-75	1975-76	1976-77
Number of parcels appraised				13,623	12,000	12,500
Input	74-75	75-76	76-77	1974-75	1975-76	1976-77
Expenditures.....	23	24.4	24.4	\$508,801	\$575,902	\$591,727

3. Allocation of Assessed Values to Taxing Districts

The total assessed value of the unitary property of each assessee is divided among the tax-rate areas in which the property is located, substantially in proportion to the reproduction cost new less depreciation of the properties in the several areas. The assessed value of each nonunitary property is assigned to the tax-rate area in which the property is located. Board rolls are prepared for each county and each city that collects its own taxes, showing assessments by tax-rate area, by assessee, and by class of property. These rolls are used by the counties and cities in computing the taxes due the counties, cities, and other revenue districts.

Output	1974-75			1974-75	1975-76	1976-77
Number of items assessed				413,972	320,000	325,000
Number of tax-rate areas				25,891	26,400	26,900
Input	74-75	75-76	76-77	1974-75	1975-76	1976-77
Expenditures.....	30.7	32.6	32.6	\$679,221	\$804,668	\$826,780

4. Preparation and Maintenance of Tax-Rate Area Maps

Maps identifying the boundaries of all tax-rate areas in the state are prepared and updated to reflect boundary changes, formations of new districts, and dissolutions of districts. A tax-rate area, commonly known as a "code area", is a geographical area in which a unique combination of tax rates applies.

Output	1974-75			1974-75	1975-76	1976-77
Number of filings for changes in maps processed				2,170	2,200	2,300
Change in number of tax-rate areas.....				562	550	570
Input	74-75	75-76	76-77	1974-75	1975-76	1976-77
Expenditures.....	19.8	20.8	20.8	\$417,567	\$472,288	\$484,511

STATE BOARD OF EQUALIZATION—Continued

b. Private Car Tax

The value of cars is determined from information in property statements and other sources. The equivalent number of cars in California is determined by counting the days each car spends in the state and dividing by 365 or 366. After the value and the number of cars for each assessee are established, assessment rolls are prepared and tax bills issued.

Output				1974-75	1975-76	1976-77
Number of assessees.....				176	180	185
Market value of property assessed (000)				\$302,606	\$310,000	\$320,000
Element Requirements				1974-75	1975-76	1976-77
Continuing element costs				2.9	3.1	3.1
Element Components:						
Car-day count.....				1.7	1.8	1.8
Valuing, assessing, and collecting the tax.....				1.2	1.3	1.3
				36,295	44,895	46,129
				28,633	33,511	34,432

1. Car-Day Count

Information is obtained from the records of the railroad companies on the movements of each car in and out of the state. This information is accumulated by assessee and class of car. From this record, the total car-days accumulated for the year by each assessee by class of car are ascertained, and this total is divided by the number of days in the year to determine the number of cars to be assessed.

Output				1974-75	1975-76	1976-77
Number of movements of cars in and out of the state				1,096,710	1,105,000	1,120,000
Input				1974-75	1975-76	1976-77
Expenditures.....				1.7	1.8	1.8
				\$36,295	\$44,895	\$46,129

2. Valuing, Assessing, and Collecting the Tax

The market value of each assessee's cars is determined, and assessments are enrolled at 25 percent of market value. Taxes are extended on the roll at the statewide average general property tax rate in the preceding fiscal year. Billings are then prepared and mailed to the assessee. Tax payments are made directly to the board.

Output				1974-75	1975-76	1976-77
Number of cars.....				18,003	18,100	18,200
Number of tax bills issued				164	176	180

Expenditures.....				1.2	1.3	1.3
				\$28,633	\$33,511	\$34,432

III. SALES AND USE TAX PROGRAM

Program Objectives and Description

This program is needed to provide General Fund revenue for the state and for cities, counties, and rapid transit districts. The program's objectives are to insure that all sales and use tax revenues are collected in an equitable and effective manner by, effecting timely reporting of tax liability, detecting and correcting errors in self-assessments, and promptly collecting amounts determined to be due and economically recoverable.

The State Board of Equalization administers the state's 4% percent Sales and Use Tax Law, the 1% percent Bradley-Burns Uniform Local Sales and Use Tax Ordinances of cities and counties, and 0.5 percent transactions (sales) and use tax ordinances for the San Francisco Bay Area Rapid Transit District.

A savings of \$31,008 was realized by acquisition of field office facilities.

Authority

Revenue and Taxation Code, Division 2, Parts 1, 1.5 and 1.6.

d. Collecting taxes receivable	262.6	282	290.1	4,511,101	5,326,218	5,584,354

a. Registration of Taxpayers

Registration of sellers and users enables the board to furnish them with proper tax forms and instructions for purposes of reporting and allocation of these taxes. Necessary security within the limits allowed by law is obtained to assure payment of the tax. The board establishes an account for each new taxpayer, maintains the account on a current basis and closes it out when the business terminates.

Fourteen positions are proposed to process the increased registration of new taxpayers workload.

Input	74-75	75-76	76-77	1974-75	1975-76	1976-77
Expenditures	428.7	426.2	440.3	\$6,689,316	\$7,476,609	\$7,813,567

b. Processing Tax Returns

After the taxpayer files his return, it is processed through the mailroom, cashier, and data processing for deposit of revenue receipts and fiscal accounting purposes. This accounting includes the proper distribution of local and transit district tax. A delinquency record is established for taxpayers failing to file returns, and notices are sent to them. Taxpayers whose accounts remain uncleared after a reasonable period are cited to appear at the local board office to show cause why their permits should not be revoked for failure to file returns.

Returns are reviewed for mathematical accuracy, proper preparation, and application of the law. Billings or refunds are prepared to notify the taxpayer of errors in self-declared tax and applicable penalty and interest. When questionable deductions are observed, the taxpayer is contacted and asked to explain the deduction.

Thirty and one-half positions are proposed to process the increased workload resulting from an additional 210,000 tax returns.

Input	74-75	75-76	76-77	1974-75	1975-76	1976-77
Expenditures	362.2	356	386.6	\$7,454,939	\$8,482,541	\$9,037,563

c. Auditing Accounts

This activity is statistically designed to cover the tax base in a manner which will result in audits of accounts most likely to make substantial errors in reporting and on a selective basis to police other accounts as a means of promoting accurate self-reporting.

A major objective of the audit selection system, which is based on the principle of marginal analysis, is to audit accounts which will produce "tax change" in excess of the cost of auditing. Tax change is the difference between self-assessed taxes and the final determination of taxes due after auditing, whether the difference is a deficiency or a refund to the taxpayer.

To assist the field staff in the selection of accounts to be audited, a tabulated list of eligible accounts is furnished to each district annually. Taxpayer accounts with similar audit characteristics are classified into one of 16 separate groups (cells) according to the probability of productive audits and average time expended.

Districts use the cell lists together with information in their files to select specific accounts to be audited within recommended quotas. The final step in the selection process occurs when a supervisor or field auditor determines, after field investigation, that an audit should be completed or that an audit is not warranted.

Twenty-one positions are proposed for workload increases resulting from an increased number of eligible accounts in order to maintain the current approved level of audit coverage. One hearing officer position related to workload resulting from sales tax rate changes in 1973 and 1974 is terminating on June 30, 1976.

Forty-six positions are proposed to increase audit coverage. It is estimated that over \$3 million in additional tax revenue will be collected.

Input	74-75	75-76	76-77	1974-75	1975-76	1976-77
Expenditures	882	871.7	937.9	\$17,229,869	\$19,207,861	\$20,809,566

d. Collecting Taxes Receivable

Field offices are primarily responsible for the collection of delinquent amounts. The effort expended on each account is consistent with the amount due. Although efforts are made to accomplish collection through use of the telephone or by correspondence, field calls are made to collect larger amounts when other efforts have not been productive.

Headquarters staff supports field collection efforts with actions such as the preparation of liens, issuance of warrants, demands on sureties and personal guarantors, and processes all claims and documents pertaining to bankruptcies, assignments, and probates.

Eight positions are proposed to reduce the delinquent occasional sales use tax accounts receivable being written-off and backlogged. It is estimated that over \$1 million in additional revenue will be collected as a result.

Input	74-75	75-76	76-77	1974-75	1975-76	1976-77
Expenditures	262.6	282	290.1	\$4,511,101	\$5,326,218	\$5,584,354

STATE BOARD OF EQUALIZATION—Continued

IV. ALCOHOLIC BEVERAGE TAX PROGRAM

Program Objectives and Description

This program is needed to provide revenue for the State General Fund. It is estimated that alcoholic beverage taxes will produce \$126,800,000 in General Fund revenue in fiscal year 1976-77. The objective of this program is to insure that all alcoholic beverage tax revenues are collected in an equitable and effective manner by effecting timely reporting of tax liability, detecting and correcting errors in reporting, and promptly collecting amounts determined to be due and economically recoverable.

State excise taxes imposed on the manufacture, importation, or sale of alcoholic beverages in this state are administered by the board. These are self-assessed taxes.

Continuing program costs (General Fund)	31.8	32.4	32.4	\$518,892	\$603,366	\$619,946

Program Elements

a. Registration of taxpayers	1.7	1.5	1.5	25,801	22,913	23,543
b. Processing tax returns and reports	19.9	20.7	20.7	297,121	364,453	374,468
c. Auditing accounts.....	9.7	9.7	9.7	187,632	207,650	213,356
d. Collecting taxes receivable.....	0.5	0.5	0.5	8,338	8,350	8,579

a. Registration of Taxpayers

Persons subject to the alcoholic beverage taxes are identified through licenses issued by the Department of Alcoholic Beverage Control. The board furnishes them tax returns for the reporting of tax. Accounts are regularly reviewed to determine security requirements. Nontaxpaying common carriers, customs brokers, out-of-state vendors, and out-of-state purchasers are also registered and supply necessary information reports.

Input	74-75	75-76	76-77	1974-75	1975-76	1976-77
Expenditures.....	1.7	1.5	1.5	\$25,801	\$22,913	\$23,543

STATE BOARD OF EQUALIZATION—Continued

b. Processing Tax Returns and Reports

Alcoholic beverage tax returns are filed directly with the board's headquarters office. The returns are processed through the cashier and the data processing division for deposit of funds and fiscal accounting purposes. The excise tax unit then verifies reported tax computations, notifies taxpayers of apparent discrepancies on returns, and reviews them for proper preparation and application of the law.

A delinquency is established for taxpayers failing to file returns and notices are sent to them. A list of delinquent accounts is furnished to field offices for followup. Billings or refunds are prepared for errors in self-declared tax and applicable penalty and interest.

After reports received from common carriers, customs brokers, and out-of-state vendors are coded and processed by the data center, they are used to verify amounts reported by taxpayers. These informational reports produce an accountability system, which enables the board to effectively monitor taxable and nontaxable transactions in the state.

Input	74-75	75-76	76-77	1974-75	1975-76	1976-77
Expenditures.....	19.9	20.7	20.7	\$297,121	\$364,453	\$374,468

c. Auditing Accounts

Due to informational reports received from out-of-state vendors, common carriers, customs brokers, and reciprocating states, the excise tax unit is able to effectively select for field auditing those accounts which appear to have understatements of tax. In addition, audits are made of accounts selected at random to deter tax evasion and to promote accurate reportings.

During the audit process, taxpayers are assisted in understanding the law, rules, and regulations and in the proper manner of filing tax returns and reports.

Input	74-75	75-76	76-77	1974-75	1975-76	1976-77
Expenditures.....	9.7	9.7	9.7	\$187,632	\$207,650	\$213,356

d. Collecting Taxes Receivable

The headquarters office is primarily responsible for collecting taxes receivable. Investigations are made by field personnel when it is necessary to locate assets which may be levied upon or which are subject to lien.

Input	74-75	75-76	76-77	1974-75	1975-76	1976-77
Expenditures.....	0.5	0.5	0.5	\$8,338	\$8,350	\$8,579

V. CIGARETTE TAX PROGRAM

Program Objectives and Description

This program is needed to provide revenue for the State General Fund and for cities and counties. It is estimated that the 10-cent cigarette tax will produce \$272,500,000 in 1976-77. The State General Fund share will be \$190,750,000 and \$81,750,000 will be for local governments. The objective of this program is to insure that all cigarette tax revenues are collected in an equitable and effective manner by effecting timely reporting of tax liability, detecting and correcting errors in taxpayer reporting, and promptly collecting amounts determined to be due and economically recoverable.

The cigarette tax is imposed upon distributors of cigarettes at the rate of one-half cent per cigarette (10 cents per standard package of 20) and upon consumers who acquire untaxed cigarettes which are not otherwise exempt from tax. The tax is paid by distributors through the purchase of stamps or meter register units from commercial banks which contract with the state for the issuance of stamps and indicia.

d. Enforcement activities	3	3.1	3.1	61,591	67,260	69,108
e. Collecting taxes receivable	0.1	0.1	0.1	1,113	1,349	1,386

a. Registration of Taxpayers

Every person desiring to engage in the sale of cigarettes as a distributor or a wholesaler must obtain a license for each location at which he engages in such business. This enables the board to furnish him with proper forms for the orderly reporting, processing, allocation, and administration of the tax. Necessary security to assure payment of tax is obtained from licensed distributors. Taxpayers are advised about reporting requirements, the records that are required, and the application of tax to specific transactions.

Input	74-75	75-76	76-77	1974-75	1975-76	1976-77
Expenditures	0.2	0.2	0.2	\$2,231	\$2,871	\$2,950

b. Processing Tax Returns

Forms and instructions are mailed to licensed distributors and wholesalers to enable them to file monthly reports to account for their purchases and distributions of cigarettes, stamps, and meter units and to enable licensed distributors to report tax. Other reports are received from banks relating to the acquisition and sale of stamp and meter units and information reports are received from manufacturers and common carriers. After tax reports, stamp and meter unit sales reports, payments from banks, and various informational reports are received in headquarters, they are processed to account for tax payments and verify mathematical accuracy and conformity with the requirements of the law. This information is also used for audit selection. If a timely report is not filed, the taxpayer is notified; and if the delinquency is not cleared, revocation proceedings are instituted.

Input	74-75	75-76	76-77	1974-75	1975-76	1976-77
Expenditures	6.4	6.6	6.6	\$786,910	\$862,821	\$880,468

c. Auditing Accounts

Field auditing is essential to assure uniform application of the law, deter evasion and carelessness in self-reporting, and identify and correct errors in self-reporting. The cigarette audit activity is an important facet of the enforcement program to deter illegal distributions. Reconciliations are made in headquarters using data reported by manufacturers, distributors, wholesalers, banks, and others on information reports. Immediate corrective action is taken when underreported tax is indicated. This headquarters function protects the revenue from underreported tax on cigarettes received from legitimate sources. It does not, however, provide an adequate control of cigarettes obtained from illegal sources.

Input	74-75	75-76	76-77	1974-75	1975-76	1976-77
Expenditures	5.1	5.1	5.1	\$97,855	\$109,755	\$112,771

STATE BOARD OF EQUALIZATION—Continued

d. Enforcement Activities

Enforcement activities are designed to prevent loss of revenue through tax indicia counterfeiting, bootlegging, smuggling and illegal sales of cigarettes. Field inspections are made of distributors' stamping machines to see that indicia is properly affixed, clear and legible. In addition, inspections are made of cigarette stocks in retail stores and in transit and vending machines to assure that all packages are properly stamped.

Liaison is maintained with all federal, state, and local law enforcement agencies.

Input	74-75	75-76	76-77	1974-75	1975-76	1976-77
Expenditures.....	3	3.1	3.1	\$61,591	\$67,260	\$69,108

e. Collecting Taxes Receivable

The headquarters office is primarily responsible for collecting taxes receivable. Investigations are made by field personnel when it is necessary to locate assets which may be levied upon or which are subject to lien. Headquarters staff supports the field collection efforts with various actions, such as preparation of liens, issuance of sheriffs' warrants and maintenance of the taxes receivable ledger.

Input	74-75	75-76	76-77	1974-75	1975-76	1976-77
Expenditures.....	0.1	0.1	0.1	\$1,113	\$1,349	\$1,386

VI. MOTOR VEHICLE FUEL LICENSE TAX PROGRAM

Program Objectives and Description

This program is needed to provide revenue for the Highway Users Tax Fund, Aeronautics Fund, Harbor and Watercraft Revolving Fund, and Agriculture Fund. The objective of this program is to insure that the Motor Vehicle Fuel License Tax is administered in an equitable and effective manner by effecting timely reporting of tax liability and detecting and correcting errors in taxpayers' self-assessments.

The 7 cent per gallon gasoline tax is imposed upon refiners, importers, and wholesale distributors on their distributions to retailers. A 2 cent per gallon tax is imposed on sales of aircraft jet fuel by dealers to certain users. The State Controller shares responsibility with the State Board of Equalization for the administration of this tax by collecting delinquent taxes and making refunds to consumers making exempt use of the gasoline.

^c Approximately 90% of the reported tax base is audited in a 3-year audit cycle.

^e Audited overpayments, including \$262,000 involving two taxpayers, exceeded audited underpayments.

^f \$262,000 of this amount represents refunds involving two taxpayers.

a. Registration of Taxpayers

Persons subject to the Motor Vehicle Fuel License Tax are registered to enable the board to furnish proper forms for the reporting, processing, and administration of the tax. Necessary security within the limits allowed by law is obtained to assure payment of the tax. Taxpayers are advised concerning the application of tax to specific transactions, the records required, and the preparation of reports.

Expenditures.....	1.5	1.5	1.5	\$23,831	\$25,235	\$25,956

STATE BOARD OF EQUALIZATION—Continued

b. Processing Tax Returns

After a return is filed by the taxpayer in the headquarters office, it is processed through the cashier and the excise tax unit for proper deposit of funds and fiscal accounting purposes. Taxpayers failing to file returns are identified and notices are sent to them. A list of delinquent accounts is furnished to field offices for followup.

Returns are verified for mathematical accuracy and reviewed for proper preparation and application of the law. When questionable deductions are found, the taxpayer is contacted and asked for an explanation.

Input	74-75	75-76	76-77	1974-75	1975-76	1976-77
Expenditures.....	5.6	5.6	5.6	\$107,795	\$118,950	\$122,348

c. Auditing Accounts

Accounts eligible for audit are selected through a process which assures that field audit time is used as productively as possible to promote accurate tax reporting and deter evasion. The primary benefit of these audits is to protect the tax base and assist taxpayers in understanding the law and reporting properly. These activities result in a sustained high level of self-declared tax.

Input	74-75	75-76	76-77	1974-75	1975-76	1976-77
Expenditures.....	7.3	7.2	7.2	\$158,838	\$179,498	\$184,627

VII. USE FUEL TAX PROGRAM

Program Objectives and Description

This program is needed to provide revenue for the Highway Users Tax Fund. It is estimated that the tax will produce \$54,000,000 of revenue for the 1976-77 fiscal year. The objectives of this program are to insure that all use fuel tax revenues are collected in an equitable and effective manner by effecting timely reporting of tax liability, detecting and correcting errors in taxpayer self-assessments, and promptly collecting amounts determined to be due and economically recoverable.

The use of fuel tax is imposed on users of diesel fuel at 7 cents per gallon, liquefied petroleum gas and liquid natural gas at 6 cents per gallon, and compressed natural gas at 7 cents per 100 cubic feet, measured at standard pressure and temperature. The tax applies on use of these fuels in motor vehicles on the highways. All users must be licensed, file returns, and pay applicable tax. A portion of the tax is collected by vendors who place such fuel in the fuel tanks of motor vehicles. These vendors are likewise licensed and file returns and report the tax.

a. Registration of Taxpayers

Registration of sellers and users enables the board to furnish them with proper tax forms and instructions for purposes of reporting and processing of these taxes. Necessary security within the limits allowed by law is obtained to assure payment of the tax. The board establishes an account for each new taxpayer, maintains the account on a current basis and closes it out when the business terminates.

Two and three-tenths (2.3) positions are proposed to process the workload generated by Chapter 807, Statutes of 1975 (AB 2149, Flat Rate Use Fuel Tax).

	74-75	75-76	76-77	1974-75	1975-76	1976-77
Input						
Expenditures	36.3	36	38.3	\$601,255	\$655,510	\$710,668

b. Processing Tax Returns

This enables the board to verify the computations, account for the tax paid, identify taxpayers who are delinquent, assess self-declared but unpaid tax liability, and notify taxpayers of apparent discrepancies detected on the returns.

After returns are filed by taxpayers in the headquarters office, they are processed through the cashier section and data processing for deposit of funds and fiscal accounting purposes. Delinquencies are established for taxpayers failing to file returns and notices are sent to them.

Returns are verified for mathematical accuracy and reviewed for proper preparation and application of the law. When questionable deductions are found, the taxpayer is contacted and asked for an explanation. A control system is maintained to assure the accuracy of credits claimed by users for tax paid to vendors.

Input						
Expenditures	25.1	25.4	25.4	\$440,935	\$493,404	\$507,502

STATE BOARD OF EQUALIZATION—*Continued*

c. Auditing Accounts

This activity is planned to assure uniform application of the tax by detecting and correcting errors in reporting and is statistically designed to cover the tax base in a manner which will audit accounts most likely to make substantial errors in reporting and on a selective basis to police other accounts as a means of promoting accurate reporting. A major objective of the selection system is to audit accounts which will produce tax change in excess of the cost of auditing. To assist the field staff in selection of accounts to be audited, a list of eligible accounts is furnished to each district yearly. Eligible accounts are grouped into eight tax intervals in descending order according to annual tax reported.

Input	74-75	75-76	76-77	1974-75	1975-76	1976-77
Expenditures.....	23.3	23	23	\$447,003	\$488,864	\$502,832

d. Collecting Taxes Receivable

After the finality date of billings, field offices are primarily responsible for collection action including the use of mail, telephone, and personal contacts. Necessary investigations are made by the field staff to locate assets subject to lien or execution proceedings. Vehicles may be seized and thereafter sold when necessary to effect collection of the tax. The object is to bring about payment with the least delay.

In addition to field collection activities, liens are automatically recorded by headquarters seven weeks after the finality date where the amount owed is \$100 or more. If the delinquent amount is owed on an active account, a "notice of hearing" preparatory to revocation action is issued simultaneously with the recording of the lien.

Input	74-75	75-76	76-77	1974-75	1975-76	1976-77
Expenditures.....	9.5	9.4	9.4	\$170,801	\$186,114	\$191,432

VIII. MOTOR VEHICLE TRANSPORTATION LICENSE TAX PROGRAM

Program Objectives and Description

This program provided revenue for the Highway Users Fund. The objective of the program was to insure that the Motor Vehicle Transportation License Tax was collected in an equitable and effective manner.

The 1½ percent transportation tax was imposed upon the gross receipts from vehicles transporting persons or property for-hire on the highways of the state. The State Board of Equalization's responsibility for the administration of the Motor Vehicle Transportation License Tax was phased out effective with the 1974-75 fiscal year, as a result of Chapter 563, Statutes of 1972 (AB 705).

Authority

IX. INSURANCE TAX PROGRAM

Program Objectives and Description

This program is needed to provide revenue for the State General Fund. It is estimated that this tax will produce \$241 million in General Fund revenue in 1976-77. The objective is to assess taxes on premiums and on ocean marine profits of underwriters and levy retaliatory assessments against "foreign" insurers.

The program is administered jointly by the board, the Controller and the Insurance Commissioner. The board's responsibility in administering this program is the assessing of the tax on the California business of insurance companies.

The board's staff prepares an annual assessment against each insurance company based on the net premiums on California business other than ocean marine insurance, and the average annual underwriting profit on ocean marine business. It also imposes a retaliatory tax on any out-of-state company doing business in California whenever that company's home state subjects a California company doing business in that state to a greater burden than California imposes on insurers domiciled in that state. The staff processes deficiency assessments, refunds, and requests for corrections of assessment. It recommends action to the board and advises taxpayers and the Controller of amended assessments. The board also hears taxpayer appeals made in person or in writing and makes decisions based on the material presented at such hearings by the board's legal staff.

Authority

The State Constitution, Article XIII, Section 28 and Part 7 of Division 2 of the Revenue and Taxation Code.

STATE BOARD OF EQUALIZATION—Continued

X. APPEALS FROM OTHER GOVERNMENTAL PROGRAMS

Program Objectives and Description

A method of independent review is necessary when a taxpayer disagrees with actions taken by the Franchise Tax Board. The Board of Equalization provides this necessary appellate procedure.

There is also a need for an impartial tribunal that decides disputes between entities of local government relative to assessments and equalization on local rolls of taxable property of a county, city, city and county, or municipal corporation. The objective is to render sound and equitable administrative appellate decisions in an expeditious manner.

In the case of franchise and income tax and senior citizens property tax appeals, a taxpayer files a written notice with the board to initiate the appeal action.

In the case of intracounty equalization appeals, the review action is initiated when the local public entity which owns taxable property outside its jurisdiction files an application for review, equalization, and adjustment of the assessment with the board.

Authority

1) Franchise and Income Tax Appeals: The Revenue and Taxation Code Sections 18593 to 18596, 18621, 18646, 18648, 19057 to 19061.1, 19062.2 to 19062.5, 25666, 25667, 25701, 25701a, 25731a, 25761a, 26075 to 26078 and 26060.1. Procedural regulations respecting appeals from the Franchise Tax Board are contained in Title 18, California Administrative Code, Chapter 2, Subchapter 10, Sections 5021 to 5027 and 5071 to 5080; 2) Senior Citizens Property Tax Assistance: Section 19540 of the Revenue and Taxation Code; and 3) Intracounty Equalization: Section 1 of Article XIII, California Constitution, and Sections 1822.5 and 1826 of the Revenue and Taxation Code. The procedural regulations are contained in Sections 451–458, Chapter 1, Title 18, California Administrative Code.

c. Intracounty equalization	—	—	—	—	500	500

a. Franchise and Income Tax Appeals

Action is initiated after a taxpayer files a written notice with the Board of Equalization. The legal staff secures the framing of the issues of law and fact by means of memoranda and stipulations of the parties. After an oral hearing before the board, the case is referred to the board's legal staff for review, analysis, and preparation of a written opinion and decision reflecting the views of the Board of Equalization.

Three positions are proposed to process increased workload resulting from appeals of Personal Income Tax and Bank and Corporation Tax decisions rendered by the Franchise Tax Board and to reduce undesirable existing backlogs.

Output	1974-75	1975-76	1976-77
Percent of appeals decided within 90 days	21	30	33.3
Number of appeals decided within 90 days	15	30	40
Number of appeals disposed of by opinion.....	72	100	120
Number of appeals disposed of by dismissal	199	220	240

Input	74-75	75-76	76-77	1974-75	1975-76	1976-77
Expenditures.....	11.1	10.8	13.8	\$282,712	\$309,992	\$386,178

b. Senior Citizens Property Tax Assistance

A taxpayer files a written notice to initiate the action with the Board of Equalization. A framing is secured by the legal staff regarding the issues of law and fact. Upon submission, the board makes a determination and informs the claimant of its decision.

Output	1974-75	1975-76	1976-77
Percent of appeals decided within 60 days	74.7	80	80
Number of appeals decided within 60 days	322	200	240
Number of cases completed	431	250	300

Input	74-75	75-76	76-77	1974-75	1975-76	1976-77
Expenditures.....	0.5	0.5	0.5	\$15,915	\$17,580	\$18,063

c. Intracounty Equalization

Action is initiated when the local public entity which owns the property files with the State Board of Equalization an application for review, equalization, and adjustment of the assessment imposed by the county or city in which the property is located. The assessor may file an answer. A prehearing conference is conducted by a member of the board's legal staff to define the issues and arrange for stipulations and exchange of exhibits. A formal hearing is conducted before the board which renders a written decision with findings of fact, conclusions, and an order.

Output	1974-75	1975-76	1976-77
Percent of all applications disposed of prior to August 23.....	—	100	100
Number of all applications disposed of prior to August 23	—	1	1

Input	74-75	75-76	76-77	1974-75	1975-76	1976-77
Expenditures.....	—	—	—	—	\$500	\$500

STATE BOARD OF EQUALIZATION—Continued

XI. CAMPAIGN STATEMENT AUDITING PROGRAM

Program Objectives and Description

Under provisions of the State Election Code (in compliance with the Waxman-Dymally Campaign Disclosure Act), the Board audited and investigated certain statements of campaign fund receipts and expenditures for elections held during 1974; and filed a report with the Secretary of State and the Attorney General. The objective was to insure that campaign statements filed with the Secretary of State represented fairly the financial transactions of candidates and committees.

Copies of statements were received from the Secretary of State and reviewed for possible audit and investigation. Mandatory audits were conducted when a candidate received more than 15 percent of the vote cast for the office in a special or general election; when more than \$25,000 was spent by the candidate or a committee or committees in support of the candidate; and when a committee spent more than \$10,000 during a calendar year. In addition, the Board audited or investigated statements not meeting the preceding requirements, but were directly associated with the mandatory audits.

The board is required to provide supportive service to the Attorney General through 1975-76 in conjunction with those audit reports subject to review under the enforcement provisions of the Code.

Thirty-two positions and \$626,000 are proposed for reduction due to completion of the workload resulting from the Waxman-Dymally Campaign Disclosure Act.

Authority

Elections Code Sections 11500-11707, as amended by Chapter 1186, Statutes of 1973.

Output	1974-75	1975-76	1976-77

XII. ENERGY RESOURCES SURCHARGE PROGRAM

Program Objectives and Description

This program is needed to provide revenues for the State Energy Resources Conservation and Development Commission. The objective is to administer a surcharge on the consumption of electricity.

Administration of this surcharge on consumers of electrical energy includes registration of electric utilities required to collect from consumers, return review, auditing, billing and collecting efforts, resolution of protests, submission of management reports, necessary advisory services, and setting a rate sufficient to fund the expenditures authorized in the Budget Act to be made from the State Energy Resources Conservation and Development account in the General Fund.

Authority

Part 19 of Division 2 of the Revenue and Taxation Code.

XIII. ADMINISTRATION PROGRAM

Program Objectives and Description

This program provides policy, planning, direction, and support services. The objective of this activity is to provide leadership and support to all programs to insure that objectives are accomplished.

Administrative activities include planning and coordination carried out by the board members, the executive secretary and the assistant executive secretaries. It also includes administration staff services reporting to the executive secretary and assistant executive secretary for administration.

SECRETARY OF STATE

The principal objectives of the Secretary of State's Office are to examine numerous types of documents for statutory compliance; to file such documents as a matter of public record; to administer and enforce election laws and procedures; to appoint notaries public and to enforce the laws relating to the conduct of notaries public; to accession and preserve records having historical significance and to make such records available for public use.

The office is organized into six divisions: Corporate Filing, Elections, Uniform Commercial Code, Notary Public, Archives, Administration and Staff Services.

SUMMARY OF PROGRAM REQUIREMENTS

II. Elections		12	1,338,660
III. Uniform Commercial Code		1.8	16,305

I. CORPORATE FILING

Program Objectives and Description

The Secretary of State's staff examines all proposed articles of incorporation and related documents to assure the propriety and protection of the public interest in corporation filing through the review of powers and purposes stated in articles of incorporation and related documents submitted for filing. In addition, a variety of legal work is necessary in performing the primary function. Other integral elements of the office share in the total operation of filing and processing corporate documents and other kinds of documents, such as applications to register trademarks and service marks. The program provides a control to assure that corporations are properly formed pursuant to the laws of the State of California. The office gives ready reference to names, legal standing, county of principal office, stock structure, and names of officers of California corporations. Filed documents are available for public inspection and copies are available upon request.

One clerical position plus one-tenth of a man-year for added temporary help due to anticipated workload increase in the number of corporate documents filed and services related thereto is proposed for this program.

Also, Chapter 682, Statutes of 1975, completely revises those provisions of the Corporations Code which generally govern corporations in California. Two changes in the law which will go into effect January 1, 1977, will impose a logistical and fiscal impact on the Secretary of State's Corporate Filing Program. As a result of this legislation, net expenditures will increase \$36,165, while revenue on a full-year comparison will be increased by approximately \$320,600. The added expense will include 13 additional clerical positions and 4 Key Data Operator positions and equipment.

II. ELECTIONS

Program Objectives and Description

To assure that the state's election laws are complied with in a uniform manner. The Secretary of State, as California's chief election officer, provides technical information and legal opinions for the public, Legislature, and local election officers regarding election laws and procedures. The continuing greater complexity of the state's election system requires increased vigilance by the Secretary of State, as well as the promulgation of appropriate rules and regulations, to insure that the state's election laws are uniformly and adequately observed. In addition, the Secretary of State certifies to the nomination and election of state candidates, and the office is the central repository for voter registration data and official election results. In January, 1975, the Secretary of State implemented the provisions of Proposition 9, passed at the June, 1974, statewide election, relating to the processing and filing of campaign disclosure statements, conflict of interest statements and the registration of lobbyists.

The State Commission on Voting Machines and Vote Tabulating Devices consists of the Governor, Secretary of State and Attorney General or their designated representatives. Its function is to examine voting systems and/or devices and to approve or disapprove their use in California. Prior to the 1974-75 fiscal year, the expense of the necessary meetings and hearings and the examination of systems and equipment was recovered by prorating the expense to the persons or firms who had equipment or systems before the commission. The commission determined that by statute it can only require the applicant to pay for the cost of the necessary technical evaluations and reports. Other costs for hearing reporters, advertising, etc., must be paid for from state funds. An additional \$7,075 is proposed for this purpose.

SECRETARY OF STATE—Continued

Further, Chapter 704, Statutes of 1975, provides for voter registration by mail. It requires the Secretary of State to adopt regulations for program implementation and compliance, to provide local officials with all of the necessary forms and to generally reimburse local government for expenditures incurred in the registration-by-mail program. Estimated cost in the current fiscal year is \$276,556. The Secretary of State will request legislation to provide authorization for this current year deficiency. Proposed expenditures in the 1976-77 fiscal year will amount to an estimated \$1,331,585. This includes 7 additional permanent positions and 5 man-years of temporary help. These positions are necessary in order to implement and monitor the Registration-By-Mail Program, mandated by the above-cited statute.

Authority

Elections Code, Government Code, Title 9 and the State Constitution. Federal Voting Rights Act of 1965, as amended.

Output

III. UNIFORM COMMERCIAL CODE

Program Objectives and Description

To render a service through the filing of financing statements and related documents so that a secured creditor may perfect a security interest in personal property covered by a security agreement as against other creditors. Not only does this program afford a secured creditor some protection against debtor bankruptcy, insolvency or default, but it also provides a prospective lender or seller the means to determine if there are any previously perfected security interests involving certain personal property. The division further files notices of federal tax liens against partnerships and corporations, state tax liens against personal property and attachment liens against equipment. The Secretary of State's staff examines all documents presented for filing for statutory compliance. The documents are then filed and open to public inspection. Certificates of filing and copies of filed records are available upon request.

The anticipated workload increase for this program will be about 7.5% greater than that experienced in the 1975-76 fiscal year. One permanent clerical position and 0.8 of a man-year of temporary help is being added to this program because of the anticipated workload increase. The cost to meet this increase including related equipment is \$16,305.

Authority

Uniform Commercial Code, Chapter 4, Divisions 9 and 10; Uniform Federal Tax Lien Registration Act, Chapter 14, Division 7 of Title 1 of the Government Code; and Chapter 14.5, Division 7 of Title 1 of the Government Code relating to the registration of state tax liens. Section 542.1 of the Code of Civil Procedure relating to attachment liens.

Reimbursements				16,200	6,855	7,242

IV. NOTARIES PUBLIC

Program Objectives and Description

To serve the business community and general public through the appointment of notaries public for the purpose of performing certain official acts and to give official recognition and authenticity to acts and documents executed in the presence of a notary public. Many documents to be legally or officially acceptable must be notarized. Notary public services are generally related to oaths, affirmation, affidavits, depositions and acknowledgments. The notarial certificate generally states that a certain person or persons appeared before a notary public and under oath signed a statement or acknowledged execution of a document. Applications for notary public appointments are reviewed to determine that applicants meet the statutory requirements. Appointments are for four-year terms and under such an appointment, a notary may render notarial services throughout the state. The Secretary of State further investigates improper conduct on the part of notaries public and takes appropriate disciplinary measures if warranted.

Authority

Government Code, Chapter 3, Division 1, Title 2.

Output

V. ARCHIVES

Program Objectives and Description

To collect, catalog, index and preserve historic and otherwise valuable artifacts from a wide range of origins including county and city records as well as state papers. To serve the public directly and to assist state agencies and private and semiprivate institutions by providing an organized record of California history. Without this program for collecting historic documents, many valuable and needed records would be lost or otherwise destroyed, leaving the state with a reference vacuum that could not be filled.

Authority

Government Code Sections 12220-12231, 147; California Administrative Code, Title 5; Education Code, Article 2, Section 3019.

VI. ADMINISTRATION AND STAFF SERVICES

Program Objectives and Description

To maintain management control and to provide staff support to line functions with emphasis on personnel, fiscal and general administrative services. To provide the office with a means for continuing evaluation of its programs for greater responsiveness to program requirements. Through analytical studies, development of personnel, fiscal and other administrative options developed by administrative staff, the executive staff to the Secretary of State is able to establish policy, plan and direct the various programs administered by the department. Fiscal, personnel, electronic data processing, system analysis, computer programming and management analysis functions contribute significantly to the executive and administrative direction provided by top management.

Program Requirements	74-75	75-76	76-77	1974-75	1975-76	1976-77

VII. SUBVENTIONS FOR SIGNATURES IN LIEU OF FILING FEES (Local Assistance)

Chapter 454 (AB 914, Gonzales) waives the requirement for a filing fee when petitions signed by a specified number of registered voters in the area to be represented are filed by a candidate for public office.

Program Requirements	1974-75	1975-76	1976-77
Totals, subventions for signatures in lieu of filing fees (<i>General Fund</i>)	-	\$29,000	\$30,450

VIII. LEGISLATIVE MANDATES (LOCAL ASSISTANCE)

Chapter 1001, Statutes of 1974 (AB 2803, Ingalls) appropriated \$600,000 to the State Controller to reimburse local governments for costs incurred in 1974-75 in carrying out Chapter 1177, Statutes of 1973, which specified the size of all election ballot pamphlets to be 8 1/4" x 11" and specified minimum sizes of type.

Because these requirements were included in Proposition 9 which was approved by the voters in June of 1974, the chapter has limited application. The mandates only extended to elections held between January 1 and June 4, 1974. No funds need to be budgeted for the activity in future years.

SPECIAL STATEWIDE ELECTION

On June 26, 1973 the Governor issued a Special Election Proclamation. Although the Special Election Proclamation was not an executive regulation, the Governor concluded that certain costs of the election were reimbursable to local government entities.

As a consequence, \$6,710,000 was included in the 1974 Governor's Budget for fiscal year 1974-75 to reimburse local government entities (1) which, on November 6, 1973, were governed by Charter provisions requiring recognition of designated state holidays and therefore were required to provide premium pay for employees who worked on any designated state holiday, or (2) which had in existence on November 6, 1973, a binding employer-employee agreement requiring premium pay on any designated state holiday. Payment was to be made for actual costs related to the November 6 election on the proportionate basis that the Tax and Expenditure Limitations Initiative bears to the entire ballot configuration. Claims against the appropriation totaling \$4,576,392 were submitted to the State Controller within the filing period, for a resultant savings of \$2,133,608.

HERITAGE PRESERVATION COMMISSION

Program Objectives and Description

The commission, with the Secretary of State as its secretary, is composed of representatives of four state agencies and a private college or university, six persons appointed by the Governor and two members of each house of the Legislature who constitute a joint interim legislative committee on California heritage preservation.

The commission will furnish a report to the 1976 session of the Legislature to account for its activities.

The California Heritage Preservation Commission is charged with planning for the restoration, preservation and display in the State Capitol and elsewhere throughout the state of the historic documents of the State of California on deposit with the Secretary of State.

In the 1974-75 fiscal year, \$45,000 was appropriated pursuant to Chapter 984, Statutes of 1974, for the completion of the Earl Warren Oral History Program. This is being accomplished through a contract between the California Heritage Preservation Commission and the University of California (Regional Oral History Office of the Bancroft Library).

Chapter 59, Statutes of 1974 appropriated \$5,000 to the commission to advise and coordinate activities of county heritage and historical commission.

Chapter 483, Statutes of 1975 appropriated \$66,000 for the Goodwin Knight-Edmund G. Brown Era Oral History Project. This will be accomplished through a contract between the California Heritage Preservation Commission and the University of California.

The function of the Heritage Preservation Commission has been absorbed by the Office of the Secretary of State.

PROGRAM REQUIREMENTS	1974-75	1975-76	1976-77

STATE TREASURER

The State Treasurer is charged with the responsibility for the custody of all money and securities belonging to or held in trust by the state; investment of temporarily idle state monies; administration of the sale of state bonds, their redemption and interest payments; and payment of warrants drawn by the State Controller and state agencies; this program is also responsible for administration of the District Securities Division which reviews the financial soundness of local water district construction financing proposals.

PROGRAM REQUIREMENTS			
	1974-75	1975-76	1976-77
Office of the Treasurer	\$1,678,060	\$1,976,517	\$2,116,745
Reimbursements	-323,603	-373,400	-443,000

Program Elements

a. Bond Sales and Services	11	12.5	12.7	\$258,165	\$274,204	\$289,478
b. Investment services	5.4	6.4	7.4	196,094	225,012	264,157
c. Paying and receiving	28.1	32.3	34.9	644,777	838,773	890,535
d. Trust services	14.9	16.5	16.5	372,258	418,364	443,450
e. Districts Securities Division	7	7	7	206,766	220,164	229,125
f. Administration (distributed to other elements)	12.3	16.6	17.3	(366,485)	(400,961)	(423,415)

a. Bond Sales and Services

This program element includes the selling, issuing, servicing, and redeeming of all State of California general obligation and revenue bonds. Interest costs are minimized through a planned bond marketing program. This includes the offering of complete bond services to present bond holders including flexible bond registration and maintenance of paying agents in New York and Chicago.

Output	1974-75	1975-76	1976-77
Value of bonds sold (in millions)	\$584.4	\$780	\$885
Input			
Expenditures	\$258,165	\$274,204	\$289,478
Personnel man-years	11	12.5	12.7

b. Investment Services

The State Treasurer has the responsibility for investment of state moneys from the day of receipt until the day warrants issued to expend these receipts are presented to the State Treasurer's Office for redemption. During the 1974-75 fiscal year, this office handled 11,255 security investment transactions totaling over \$73 billion. The Pooled Money Investment Board programs accounted for 9,099 of these transactions totaling \$67 billion. The remaining \$6 billion was distributed among other investment programs such as the State Transportation Fund, Unemployment Compensation Disability Fund, Central Valley Water Projects Construction Fund. Cash management for these programs includes a comprehensive cash forecasting system which permits the purchase of longer term securities, thus maximizing the return from these funds.

One new position is being added to this function for 1976-77 to comply with new legislation, Chapter 639, Statutes of 1975 (AB 384), which makes negotiable certificates of deposit eligible securities for investment of new moneys. The legislation provided for the hiring of an investment analyst to assist in such investment decisions but did not provide funding for it.

Output	1974-75	1975-76	1976-77
Total revenue (in millions)	\$259.7	\$240	\$250
Input			
Expenditures	\$196,094	\$225,012	\$264,157
Personnel man-years	5.4	6.4	7.4

STATE TREASURER—Continued

c. Paying and Receiving

The State Treasurer provides banking services for all state agencies. Included in this element is the deposit of state moneys in the State Treasury and the centralized Treasury banking system and the redemption of all state warrants.

Effective January 1, 1976 the Department of Health will draw its vouchers (almost 8 million annual volume) of the supplemental federal food program for pregnant women, infants and children (WIC) on the State Treasurer. Currently these vouchers are drawn on a commercial bank. The Treasurer's budget has been increased by 2.5 positions of temporary help in the current year and 5 positions of temporary help in the budget year to handle this program. All costs of this program will be fully reimbursed by the Department of Health.

Output	1974-75	1975-76	1976-77
Dollars received (in billions)	\$61.1	\$63	\$65
Number of warrants paid (in millions)	17.1	20.9	24.7
Input			
Expenditures	\$644,777	\$838,773	\$890,535
Personnel man-years	28.1	32.3	34.9

d. Trust Services

The State Treasurer is responsible for the safekeeping of all securities and other personal property owned by or pledged to the state. These securities are held in the Treasurer's vault or in approved depositories such as the Federal Reserve Banks in San Francisco and Los Angeles. As of June 30, 1975, the Treasurer was responsible for over \$13 billion dollars in securities. During the past year 15,978 vault and depository releases were prepared and processed involving 493,266 securities. In addition 1,882,490 coupons, representing the interest increment on bonds held, were clipped and processed for collection during fiscal 1974-75.

One new guard-clerk position is being proposed for this function in 1976-77 to control the entry of people into the Trust Division. Currently such control is handled by vault personnel but when the State Treasurer's Office is moved to State Office Building No. 1 in Sacramento, the Trust Division and the State Vault will be placed on different floors. Since both units must be in secured areas, this position is proposed.

Output	1974-75	1975-76	1976-77
Number of securities received and released	493,266	530,000	565,000
Input			
Expenditures	\$372,258	\$418,364	\$443,450
Personnel man-years	14.9	16.5	16.5

e. Districts Securities Division

The California Districts Securities Division is charged with the supervision of certain fiscal and physical affairs of irrigation districts, California water districts, water storage districts, and certain other types of districts and local entities of the State of California.

The Districts Securities Commission was established in 1931 as a result of a special investigation by the California Irrigation and Reclamation Financing and Refinancing Commission following the default of many irrigation and other districts in payment of principal and interest due on outstanding bonds. The Districts Securities Commission succeeded the Bond Certification Commission which had been created in 1911. Since the creation of this Commission in 1931 there has been no default in payment of principal or interest due on bonds approved by the Commission.

The Districts Securities Commission became a division in the State Treasurer's Office effective November 10, 1969, in accordance with the Governor's Reorganization Plan No. 1.

Output	1974-75	1975-76	1976-77
Examination and report on debt proposals of various special districts	70	65	70
Examination and approval of financing programs (water storage districts)	10	10	8
Exemption approvals from D.S.I. Law	37	45	48
Input			
Expenditures	\$206,766	\$220,164	\$229,125
Personnel man-years	7	7	7

f. Administration

The administrative operation gives executive direction to program chiefs. Administration includes budgeting, personnel and accounting functions.

One clerk-typist position and one accounting technician position were added in Administration for 1976-77 to handle increased workload. However, funding for these positions was offset by temporary help savings partially in Administration and partially in other elements of the State Treasurer's operation.

Input	1974-75	1975-76	1976-77
Expenditures	\$366,485	\$400,961	\$423,415
Personnel man-years	12.3	16.6	17.3

DEPARTMENT OF FINANCE

By statute the director serves as the Governor's chief fiscal policy advisor with emphasis on the financial integrity of the state and maintenance of a fiscally sound and responsible Administration.

The objectives of the Department of Finance are:

1. To assist the Governor in the development and enactment of the annual financial plan.
2. To assess and optimize the efficiency and effectiveness of resource utilization for state-administered and state-financed programs.
3. To provide economic, financial, and demographic information.

SUMMARY OF PROGRAM REQUIREMENTS

I. PREPARATION AND ENACTMENT OF THE ANNUAL FINANCIAL PLAN

Program Objectives and Description

The Department of Finance develops and assists in the enactment of the annual financial plan for the effective allocation and accountability for available resources to meet the needs of the people. The annual financial plan is the Governor's Budget as amended by legislative action, the Budget Act, revenue and expenditure measures, and legislation having financial impact.

Program budget units act as the focal point to generate expenditure planning estimates; make recommendations for use in the executive decision process; analyze, review, and coordinate budget submissions to insure compatibility with the Governor's policies; compile the Governor's Budget and Budget Bill and publish the Governor's Budget; supply information to the Legislature on items in the Budget Bill and on the fiscal impact of other legislation; provide estimates of revenues and expenditures and special studies for use by the executive branch; assist the Legislature in its review of legislation; and compile a summary of the annual financial plan as enacted.

The workload in Health and Welfare assignments has increased to the point that additional manpower is necessary to meet the requirements of program analysis, budget preparation, legislative bill analysis, field investigations, and analysis of state plans for recurring Federal programs funded through formula grants.

Authority

Article IV, Section 12 of the State Constitution; Government Code Section 13320, et seq.; and Budget Act.

b. Legislative process	34.4	37.8	38.2	823,819	930,501	1,001,181
Administration distribution	2.8	3.3	3.3	91,683	100,652	100,811

a. Development of the Annual Financial Plan

The Expenditure Planning Estimate is developed by the Department of Finance to provide those in the executive branch with fiscal, economic, and demographic data for the past, current, and proposed fiscal year so that alternatives may be weighed, priorities established, and resources allocated prior to the actual preparation of the Governor's Budget. The allocation planning takes into consideration the revenues and expenditures necessary to maintain currently authorized program levels on a sound financial basis.

The plan must be adjusted to reflect the impact of legislation in the current year, economic conditions, and the distribution of resources that have previously been authorized by the Legislature without specific departmental designation. With these considerations in view, the Department of Finance prepares an expenditure planning estimate for each department of state government. Each department then compares its budget plan with the planning estimate.

A department which wishes to change its program or level of support must initiate a decision document to secure the reaction and approval of the appropriate agency secretary, the Department of Finance and the Governor.

The Department of Finance reviews and coordinates budget submissions from each of the state departments to verify that the decisions already made have been reflected and that the budget proposals are consistent with the statutes and the Governor's policies. Problems which become apparent at this stage are analyzed and resolved or referred to the Administration for decision.

The Department of Finance enters changes in the plan to reflect the adjusted expenditure projections for both the current and budget years. If a gap exists between available revenue resources and expenditure requirements, the Department of Finance recommends alternatives for additional revenue sources and/or expenditure reductions.

In addition to review and coordination of the annual financial plan for all state agencies, the department provides state agencies with information which pertains to state funding of local costs incurred for program mandates occurring through enactment of legislation or executive regulations.

The fiscal impact of legislation to be proposed in support of the Governor's annual financial plan must be analyzed and recommendations prepared.

DEPARTMENT OF FINANCE—Continued

Output

The Governor's Budget, Budget Bill, and proposals for special legislation prepared in accordance with the Governor's policy.
 Information services to the Governor and the Legislature and to other levels of government.
 Revenue estimates and forecasts of the economic pattern anticipated during the period covered by the budget and the translation of these into revenue under current tax laws.
 Current and long-range population estimates of the state and its counties.
 An analysis of the population composition.
 Current and long-range estimates of enrollments in higher education institutions, and primary and secondary schools.
 Revenue-related and demographic estimates for agency workload and caseload projections.

Input	74-75	75-76	76-77	1974-75	1975-76	1976-77
Expenditures.....	38.4	41.7	42.3	\$936,660	\$1,033,972	\$1,085,628

b. Legislative Process

Representatives of the Department of Finance, agencies, and departments appear before fiscal and revenue and taxation committees of the Legislature to present the Governor's program. The staff provides additional information requested by legislators or legislative committees and the public to explain the Administration's programs.

Bills introduced in the Legislature are reviewed for fiscal and program implications and analyses of these bills, including local mandated cost estimates, with recommendations, are submitted to the Governor's legislative assistant. Representatives of the Department of Finance appear before fiscal and revenue committees of the Legislature while they are considering bills. Data and information regarding the legislation are presented and assistance is provided in the preparation of amendments.

New or proposed expansion of existing programs are analyzed to ascertain additional costs mandated on local government and appropriate criteria are developed for reimbursement of those costs by the State Controller's Office.

At the time of budget enactment, revenue estimates are prepared to reflect the latest economic forecasts and recent legislation. This information is related to anticipated expenditures in order that a balanced budget may be developed. The staff brings fiscal and program implications of enrolled bills to the attention of the Governor.

Output

The Governor's Budget.
 Weekly Change Book, Combined Change Book, and Final Change Book.
 The Budget Act.
 Analyses and recommendations on bills, constitutional amendments, and resolutions.
 Appearances before legislative committees.
 'Summary of Revised Revenues and Authorized Expenditures Including Financial Legislation,' summarizing the annual financial plan.
 Annual report on chaptered legislation with state mandated local program implications pursuant to Chapter 486, Statutes of 1975.

Expenditures.....	34.4	37.8	38.2	\$823,819	\$930,501	\$1,001,181

II. SUPPORT AND DIRECTION OF THE ANNUAL FINANCIAL PLAN

Program Objectives and Description

State programs must be administered in accordance with the authorized annual financial plan. Controls are placed upon appropriation items in the Budget Act and other statutes which may require specific action by the Department of Finance.

All situations which require a variation from the approved financial plan must be examined carefully to ascertain the effects on programs and the financial position of the state. If justified and within approved policy and legislative intent, revisions may be allowed to the extent permitted by law. Some situations, by legal definition or because of importance, are reported to appropriate legislative committees for their consideration.

The cash condition of the General Fund reflecting the proposed annual financial plan is a major consideration in the budgeting process. Expenditure and revenue programs must be matched to assure sufficient cash for current operations and year-end cash balance. Cash flow statements are required and are essential to the needs of management. The amounts and sources of borrowable resources must be known in the event temporary loans are needed. Refer to the budget for payment of interest on General Fund loans for cash flow statements.

Output

Revisions to the approved programs are reviewed and acted upon.
 Estimated cash flow statements reporting the timing and amounts of receipts, disbursements, ending balances and borrowable resources.
 Comparative statements of cash flow reporting actuals with previous estimates and the amounts and reasons for differences.

Authority

III. ASSESSMENT AND OPTIMIZATION OF STATE-ADMINISTERED AND STATE-FINANCED PROGRAMS

Program Objectives and Description

With the large number of continuing programs, the Department of Finance has initiated a systematic review process to evaluate the efficiency and effectiveness of the administration of the resources for state-administered and state-financed programs, including statewide EDP. This review is made to ascertain the need for changes in program or the level of support and to propose workable alternatives which can more effectively satisfy identified needs.

Review and evaluation includes the accounting systems necessary to provide accurate and timely recording and reporting of financial transactions. It is essential that the programs of the state are administered with reliability and integrity. The accounting systems to give this assurance must receive the necessary maintenance and improvement effort.

Authority

Government Code Sections 11751, 11779, et seq.; 13291-13302; and Section 4 of the Budget Act.

Administration distribution	5.4	6.4	6.4	176,180	193,416	193,861

a. Program Analysis, Organizational and Operational Evaluations and Studies, and Follow-up Activities

Program analysis looks critically at state programs, policies, resources, organization and management, and suggests ways of improving the productivity, efficiency and effectiveness of state government. Methods of assessing and measuring program results are developed, as are ways of insuring that such results are consistent with public needs and policies. Major public problems are reviewed to provide information, analyses, and techniques which may help to resolve current issues. Evaluations and analyses are made to help the Director of Finance, the Governor, agency secretaries, department directors, and the Legislature in allocating resources, formulating policies, and making decisions.

Output

Increased effectiveness and efficiency of state programs and supporting data collection systems, or assurance that current conditions are acceptable.
Improved allocation of state resources to programs.

Input	74-75	75-76	76-77	1974-75	1975-76	1976-77
Expenditures.....	78	83.8	85.7	\$1,840,128	\$2,087,460	\$2,257,970

b. Fiscal Management Audits

Audits of various state agencies and state-administered or supported programs are made as often as deemed necessary by the Director, and consist of three elements:

- 1. *Financial and Compliance* which determines:
 - a. whether financial operations are properly conducted,
 - b. whether the financial reports of an audited agency are presented fairly, and
 - c. whether the agency has complied with applicable laws and regulations.
- 2. *Economy and Efficiency*, which determines whether the agency is managing or utilizing its resources in an economical and efficient manner, and the causes of inefficiency or uneconomical practices. Staff availability and priorities determine the extent to which this element is included in an audit.
- 3. Identification of existing or potential problem areas in organizational and program operations.

Currently these audits, plus special audits and investigations as assigned, are made in accordance with an annual work plan based on statutory requirements, judgment as to the magnitude or degree of risk associated with the department or program, and priorities of the Governor, Agency Secretaries, and the Director of Finance. Consideration is given to work done by other auditors, such as the Auditor General, departmental internal audit staffs and Federal audit agencies.

A further significant function is the supervision of annual audits of K-14 school districts made by independent public accountants. This is done by prescribing the content of reports on these audits, review of reports issued for compliance with prescribed content, and publication of audit guidelines to assist independent public accountants in conducting these audits. Also, on a selective basis, audits are made of apportionments of state funds to school districts.

Results of the audits are communicated to departments, Agency Secretaries, the Director of Finance and the Legislature through interim management letters or final reports.

An addition of four staff-years in the current year reported to the Legislature and 10 staff-years in the budget year are proposed to provide increased emphasis on Kindergarten to 14 year school district audits, state departments and state-financed programs.

Output

- The number and timeliness of audits made.
- Dollar magnitude of the expenditures audited.
- Number of recommendations generated.
- Percentage of recommendations implemented.
- To the extent possible and appropriate, dollar values are assigned to recommendations implemented.

Expenditures.....	50.7	54.2	64.2	\$1,226,791	\$1,327,303	\$1,672,469

c. Data Processing Management Office

The State Data Processing Management Office monitors the acquisition and utilization of state electronic data processing resources—equipment, personnel, and data systems, whether through lease, purchase or contract. Excluded from control are the State Legislature, University of California, State Compensation Insurance Fund, and the Community Colleges.

Output

- Coordinated plans for information systems and EDP facilities.
- Procurement and contracting procedures for EDP resources.
- Management and development plans for EDP personnel.
- Equipment management systems for inventory, maintenance and utilization.
- A manual of statewide EDP policies, procedures and standards.

Expenditures.....	11.2	11.8	12	\$241,737	\$251,046	\$274,047

IV. DEVELOPMENT OF SUPPORTIVE DATA

Program Objectives and Description

The Department of Finance provides a centralized source for official relevant data and analyses for economic, revenue, tax, and demographic information and data required by the Administration, the Legislature, and state agencies and requested or purchased by county and local government, the federal government, academic institutions, school districts, and private firms.

Data processing systems are used to assist the budget staff in the preparation and administration of the Governor's Budget. The computer system provides information on the budget and enrolled bills having financial implications.

Authority

Government Code Sections 13073, et seq., and Revenue and Taxation Code Sections 2227, et seq., and 11005.6.

Administration distribution	1.1	1.4	1.4	37,651	41,329	41,425

a. Economic Research

The Economic Research Unit prepares economic forecasts to provide the basis for revenue estimates. Reports and reviews of the national and California economies are prepared so that all branches of state government may be kept currently informed of changes in the economic situation or outlook in both the national and California economies. Economic advice and technical assistance are provided as requested by state agencies, the Administration, and the Legislature. The unit also prepares the *Economic Report of the Governor*, *California Statistical Abstract*, and *Economic Indicators*.

Collection of data for research requires cooperation with government and private research groups to facilitate the exchange of information and analyses. New or extended research methodologies are developed to improve forecasts and analytic procedures.

Output

- Development of basic economic data.
- Economic analyses and estimates.
- Statistical compilations.
- Special studies.
- Economic reports and reviews.
- Technical assistance.

Input	74-75	75-76	76-77	1974-75	1975-76	1976-77
Expenditures.....	2.3	2.5	2.6	\$46,682	\$53,063	\$60,189

b. Revenue Estimating and Tax Research

The Financial Research Unit maintains a basic and applied research function to support the revenue estimates required in preparation of the state financial plan, the analysis of financial legislation, and the evaluation of any financial developments of importance to the state. In addition, major studies, task forces, and special requests or projects initiated by the Administration, the Legislature, or state agencies require specific research into state revenue sources, including the use of samples and surveys.

The objectives of the Financial Research Unit also require cooperation with various state agencies, local governments, private consultants, firms, research groups, and comparable revenue units in other states to develop data and improve estimating methodologies.

Research projects also provide the basis for policy recommendations for the Administration. These may involve tax programs, the impact of various tax changes and the long-term projection of potential revenue sources.

New or extended research methodologies are developed to improve forecasts and analytical procedures.

DEPARTMENT OF FINANCE—*Continued*

Output

- Development of revenue estimates for the Governor's Budget.
- Monthly analyses of the revenue situation on an accrual basis.
- Special studies.
- Statistical analyses.
- Long-term projections used to support policy recommendations or analyses as requested.
- Technical assistance.

Input	74-75	75-76	76-77	1974-75	1975-76	1976-77
Expenditures.....	7.1	7.7	8.1	\$169,239	\$191,512	\$214,253

c. Demographic Research

Demographic data and analyses are required for research and planning purposes by users in state agencies, county and local governments, the federal government, academic institutions and school districts, and private firms. This unit provides the single source for official data.

The Population Research Unit carries out a basic and applied research function directed primarily at the production of population figures which underlie the caseload estimates of virtually all state agencies. This responsibility enables the unit to provide special aid to all levels of government and to the private sector, and in turn, to secure information from all levels of government and from the private sector in the development of its estimates and projections. Provides annual estimates of city-county population for local tax limitations.

Output

- Analyses and projections of enrollments in public schools, colleges, and universities.
- Development of basic data and statistical compilations.
- Local (city and county) population estimates for tax distribution, tax rate limitation, special survey design, and supervision.
- Design and testing of methods of research and data collection. The federal-state cooperative program on methodology for local estimates is an example.
- Publish annual estimates of state population and its composition.
- Preparation of short- and long-range population projections.
- Advisory services to state agencies, other levels of government, and the business community.

Input	74-75	75-76	76-77	1974-75	1975-76	1976-77
Expenditures.....	13.8	14.7	15.5	\$388,616	\$442,936	\$465,451

d. Computer Support

The computer support operation assists the budget staff and departments in the preparation and enactment of the annual financial plan through the use of data processing systems. The utilization of data processing systems facilitates the administration and direction of the annual financial plan. Legislative action on the Budget Bill and other enrolled bills with a financial impact are maintained by the computer system in order to maintain current information on the fiscal impact of this type of legislation. These computer files are available to the Legislature and its staff.

There are currently seven subsystems: (1) budget posting—summary schedule generation, (2) appropriation control accounting, (3) Schedule 10 generation, (4) budget changes and enactment, (5) interactive file, (6) budget planning, and (7) financial legislation.

Output

- Budget summary Schedules 3, 6, 7 and 8.
- Supplemental schedules of appropriations—Schedule 10.
- Lists of legislative and executive changes to Assembly and Senate Budget Bills.
- Final list of changes to the Governor's Budget.
- Financial Legislation Report.
- Planning Estimate Report
- Special reports and analyses using the appropriation data base which reflects planned, authorized, and past-year actual expenditures by category or project within each appropriation. In addition, the data base reflects all appropriation adjustment, e.g., budget revisions and executive orders starting with the 1973-74 fiscal year.

Input	74-75	75-76	76-77	1974-75	1975-76	1976-77
Expenditures.....	6.8	7.3	7.7	\$150,491	\$170,380	\$190,738

V. ADMINISTRATION

Program Objectives and Description

The Director of Finance provides active leadership in maintaining a fiscally sound state government. The Director serves as the Governor's chief fiscal policy advisor to provide guidance on matters of financial policy. He also serves as a member on many boards and commissions as required by law, including the Franchise Tax Board, the Pooled Money Investment Board, the State Lands Commission, the Housing Bond Credit Committee, and the State Public Works Board. The Director and his staff provide executive leadership and policy direction required for the successful achievement of department program objectives. *Other administrative costs are distributed proportionately over programs I through IV. These programs reflect the additional one staff-year in the Personnel Unit.*

COMMISSION ON CALIFORNIA STATE GOVERNMENT ORGANIZATION AND ECONOMY

The Commission on California State Government Organization and Economy was created by the 1961 Legislature and has responsibility for submitting reports of its findings and recommendations to the Legislature and to the Governor. The Commission is composed of two Senators, two Assemblymen and nine citizen members, five of whom are appointed by the Governor, with two each appointed by the Speaker of the Assembly and the Senate Rules Committee. The professional staff of the Commission consists of an Executive Officer and a secretary.

PROGRAM REQUIREMENTS

	1974-75	1975-76	1976-77
Commission on California State Government Organization and Economy	\$97,843	\$129,120	\$130,592
Personnel man-years	2.2	2	2

Program Objectives and Description

1. To secure assistance for the Governor and the Legislature in promoting economy, efficiency, and improved service in the transaction of the public business in the various departments, agencies, and instrumentalities of the executive branch of state government.

2. To make the operation of all state departments, agencies and instrumentalities, and all expenditures of public funds, more directly responsive to the wishes of the people as expressed by their elected representatives.

The Commission has a continuing interest in the activities relating to the operation of the Contractor's State License Board, as well as the sale of surplus lands owned by the State of California.

A comprehensive analysis of the operations of the Public Utilities Commission was completed in 1975. Also reviewed was the State's Vehicular Emission Control Program. Two reorganization proposals were submitted to the Commission in 1975 for review and it is anticipated the Commission will review proposals for reorganization in this fiscal year.

Presently, the Commission is making an organizational review of the Department of Health; tentative date for completion of the study is November 1, 1975. Additionally, a study of the operations of the Office of Administrative Hearings is under way, as well as a review of the Mandatory Vehicle Inspection Program.

As in past years, provision in the budget will allow the Commission to undertake additional projects and studies at the request of the Governor and or the Legislature.

Authority

Government Code Sections 8501 to 8541.

COMMISSION ON INTERSTATE COOPERATION

The objectives of the commission are to carry forward the participation of this state as a member of the Council of State Governments, both regionally and nationally; to confer with officers of other states and of the federal government; to formulate proposals for cooperation between the state and other states and with the federal government; and to organize and maintain governmental machinery for such purposes.

The Legislature eliminated total direct funding for the Council of State Governments in the 1975 budget bill. The amount proposed for 1976-77 is the difference between the total assessment of the Council and the amount of the National Governor's Conference which is budgeted in the Governor's Office in the same manner as the Legislature has included the amount for the National Conference on State Legislators in the budget of the Senate.

Authority
Government Code Sections 8000-8013 inclusive.

ARTS COUNCIL

The Arts Council, established by Chapter 1192, Statutes of 1975, consists of nine members appointed by the Governor with the advice and consent of the Senate. Members are compensated at the rate of \$100 per meeting and are reimbursed for necessary traveling and other expenses incurred while performing official duties.

The Council is required to:

- (a) Encourage artistic awareness, participation and expression.
- (b) Help independent local groups develop their own art programs.
- (c) Promote the employment of artists and those skilled in crafts in both the public and private sector.
- (d) Provide for the exhibition of art works in public buildings throughout California.
- (e) Enlist the aid of all state agencies in the task of ensuring the fullest expression of our artistic potential.
- (f) Adopt regulations in accordance with the provisions of the Administrative Procedure Act necessary for proper execution of the powers and duties granted to the council by this chapter.
- (g) Employ such administrative, technical, and other personnel as may be necessary.
- (h) Fix the salaries of the personnel employed pursuant to this chapter which salaries shall be fixed as nearly as possible to conform to the salaries established by the State Personnel Board for classes of positions in the state civil service involving comparable duties and responsibilities.
- (i) Appoint advisory committees whenever necessary. Members of an advisory committee shall serve without compensation, but each may be reimbursed for necessary traveling and other expenses incurred in the performance of official duties.
- (j) Request and obtain from any department, division, board, bureau, commission, or other agency of the state such assistance and data as will enable it properly to carry on its power and duties.
- (k) Hold hearings, execute agreements, and perform any acts necessary and proper to carry out the purposes of this chapter.
- (l) Accept federal grants, for any of the purposes of this chapter.
- (m) Accept only unrestricted gifts, donations, bequests, or grants of funds from private sources and public agencies, for any of the purposes of this chapter. However, the council shall give careful consideration to any donor requests concerning specific dispositions.
- (n) Establish grant application criteria and procedure.
- (o) Award prizes or direct grants to individuals or organizations in accordance with such regulations as the council may prescribe.

The Council may delegate to a director the responsibilities for carrying out council policy. The director and two deputies are appointed by the Governor.

Program Objectives and Description

The Commission was created by Chapter 1230, Statutes of 1971. This law, which went into effect March 4, 1972, provides that the Commission shall consist of 17 members. These include the Lieutenant Governor, who serves as chairman; 10 Governor's appointees, of which only six can belong to the same political party; three Senators appointed by the Senate Rules Committee; and three Assemblymen appointed by the Speaker. Chapter 253, Statutes of 1975, changed the expiration date on the life of the Commission from January 1, 1976 to June 30, 1977.

The enabling legislation specifically provides that the Commission shall: (1) make recommendations concerning legislation affecting the economic development of the state, (2) consider programs to further the economic development of the state, study laws and programs of other states relating to economic development, and confer with governmental officials and representatives of business and industry and any other persons or organizations interested in the promotion of economic development, (3) appoint advisory committees from outside its membership to represent the aerospace, manufacturing, maritime, tourism and international trade segments of the state's economy, and such other advisory committees as it deems necessary, and (4) make a report of its activities, findings, and recommendations to the Governor and the Legislature.

During the past year, as part of the Department of Commerce, the Commission appointed a number of citizen "task forces" on such subjects as foreign trade, housing and construction, small business, rural economies and economic planning. The Commission also sponsored and conducted statewide conferences on employment and on improving the California business climate.

MILITARY DEPARTMENT

The Military Department provides a military organization to support the Constitution and to protect life and property during periods of civil disturbance, emergencies, or disaster; and furnishes trained units for federal mobilization and for state missions as required by the Military and Veterans Code or as directed by the Governor.

The department is organized into the Army Division, Air Division, and command-management functions. Staff activities serving both the Army and Air Divisions and including accounting, budgeting, personnel, recruiting, information, and administrative services, are assigned to the command-management function. The California Cadet Corps, although separately funded, is assigned to the Army Division.

Full-time personnel of the department are state active duty, state civil service or federal civil service, organized in general accordance with staffing patterns of the Departments of Army and Air Force.

III.	Military support of civil authorities	1	23,926
V.	Cadet Corps expansion	1	102,759

I. ARMY NATIONAL GUARD

Program Objectives and Description

The objective of this program is to manage personnel and other resources so as to maximize the readiness of trained and equipped ground forces when required for federal or state missions in support of the Constitution.

The ARNG consists of 177 company-sized units allotted to the state by the Department of the Army. The Military Department, in turn, stations those units at locations deemed best suited to insure their readiness and availability to perform state and federal missions. Authorized strength of those units is now 20,870. *Thirteen positions at Camp Roberts and Fort Irwin shift to direct Federal payroll and are reduced here. One engineering officer position is reduced because of the termination of Federal funding. One janitorial position is proposed for new facilities at Camp San Luis Obispo.*

a. Training

California ARNG units observe the training programs established by the Department of the Army and are regularly inspected by active army officers to measure progress toward training objectives.

More than \$1,650,000 in federal funds are available in fiscal year 1975-76 and an equal or greater amount will probably be available in fiscal year 1976-77 to support the attendance of California national guardsmen at federal military schools.

MILITARY DEPARTMENT—Continued

b. Logistics

Except for housing and storage facilities, most supplies and equipment required by the ARNG for training and readiness for federal mobilization missions are provided by the federal government and are authorized for use by units called into state service. Housing and storage have been provided by construction or acquisition of 118 armories and 7 support facilities located throughout the state and containing over 3,000,000 square feet of space. Operation and maintenance of armories is a major cost and principal activity of this element.

Camp San Luis Obispo is a state-owned logistical base through which federal supplies and equipment are channeled to the ARNG. This installation is also a weekend and annual training site for ARNG units. Camp Roberts and Fort Irwin are federal installations licensed to the state for year-round training of the California NG and other reserve forces and would not be available unless operated and maintained by the state with 100 percent federal funding support. Fiscal year 1976-77 federal support will approximate \$3,000,000.

c. Command Support

This element provides command direction and policy guidance for the program. Primary activities include the issuance of necessary directives; the coordination of training and logistics; the preparation for contingencies; the determination of forces to be used in each contingency; and the command and control of operational forces.

d. Personnel

This element establishes standards for administrative and military personnel practices throughout the program; develops policies, procedures, and standards for management, preparation, and maintenance of personnel and other records; develops military personnel systems and administers the procurement, assignment, payment, promotion, retention, separation, and retirement of military personnel.

II. AIR NATIONAL GUARD

Program Objectives and Description

The objective of this program is to manage personnel and other resources so as to maximize the readiness of trained and equipped air forces when required for federal or state missions.

The ANG consists of an air defense unit at Fresno, a tactical airlift unit at Van Nuys, an air rescue and recovery unit at Hayward, and a tactical air support unit at Ontario. Additionally, communications units are located at North Highlands, Van Nuys, Hayward, Compton, Costa Mesa, and Los Angeles. All of these units are allotted to the state by the Department of the Air Force. The authorized strength of the California Air National Guard is 5,275. *Eight security guard positions are proposed for Ontario and Fresno ANG Bases. Four of these positions were established in the current year and are fully Federally funded. Five maintenance and custodial positions are proposed for new facilities at Fresno ANG Base.*

^a Direct federal expenditure of funds not reported elsewhere.

a. Training

Training in the Air National Guard is conducted using a combination of resident USAF technical schools and individual on-the-job training at the bases. Upon completion of formal technical training, individual skills are advanced through closely supervised career development training, employing both correspondence courses and actual experience on the job. Each individual performs a minimum of 63 days a year training in a combination of scheduled weekend training assemblies and 15 days of annual training. Proficiency is insured through periodic individual and unit testing conducted by Air Force advisers, using USAF standards and criteria.

b. Plans and Operations

Contingency plans are developed and maintained for the employment of Air National Guard forces in support of state government during periods of state emergencies and for the mobilization of state air forces into federal service in accordance with national war plans. Air guard plans for support of civil authority reflect airlift, communications, and other specialized support. The operations portion of the task includes the control, management and direction of air resources committed to operational missions and the employment of supporting forces in implementing daily, weekly and monthly flying schedules of air guard units.

c. Logistics

The federal government provides virtually all supplies, equipment, transportation, subsistence, and support services necessary for training, deployment, and commitment of the ANG. Major tasks are procurement, issuance and control of repair parts, administrative supplies, uniforms, fuels, meals, ammunition, and mobilization stockpiles; housekeeping and the highly technical maintenance of over \$168,000,000 worth of aircraft, wheeled vehicles, and modern mobile radio, teletype, and radio relay equipment.

MILITARY DEPARTMENT—Continued

d. Installations

The State of California operates and maintains ANG facilities under a contract which requires federal reimbursement for a major portion of the costs. The federal government also provides funds for major and minor capital outlay, repair projects, and runway crash fire protection. Construction activities are administered by the Military Department, with federal funds totaling nearly \$21,460,000 since 1946.

e. Administration and Services

This element develops and implements personnel policies and systems, and accomplishes the procurement, selection, appointment, enlistment, commissioning, assignment, classification, reporting, promotion evaluation, separation, and discharge of Air National Guard personnel; establishes criteria and procedures for maintenance of personnel records; provides services including the development and publication of policies concerning correspondence, records, files, reports, libraries, processing of security clearances, and the safeguarding of classified information.

f. Command Support

This element performs all functions of command to insure achievement of program objectives. Primary tasks include development of long-range plans and programs concerning state military requirements, determination of current requirements, and analysis of current operational capabilities of California Air National Guard organizations.

III. OFFICE OF THE COMMANDING GENERAL

Program Objectives and Description

The objective of this program is to provide executive leadership, policy direction, and administrative services prerequisite to successful accomplishment of departmental objectives. *Federal funding for a civil defense operations officer has terminated and a state funded civil defense position is proposed for 1976-77. Twenty-four positions were administratively established in the current year for the California Specialized Training Institute (CSTI) and are not budgeted for continuation in 1976-77. Temporary help expenditures of 1.6 man-years from existing funds are proposed for the budget year.*

^a Direct federal expenditure of funds not reported elsewhere.

a. Command Management

This element determines overall departmental policies, exercises general guidance and direction over departmental activities, and provides administrative services. Specific services include recruiting and retention services; publication and distribution of publications pertaining to organizations with about 3,000 full-time federal and state employees and 26,000 national guardsmen; maintenance of all official records required for state purposes; legal and inspector general services; procurement of supplies and services; public information; data processing; property accounting; and fiscal accounting and control.

b. Military Support To Civil Authority

This element plans for the employment of California NG personnel and resources when called into state service by the Governor because of disaster or other emergencies or when called into federal service.

Resource data, capabilities of military forces, and procedures for employment of personnel and equipment for state or federal purposes are regularly reviewed and updated. Coordination with other federal, state, and local agencies is conducted to assure prompt and effective response to state or federal emergencies.

The California Specialized Training Institute at Camp San Luis Obispo, supported entirely by federal grants, is conducted by the Military Department to provide training in civil emergency management operations, officer survival and internal security, and school security to civilian and military personnel. No funds are included in the FY 76-77 budget for CSTI.

IV. MILITARY RETIREMENT

Program Objectives and Description

This program provides retirement benefits, similar to those provided by the federal military services, to persons who entered state active duty prior to 1 October 1961 and have served 20 or more years, at least 10 of which have been on state active duty. All other personnel are covered by the Public Employee's Retirement System. There are currently 44 retirees receiving these benefits and no new retirees are budgeted for 1976-77.

V. CALIFORNIA CADET CORPS

Program Objectives and Description

This educational program is specifically designed to develop in the youth of our state qualities of leadership, patriotism and citizenship, and will be available to about 4,800 cadets in 102 intermediate and secondary level schools throughout the state. *A new captain-coordinator position is proposed to provide for an expansion of the program from 3,200 to 4,800 cadets.*

Authority

Sections 500-530, Military and Veterans Code.

PUBLIC UTILITIES COMMISSION

The objectives of the Public Utilities Commission are: 1. To provide the public with the lowest reasonable rates for services by utilities, transportation and warehouse companies. 2. To make certain that utilities and transportation companies render adequate service and have sufficient facilities to meet the needs of the public. 3. To ensure that the public has stable, efficient utilities and transportation services by controlling and limiting entry into the field to those applicants with financial responsibility and demonstrated capability to render adequate service. 4. To promote public safety and accident reduction by establishing and enforcing safety regulations for utility and transportation companies, as well as for railroad highway grade crossings. 5. To determine the just compensation for the acquisition of utility or transportation company property by political subdivisions.

I. REGULATION OF UTILITIES

Program Objectives and Description

Utilities in California have been granted exceptional powers and privileges by the state, including exclusive service areas, which precludes customers from obtaining service from others. State regulation is necessary to protect the public interest and ensure fair and impartial rates as well as adequate service facilities rendered by stable, financially responsible companies. Regulatory controls have also been established to promote the safety of employees, customers, and the public at large.

The objective is to provide the public with adequate and safe utility services at the lowest reasonable rates.

The Commission has redirected its efforts of personnel formerly involved in Transportation Rate Fund activities to General Fund activities. This program shift will result in increasing General Fund requirements by \$588,000 in 1975-76. The Commission is proposing to continue this changed level in 1976-77 thereby requiring an additional \$941,000 from the General Fund. As this redirection has not been approved by the Legislature, the budget presentation does not reflect this change. The Commission is proposing to have legislation submitted in the 1976 session to assess a fee on gross revenues of utility companies. They are also proposing to use this fee to offset increased cost and new emphasis of direction in both 1975-76 and 1976-77.

d. Safety.....	9.6	9.9	9.8	212,220	227,476	242,957

a. Regulation of Rates

The commission's responsibility for the establishment and maintenance of reasonable rates for utility service is accomplished by making intensive studies of costs of service, cost of plant, earnings, and financial analysis which are entered into evidence at public hearings. Similar studies are made to form the basis for negotiated rate settlements and reductions. The commission's attorney represents the people of the State of California and the commission in all proceedings involving any question under the Public Utilities Act and any order or act of the commission. The commission participates in rate and certification proceedings before federal regulatory commissions and in the courts.

The volume and complexity of rate applications has been increasing in recent years. Special consultant funds have been provided in the amount of \$100,000 to allow the Commission to seek expertise, not available through existing staff, when processing complex rate cases. Additional funds and three positions have been provided to allow for greater use of electronic data processing in gathering evidence for hearings. Hearing reporters are necessary at each public hearing. Reimbursements have been increased by \$70,000 in 1975-76 and \$90,000 in 1976-77 to provide additional hearing reporters for the increasing number of rate increase cases being processed. Four positions are being added in 1976-77 to reduce the current backlog of rate increase applications.

PUBLIC UTILITIES COMMISSION—Continued

Output

	1974-75	1975-76	1976-77
Utility charges (billions)	\$7.9	\$8.5	\$9.1
Utility plant (billions)	\$25.2	\$26.5	\$28.1
Rate cases decided	76	113	133
Resolutions	862	900	960

Inquiries and complaints	28,930	31,176	33,984

Input

Expenditures	\$4,774,950	\$5,224,583	\$5,637,179
Personnel man-years	214.6	218.7	228.5

b. Service and Facilities

Utility services are regulated through commission orders issued as a result of investigations, studies, and public hearings related to the adequacy of service and facilities. A large part of new facilities are financed through the issuance of stocks or bonds which require commission authorization prior to issuance.

The number of service connections is a reasonable measure of the output of this element. With a continual growth in the general population and the number of customers in the state, the number of service connections and the related activities of maintaining adequate service and facilities will also continue to expand.

Conservation of energy resources is becoming increasingly important. Five positions are being added to allow the commission to measure and improve the effectiveness of utility programs designed to assist customers in the more efficient use of energy in existing buildings and by existing appliances.

Chapter 1319 of 1974 required the commission to prepare priorities for providing energy to customers during periods of shortage. The report will be completed by July 1, 1976 and 3.5 positions added for that purpose will terminate on June 30, 1976.

Output

	1974-75	1975-76	1976-77
Service connections (millions)	22.4	23.1	23.6
Informal complaints	2,179	2,380	2,604
Public inquiries	9,072	9,744	10,612

Input

Expenditures	\$1,094,259	\$1,269,456	\$1,269,642
Personnel man-years	49.2	54.2	51.5

c. Certification

Before utilities can exercise any rights or privileges of franchise, they must obtain certification that public convenience and necessity requires their exercise of these rights.

New or existing entities file applications for certification of public convenience and necessity to construct or extend facilities to areas not theretofore serviced. The processing of the applications involves studies and investigations covering financing programs, operations, and reasonableness of initial rates.

The number of decisions issued gives a reasonable measure of output and shows how utility service is being reviewed for the benefit of the consuming public in California.

Continuing in its activity with respect to the Environmental Quality Act of 1970 (Chapter 1154), the commission is strengthening its staff in its review and evaluation of environmental reports. In light of the acceleration in the number and complexity of the applications, one associate utilities engineer and one economic analyst are being added in 1976-77.

Output

Decisions issued	67	73	81

Input

Expenditures	\$550,446	\$616,383	\$697,519
Personnel man-years	24.7	26.3	28.4

d. Safety

The safety element of the commission's regulation of utilities program is divided into two components: gas safety and electric safety.

In its endeavor to meet the objectives of this element the commission establishes minimum standards for the construction, operation and maintenance of utility plants to promote the health and safety of employees and the public.

Accident reports and other utility reports are made to ensure that these standards are maintained. This is accomplished through field investigation and tests of utility plants and examination of methods of construction, operating procedures, and maintenance; and public hearings where appropriate.

Because the establishment and enforcement of safety regulations for utility plant and facilities are related directly to the size of the utility plant, there is a direct relationship between the size of the utility plant as measured in dollars and the utility safety activities of this agency.

Output

	1974-75	1975-76	1976-77

II. REGULATION OF TRANSPORTATION

Program Objectives and Description

State regulation has been necessary to provide the general public with a stable, efficient, and dependable transportation and warehouse system, at a reasonable rate. This regulation insures freedom from destructive rate wars, financially irresponsible operators, curtailment of service, and inadequate routing and scheduling. In addition, this regulatory program provides that safety standards are met in railroad and other transportation and warehousing operations, as well as at railroad highway grade crossings.

Authority

California Constitution, Articles IV and XII; Public Utilities Code, Division 2.

Program Requirements

	74-75	75-76	76-77	1974-75	1975-76	1976-77

e. Just compensation	—	—	—	—	—	—

a. Regulation of Rates

Appropriate charges to the public for transportation and warehouse services are accomplished through the establishment and maintenance of minimum rate tariffs for for-hire carriers of freight and by requiring common carriers and warehousemen to file their schedule of rates and charges with the commission. The commission holds public hearings at which studies of costs, revenues and expenses are received in evidence to assist the commission in determining the reasonableness of the rates the public is required to pay.

The commission's attorney represents the people of the State of California and the commission in all proceedings involving any question under the Public Utilities Act and any order or act of the commission. The commission participates in rate cases before the Interstate Commerce Commission and rate violation and other enforcement cases in the courts.

Output

Personnel man-years	328	340	341.3

b. Service and Facilities

Special studies are made in connection with proposed changes in the level of service of all classes of transportation companies. These studies test the economic justification or reasonableness of the proposed service change. This includes investigations, reports and testimony at Public Utilities Commission hearings on adequacy of bus service; and review and hearings on proposals of railroads to discontinue passenger trains before the Public Utilities Commission and Interstate Commerce Commission.

The control and supervision of financing practices of carriers is essential because of the effect of such practices on capital costs and the availability of capital funds, both important elements in providing adequate service at reasonable costs to the customer. Commission authorization is required for security issuance and such related matters as transfers of utility properties, mergers, and consolidations for the purpose of assuring sound, well-balanced financing and capital structures.

Output

PUBLIC UTILITIES COMMISSION—Continued

c. Licensing

Carriers must obtain a certificate for authority to operate as a for-hire carrier or warehouseman in California. Before obtaining authority to operate, they must establish ability and reasonable financial responsibility. All for-hire carriers must deposit public liability and property damage insurance with the commission. Interstate motor carriers are required to register their interstate operating authority with the commission.

After issuance, carrier's certificates and permits are subject to suspension, reinstatement or revocation for failure to comply with statutes and commission orders. Activities related to carrier licensing are analyses of applications for financial responsibility, insurance coverage, and nature and scope of proposed operations; hearings relating to certificate applications; and enforcement of licensing requirements.

Applications to operate as public utility carriers are analyzed to determine compliance with the commission's procedural requirements, reviewing draft decisions by the examiners, preparing operating authorities in appendix form and monitoring the mandatory requirements contained in the decisions that issue from these proceedings.

Output	1974-75	1975-76	1976-77

Personnel man-years	113.2	117.2	117.2

d. Safety

The safety element in the regulation of transportation program is divided into two components: railroad safety and grade crossing safety.

The railroad safety component is concerned with promoting the adoption and enforcement by railroads and rapid transit systems of safe and efficient operations and maintenance practice and facilities, and the compliance by such carriers with commission and special orders and state law principally for the promotion of efficiency and safety of operating and nonoperating employees and the public. The grade crossing safety component involves requiring installation of automatic protection devices or the construction of overpass or underpass structures to promote safety at railroad-highway grade crossings.

In the railroad safety component of the safety element, accidents are investigated and causes analyzed for corrective action by the railroads in an accident prevention program. Inspections and surveys involving safety, health and comfort of employees, passengers, customers, and the public are made. These cover railroad rolling stock, main track areas and industrial track areas, repairs, maintenance and operation, and building and bridge construction.

In the grade crossing component, the commission promotes or orders the installation of automatic protection devices, or underpasses, or overpasses at dangerous railroad-highway crossings. Inspections are made of crossings to determine accident potential and whether cities or counties and the railroads should be required to install automatic protection devices or whether existing protection, if any, should be improved. In addition, complaints from the public regarding unsafe conditions at grade crossings are adjusted through this activity. Investigations are conducted of accidents at railroad crossings and for the authorization of new crossings and spur tracks or alteration of existing crossings. Studies are made of the construction of grade separation structures. As vehicular traffic increases with the growth of California, there will be a greater need for improved grade crossing protection and for grade separations to replace grade crossings that have reached their limit capacity to handle the vehicular traffic interspersed with delays caused by train movements.

e. Just Compensation

The Public Utilities Code provides that, upon petition of a political subdivision, the commission shall determine the just compensation for the acquisition of a transportation company's property. The need would arise should a political subdivision desire to acquire a transportation company's property but be unable to negotiate compensation with them. Upon receipt of such a request, the program involves valuation, depreciation, appraisal, and financial studies of transportation company property; and placing such studies in evidence through testimony and exhibit at public hearings. After the hearing, the commission finds and fixes a single sum to be paid for the properties. If the commission finds that severance damages should be paid, the just compensation for such damages is found and stated separately.

Output

No work is planned in this element until a political subdivision of the state makes a formal request for such services.

COMMISSION ON THE STATUS OF WOMEN

The Commission on the Status of Women works toward maximum participation of women in California society.

The Commission was originally created by Chapter 1378 of 1965, continued by Chapter 854 of 1967, and by Chapter 721 of 1969. Chapter 541 of 1971 continued the commission without a termination date, extended its areas of concern, and added action projects and consultive functions to its mandate.

The Commission examines all bills introduced into the Legislature which affect women's rights, maintains an information center on current needs of women, with its resources available to government agencies and private groups and individuals, and gives consultive assistance to organizations working on local levels to assist women. Emphasis is on legislation, education, employment and counseling.

Legislation provides for a 17-member commission, consisting of the Superintendent of Public Instruction, the Chief of the Division of Industrial Welfare, three Members of the Assembly and one public member appointed by the Speaker of the Assembly, three members appointed by the Senate Committee on Rules, and seven public members appointed by the Governor. Chapter 382 of 1973 provided for staggered four-year terms for public members, commencing July 1, 1974.

In the current year, an Office of Criminal Justice Planning grant will enable the continuance of one position, previously established in the 1974-75 fiscal year and the addition of 1.5 administratively established positions.

These 2.5 positions will terminate at the end of the 1975-76 fiscal year.

One position is proposed for 1976-77 to handle increased work in the information center.

An additional \$5,000 is proposed in the budget year for the purpose of establishing a commission member per diem of \$50 a day. Legislation will be required to authorize the payment of such per diem.

EDUCATIONAL EMPLOYMENT RELATIONS BOARD

Program Objectives and Description

The Educational Employment Relations Board was created by Chapter 961 (SB 160), Statutes of 1975. The three members of the board will be appointed by the Governor with the advice and consent of the Senate. While the board will be operative January 1, 1976 and certain provisions relating to the rights of employees and employee organizations will be effective April 1, 1976, the entire statute will not become operative until July 1, 1976. A total of \$300,000 was appropriated for start-up costs from January 1 to June 30, 1976 by Chapter 961. The amount proposed for support of the board in 1976-77 is a projection of the amount appropriated in Chapter 961 less an allowance for nonrecurring start-up costs. The board, when established, will develop and submit their program budget.

The board will govern negotiating procedures of public school employers (including community college districts) and public school employees, with the exception of elected officials, management, and confidential employees. When necessary, the board has the adjudicatory power to determine the appropriateness of the collective bargaining units. The board is also authorized to conduct secret ballot representation elections, establish lists of qualified mediators, arbitrators and fact-finders, conduct related studies and recommend needed legislation, adopt rules and regulations, investigate and determine charges of unfair practices, hold hearings, and issue subpoenas.

Authority

Sections 3540 through 3549.3, Government Code.

INTERGOVERNMENTAL BOARD ON ELECTRONIC DATA PROCESSING

The primary objectives of the board are to: (1) facilitate the establishment of efficient, cost-effective, practical systems for intergovernmental flow of information required to conduct government business, (2) see that development and implementation of needed systems is undertaken, (3) see that there is true coordination with all levels and (4) see that the methods used achieve an integration of the best design ideas available from every level and incorporate the best features from currently operating systems, systems under development and implementation, and systems in the design phase.

In the budget year, two additional positions are proposed to increase the board's effectiveness in coordinating the use of intergovernmental data systems.

Authority

AMERICAN REVOLUTION BICENTENNIAL COMMISSION OF CALIFORNIA

The American Revolution Bicentennial Commission of California was created in 1967 by Chapter 1425, Statutes of 1967 (Senate Bill 1327). The purpose of the commission is the planning and coordinating in this state of the commemoration of the "epochal period of approximately 1765-1783."

SUMMARY OF PROGRAM REQUIREMENTS

	1974-75	1975-76	1976-77
American Revolution Bicentennial Commission	\$134,274	\$358,196	\$72,465

Federal funds ^a	30,000	260,000	25,000
Personnel man-years	4.1	5.1	3.1

Program Objectives and Description

The commission shall provide for, assist, sponsor and promote projects and programs commemorating the bicentennial of the American Revolution and the events which preceded the years of actual hostilities.

One of four actions may be taken by the commission on projects submitted for consideration: sponsorship, endorsement, approval, or recognition—each carrying with it certain specifics as set forth in the pamphlet on *Purposes and Procedures*.

Projects must conform to one or more of three themes selected by the national American Revolution Bicentennial Commission: *Heritage '76*, *Festival USA*, *Horizons '76*.

The commission operates without the appropriation of state funds for its purposes. Expenditures are to be financed from donations, gifts, grants from private and other public agencies, and from the sale of medallions and other commemorative items.

To respond to anticipated workload fluctuations, one limited-term clerical position is being added in the current year and a reduction of one clerical position is proposed for the budget year.

^a Federal funds and expenditures therefrom are not included in budget totals.

Program Objectives and Description

To support funding for the arts, through grant awards of state and federal funds on a matching basis to generate additional funds from nonstate sources.

Funding categories reflected requests from arts organizations for support of new and ongoing programs.

Research and technical assistance were also provided for communities through maintaining a support base of information and reference sources.

The California Arts Commission will terminate December 31, 1975 and the Arts Council will replace it beginning January 1, 1976.

Authority

Government Code, Sections 8750 through 8758.

MOTION PICTURE DEVELOPMENT COUNCIL

Program Objectives and Description

The objective of the Council is to prepare and implement a program to promote the production of motion picture films within the State of California. The Council will:

1. Prepare and distribute appropriate promotional materials pointing out desirable locations within the State for the production of motion pictures.
2. Assist film companies in securing location permits and other appropriate services connected with motion picture production.
3. Facilitate cooperation from local government, state and Federal government agencies and private sector groups in the location and production of motion pictures.

The Council was established in the Governor's Office as of January 1, 1976. Current year funding is being provided by the Governor's Office. It is planned that the Council will be self-supporting by fiscal year 1977-78.

Authority

Government Code, Sections 14998.1 et seq.

CALIFORNIA HORSE RACING BOARD

Program Objectives and Description

The purpose of the board is to regulate pari-mutuel wagering for the protection of the betting public; the promotion of the horse racing and raising industries; and, the maximization of tax revenues for the State of California.

In 1933 the electors of the State of California adopted a constitutional amendment which created the California Horse Racing Board. It provided for the regulation and the safeguarding of existing racing and wagering so as to assure the State of California an income from racing and to guarantee to the public an honest and correct return on monies wagered.

The measure, in order to get the support of the people, wrote many safeguards into the law and gave complete jurisdiction and supervision over all racing activities to the State of California acting through the California Horse Racing Board, a three-member commission appointed by the Governor. Whereas previously racetracks had acted autonomously and the stewards had complete and final authority over all meetings, the California law transferred this authority to the commission. The law also gave the board wide discretion in rulemaking powers and pursuant to these powers the board passed rules establishing the authority of the stewards but making the stewards strictly and completely responsible to the board for all their actions.

The California Horse Racing Board supervises all race meetings in the state where pari-mutuel wagering is conducted. Principal activities of the board are directed toward:

- Protection of the betting public.
- Licensing of racing associations.
- Sanctioning of every person who participates in any phase of horseracing.
- Designating racing days and charity days.
- Acting as a quasi-judicial body in matters pertaining to horseracing meets.
- Collecting the state's lawful share of revenue derived from horseracing meets.
- Enforcing laws, rules and regulations pertaining to horseracing in California.

The state's revenue from horseracing is principally derived from fees based upon a percentage of the pari-mutuel wagering pools, breakage and unclaimed tickets. Additional revenue is derived from licenses issued to horse owners, trainers, jockeys, grooms and others, and from fines and miscellaneous sources. The present tax rates range from 5.50 to 7.45 percent on the total amount wagered at the race tracks.

Estimated revenues for the 1976-77 fiscal year will amount to \$103,287,000 of which approximately \$8,946,000 is appropriated for the Fair and Exposition Fund and the remaining balance of \$93,590,000 is transferred to the General Fund.

Authority

Licensing.....	9.3	9.2	9.2	129,150	131,767	134,222
Enforcement.....	10.5	11	11	263,723	293,092	296,044
Administration (undistributed).....	7.3	8	8	174,498	219,166	220,966

Output

Primarily, the workload of the board is determined by the number of racetracks operating and the number of racing days allocated. This is directly related to the Horse Racing Law, Chapter 4, Division 8, Business and Professions Code. The projected workload is shown in the following tables:

	73-74	74-75	75-76	76-77
Number of nights.....	411	410	416	420
Number of days.....	490	491	494	495
Totals.....	901	901	910	915
Number of occupational licenses issued.....	17,397	17,834	18,300	18,800
Collection of fees.....	\$314,480	\$402,000	\$450,000 *	\$461,000
Disciplinary hearings:				
Ejected patron cases.....	57	66	73	80
Licensee penalty cases.....	66	67	70	73
Totals.....	123	133	143	153

* Due to the increase in license fees that commenced on January 1, 1975, an additional \$40,000 will accrue during the period from July 1, 1975 through December 31, 1975.

a. LICENSING

It is essential, in order to protect both the public and the industry, that the board be aware of every individual participating in horseracing. The licensing of each participant establishes such a control.

Input	1974-75	1975-76	1976-77
Expenditures.....	\$129,150	\$131,767	\$134,222
Personnel man-years.....	9.3	9.2	9.2

b. ENFORCEMENT

Strict compliance with the detailed rules is required in order to establish a preventive control and a protection to the betting public and the state's interest.

Racetrack investigators, who represent the California Horse Racing Board, inspect racing operations for compliance with the rules and regulations of the board, seek the ejection of undesirables from racing enclosures, and keep the board informed of all racing matters.

Input	1974-75	1975-76	1976-77
Expenditures.....	\$263,723	\$293,092	\$296,044
Personnel man-years.....	10.5	11	11

CALIFORNIA HORSE RACING BOARD—Continued

c. ADMINISTRATION

Administration includes the California Horse Racing Board, which consists of three members appointed by the Governor for four-year terms, and the administrative staff which is responsible to the board for budgeting and accounting, supervising the licensing and enforcement activities of the board, and administering the increasing number of appeals.

Input	1974-75	1975-76	1976-77
Expenditures	\$174,498	\$219,166	\$220,966
Personnel man-years	7.3	8	8

BOARD OF OSTEOPATHIC EXAMINERS

The public needs the assurance that health professionals are adequately trained and have demonstrated their competence. The Board of Osteopathic Examiners sets and enforces standards for licensure for Osteopathic Physicians and Surgeons, conducts examinations and investigations, and initiates disciplinary proceedings in the event violations of the Osteopathic Initiative Act are confirmed.

The board was established by the initiative process and was organized as part of the Department of Consumer Affairs by their own request. Effective December 15, 1975, the board has withdrawn from the Agriculture and Services Agency and the department. Commencing with the 1976-77 Governor's Budget, the board will be displayed independently in the General Government section.

Output

Activity in all components has increased significantly since licensure was ordered by the State Supreme Court in 1974. All applications processed and examinations given to date involved persons seeking reciprocity licensure.

BOARD OF PILOT COMMISSIONERS FOR THE BAYS OF SAN FRANCISCO, SAN PABLO, AND SUISUN

This board licenses persons qualified to pilot vessels on San Francisco, San Pablo, and Suisun Bay, and implements rates for their services based upon recommendations of the Pilotage Rate Committee. The Pilotage Rate Committee's function is to conduct public hearings upon the petition of any party directly affected by pilotage rates and upon conclusion of such public hearings to furnish the Legislature copies of their findings and recommendations for final determination by the Legislature.

HEALTH BENEFITS FOR ANNUITANTS

The purpose of this program is to provide health protection for retired employees.

This program began January 1, 1962 with the enabling legislation providing an employer contribution of \$5.00 per month toward the cost of the basic health plan. Since that date, major medical plans, Medicare, and plans supplementing Medicare have been developed.

PROGRAM REQUIREMENTS

	1974-75	1975-76	1976-77
Health protection for annuitants	\$7,976,601	\$9,487,843	\$10,306,388

SIGNIFICANT PROGRAM CHANGES

Chapter 38, Statutes of 1975 (S.B. 85), increased for state employees and annuitants, the employer's share of premiums to \$19.00 per month for a single enrollee, \$36.00 per month for self and one family member and \$46.00 per month for self and two or more family members. Chapter 175, Statutes of 1975 (S.B. 877), increased the state contribution by \$1.00 for each enrollment and increased the percentage recommended for the employer's contribution for single enrollments from 80% to 85% of average premium.

Output

The cost for annuitants' benefits is based on the following average number of annuitants covered from each retirement system:

Retirement System	Number of annuitants			Cost by system		
	74-75	75-76	76-77	1974-75	1975-76	1976-77

OFFICE OF EMERGENCY SERVICES—NATURAL DISASTER ASSISTANCE

Program Objectives and Description

The objectives of the program are to provide aid to local agencies for repair and restoration of public real property in stricken areas in time of disaster and to provide assurance that public roadways will be maintained or restored in the event that damage occurs from natural disasters.

Chapter 290, Statutes of 1974, the Natural Disaster Assistance Act, placed the administration of the act with the Director of the Office of Emergency Services and created the Natural Disaster Assistance Fund, to be the single fund from which moneys will be appropriated to local agencies for repair of damage caused by natural disasters.

Authority

Item 446.7, Budget Act of 1958; Chapter 20, Statutes of 1965; Chapter 27, Statutes of 1965 as amended by Chapter 131, Statutes of 1966 and Chapter 8, Statutes of 1967; Chapter 52, Statutes of 1969; Chapter 10, Statutes of 1970; Chapter 8, Statutes of 1971; Chapter 1284, Statutes of 1972; Chapter 624, Statutes of 1973; and Chapter 290, Statutes of 1974.

Program Requirements

	1974-75	1975-76	1976-77
Totals, Natural Disaster Assistance	-\$67,373	\$2,100,000	\$2,100,000

REFUNDS OF TAXES, LICENSES, AND OTHER FEES

This program exists for the purpose of refunding the licenses, taxes and other fees erroneously collected and paid into the General Fund for which no other specific provision of the law exists. Funds are also available for payment of prior judgments, liens or encumbrances as provided in Government Code Section 12516, and to cover refunds of taxes in special situations confronting the Franchise Tax Board in which a court of record orders the refund of taxes collected, withheld or transmitted from persons subject to trial and for which no other provision for refund is made by law.

Funds are appropriated each year to provide for expeditious refunds of noncontroversial amounts paid and deposited in the General Fund. This avoids the necessity of filing claims with the Board of Control and inserting items in a claims bill.

Authority

Section 12516, Government Code.

REQUIREMENTS OF THE GOVERNOR-ELECT AND OUTGOING GOVERNOR

This program was proposed to provide \$150,000 to assist the Governor-elect in his duties described under the provisions of Government Code Section 12015. The new Governor is required under law to present his budget to the Legislature by January 10, following his inauguration. He has approximately two months after his election to formulate his policies and to incorporate them into the various programs included in the budget. Chapter 1241, Statutes of 1974 provided up to \$25,000 additional funds to the Governor-elect to appoint office staff to assist in carrying out his duties and \$25,000 to the outgoing Governor after conclusion of his term for office staff to assist in concluding matters arising out of his official duties.

CALIFORNIA INFORMATION SYSTEMS IMPLEMENTATION COMMITTEE

The state has established policies regarding electronic data-processing which to be effective must be expeditiously implemented.

The committee's objective is the formulation of recommendations regarding appropriate legislative and executive actions in order to expeditiously implement the state's electronic data-processing policies.

PROGRAM REQUIREMENTS

	1974-75	1975-76	1976-77
Committee Program	\$28,610	\$33,102	\$33,870
Personnel man-years	1	1	1

Program Objectives and Description

The committee consists of the Secretary of Business and Transportation, Secretary of Health and Welfare, Chairman and Vice Chairman of Assembly Committee on Ways and Means, and Chairman and Vice Chairman of Senate Committee on Finance, Director of Finance, Director of General Services, Chairman and Vice Chairman of the Joint Legislative Budget Committee, and Chairman and Vice Chairman of the Assembly Committee on Efficiency and Cost Control.

In its role as a focal point, the committee reviews electronic data-processing policies set forth in Article 1 of Chapter 7 and Chapter 8 of the Government Code and makes recommendations for appropriate change.

The committee develops procedures for the implementation of policies for protecting the privacy and confidentiality of records and the rights and privacy of the individual as established by law.

The committee reports to the Legislature and Governor each year the recommendations made and procedures adopted for implementing the conclusions derived by the committee.

Authority

Sections 11755 through 11758 of the Government Code.

WORKING CAPITAL ADVANCES

STATE CLEAN WATER GRANTS ADMINISTRATION REVOLVING FUND

Chapter 804, Statutes of 1974, amended the Government Code and Water Code to establish the State Clean Water Grants Administration Revolving Fund and authorized a \$1,500,000 loan to the revolving fund from the General Fund.

This fund was established to enable the State Water Resources Control Board to speed up its review of grants for the construction of municipal sewage treatment and water reclamation facilities. The acceleration of the Wastewater Facilities Construction Grant program by avoiding a high inflation rate is estimated to save \$22 million in construction costs in 1975-76, \$68 million in 1976-77, and \$114 million in 1977-78 by getting more facilities constructed sooner. The \$1,500,000 transferred from the General Fund is to be repaid to the General Fund from the grant processing fee established by this act and upon such terms and conditions as prescribed by the Department of Finance.

Revenue from grant processing fees is anticipated to be sufficient in the 1975-76 fiscal year to offset the State Water Resources Control Board costs in administering the clean water grants program. Consequently, the balance of the General Fund loan authorization (\$1,280,000) will not be required if the anticipated fee revenues are realized. During the 1976-77 fiscal year fee revenues should be sufficient to repay the \$220,000 loaned from the General Fund.

COUNTY FORMATION REVOLVING FUND

Chapter 1247, Statutes of 1975, established the County Formation Revolving Fund and transferred to the revolving fund \$100,000 from the General Fund.

The fund authorizes the State Controller to make loans to a County Formation Review Commission. Previous legislation established a uniform procedure for the formation, consolidation and boundary alteration for counties. This fund is established to permit the Commission to borrow money from the State Controller to meet its expenses.

Repayment with interest is due the fund within one year of the date on which the issues of county formation is voted on by the people.

TAX RELIEF

A significant portion of the state's annual budgeted expenditures are allocated for tax relief. Tax relief programs were initiated in the late 1960's as a response to the growing concern with the burden of taxes on certain groups of taxpayers. In an effort to mitigate the impact of property taxes, homeowners were given a partial exemption against the value of their residences. In response to assertions that the property tax on inventories was stifling economic activity, businesses were given a partial exemption for business inventories. The state provided subventions in the amount of actual property tax revenue loss to reimburse cities, counties, school districts, and other local taxing jurisdictions. In 1967 the Senior Citizens' Property Tax Assistance Program was established to provide direct assistance to low income elderly homeowners; payment relief is based on the income and property tax of a claimant. In 1972 the state began to partially reimburse cities, counties, and school districts for revenue losses due to Williamson Act contract assessed value reductions.

Chapter 1406, Statutes of 1972 (SB 90) provided substantial increases in the two major existing subvention programs, Homeowners' Property Tax Relief and Personal Property Tax Relief, and added: (1) the Renters' Tax Relief Program, that provided an income tax credit or refund to qualified renters based on income; and, (2) reimbursements to local jurisdictions for any future sales or property tax exemptions.

Today the state is the major property taxpayer in California. Payments for the Homeowners' Tax Relief Program and Personal Property Tax Relief total approximately 12% of local property tax revenue in 1975-76.

SUMMARY OF PROGRAM REQUIREMENTS

	1974-75	1975-76	1976-77
I. Senior Citizens' Property Tax Assistance.....	\$50,035,313	\$51,400,000	\$51,200,000
II. Personal Property Tax Relief.....	295,799,217	362,750,000	412,000,000
III. Homeowners' Property Tax Relief.....	700,881,038	755,400,000	798,000,000
IV. Subventions for Open Space	14,356,451	15,500,000	17,000,000
V. Payments to Local Government for Sales and Property Tax Revenue Loss	2,673,154	4,840,000	5,207,000
VI. Renters' Tax Relief.....	110,248,379	125,000,000	135,000,000
TOTALS, PROGRAMS (General Fund).....	\$1,173,993,552	\$1,314,890,000	\$1,418,407,000

I. SENIOR CITIZENS' PROPERTY TAX ASSISTANCE

The state, as a means of reducing the burden of the property tax for low-income senior citizens, provides financial assistance through a system of direct reimbursements for portions of property taxes paid. California residents who are 62 and over, have total household income of \$10,000 or less, and who own and occupy their homes, are reimbursed from 4 to 96 percent of the amount of property taxes paid on the first \$7,500 of assessed value. The percentage assistance is in inverse ratio to household income. The Franchise Tax Board administers the program.

The past, current, and budget year program costs include the effect of Chapter 1267, Statutes of 1973, which extended property tax assistance benefits to senior citizens who are public assistance recipients. The 1975 legislation that will be applicable to 1976-77 assistance includes: (1) Chapter 101, Statutes of 1975, which redefines the term "household" for purposes of calculating assistance; and (2) Chapter 989, Statutes of 1975, which changes the gross income limitation to \$20,000 and allows a deduction from gross receipts of all cash expenses which are necessary to produce income. The legislation will not have a measurable effect on costs but will improve administration of the program.

Estimates for 1976-77 are lower than 1975-76; over time, the cost in this program should remain fairly stable because as household income increases claimants are either pushed into lower assistance levels or out of the program altogether.

Program Requirements	1974-75	1975-76	1976-77
Continuing program costs.....	\$50,035,313	\$51,400,000	\$51,200,000

II. PERSONAL PROPERTY TAX RELIEF

The state provides reimbursement to local governments for the property tax revenues lost as a result of the partial exemption of business inventories and livestock as well as special reimbursements for motion picture films and wine and brandy. Chapter 1406, Statutes of 1972, increased the exemption from 30 percent to 45 percent in 1973-74 and up to 50 percent in 1974-75 and thereafter.

Business inventory assessed value grew at 19.1 percent in 1975-76. Legislation, which included Chapter 277, Statutes of 1975, increased costs of the program through school tax rate increases of approximately \$2.4 million. In addition, the tax rate experienced an unanticipated growth above that amount accounted for by legislation and normal growth. Claims for livestock and motion picture film exemptions were approximately \$700,000 above anticipated levels.

The 1976-77 estimate is based on inventory growth of approximately 12 percent, which will be in line with economic trends of moderated price increases and inventory accumulation. The projection includes approximately \$8.5 million for legislation, the bulk of which is represented by Chapter 277, Statutes of 1975. Also included is \$7 million to reflect the second year impact of Chapter 1441, Statutes of 1974, which extended the inventory exemption to inventories assessed as escaped property. Other major legislation of the 1975 session included Chapter 748 and Chapter 1126. Both measures could cause program savings, however, it is not anticipated that such savings will occur in 1976-77.

Program Requirements	1974-75	1975-76	1976-77
Continuing program costs.....	\$295,799,217	\$362,750,000	\$412,000,000

III. HOMEOWNERS' PROPERTY TAX RELIEF

In order to reduce the property tax burden, homeowners are not required to pay property taxes on the first \$7,000 market value of their principal place of residence if they occupy it on the property tax lien date of March 1. The Homeowners' Property Tax Relief Program provides reimbursements to local government for the reduced property tax revenues.

The expenditure figures include the impact of Chapter 60, Statutes of 1974, which provides that late claimants may receive 80 percent of the value of the homeowners exemption for filing late in 1973-74 and thereafter. Chapter 60 also provided that for 1975-76 and subsequent years, claimants who received the exemption in the prior year will automatically receive the exemption in the current year unless they notify the assessor that they are no longer eligible.

For the current year, a \$39.4 million deficiency appropriation will be needed to fully fund the program. The deficiency is a result of: (1) legislation, most notably Chapter 277, Statutes of 1975 which reduced the roll-back in school tax rates; (2) a substantial increase in claimants above the total anticipated; (3) tax rate increase above the anticipated level; and (4) unanticipated adjustments made for prior year claims. The unexpected increase in claimants in 1975-76 could at least partially be the effect of the elimination of annual filing as provided in Chapter 60, Statutes of 1974. Study is being given to existing state and local safeguards against erroneous receipt of the exemption, and whether some of the unanticipated 1975-76 claims could be the result of such an erroneous receipt.

Estimates for 1976-77 take into account approximately \$8.5 million in legislation that will reduce the roll-back in school district tax rates. Estimates of claimants anticipate an increased participation rate over the prior year.

Program Requirements	1974-75	1975-76	1976-77
Continuing program costs.....	\$700,881,038	\$755,400,000	\$798,000,000

TAX RELIEF—Continued

IV. SUBVENTIONS FOR OPEN SPACE

Article XXVIII of the California Constitution permits land under enforceable restrictions for open space uses to be assessed at other than market value based on its restricted use. The state provides financial assistance to cities, counties, and school districts to partially defray the loss of property tax revenues. The program is administered by the Department of Conservation.

Payments to cities and counties are based on the lesser of dollar amount per acre (dependent on soil type and location, whether urban prime, other prime, or nonprime) and a computed revenue difference method. Payments for school districts are based on a revenue loss formula calculation, subject to the additional criteria that a school district's tax rate must exceed a statutory rate to qualify for assistance. Over time, as school district tax rates are rolled back, fewer districts will qualify for subventions. For 1975-76, payments to school districts are estimated at approximately \$4 million.

During the past year, open space subventions have received considerable legislative scrutiny. Consideration has been given to the assertion that Williamson Act contracts are ineffective for preserving open space lands which are severely threatened with development pressures because in those areas the economic incentive to allow development would be greater than the incentive of a reduction in property tax. Further consideration should be given to program changes that would deal more effectively with the problem of preserving our more productive lands.

Program Requirements	1974-75	1975-76	1976-77
Continuing program costs	\$14,356,451	\$15,500,000	\$17,000,000

V. PAYMENTS TO LOCAL GOVERNMENT FOR SALES AND PROPERTY TAX REVENUE LOSS

Chapter 1406, Statutes of 1972, as amended by Chapter 358, Statutes of 1973, provided for state reimbursement of local property and/or sales and use tax revenue losses resulting from statutes enacted after January 1, 1973. This represented an attempt to eliminate the future erosion of the local government tax base in light of the property tax rate limitations imposed on local government in those statutes.

Expenditures for 1976-77 result from the enactment of the following statutes:

(1) Chapter 16, Statutes of 1973 (Blind veterans)	\$50,000
(2) Chapter 1165, Statutes of 1973 (Wildlife habitat contracts)	78,000
(3) Chapter 1169, Statutes of 1973 (Aircraft assessment)	3,000,000
(4) Chapter 456, Statutes of 1974 (Business records)	16,000
(5) Chapter 1010, Statutes of 1974 (Camp trailers)	33,000
(6) Chapter 1405, Statutes of 1974 (Cargo containers)	1,700,000
(7) Chapter 1467, Statutes of 1974 (Documented vessels)	230,000
(8) Chapter 662, Statutes of 1975 (Disabled veterans: late filing)	100,000
Total Expenditures	\$5,207,000

Program Requirements	1974-75	1975-76	1976-77
Continuing program costs	\$2,673,154	\$4,840,000	\$5,207,000

VI. RENTERS' TAX RELIEF

Chapter 1406, Statutes of 1972, established a new state program to provide tax relief to qualified renters. For taxable years beginning January 1, 1973, renters receive an income tax credit of from \$25 to \$45 depending on their adjusted gross income with the maximum relief at incomes of \$8,000 or more. If the amount of the credit exceeds the total income tax liability a refund of the balance is made directly to the taxpayer. The Franchise Tax Board administers the program.

During 1974-75 this program provided average payments of about \$38.50 to almost 2.9 million renters. There is a proposed deficiency appropriation of \$5 million to fund additional claims expected during 1975-76.

Program Requirements	1974-75	1975-76	1976-77
Continuing program costs	\$110,248,379	\$125,000,000	\$135,000,000

Future Bond Acts Subject to Elector-					
ate Approval:					
Community College Construction					
Bond Act of 1976 ^a	150,000,000	-	-	-	50,000,000
California Safe Drinking Water					
Bond Law of 1976 ^a	175,000,000	-	-	-	25,000,000

In addition to the above issues, there are other State of California general obligation bonds. The State School Building Aid Program appears functionally under the education section of the budget. The California Water Resources Development Bond Fund Program, the San Francisco Harbor Improvement Bond Financial Program, the Small Craft Harbor Improvement Bond Financial Program, the Veterans Farm and Home Building Fund of 1943 Program, and the Housing Finance Bond Law of 1975^b are public service enterprises which have their own revenues to finance their respective debt service expenditures.

^a No expenditures are to be made unless electorate approval is obtained June 8, 1976.

^b Subject to electorate approval November 2, 1976.

Ending accrual, interest expense, June 30	22,319,263	22,360,656	21,863,861
Ending accrual, interest expense, (new bond acts), June 30	—	—	875,000
TOTALS, EXPENDITURES (Accrual Basis)	\$127,596,428	\$151,746,983	\$166,971,463

^a No expenditures are to be made unless electorate approval is obtained June 8, 1976.

PAYMENT OF INTEREST ON GENERAL FUND LOANS

Due to monthly fluctuations in receipts and disbursements, temporary loans are occasionally required to provide cash in the General Fund when disbursements exceed collected revenues and any cash balance from the previous month. Such loans are made under the provisions of Government Code Section 16310.

The General Fund's need for temporary loans is also increased by the temporary loans which it must make to other funds, mainly under the provisions of Government Code Section 16351. The 1974-75 fiscal year ended with \$34.7 million loaned to the Social Welfare Federal Fund (for the Federal Government's share of the advance to counties for the Assistance to Families with Dependent Children Program) and \$98 million loaned to the Health Care Deposit Fund (for amounts owed by the Federal Government and counties for the Medi-Cal Program). The \$34.7 million was repaid in early July and the \$98 million was repaid in full by the end of December, 1975. During the 1975-76 fiscal year, a total of \$134 million has been authorized as a loan to the Health Care Deposit Fund to be withdrawn as needed. The 1975-76 fiscal year will end with estimated loans outstanding of \$37 million to the Social Welfare Federal Fund and \$100 million to the Health Care Deposit Fund. Similarly, the 1976-77 fiscal year will end with estimated loans outstanding of \$41.5 million to the Social Welfare Federal Fund and \$100 million to the Health Care Deposit Fund.

It is anticipated that temporary loans from special funds will be required in April of 1976 and several months in 1976-77. Small amounts of interest costs are estimated to be required for 1975-76 and 1976-77 after taking into consideration the other borrowable resources for which the General Fund does not have to pay interest. However, because of the uncertainties of many variables that affect the need and cost of any temporary loans and the relatively small amount of any interest cost, amounts for interest cost are not included in the budget for 1975-76 and 1976-77. The need for, and cost of, any temporary loans will be included in the May Revision Report to the Legislature based on later reassessments of the variables, such as revenue conditions and expenditure needs.

Included in this presentation are statements of cash flow and statement of accounts payable and receivable for the past year, the current year, and the budget year, as required by Government Code Sections 12020 and 12021. Neither the cash receipts nor cash disbursements agree with the revenues and expenditures presented elsewhere in the budget because for cash flow purposes, it is necessary to adjust the budget data for cash collected by the agency but not yet received by the State Controller and for the net accrued revenues and expenditures included in the budget. For the 1974-75 and the first five months of the 1975-76 fiscal years, actual data have been obtained from the monthly cash condition reports compiled by the State Controller's office. The receipts and disbursements for the last seven months of 1975-76 and the 1976-77 fiscal year are estimated by projecting monthly receipt and disbursement patterns adjusted to reflect the various changes in statutes and administrative actions not included in these monthly patterns. The 1976-77 fiscal year estimated cash flow takes into consideration only the revenue and expenditures proposed in this budget. Any changes made subsequent to the budget as presented or statutes enacted which change revenues or expenditures will have an effect on the estimated cash flow and any interest cost.

The borrowing capacity from special funds included in the cash flow statements has been estimated as of the end of each month. The normal cash flow for the funds available for borrowing has been considered but still remain subject to large fluctuations.

PAYMENT OF INTEREST ON GENERAL FUND LOANS—Continued

FEDERAL REVENUE SHARING

The State and Local Fiscal Assistance Act of 1972 (general revenue sharing) was enacted on October 20, 1972, with an appropriation of approximately \$30.2 billion for distribution to state and local governments over the five-year period January 1, 1972, to December 31, 1976. The act was designed to give financial aid to state and local governments which were finding it increasingly difficult to pay for services they provided.

The allocation of general revenue sharing among the recipient governments for each entitlement period is made according to statutory formulas using data such as population, general tax effort, and income tax collections. It is anticipated that California state government will have received approximately \$1.06 billion through January 1977. Local governments in California will have received directly from the federal government, during the same period, approximately twice the amount the state will have received.

Federal revenue sharing receipts and interest earned thereon are required by the federal statute to be deposited in a trust fund and expended in accordance with state laws. These funds are reserved until appropriated by the Legislature. \$215,000,000 is proposed for expenditure in 1976-77 for apportionments for public schools.

Extension of the Revenue Sharing Program beyond its January 1977 expiration is being considered by Congress. Budget estimates for 1976-77 are based only on the current program. Three payments will be received in 1976-77, the last quarterly payment of Entitlement Period 6 and the two payments of Entitlement Period 7.

AUGMENTATION FOR EMPLOYEE COMPENSATION

Program Objectives and Description:

Within existing appropriations, the objectives of the augmentations for salary increase and employee benefits are to:

- (a) Recognize the severe impact of inflation on wage earners, especially those in lower-paid classifications by providing equal, flat-dollar pay increases and benefit adjustments.
- (b) Provide special salary adjustments for groups of employees where inequities have been identified based on such factors as comparisons of state benchmark salaries with salary surveys, recruitment and retention problems, and consideration of general economic trends.

SIGNIFICANT PROGRAM CHANGES

I. Salary Increase	\$169,643,000
II. Employee Benefits and Special Adjustments	34,729,000
	<u>\$204,372,000</u>

^a Nongovernmental cost revenues and expenditures are excluded from budget totals.

I. Salary Increase

In 1974-75, funds were released from available 1973-74 salary increase money to provide a special increase for every state employee in an amount equal to that which would have been received from July 1, 1973 through April 30, 1974 had it not been for the Cost of Living Council. These expenditures are shown as "Completion of 1973-74 Salary Increase Program". In addition, the 1974-75 budget provided an overall 2.7 percent salary increase.

The Budget Act of 1975 included appropriations to provide an overall average increase of 7.5 percent. The act specified that part of the average increase was to be a one-time bonus of \$400 to full-time employees in classes whose maximum salary level was at or below \$753 per month after the percentage salary increases adopted by the salary-setting authorities.

Salary Increase 1976-77

Funds are budgeted for 1976-77 in an amount equivalent to provide an increase of \$65 per month for all state employees including civil service and related classifications, faculty and nonfaculty positions at the University of California and the California State Universities and Colleges, California judges and jurists, faculty and non-faculty positions at Hastings College of the Law and statutory and exempt officers and employees.

Additionally, \$34.7 million (\$22.0 million from general funds, \$4.8 million from special funds and \$7.9 million from other funds) is budgeted to provide benefits related to Total Equivalent Compensation for all employees and to provide special adjustment funds for identified inequities.

In consideration of the policy underlying special legislation enacted in 1974 for highway patrolmen, \$10.6 million in special and other funds is budgeted to provide a monthly salary increase of \$125.

AUGMENTATION FOR EMPLOYEE COMPENSATION—Continued

A. Civil Service and Related Classifications

Funds were included in the 1974 Budget Act to provide an overall average increase of 5.3 percent. The Budget Act of 1975 provided an overall average increase of 7.5 percent, which included the \$400 bonus to the lower-paid employees.

For 1976-77, funds are budgeted in an amount equivalent to provide an increase of \$65 per month for all employees except the highway patrolmen series in the Highway Patrol which will receive \$125 a month in consideration of special legislation concerning their salaries.

Input	1974-75	1975-76	1976-77
Expenditures:			
Civil Service and related	—	\$31,614,204	\$105,916,000
Highway Patrolmen	—	— ¹	10,542,000
Total Expenditures	—	\$31,614,204	\$116,458,000
Allocations	\$58,342,895	90,100,796	—
Completion of 1973-74 Salary Increase Program	46,742,031	—	—
TOTALS	\$105,084,926	\$121,715,000	\$116,458,000

B. University of California

The Budget Act of 1974 included funds to provide an average salary increase of 5.45 percent for faculty and faculty-related classifications and 5.3 percent for nonfaculty classifications. The Budget Act of 1975 provided an overall average increase of 7.5 percent, which included the \$400 bonus to the lower-paid employees.

For 1976-77, funds are budgeted in an amount equivalent to provide an increase of \$65 per month.

Input	1974-75	1975-76	1976-77
Expenditures and Allocations:			
Faculty and Faculty-Related	\$12,711,000	\$18,597,000	\$10,854,000

Completion of 1973-74 Salary Increase Program	8,052,200	—	—
TOTALS	\$32,191,200	\$35,079,000	\$25,243,000

C. The California State University and Colleges

General Description

The Budget Act of 1974 provided an overall average increase of 5.45 percent for instructional and instructional-related classifications, and 5.3 percent for nonfaculty classifications. The Budget Act of 1975 provided an overall average increase of 7.5 percent, which included the \$400 bonus to the lower-paid employees.

For 1976-77, funds are budgeted in an amount equivalent to provide an increase of \$65 per month.

Input	1974-75	1975-76	1976-77
Expenditures and Allocations:			
Instructional and Instructional Related	\$14,815,457	\$21,936,000	\$14,537,000
Noninstructional	7,482,000	10,989,000	12,865,000
Completion of 1973-74 Salary Increase Program	5,894,324	—	—
TOTALS	\$28,191,781	\$32,925,000	\$27,402,000

D. Judicial

General Description

Government Code Section 68203 provides that the salaries of judges and justices be adjusted on September 1 of each year by the percentage change in the California Consumer Price Index for the previous calendar year. However, this budget is based on repealing that section of the code and providing a \$65 a month increase which is the same increase all State employees will receive except for the highway patrolmen.

	1974-75	1975-76	1976-77
California CPI percent change	4.0862%	12.3420%	—%

Input

Expenditures and allocations:			
Statutory	\$1,205,722	\$2,473,000	\$540,000

Under Government Code Section 18004, salary adjustment for employees of the courts are approved by the Chairman of the Judicial Council. Salary adjustments for these employees are generally consistent with adjustments granted to civil service employees, and are budgeted with civil service increases in an amount equivalent to provide an increase of \$65 per month.

E. Hastings College of the Law

The Budget Act of 1974 included funds to provide an average salary increase of 5.45 percent for faculty and faculty-related classifications and 5.3 percent for nonfaculty classifications. The Budget Act of 1975 provided an overall average increase of 7.5 percent, which included the \$400 bonus to the lower-paid employees.

For 1976-77, funds are budgeted in an amount equivalent to provide an increase of \$65 per month.

Salary increase funds for Hastings are budgeted with civil service increases. They are shown here separately only for information.

Input	1974-75	1975-76	1976-77
Expenditures and Allocations:

¹ Highway Patrolmen included in Civil Service and related.

AUGMENTATION FOR EMPLOYEE COMPENSATION—Continued

II. EMPLOYEE BENEFITS AND SPECIAL ADJUSTMENTS

The Budget Act of 1974 contained the first funds to implement a Total Equivalent Compensation (TEC) approach toward adjusting salaries and benefits for state employees. \$58.4 million was provided in that year. In 1975-76, this program was continued and increased to a total of \$91.8 million. Each department and state agencies' budget contains funds for the existing TEC program.

An additional \$34.7 million is provided in the 1976-77 Governor's Budget for employees' benefits and special salary adjustments. These funds will be allocated to the departments and agencies including the University of California and the California State University and Colleges during the 1976-77 fiscal year.

III. DEPOOL PUBLIC EMPLOYEES' RETIREMENT FUND

The enactment of Chapter 1399 of the Statutes of 1974 required that the pooled assets and liabilities of the miscellaneous members of the Public Employees' Retirement System be separated or "depooled" within the PERS system. This was due to the passage of Chapter 374, Statutes of 1974, known as the Berryhill Bill which implemented the Total Equivalent Compensation (TEC) program. This legislation provided separate benefits and contribution rates for state miscellaneous members and consequently necessitated depooling of assets and liabilities from other members. The budget for 1975-76 provided \$6,000,000 in General Fund and \$4,000,000 Special Funds to cover the costs of depooling.

IV. FAIR LABOR STANDARDS ACT

In 1974-75, the Legislature appropriated \$6,000,000 to fund increased costs due to 1974 amendments to the Federal Fair Labor Standards Act. Additional funds were not included in the final budget act of 1975-76 fiscal year and are not included for the 1976-77 fiscal year as the amendments to the Fair Labor Standards Act are being challenged in court. When a decision is rendered by the courts, appropriate action will be taken.

AUGMENTATION FOR EMPLOYEE COMPENSATION—Continued

RESERVE FOR CONTINGENCIES

Funds are required by various state agencies for unforeseen contingencies for which no appropriation or an insufficient appropriation has been made. Amounts as required are allocated to the various agencies by the Department of Finance based upon the determination of need. Loans are authorized to meet the needs of programs which would be curtailed due to delayed receipt of reimbursement or revenues and result in no cost to the General Fund.

PROGRAM REQUIREMENTS

	1974-75	1975-76	1976-77
Unallocated balance (<i>General Fund</i>)	—	\$1,041,590	\$1,500,000
In the 1974-75 fiscal year, a deficiency appropriation was approved in the amount of \$14,700,000. All but \$1,087,633 of this was required to finance the required allocations. A deficiency appropriation of \$17,800,000 will be submitted to finance required allocations in the 1975-76 fiscal year. This will leave \$1,041,590 in the 1975-76 fiscal year to meet unforeseen contingencies. This amount is reported as an expenditure in the 1975-76 fiscal year. It is proposed that \$1,500,000 be appropriated for the 1976-77 fiscal year. The authorization to make temporary loans was continued at \$1,500,000 in the 1975-76 fiscal year. It is proposed that this authorization to make temporary loans be continued at \$1,500,000 for the 1976-77 fiscal year.			
The detail below includes allocations and loans from the Emergency Fund. All of these allocations are shown as available funds in each agency budget. The unallocated balance of the Emergency Fund shows as an expenditure in this section of the budget.

MOVING AND REMODELING EXPENSE

In 1974-75 the Legislature appropriated \$250,000 to be allocated by Executive Order of the Department of Finance for the relocation of the State Treasurer's Office in Sacramento. Of this amount \$70,000 was used for the initial planning phase of the relocation.
Chapter 246, Statutes of 1975 reappropriated the balance of the \$250,000 and appropriated an additional \$1,000,000 to the Department of General Services to complete relocation of the State Treasurer's Office.

AUGMENTATIONS FOR PRICE INCREASES

The Legislature in 1975-76 appropriated \$1,500,000 to be allocated by Executive Order of the Department of Finance to provide for anticipated price increases which were not included in individual department budgets.

In 1976-77, an additional \$21,000,000 is being proposed to be allocated by Executive Order of the Department of Finance to fund anticipated price increases which are not included in individual department budgets, such as OASDI contributions; postage; and state contributions for retirement systems for California Highway Patrol, safety and industrial personnel.

Special funds	45,069	146,450	-
Nongovernmental cost funds ^a	8,818	34,136	-

Program Objectives and Description

Otherwise known as the "omnibus claims bill," this program includes all claims approved by the Board of Control and referred to the Legislature for payment. The program provides an equitable procedure for the payment of the following categories of claims:

(a) For which no appropriation has been made or for which no fund is available but the settlement of which has been provided for by statute or constitutional provision.

(b) For which the appropriation made or fund designated is exhausted.

(c) For which settlement is not otherwise provided for by statute or constitutional provision.

In accordance with the provisions of Chapter 622, Statutes of 1974, (AB 2611) the budget year funding has been eliminated from the schedule of expenditures. The State Board of Control has been directed to submit special appropriation measures on a quarterly basis for all claims which have been approved by the board during each calendar year.

Current year estimated expenditures reflect Chapter 421, Statutes of 1975 and AB 877 ^b appropriation amounts. Two remaining legislative claims bills will be submitted during the current year which are not included herein.

Authority

Government Code Section 905.2.

SHARED REVENUES

The primary objectives of the Shared Revenue program are to maintain the fiscal strength of the various governmental entities throughout the state as well as to prevent an increase in the tax burden of their citizens.

This is accomplished by the apportionment of special moneys collected by the state to local government on the basis of statutory formulas.

PROGRAM REQUIREMENTS

UNALLOCATED CAPITAL OUTLAY

Lump sum appropriations for project planning and increased cost of construction have been provided from which allocations to agencies are made as needed. The expenditures from such allocations, except project planning, are included in the individual agency budgets. That part which has not been allocated but which is estimated to be needed for further allocations is included here as an expenditure.

Funds for project planning are proposed to continue present procedures for securing sound cost estimates for future projects.

Expenditures from available appropriations are estimated for allocation to state agencies upon approval of the State Public Works Board as prescribed by Sections 16409, 16352 (Capital Outlay Fund for Public Higher Education only) and 16354 of the Government Code and for increased cost of construction when the lowest bid on a project is in excess of the available funds for such project. Savings from completed projects are transferred to these funds and are available by law for such allocations.

An appropriation of \$150,000, the same amount as the 1975-76 appropriation, is proposed for project planning and estimating during the 1976-77 fiscal year.

Chapter 246, Statutes of 1975, provides for restoration or rehabilitation of the west wing of the State Capitol and appropriated the \$42,000,000 in the Capital Improvement Fund for transfer to the Contingent Funds of the Senate and Assembly. This transfer is reflected in the 1975-76 fiscal year. Refer to the budget for the Legislature for the expenditure program.

A fund condition statement is included in this portion of the budget for the Community College Construction Program Bond Act of 1976. This bond program is subject to approval of the electorate in June, 1976.

SUMMARY OF PROGRAM REQUIREMENTS

AGRICULTURE AND SERVICES

DEPARTMENT OF FOOD AND AGRICULTURE

The objectives of the Department of Food and Agriculture are:

To promote, protect, and further the economy of the state's agribusiness industry to the fullest extent commensurate with the public welfare.

To assure that producers, handlers, and consumers receive the true weights and measures of commodities and services purchased.

Within the authority delegated, to further and protect actively the health and welfare of the people of the state.

To assume active leadership in meeting current agricultural and environmental problems.

To identify, study, and recommend solutions to the state's agribusiness problems to the end that adequate supplies of food and fiber will be available and the industries involved will be economically sound.

SUMMARY OF PROGRAM REQUIREMENTS

I. AGRICULTURAL PEST AND DISEASE PREVENTION

Program Objectives and Description

Infestations of harmful pests and diseases seriously affect the ability of the agricultural industry to produce adequate supplies of food and fiber of high quality and reasonable cost. Animal diseases which are transmissible to man would endanger the health of the state's populace.

The objective of this program is to protect California agriculture and the citizens of the state against unfavorable economic, social, or environmental impact by preventing the introduction or spread of harmful plant and animal diseases, weeds, insects, and other pests. This is accomplished by:

1. The establishment and enforcement of quarantines to exclude such diseases and pests whenever possible;
2. The detection of diseases and pests now established or about to become established in California and, by identification, analysis, and evaluation after detection, arriving at recommendations for action;
3. The formulation and enactment of plans of action to eradicate or control such diseases and pests.

Activities to quarantine, detect, identify, evaluate, and eradicate or control diseases and pests are carried out by action of the Department of Food and Agriculture, either directly or with the county agricultural commissioners.

a. Exclusion and Detection of Plant Pests and Diseases

Plant pest and disease exclusion and detection encompasses those activities designed to prevent undesirable economic, social, or environmental impact due to entry and establishment of plant "target pests" from outside the borders of California. Also included within this element are those activities intended to detect and evaluate new infestations occurring within the state and to prevent the spread of already established plant pests (insects, diseases, weeds, or vertebrates) by internal quarantine.

The border inspection stations have responsibility of checking all plants and produce, entering the state by car or truck for diseases or pests. No livestock, eggs, or poultry are inspected, but their entrance is reported to the animal health element for control and inspection.

Plants and produce shipped by air, sea, or rail are a state program responsibility but are inspected by county agricultural commissioners or the federal government in accordance with cooperative agreements and state regulations. The commissioners are under the supervision of the Director of Food and Agriculture.

Ultimate responsibility for any plant infestations occurring in California is vested in the Department of Food and Agriculture, except where otherwise provided by state or federal statute. Thus, even though the actual intrastate work in detection is not done by state personnel, the effectiveness of the department's operations must be measured by the performance of the units under its supervision and guidance.

Output

	1974-75	
	Internal	Border
1. Number of border and internal inspections of a plant pest or disease exclusion nature:		
a. Commercial	131,699	407,400
b. Noncommercial	395,097	5,953,490
2. Dollar value of commercial shipments examined for plant pests and diseases:	\$150,000,000	\$325,000,000
3. Number of shipments prevented entry or movement under quarantine action:		
a. Commercial	1,104	214
b. Noncommercial	3,314	33,100
4. Dollar value of commercial shipments prevented entry or movement under quarantine action:	N/A	\$2,025,000

Expenditures.....	129.6	124.4	130.5	\$2,897,916	\$3,007,763	\$3,329,648

b. Control and Eradication of Plant Pests and Diseases

The purpose of this element is to minimize the undesirable economic, social, and environmental impacts on the agricultural industry and the public, from identified infestations of vertebrate or invertebrate plant pests, plant diseases and noxious weeds, predatory animal damage, and to maintain apiary quality.

This element achieves its stated objectives by employing effective control or eradication measures whenever feasible, and by providing training and advisory services to county agricultural commissioners and their staff. Certain projects in the element are financed wholly or in part by industry assessments.

With the successful eradication of the Japanese beetle in San Diego, that eradication program is being terminated June 30, 1976. This will result in a General Fund savings of \$253,185.

General Fund support of predatory animal damage control is being reduced by \$183,075 in 1976-77. The livestock industry will be encouraged to participate in program funding.

Dutch elm disease was officially diagnosed in California for the first time in August of 1975. Chapter 1000/75 declared the disease to be an agricultural pest and appropriated \$950,000 in augmentation of the 1975-76 support budget. In order to provide funding for this program in 1976-77, \$670,000 of this appropriation has been unallotted in 1975-76 and carried forward. This is being augmented by \$770,262 to bring the 1976-77 program total to \$1,440,262. Funding for the program in 1975-76 is being provided through the Department of Food and Agriculture Emergency Fund.

DEPARTMENT OF FOOD AND AGRICULTURE—Continued

d. Nursery Service

Nursery Service initiates and maintains programs to coordinate and supervise the enforcement by county agricultural commissioners of state laws which regulate the growing, handling, and distribution of nursery stock. Persons selling nursery stock are licensed to enable effective enforcement work. The unit provides uniformity in regulatory work and leadership in pest detection programs in nurseries to provide for adequate freedom of movement of nursery stock, to keep the nursery trade from becoming involved in restrictive quarantines, and to assure orderly marketing of nursery stock. Cooperative research is undertaken to solve nursery-related pest problems.

Voluntary registration and certification programs are provided to nurserymen as a means of producing and marketing plants relatively free of virus diseases, disorders, and economic plant pests.

The nursery services are supported by fees collected for licenses and services performed in nursery stock registration and certification.

Output

	1974-75	1975-76	1976-77
1. Value of nursery stock produced in California	\$408,000,000	\$410,000,000	\$410,000,000
2. Value of nursery stock certified	\$25,110,540	\$23,000,000	\$20,000,000
3. Number of nursery inspections and reinspections	15,000	15,000	15,000
4. Number of licenses issued to operate nurseries	7,982	8,200	8,350
5. Number of nurseries authorized to use origin certificates	2,115	2,180	2,210
6. Number of applications entered in voluntary registration and certification programs	278	254	275
7. Number of participants in registration and certification programs	131	119	135
8. Certification activities:			
a. Growing grounds (acres)	1,020	2,044	2,050
b. Trees (number)	3,540	3,603	3,700

Input

Expenditures	14.1	15.6	15.6	\$357,126	\$438,431	\$453,968

e. Seed Potato Certification Service

California's industry-supported seed potato certification program commenced in 1915 when it became evident that potatoes could no longer be produced commercially unless seed, meeting strict standards of pest cleanliness and varietal purity, was available for planting.

The fitness of potatoes to qualify for certification is determined by inspection and testing of plants and tubers for serious pests, grade standards and varietal purity.

Approximately 3,000 acres of seed potatoes are entered for certification annually. This acreage is grown and harvested over a 12-month period throughout the state.

Output

	1974-75	1975-76	1976-77
Value of certified seed produced	\$3,292,000	\$1,910,000	\$2,500,000
Value of seed exported	\$240,000	\$200,000	\$250,000
Estimated savings to potato industry	\$135,000	\$115,000	\$130,000

Input

	74-75	75-76	76-77	1974-75	1975-76	1976-77
Expenditures	3.8	2.5	2.5	\$124,039	\$101,151	\$103,276

f. Animal Health

This element is responsible for the detection, control, and eradication of animal diseases in the State of California. Detection activities include surveillance, examination, testing, and autopsies performed both in the field and in the laboratories.

Disease control is accomplished through vaccinating, testing, and eliminating of infected animals; cleaning and disinfecting premises; and restricting movement by hold orders, quarantines, or movement permits with controlled destination of animals with disease, exposed to disease, or contaminated with deleterious substances.

Eradication efforts are made through nationwide programs to break the cycle of infection by test and removal of infected animals, sterilization of garbage fed to swine, sanitation of hatching eggs, and herd treatment for external parasites. Owners whose animals are removed are in some cases indemnified for removal.

Preventive activities are directed toward protecting against the entry of foreign diseases and diseases already successfully eradicated in California. This is done by destruction of ship and aircraft garbage, inspection of shipments of animals from other states, and by quarantines when applicable.

Output

	1974-75	1975-76	1976-77
1. Number of animals tested:			
a. Livestock	1,291,024	1,400,000	1,400,000

Expenditures	96.3	101.1	101.1	\$2,548,543	\$2,946,237	\$3,051,767

g. Veterinary Laboratory Services

Laboratory assistance is provided by five laboratories strategically located at Petaluma, San Gabriel, Turlock, Fresno, and Sacramento. These laboratories conduct tests, perform autopsies, and provide diagnostic support for State and Federal animal health regulatory veterinarians, veterinary practitioners, poultry men, state meat inspection, milk and dairy food control, and university and extension veterinarians. A fee is charged for all diagnostic work performed by the laboratories.

II. FOOD AND AGRICULTURAL STANDARDS AND INSPECTION SERVICE

Program Objectives and Description

This program is responsible for:

Assurance to consumers that meat, meat food products, milk, milk products, and products resembling milk products are wholesome, properly labeled, and in compliance with adequate standards.

Enforcement of laws relating to pesticide regulatory activities, including pesticide residues and pest control activities, to protect environment, agricultural workers, and the general public from harmful effects of pesticides and other materials used in agricultural production. Regulation of commercial fertilizers to assure uniform product labeling and to assure consumers that products they purchase are as represented by the label. Regulation of commercial feed and livestock remedies to assure consumers that the products they purchase are as represented by the label and can safely be used for production of livestock and poultry when labeled directions are followed. Providing consumer protection by removing from channels of trade food and agricultural products failing to meet minimum quality standards.

Protection of consumers by providing regulatory services assuring accuracy of measure and count of consumer goods, labeling and advertising of petroleum products, training and licensing of weighmasters, and standardizing of weighing and measuring devices.

Authority

a. Meat Inspection

The meat inspection element provides inspection of meat, meat food products, poultry and poultry food products, an important source of the state's total supply of food. This inspection protects the health and welfare of consumers by ensuring only wholesome, clean, and truthfully labeled meats reach the retail market and by preventing the meat from carcasses of 250,000 animals which died on farms, otherwise than by slaughter, from becoming part of their food supply.

The department will be initiating action whereby the responsibility for this program will be turned over to the federal government. The state will continue to inspect meat processed for pet food, an activity which the federal government will not assume, to assure that this meat does not become a part of the human food chain. A total of 302 positions and \$743,296 in state and federal funds are being deleted in 1975-76. In 1976-77 these totals will increase to 354 positions and \$6,667,104 in state and federal funds. The projected date of the federal takeover of the program is April 1, 1976.

Output	1974-75	1975-76	1976-77
1. Meat inspected and passed from slaughter (cattle, sheep, swine and poultry) in lbs.	339,595,300	255,000,000	—
2. Processed meat food products inspected and passed (meat and poultry) in lbs.	1,059,819,648	825,000,000	—
3. Meat condemned and meat food products condemned on reinspection (meat and poultry) in lbs.	5,784,253	4,350,000	—
4. Meat unfit for human consumption inspected for pet food in lbs.	106,499,353	110,000,000	125,000,000
5. Meat unfit for pet food condemned in lbs.	18,294,526	18,300,000	18,500,000
6. Number of plants under inspection (slaughtering and processing)	812	820	—

	\$7,154,755	\$7,570,060	\$2,012,641

DEPARTMENT OF FOOD AND AGRICULTURE—Continued

b. Milk and Dairy Foods Control

The Bureau of Milk and Dairy Foods Control has responsibility for the hygienic quality of milk, milk products, and products resembling milk products. This is accomplished by enforcing the provisions of the Food and Agricultural Code dealing with the standards of composition, purity, and truthful labeling as they apply to the production, processing, and distribution of milk, milk products, and products resembling milk products.

The program also includes the enforcement of laws and regulations that control weighing, sampling and testing of milk where such measurements determine the value of the product, and the inspection and certification of dairies, milk plants, dairy laboratories, and milk-container fabricators for interstate sale and sale to federal installations in California.

The Bureau provides additional inspection on a reimbursable basis for the federal government in its surplus commodities program, as well as inspection and grading of butter, cheese, and dry milk for consumer protection.

The inter and intra-agency relationships include supervision of 28 local Approved Milk Inspection Agencies (AMIS), a program of pesticide control in milk products, and collaboration with state and federal agencies on radiological surveillance, and with the Water Quality Control Board on environmental conditions existing on dairies.

The principal objectives of this program are to insure that the California consumer can purchase and consume milk, milk products, and products resembling milk products from any retail outlet in the state with the assurance that the products they receive will be pure, wholesome, and truthfully labeled, and that tests for basis of payment between milk producers and the buyer are accurate.

Output

	1974-75	1975-76	1976-77
1. Pounds of market milk produced in California per year	10,587,176,000	10,693,000,000	10,800,000,000
2. Number of final packaging units of milk and milk products	1,834,308,000	1,852,650,000	1,871,177,000
3. Final packaging units inspected for purity, quality, and quantity	128,000	129,000	129,500
4. Percentage found in compliance with all standards	85.07	85.1	85.15
5. Number of inspections performed:			
a. Raw milk level	30,638	30,600	30,650
b. Finished product level	52,451	52,500	52,750
6. Number of milk producers	3,426	3,300	3,000
7. Number of processing distributors	723	600	550

Surveys and reinspection of dairies and milk plants under local inspection have been more extensive and time-consuming because of inadequate performance of local agencies. Label approval to meet the mandates of ingredient and nutritional labeling have also increased staff workloads considerably.

Input

	74-75	75-76	76-77	1974-75	1975-76	1976-77
Expenditures	46.3	46.1	46.1	\$1,006,104	\$1,092,812	\$1,155,477

c. Fruit and Vegetable Quality Control

The purpose of this element is to inspect fruits, nuts, vegetables, and honey to assure minimum legal standards of quality, packaging, and labeling. Inspections are performed at production, wholesale, and retail levels by county agricultural personnel who are trained and supervised by state personnel.

In addition, state personnel operate highway inspection stations to monitor commodities and verify validity of certificates.

The element is also responsible for inspecting avocados to ensure avocados offered for sale are certified as meeting minimum standards of quality and maturity, etc. This mandatory inspection and certification is due to the enactment of Chapter 1261, Statutes of 1972. It is supported by a fee charged on each container of avocados.

Output

	1974-75	1975-76	1976-77
1. Containers of fruits, vegetables, nuts, and honey inspected at:			
a. Production, wholesale and retail levels	211,023,664	215,000,000	215,000,000
b. Inspection stations	64,373,852	65,000,000	65,000,000
c. Sub-standard processing control forms issued	5,511	6,000	6,000
2. Containers of fruits, vegetables, nuts, and honey rejected at:			
a. Production, wholesale and retail levels	794,417	800,000	800,000
b. Inspection stations	232,410	235,000	235,000
c. Sub-standard processing control forms received	7,807	8,000	8,000
3. Classroom training of county personnel (man-hours)	3,000	3,000	3,000
4. Total annual value of California fruits and vegetables:	\$2,959,000,000	\$3,100,000,000	\$3,500,000,000

Input

	74-75	75-76	76-77	1974-75	1975-76	1976-77
Expenditures	45.8	46.6	46.6	\$938,960	\$1,053,151	\$1,087,960

d. Quantity and Quality Assurance

The Division of Measurement Standards, in a cooperative program with county sealers of weights and measures, provides regulatory services in the four major areas of responsibility:

1. Quantity declarations of commodities in containers.
2. Quality, labeling and advertising of petroleum products.
3. Weighing of bulk commodities.
4. Accuracy of devices used to determine weight, measure and count.

This element is organized into four regions of California: northern, central, bay area, and southern. Each region is staffed with a manager, and personnel from the four programs. Coordination of the regions and overall responsibility of the statewide program rests with headquarters in Sacramento.

All primary standards of weights and measures are maintained in the Sacramento headquarters. Working standards used by state and county weights and measures officials are tested and must conform to these primary standards. The state's standards are traceable to the National Bureau of Standards and through this chain we assure the public of the accuracy of commercially used weighing and measuring devices.

Chapter 203/75 authorized the establishment of tare weights for trucks and tractors used in making bulk deliveries of tomatoes. A total of \$91,587 has been budgeted for this program.

DEPARTMENT OF FOOD AND AGRICULTURE—Continued

Output

	1974-75	1975-76	1976-77
1. Number of inspections:			
a. Packaged products.....	144,071	147,000	150,000
b. Petroleum products.....	15,642	18,100	18,200
c. Bulk commodities.....	2,840	3,000	3,600
2. Number of packaged products in violation:			
a. Labeling.....	639,717	671,703	705,288
b. Shortages.....	2,585,043	2,843,547	3,127,902
3. Number of violations in petroleum products:			
Quality, labeling and advertising.....	12,778	12,280	11,200
4. Number of violations in bulk containers.....	2,750	3,150	3,250
5. Number of disciplinary actions:			
a. Packaged products.....	1,942	2,100	2,300
b. Petroleum products.....	14	10	21
c. Bulk commodities.....	1,030	1,100	1,210

e. Pesticide Control

Over 25 million acres of agricultural crop land plus a great number of gardens, industrial areas, and stored products are treated annually with pesticides. In fiscal year 1974-75, \$317 million worth of pesticides were reported sold in California.

California annually registers pesticides prior to sale. The registration process requires thorough and continuing evaluation of each product label claim for clarity, technical accuracy and compliance with Federal and State laws and regulations. Regulations are developed and enforced to provide safety for workers and proper use of pesticides. Inspection, sampling and testing of pesticide products are done to assure that they are registered properly, labeled, and that ingredients conform to label statements. Unlabeled, misbranded or deficient products are quarantined from sale and subject to further enforcement actions.

A large population of dealers, pesticide salesmen and pest control advisers are employed in contacting pesticide users. Applicants for Agricultural Pest Control licenses, Agricultural Pilot certificates, Pesticide Dealer licenses and Agricultural Pest Control Adviser licenses are examined and, if qualified, are licensed to operate. Regulations are developed and adopted to establish operating standards for licensees.

Farm commodities used as food or feed are sampled and laboratory tested for pesticide residue. Products found with illegal residues are quarantined for removal from sale and follow-ups are made for correction of improper practices.

Coordination is maintained with county agricultural commissioners, the U.S. Food and Drug Administration and the U.S. Environmental Protection Agency in pesticide regulatory activities. Assistance is given to county agricultural commissioners in developing local programs for regulation of pesticides.

Output

	1974-75	1975-76	1976-77
Pesticide Registration, Worker Safety, and Environmental Protection:			
Registrants (pesticides and fertilizers).....	1,675	1,700	1,700
Products registered.....	10,000	10,000	10,000

DEPARTMENT OF FOOD AND AGRICULTURE—Continued

f. Commercial Fertilizer Control

This element provides protection to producers of food and fiber crops, as well as to the home gardener who purchases these products. Commercial fertilizers and agricultural minerals require complete labeling stating all constituents claimed to be of value. Users depend upon complete label information for purchase and proper use of materials for optimum production. The user also relies on label integrity to achieve the lowest unit cost. Mislabeling or adulteration could result in serious economic loss to the user.

An intensive inspection and sampling program is utilized to determine product compliance with State labeling requirements for consumer protection.

Output	1974-75	1975-76	1976-77			
1. Annual tonnage of fertilizer materials.....	3,857,413	4,000,000	4,000,000			
2. Number of registrants:						
a. Commercial fertilizers.....	550	560	600			
b. Agricultural minerals	200	225	250			
3. Number of inspections:						
a. Commercial fertilizers.....	1,340	2,200	2,300			
b. Agricultural minerals	275	500	500			
4. Number of samples:						
a. Commercial fertilizers.....	1,400	2,000	2,000			
b. Agricultural minerals	320	400	400			
5. Number of corrective actions:						
a. Investigations	38	45	50			
b. Hearings	10	12	20			
c. Quarantines and Notice of Hearings.....	40	50	50			
d. Prosecutions.....	-	7	10			
Input	74-75	75-76	76-77	1974-75	1975-76	1976-77
Expenditures.....	15.1	17.4	17.5	\$377,509	\$444,894	\$477,147

g. Feed and Livestock Remedies Control

This element provides protection to producers of livestock and poultry who annually buy and use over 8,000,000 tons of feed in production of meat, milk and eggs. Complete labeling is required so that producers can select and use these products with confidence and efficiency to minimize losses in production. Inspection, sampling and laboratory testing assures that commercial feeds and feed additives will not cause illegal drug or pesticide residues or other contaminants in food products purchased by consumers and that such products will be safe and wholesome.

Livestock remedies are required to be registered and properly labeled so that livestock and poultry producers can depend on these products to safely and effectively control disease problems. Also there is random monitoring of the user to insure that label directions are being followed to prevent possibility of illegal residues in meat, milk and eggs.

An intensive inspection program supports labeling requirements and conformance with required regulations.

Output	1974-75	1975-76	1976-77			
1. Annual tonnage of commercial feeds	8,500,000	9,000,000	9,000,000			
2. Annual dollar value of:						
a. Commercial feeds	\$900,000,000	\$1 billion	\$1 billion			
b. Livestock remedies	\$75,000,000	\$80,000,000	\$88,000,000			
3. Number of licenses:						
a. Commercial feeds	1,028	1,200	1,200			
b. Livestock remedies	621	650	700			
4. Number of inspections:						
a. Commercial feeds	2,780	3,000	3,000			
b. Livestock remedies	450	550	650			
5. Number of samples:						
a. Commercial feeds	3,540	3,600	3,600			
b. Livestock remedies	168	200	200			
6. Number of corrective actions:						
a. Investigations	75	85	85

c. Quarantines and Notice of Warnings	40	70	80			
d. Prosecutions	-	6	10			
Input	74-75	75-76	76-77	1974-75	1975-76	1976-77
Expenditures	21.2	23.3	23.4	\$522,913	\$558,332	\$600,116

h. Seed Service

Seed Service initiates and maintains programs to coordinate and supervise enforcement and inspection work done by the county agricultural commissioners and performs field seed certification work. The element also administers the One-Variety Cotton Districts Act which authorizes only the Acala variety of cotton to be planted in the San Joaquin Valley, thus assuring the growing of the most profitable and uniform cotton variety.

Official sampling and inspection work determines compliance with the California Seed Law as to specific quality statements on seed labels, freedom of the seed from primary noxious weed seeds, and proper labeling of treated seed. State responsibility in the seed certification activity is for directing, training, and coordinating work.

Seed Service receives financial support for its activities up to 50% from industry funds.

DEPARTMENT OF FOOD AND AGRICULTURE—Continued

Output	1974-75	1975-76	1976-77
1. Pounds of seed planted in California	291,000,000	291,000,000	291,000,000
2. Number of official seed samples drawn	1,179	1,600	1,800
3. Number of 'stop-sales' written	1,680	1,700	1,900
4. Number of premises inspected	8,100	8,500	9,000
5. Number of lots of seed inspected	70,250	70,500	71,000
6. Number of acres planted to 'Acala' cotton	1,200,000	950,000	980,000

Input	74-75	75-76	76-77	1974-75	1975-76	1976-77
Expenditures	9.8	11.6	11.4	\$261,407	\$308,196	\$304,277

i. Chemistry Laboratory Services

This element provides Laboratory Services for consumer and industry protection by:

Analyses of meat products, dairy products, feeds, fertilizers, livestock remedies and pesticides for label guarantees and containers. Analysis of milk, meat, plant crops and agricultural commissioners' drift samples for pesticide residues. Analysis of meat and milk for biological residues. Analysis of feeds for toxins resulting from mold.

Assisting the inspection of all levels of milk production, processing, distribution, and testing by 60 other dairy laboratories with chemical and microbiological tests. Checking the calibration of milk testing equipment and microbiological testing practice by direct observation and posting several thousand standardized samples each year.

Utilizing two mobile laboratories to perform on location analyses of preharvest food samples and crop foliage to insure worker's safety, safety of food crops, and environmental pesticide monitoring. Mobile labs are on call for emergency pesticide situations anywhere in the state.

Program Effectiveness Measurements for Dairy-Meat Laboratory

Goal: All routine Dairy and Meat Laboratory samples are to be completed one week after receipt (8 days):

	1974-75	1975-76	1976-77
Routine meat	98.9%	98%	98%
Routine dairy	95%	98%	98%
The number of analyses performed in the Dairy and Meat Laboratories are:			
Meat analyses	19,625	20,000	20,000
Dairy analyses	29,532	30,000	31,000
Dairy glassware calibrated	17,581	24,000	12,000
Dairy referee samples	3,504	3,762	3,800

Program Effectiveness Measurements for Feed-Fertilizer Laboratory

Goal: All routine feed and fertilizer samples are to be completed within three weeks of receipt (15 working days):

	1974-75	1975-76	1976-77
Routine feed	71%	80%	80%
Number of analyses	17,976	18,400	19,000
Routine fertilizer	1,800	2,400	2,400
Number of analyses	6,615	8,000	8,000

Program Effectiveness Measurements for Pesticide-Residue Laboratory

Goal: All samples are to be completed as follows: Pesticide Formulation Laboratory - within two weeks (10 working days); routine Pesticide-Residue Laboratory - within one day (1 working day); Nonroutine Pesticide-Residue Laboratory - within three weeks (15 working days):

	1974-75	1975-76	1976-77
Routine pesticide-formulation (within two weeks)	85%	90%	92%
Routine pesticide-residue (within one day)	95%	95%	95%
Nonroutine pesticide-residue (within three weeks)	90%	90%	92%
Number of Analysis Performed:			
Pesticide-formulation	4,500	4,800	5,000
Pesticide-residue	33,000	35,000	35,000

Program Effectiveness Measurements for Mobile Laboratory and Worker Safety and Registration Review

MOBILE LABORATORY

Goal: All routine Mobile Laboratory Residue samples are to be completed within one (1) day of receipt:

	1974-75	1975-76	1976-77
Routine samples	96%	95%	95%
Number of Analyses Performed: ^a			
Residue samples	2,000	3,000	3,000

^a This is a change from the 1975-76 Measures of Effectiveness in that the Worker Safety Program is shown separately.

WORKER SAFETY AND REGISTRATION REVIEW

Goal: All samples submitted involving field reentry studies are to be completed within two (2) days. Blood cholinesterase samples are to be completed within one (1) day. Other samples as soon as possible:

	1974-75	1975-76	1976-77
Reentry samples	90%	100%	100%
Blood samples	100%	100%	100%
Number of Analyses Performed:			
Reentry samples	3,500	4,000	4,500
Blood samples	2,000	4,000	4,500

DEPARTMENT OF FOOD AND AGRICULTURE—Continued

Input	1974-75	1975-76	1976-77
Expenditures	\$1,540,051	\$1,679,510	\$1,829,975
Recovery from:			
Milk and dairy foods control	\$-209,827	\$-206,427	\$-232,322

Net Totals			

Personnel man-years are included in the using elements.

j. Seed Laboratory Service

This element provides laboratory services for the seed service unit within the Department and to county agencies, agricultural industry and to the general public. Over 50 percent of the expenses are paid from seed industry assessments.

Input	1974-75	1975-76	1976-77
Expenditures	\$165,047	\$166,596	\$155,032
Recovery from Seed Service	-165,047	-166,596	-155,032
Net Totals			

Personnel man-years are included in the using element.

III. AGRICULTURAL MARKETING SERVICES

Program Objectives and Description

California agriculture produces 200 different crops which enter state, national and international commerce for human consumption. These commodities are faced with a myriad of problems including orderly marketing, reduction of economic waste, assurance of supply, consumer protection, and price determination in moving through the various trade channels. Agricultural Marketing Services assists in resolving these problems by collecting and disseminating marketing and economic information, identifying and helping to resolve marketing problems, assisting the milk industry to maintain stability, reviewing and helping to arbitrate problems between producers and handlers and inspecting grain and commodities to enforce self imposed standards.

Authority

Food and Agricultural Code, Division 16, Chapters 1, 2, 3; Division 18, Chapters 1, 3, 4; Division 20, Chapters 1, 6, 7; Division 21, Part 1, Chapters 1, 2, Part 2, Chapters 1, 2, Part 3, Chapters 1, 2, 3; Division 22, Chapters 2, 3. U.S. Agricultural Marketing Act of 1946.

f. Grain and commodities inspection	53.2	50.1	53.1	879,961	1,004,118	1,064,775

a. Market News

The Market News element is operated jointly with the United States Department of Agriculture as the Federal-State Market News Service.

Agricultural marketing data is collected by telephone and personal contact from farmers, buyers, dealers, shippers, auction sales companies, and others involved in the marketing process. All data is given to Market News representatives on a voluntary basis, including confidential information such as an individual's or firm's selling prices, volume sold, volume processed, shipments, and market conditions.

California markets the largest food and agricultural production of any state, with a large portion shipped to eastern consuming centers. Current marketing guidelines from the nation's marketing centers gives California the timely information needed to economically market several billion dollars worth of perishable food commodities each year. Through use of these market news data, shortages and/or surpluses will be held to a minimum, creating a better economic balance benefiting both the producing and consuming public.

General Fund support of this program is being reduced by \$97,561 in 1976-77. The department will explore methods of securing user support for this service.

Output	1974-75	1975-76	1976-77
Number of information collecting interviews	463,000	463,000	463,000
Number of commodity prices reported	332,000	332,000	332,000
Number of supply measures reported	48,600	48,000	48,000
Number of commodities covered	200	200	200
Value of commodities covered	\$7,119,000,000	\$7,831,000,000	\$8,614,000,000
Requests to get on mailing lists for printed Market News reports	33,900	34,000	34,000
Number of printed reports issued	4,076,000	4,100,000	4,100,000
Radio and TV market reports	23,000	24,000	24,000
Requests for Market News by telephone.....	433,000	450,000	460,000
Number of releases to home economists, food editors and other consumer interests ..	6,708	7,500	8,500

Expenditures.....	65	64.5	58.7	\$1,245,775	\$1,328,232	\$1,233,553

DEPARTMENT OF FOOD AND AGRICULTURE—Continued

b. Agricultural Statistics

California Crop and Livestock Reporting Service is a federal-state activity supported under a cooperative agreement between the Department of Food and Agriculture and USDA Statistical Reporting Service. Funding is approximately two-thirds federal and one-third state. The responsibility of this office is to prepare and distribute statistics on California agriculture. These statistics are used as a basis for production and marketing decisions by those in agriculture and allied industries. Even though farm numbers in California continue to decline, the need for 'farm facts' and demand for their precision increase. These demands often require larger samples and more frequent reporting. The statistical series include estimates on pre-harvest forecasts and later estimates of acreage, yield, production, prices, and utilization of crops, inventory numbers, production, and prices of livestock and poultry and their products, and periodic reports of weather, crop and range conditions.

Newer sampling techniques and improved estimating procedures have provided forecasts of production with greater precision than in past years. The improved estimating procedures include objective cotton and fruit counts, probability list sampling, area frame sampling, multiple frame sampling, and the use of aerial photography.

Output	1974-75	1975-76	1976-77
Number of usable questionnaires tabulated	124,944	140,000	130,000
Field personal interviews made	29,624	32,000	32,000
Number of telephone interviews.....	6,781	6,600	7,000
Number of estimates made	910	910	910
Number of copies of reports issued (includes bulletins).....	480,169	480,000	470,000
Number of individual requests through office	7,235	7,300	7,400

Input	74-75	75-76	76-77	1974-75	1975-76	1976-77
Expenditures.....	24.4	30	32	\$482,740	\$509,087	\$539,189

c. Milk Marketing Program

The Milk Marketing Program establishes the minimum prices at each level of the marketing process under standards established by the Legislature. This includes the establishment of minimum prices paid to producers by distributors, minimum wholesale prices paid by retail stores to distributors, and minimum prices paid by consumers to retailers.

The program also has responsibility for controlling unfair practices in the milk industry. These responsibilities include the enforcement of established minimum prices of fluid milk, the filing of prices on dairy products, and the prohibition against sales below cost.

Another major function is responsibility for the determination of statewide dollar values of commercial uses of market milk. Under the standards of the Milk Pooling Act, this value is assigned monthly to producers based on their individual entitlements. Under the equalization standards of the Act, adjustments are made to producer entitlements from growth in the Class One market.

A continuing audit program is maintained to verify uniform and impartial treatment to all parties subject to the program.

Output	
California market milk production 1974-75:	9.9 billion pounds
1974-75 Annual Gross Dollar Value of the Milk Industry:	
Value at the farm.....	\$870 million
Value at wholesale	\$1,175 million
Retail value	\$1,410 million
Producer and handler statements computed each month	1,379
Number of market milk producers	2,410
Number of market milk processors	237
Number of licensed distributors	2,038

Input	74-75	75-76	76-77	1974-75	1975-76	1976-77
Expenditures.....	143.6	154.1	154.1	\$3,228,408	\$3,838,850	\$3,973,799

d. General Marketing Services

General marketing services include (1) identification and analysis of agricultural marketing problems, attending and participating in industry meetings, counseling and recommending alternative procedures or solutions, stimulating and organizing industry efforts, making special reports, assisting in the formulation of nonprofit cooperative or bargaining associations, and responding to correspondence, inquiries, and requests from the general public, business, the Director's office, and other governmental agencies; (2) assisting agricultural industries in analyzing their marketing problems and helping them prepare programs to meet these needs; and (3) assisting California agriculture with foreign trade development. One agricultural economist is assigned on a half-time basis to foreign trade work which includes development and dissemination of information about foreign markets and marketing and the bringing together of sellers of California farm products and import buyers.

Input	74-75	75-76	76-77	1974-75	1975-76	1976-77
Expenditures.....	5.2	5.9	5.9	\$119,021	\$142,172	\$146,569

e. Market Enforcement

Through licensing provisions of the Food and Agricultural Code, this element exercises control upon the activities of middlemen and processors of farm products.

Mandatory provisions require investigation and settlement procedures when complaints against handlers are received from producers. In the event that settlement negotiations are not successful, the authority provides for formal hearing. Disposition of the complaint may be either by dismissal or disciplinary action against the licensee in the form of probation or suspension or by revocation of license. This activity is handled by a field staff under the supervision of regional administrators.

Optional elements of the authority emphasize the preventive and deterrent effect achieved through examination of licensee's records to assure that the licensee is conducting his business in a manner acceptable to the statutes. This part of the activity is handled by auditors auditing licensees on a random sampling basis. This activity results in specific information as to the level of compliance.

Output	1974-75	1975-76	1976-77
Licenses issued	9,423	9,619	10,575
Licenses denied	23	28	30
Licenses revoked.....	5	-	2

DEPARTMENT OF FOOD AND AGRICULTURE—Continued

f. Grain and Commodities Inspection

This element provides a service of inspecting and certifying to grades of grains, rice, beans, peas, hops, hay and certain processed commodities. Authority for this activity is granted by United States Grain Standards Act, Agricultural Marketing Act and California law. The Department has a cooperative agreement with the United States Department of Agriculture to provide a Federal-State inspection service for each commodity except grain.

Grain and commodity markets generally recognize official minimum grade standards as a means of arriving at equitable prices if the contract standard is not met. California inspection offices are located wherever demand for services is sufficient. The service is not mandatory and is self-funded by fees charged.

Due to increasing demand for this service three positions and \$38,342 are being added in 1976-77.

Output

Certificates Issued:	1974-75	1975-76	1976-77

IV. FINANCIAL SUPERVISION OF LOCAL FAIRS

Program Objectives and Description

The apportionment of funds made available by the Legislature for construction and support for fairs is a principal function of the Division of Fairs and Expositions. Also management assistance in upgrading fair services and exhibitor opportunity is mandated to the Division by the broadening of legislation and changing social and economic conditions. This entails review and approval of operating and capital outlay programs of 76 of the state's 79 fairs and the annual upgrading of manuals and a master premium list as well as the processing of over 1,500 contracts for services and rentals annually. The Division also provides staff and clerical services to the Fair Budget Review Board.

Program Requirements	74-75	75-76	76-77	1974-75	1975-76	1976-77

V. ASSISTANCE TO COUNTIES FOR AGRICULTURAL PURPOSES

This program is designed to:

a. Secure more adequate and uniform enforcement of the provisions of the Food and Agricultural Code through sharing in the payment of salaries of county agricultural commissioners.

b. Participate in the preservation of prime agricultural lands under the authority of the Land Conservation Act of 1965, and partially reimburse counties for carrying out agricultural programs authorized by the Food and Agricultural Code under the supervision of the Department of Food and Agriculture.

Program Requirements	74-75	75-76	76-77	1974-75	1975-76	1976-77
Continuing program costs	—	—	—	\$2,337,902	\$3,590,047	\$3,030,304
General Fund				174,900	174,900	174,900
Department of Agriculture Fund				2,163,002	3,415,147	2,855,404

Program Elements

a. Salaries of county agricultural commissioners	174,900	174,900	174,900
b. Payments to counties for agricultural programs	2,163,002	3,415,147	2,855,404

a. Salaries of County Agricultural Commissioners

To secure more adequate and uniform enforcement of the provisions of the Food and Agricultural Code, the state participates in the payment of salaries of the county agricultural commissioners as provided by Sections 2221 through 2224 of the Food and Agricultural Code. Participation is limited to the lesser of \$3,300 per year or two-thirds of the salary of each commissioner. Fifty-two counties are participating in this program.

Input	1974-75	1975-76	1976-77
Direct program costs	\$174,900	\$174,900	\$174,900

b. Payment to Counties for Agricultural Programs

The Department administers the State's functions under Chapter 1443/65, known as the Land Conservation Act. Provisions of that act allow landowners to enter into 10-year contracts with cities and counties for the establishment of agricultural preserves.

Section 8352 of the Revenue and Taxation Code provides for the annual transfer of refundable unrefunded gasoline taxes applicable to agricultural use from the Transportation Fund's Motor Vehicle Fuel Account to the Department of Agriculture Fund. Section 224(3) of the Food and Agricultural Code provides that of the funds transferred each year, the amount in excess of \$1,500,000 is to be paid to counties as partial reimbursement for county expense incurred in carrying out agricultural programs authorized by the Food and Agricultural Code that are supervised by the Department of Food and Agriculture. These payments are apportioned to the counties by the Director of Food and Agriculture in the percentage relationship that each county's expenditures for the preceding fiscal year for such agricultural programs bear to the total amount expended by all counties.

Section 12844 of the Food and Agricultural Code provides for payments to the counties as reimbursement for costs incurred by the counties in the administration and enforcement of the provisions of Division 6 (commencing with Section 11401), Chapter 2 (commencing with Section 12751), Chapter 3 (commencing with Section 14001), and Chapter 3.5 (commencing with Section 14101) of the Food and Agricultural Code. These payments are apportioned to the counties in the percentage relationship that each county's expenditures bear to the total amount expended by all counties for such programs.

Section 12112 of the Food and Agricultural Code provides that 50 percent of the moneys collected from licensing pesticide dealers shall be paid to counties for enforcement and administration of Chapter 7 of the Food and Agricultural Code. These payments are made to the county that the

DEPARTMENT OF FOOD AND AGRICULTURE—Continued

applicant indicates as his principal address at the time of payment.

Section 12539 of the Business and Professions Code provides that five-eighths of the moneys collected from licensing device repairmen shall be paid to the counties for enforcement of Division 5 (commencing with Section 12001) and Division 8 (commencing with Section 18400) of the Business and Professions Code.

Input

Total Costs (Department of Agriculture Fund)	\$2,163,002	\$3,415,147	\$2,855,404

VI. EXECUTIVE MANAGEMENT AND ADMINISTRATIVE SERVICES

Program Objectives and Description

Executive Management includes the executive leadership of the director's office and the staff services associated with it. The director's office sets policies and priorities which recognize and meet the changing needs of the agribusiness community of this state and which help protect the health and welfare of its people. The director's office interprets and explains to the public and the Legislature the decisions and actions which are developed to anticipate and meet the ever-changing needs of the agricultural industry and its impact on consumers and the environment.

Administrative Services includes the staff, management, and housekeeping services necessary for the effective operation of this department.

The objective is to provide active leadership to meet current and future agricultural problems; to coordinate and provide major administrative, housekeeping, and business management services for all the programs of the department.

Program Requirements

Program Elements:	74-75	75-76	76-77	1974-75	1975-76	1976-77
Executive management	24.2	24.7	24.1	\$837,561	\$918,953	\$850,759
Administrative services	108.0	113.2	113.2	2,054,189	2,250,038	2,377,128

Totals, Amounts Allocated				-1,560,465	-1,722,176	-1,801,771
Net Totals, Executive Management and Administrative Services				\$958,614	\$1,093,166	\$1,044,545
Reimbursements				-344,086	-345,247	-283,928
Reimbursements from continuing appropriations				-614,528	-747,919	-760,617

VII. UNCLAIMED GAS TAX AUGMENTATION

Section 8352 of the Revenue and Taxation Code provides for the annual transfer of unrefunded gasoline taxes applicable to agricultural use from the Transportation Fund, Motor Vehicle Fuel Account to the Department of Agriculture Fund.

Section 224(1) of the Food and Agricultural Code provides that of the funds transferred each year, \$500,000 is appropriated for reimbursement for charges for state administrative costs and for departmental and divisional overhead expense apportioned to the Department of Agriculture Fund. The Department of Agriculture Fund supports elements under both annual appropriation and continuing appropriations. Under the authority of Food and Agricultural Code Sections 221 and 27554, the continuing appropriation elements are exempt from the provisions of Government Code Sections 13320 through 13324; as such, they are not included in this budget. However, the portion of the \$500,000 applicable to these elements is shown as a budget program cost.

The portion of the \$500,000 applicable to the elements supported by annual appropriation is shown as a reimbursement to those elements within this budget.

Section 224(2) of the Food and Agricultural Code provides that of the funds transferred, \$1,000,000 is appropriated for emergency detection, eradication, or research. If not used for the purpose in the year of transfer, the balance of any transfer is appropriated for payment in the following year to counties as reimbursement for their expenses in carrying out agricultural programs authorized by the Food and Agricultural Code.

In 1974-75, \$425,824 of the \$1,000,000 was used for the following projects:

	1974-75
1. Brucellosis	\$155,006
2. Eradication and Research Oriental Fruit Fly	255,818
3. Alligator Weed Control	15,000
	\$425,824

In 1975-76 the department has encumbered funds for the following:

(As of December 19, 1975)	1975-76
1. Dutch elm disease	\$670,000

Within this program budget, the actual and estimated expenditures for fiscal years 1974-75 and 1975-76 are included in the input costs of the program element administering the emergency project.

Program Requirements

	1974-75	1975-76	1976-77
Continuing program costs	\$925,824	\$1,500,000	\$1,500,000
Less Allocations to Programs:			
Administrative cost reimbursements	-288,451	-264,121	-264,508
Agricultural pest and disease prevention emergency projects	-425,824	-670,000	—
Totals, Amounts Allocated	\$-714,275	\$-934,121	\$-264,508

DEPARTMENT OF FOOD AND AGRICULTURE—Continued

	1974-75	1975-76	1976-77
Emergency reserve	—	330,000	1,000,000
Administrative cost reimbursement to continuing programs	211,549	235,879	235,492
Net Totals, Unclaimed Gas Tax Augmentation (<i>Department of Food and Agriculture Fund</i>)	\$211,549	\$565,879	\$1,235,492

VIII. SUPPLEMENTAL INFORMATION

The program elements outlined below are exempt from budgetary review under the provisions of Section 221 of the Food and Agricultural Code. They have not been presented in the Governor's Budget since 1971-72. The figures detailed in this program are being displayed for information only and are not included in overall budget totals.

The Livestock Identification, Egg and Poultry Quality Control, Shipping Point Inspection, Canning Cling Peach Inspection, Canning Tomato Inspection and Wine Grape Inspection programs are supported by industry assessments and are subject to continuing appropriation as defined in the Food and Agricultural Code. Marketing Trust program is supported by marketing trust monies collected by the Department under authority of the Marketing Act of 1937 and, as such, is subject to the controls of specific agricultural commodity groups and the various marketing advisory boards.

Program Requirements	74-75	75-76	76-77	1974-75	1975-76	1976-77
a. Livestock Identification	102.1	93.3	93.3	\$1,679,540	\$1,917,582	\$1,937,753
b. Egg and Poultry Quality Control	45.2	56.3	56.3	1,189,853	1,396,864	1,475,482
c. Shipping Point Inspection	176.3	201.6	201.6	3,352,085	3,946,148	4,035,502
d. Canning Cling Peach Inspection	4.2	5.1	5.1	92,911	127,086	118,216
e. Canning Tomato Inspection	149.7	165.2	165.2	2,395,364	2,967,589	2,950,569
f. Wine Grape Inspection	16.6	22.7	22.7	243,207	373,973	359,078
g. Marketing Trust	26.4	28.3	28.3	521,520	529,943	538,501
Total	520.5	572.5	572.5	\$9,474,480	\$11,259,185	\$11,415,101

a. Livestock Identification

This activity protects livestock owners in California against loss of animals by theft or straying by: (1) registration of livestock brands, (2) inspection of cattle for ownership prior to transportation, sale or slaughter, and the recording of the information obtained by such inspection, and (3) giving assistance to local law enforcement officials with investigations and prosecutions involving cattle theft.

Livestock owners pay the total cost of the program including overhead charges that are not reimbursed. The primary sources of revenue are inspection and brand registration fees.

Output	1974-75	1975-76	1976-77
1. Value of theft deterrent factor	\$10,000,000	\$10,000,000	\$10,000,000
2. Value of strayed or stolen cattle returned to owners	900,000	900,000	900,000

Input	74-75	75-76	76-77	1974-75	1975-76	1976-77
Expenditures	102.1	93.3	93.3	\$1,679,540	\$1,917,582	\$1,937,753

b. Egg and Poultry Quality Control

Part of this program is mandated by the Federal Egg Products Inspection Act. All processing plants producing liquid, frozen or dried eggs must meet the facility, equipment and sanitary standards of the United States Department of Agriculture, and operate under continuous inspection. This activity is fully reimbursed by U.S.D.A. Certification of shell eggs and poultry also is reimbursed fully by U.S.D.A. The enforcement of California's shell egg standards is achieved through County Agricultural Commissioners. This activity is paid for through a mill tax on each dozen eggs that are sold. The primary benefit is that the consumer is assured a healthful and wholesome product and that eggs being offered for sale are of the size and quality marked.

Output	1974-75	1975-76	1976-77
1. Dozens of eggs inspected under California standards	34,355,490	34,500,000	34,500,000
2. Dozens of eggs rejected	3,800,910	3,600,000	3,600,000
3. Eggs graded under U.S.D.A. standards	135,938,580	136,000,000	136,000,000
4. Pounds of egg product inspected for wholesomeness	101,037,990	101,000,000	101,000,000
5. Pounds of poultry graded under U.S.D.A. standards	275,730,471	276,000,000	276,000,000

Input	74-75	75-76	76-77	1974-75	1975-76	1976-77
Expenditures	45.2	56.3	56.3	\$1,189,853	\$1,396,864	\$1,475,482

c. Shipping Point Inspection

The objective of this program is to furnish third party inspection service when requested by industry and approved by the Director. This service provides applicants with a certification that will accurately describe the quality, condition, grade and size of fresh fruits, nuts and vegetables grown in California and destined for commercial resale or processing usage, based on Federal, State or industry standards.

The major benefit is the establishment of an orderly marketing condition, and assurance of maximum protection to rights of various segments of the agricultural industry at all levels, and minimizes losses to producer, processor, buyer, receiver and carrier resulting in better quality with less waste and a monetary savings to the consumer. Shipping Point Inspection is funded by fees charged for inspection and certification of California produce.

Output	1974-75	1975-76	1976-77
1. Products accepted by the receiver as meeting the quality certified at shipping point	99.98%	99.98%	99.98%
2. Products reinspected at receiving markets by U.S.D.A. inspectors	30.00%	30.00%	30.00%
3. Appeal inspections reversed02%	.02%	.02%

Input	74-75	75-76	76-77	1974-75	1975-76	1976-77
Expenditures	176.3	201.6	201.6	\$3,352,085	\$3,946,148	\$4,035,502

DEPARTMENT OF FOOD AND AGRICULTURE—*Continued*

d. Canning Cling Peach Inspection

The purpose is to inspect for quality each load of cling peaches destined for processing; assure the Processors' Cling Peach Advisory Board that operates under a State marketing order program that quality information is accurate and uniformly applied statewide; and to provide this service economically, efficiently, and safely.

The major benefit of this program is the protection and assistance given to the producer and processor by an impartial third party providing accurate and uniform analysis of all loads and issuance of an inspection certificate which provides a communicative link between producer and processor used as a basis for pricing.

The cost of the program is borne solely from processor assessments levied on a tonnage fee basis.

Output	1974-75	1975-76	1976-77
1. Number of tons inspected	810,646	732,446	750,000
2. Number of loads inspected.....	126,378	112,441	120,000
3. Percent of loads rejected84%	2.8%	.5%
Input	74-75	75-76	76-77
Expenditures.....	4.2	5.1	5.1
	1974-75	1975-76	1976-77
	\$92,911	\$127,086	\$118,216

e. Canning Tomato Inspection

The purpose is to inspect for quality and color each load of tomatoes destined for processing; assure industry that grade and color information is accurate and uniformly applied statewide; and to provide this service economically, efficiently, and safely.

The major benefit of this program is the protection and assistance given to the producer and processor by an impartial third party providing accurate and uniform analysis of every load of canning tomatoes; and issuance of an inspection certificate which provides a communicative link between producer and processor used as a basis for payment.

The program is entirely self-supporting. The inspection fee is shared equally by the producer and processor, the processor being designated by law to collect the grower's fee as well as their own to submit to the department.

Output	1974-75	1975-76	1976-77
1. Tons of tomatoes inspected	6,040,441	7,561,239	7,000,000
2. Loads of tomatoes.....	234,880	289,474	292,000
3. Soluble solids and peelability tests	106,787	144,204	139,000
Input	74-75	75-76	76-77
Expenditures.....	149.7	165.2	165.2
	1974-75	1975-76	1976-77
	\$2,395,364	\$2,967,589	\$2,950,569

f. Wine Grape Inspection

The purpose is to inspect for quality and foreign material loads of wine grapes destined for processing; each load is required to be tested for soluble solids (sugar content) when grapes are sold on the basis of soluble solids; assure industry that grade and soluble solid information is accurate and uniformly applied statewide; and to provide this service economically, efficiently, and safely.

The major benefit of this program is the protection and assistance given to vintners and grape growers by providing accurate and uniform analysis by an impartial third party for each vintner requesting this service; and issuance of an inspection certificate which provides a communicative link between producer and vintner which may be used to determine price.

The total cost of the program is paid through inspection fees charged vintners requesting the service.

Output	1974-75	1975-76	1976-77
1. Tons of wine grapes inspected for soluble solids.....	1,456,206	1,613,795	1,700,000
2. Number of loads inspected.....	87,966	88,522	89,000
3. Number of wineries.....	30	35	35
Input	74-75	75-76	76-77
Expenditures.....	16.6	22.7	22.7
	1974-75	1975-76	1976-77
	\$243,207	\$373,973	\$359,078

g. Marketing Trust

The Department provides administrative, marketing, accounting and investment services to a varying number of marketing order programs (37 this year). Activities currently being carried on under the marketing orders include the establishment of quality regulations with inspection, market development through advertising and sales promotion, and research for various farm products at a cost of \$31.93 million in 1974-75.

The major benefit of this program is the protection provided to the consumer by assuring an adequate supply of pure and wholesome food products at a fair and reasonable price. The total cost of promoting an orderly marketing program is paid by the producers and processors through fees and assessments. There are approximately 450 exempt Advisory Board employees involved in the various phases of the program of which 230 are hired on a seasonal basis for a two-month period. The man-years and dollars shown below reflect the civil service employees within the department that are involved in the centralized administration of the various advisory boards. These services are paid for by the boards.

Input	74-75	75-76	76-77	1974-75	1975-76	1976-77
Expenditures.....	26.4	28.3	28.3	\$521,520	\$529,943	\$538,501

^a Does not agree with Controller's financial statement as this report does not include revenues, expenditures, or surplus funds under provisions of Sections 221 and 27554, Food and Agricultural Code.

^b Departmental costs relating to 1976-77 salary increase and employee benefits proposals had not been determined when this fund condition statement was prepared. Therefore, the amount shown as surplus available for appropriation has not been adjusted for such potential expenditures.

Department of Food and Agriculture

FINANCIAL ASSISTANCE TO LOCAL FAIRS

To provide financial assistance to district agricultural association fairs, county fairs, and citrus fruit fairs both in the area of operations and capital outlay.

The apportionment of funds made available by the Legislature for construction and support for fairs is a principal function of the Division of Fairs and Expositions. Also management assistance in upgrading fair services and exhibitor opportunity is mandated to the division by the broadening of legislation and changing social and economic conditions. This entails review and approval of operating and capital outlay programs of 76 of the state's 79 fairs and the annual upgrading of manuals and a master premium list as well as the processing of over 1,500 contracts for services and rentals annually. The division provides staff and clerical services to the Fair Budget Review Board.

DEPARTMENT OF COMMERCE

The objective of the Department of Commerce was to promote the economic growth of the State of California. As the existing department did not appear to be the proper organizational framework for the stated objective, it was not funded after the 1974-75 fiscal year. The Museum of Science and Industry and the Commission for Economic Development are funded and printed separately and shown elsewhere in this document.

V. COMMISSION FOR ECONOMIC DEVELOPMENT

Program Objectives and Description

The Commission for Economic Development combines the efforts of the legislative and executive branches of state government and the private sector in providing long-range guidance and support for the overall economic development of the state.

The Commission is funded separately beginning 1975-76 F.Y., and is printed as a separate budget.

MUSEUM OF SCIENCE AND INDUSTRY

The Museum of Science and Industry is an educational, scientific and technological center administered by a nine-member board of directors appointed by the Governor. It is located in Exposition Park, a 104-acre tract just south of the central part of Los Angeles which is owned by the state in the name of the museum.

In a number of state-owned buildings it presents a series of exhibits and conducts associated programs centering on the scientific and industrial development of the state and it has responsibility for the operation of parking facilities for visitors to the park, the museum, and the Los Angeles Coliseum and Sports Arena.

Personnel man-years	128.3	128.1	129.1

I. EDUCATION

Program Objectives and Description

The program performed by the Museum of Science and Industry exhibits man's scientific and industrial progress, and informs Californians and visitors of the state's scientific and industrial capabilities and accomplishments. The director and his staff, in cooperation with the nine-member board of directors, administer the museum and have responsibility for the security and operation of the museum buildings and Exposition Park.

The primary purpose of this educational program is to create and stimulate the interest of Californians in the fields of science and industry. It is particularly geared to reach the largest possible number of the state's young people, with the anticipation that some will pursue scientific and industrial careers and thereby provide California with needed talent in these fields. The program, in addition to permanent and temporary exhibits, consists of lectures, seminars, summer science workshops and teaching institutes led by eminent scientists from all over the country. A major portion of these latter activities is financed by the Museum Foundation Fund which is supported by private contributions.

Admission to the museum's exhibits is free, and attendance records underscore continued public interest.

One Museum Guard position administratively established in 1974-75 is requested as a proposed new position.

Authority

Agricultural Code, Division 3, Part 3, Chapter 6 (Sections 4101 through 4106).

II. ADMINISTRATION

The administrative staff of the Museum of Science and Industry operates under the general direction of the Museum Director and provides personnel, budgeting, planning, and clerical services in support of the museum program. This function assures the proper operation and maintenance of all plants and facilities and is responsible for the operation of 26 acres of public parking. *A Personnel Assistant I is being added in 1976-77 to handle an increasing volume of personnel transactions.*

DEPARTMENT OF CONSUMER AFFAIRS

Chapter 1394/70 changed the name of the Department of Professional and Vocational Standards to the Department of Consumer Affairs in order to describe more fully the department's primary purpose of protecting the health, safety and welfare of California's consumers. The legislative intent to promote and protect the interests of the consuming public, and to charge the department with the responsibility for vigorous and effective administration is specifically set forth in the Consumer Affairs Act.

BOARD OF BEHAVIORAL SCIENCE EXAMINERS

The confidential and sensitive nature of services performed by Licensed Clinical Social Workers, Marriage, Family and Child Counselors, and Educational Psychologists necessitates the development and enforcement of professional standards of performance and competence. By means of educational and experience requirements and examinations, the Board of Behavioral Science Examiners assures that minimum standards are met. The Board investigates cases of possible violations or unlicensed practice.

Output

Comprehensive examinations assure that only those demonstrating competence obtain licensure. Investigative and disciplinary actions reduce the opportunity for unethical or improper practice.

BOARD OF CHIROPRACTIC EXAMINERS

The public needs to know that providers of chiropractic services are adequately trained and have met minimum standards of performance for such treatment. Through licensure, continuing education, and the disciplinary process, the Board of Chiropractic Examiners ensures that recognized standards of training and practice are maintained by licentiates, approves chiropractic courses of study, receives complaints and investigates possible violations of the Chiropractic Initiative Act, and polices unlicensed activity.

Output

1. The number of applicants who do not successfully complete the examination and who are therefore denied a license until they can demonstrate the necessary knowledge and skills.
2. The number of complaints investigated which resulted in license revocations and suspensions.

APPROVED CONTROL—CONTINUING EDUCATION SERVICES SECTION (A.C.C.E.S.S.)

The Continuing Education Services Section was established within the department during 1974/75, as required by law, to provide continuing education services to the Board of Registered Nursing and the Board of Vocational Nurse and Psychiatric Technician Examiners—Vocational Nurse Program. Chapter 923, Statutes of 1974, delegated the responsibilities of the A.C.C.E.S.S. unit directly to the two Boards. Therefore, the positions and function of this section were transferred to the two Boards during the 1975/76 fiscal year.

BOARD OF DENTAL EXAMINERS

Dental treatment and care must be performed in a competent and professional manner. To ensure this, the Board of Dental Examiners establishes qualifications for licensure as a dentist, hygienist, assistant, expanded function auxiliary, or professional corporation, administers examinations, approves dental schools and training programs, sets requirements for continuing education, receives complaints and investigates possible violations of the Dental Practices Act and polices against unlicensed practice. *An increase in revenue or a reduction in expenditures will be necessary to alleviate a projected deficiency in this agency's Fund in the 1976-77 fiscal year.*

Output

Effective application screening and testing of candidates identifies those persons capable of performing competently. Investigative and disciplinary actions ensure that these standards are maintained.

STATE BOARD OF GUIDE DOGS FOR THE BLIND

Blind persons need assistance to help them maintain their independence in areas outside of their immediate surroundings. Without this assistance they are subject to serious injury, death, or unhealthy confinement.

It is the primary objective of the State Board of Guide Dogs for the Blind to:

1. Protect the safety of the blind by ensuring that only those trainers and schools of guide dogs possess the necessary qualifications to be licensed
2. Enforce standards of ethical conduct established for such licenses, and to police unlicensed practices.

Output

The board licenses those persons who meet the educational and experience requirements to be guide dog trainers and operators of guide dog schools

BOARD OF MEDICAL QUALITY ASSURANCE ^a

The people of California are deserving of the best possible medical treatment and healing art services. They must be protected from the unethical and/or unlicensed individual who can do harm because of the personal and intimate nature of the services provided.

The objectives of the board are:

1. To protect consumers from unlicensed and/or unethical practitioners.
2. To enforce and strengthen provisions of the Medical Practices Act.
3. To stimulate healing art licensees to become familiar with required rules and regulations for their professions.

To implement the medical malpractice legislation (AB 1xx and SB 24xx) enacted during the Second Extraordinary Session, 34 professional and clerical positions are being added in the current year and 38 in the budget year.

Output

To license those who qualify and provide the consumer with the utmost protection in the marketplace by a careful consideration of complaints and action to insure that health care standards are met as required by law.

- a. Numbers of licenses issued to qualified applicants and denied to those not qualified.
- b. Numbers of complaints and inquiries processed, investigations conducted and disciplinary actions rendered.

^a Effective December 12, 1975, the Board of Medical Examiners was reconstituted as the Board of Medical Quality Assurance per the provisions of Chapters 1xx and 2xx, Statutes of 1975.

ACUPUNCTURE ADVISORY COMMITTEE

The practice of acupuncture is a theory and method for treatment of illness and disability and for strengthening and invigorating the body. As such affects the public health, safety and welfare there is a necessity that individuals practicing acupuncture be subject to regulation and control. A committee exists to advise the Board of Medical Quality Assurance on implementing the provisions of the related laws. *An initial staff level of 1.1 positions is being added in the current year. In the budget year, 1.4 positions are proposed for ongoing program requirements.*

Output

Numbers of qualified applicants approved by the board for certification, and those disapproved for certification who do not possess minimum qualification.

Numbers of complaints and inquiries processed, investigations conducted, and disciplinary actions rendered.

HEARING AID DISPENSERS EXAMINING COMMITTEE

It is estimated that one out of every five California citizens has some degree of a hearing loss. For those who must wear hearing aid devices, there are dangers from unlicensed or un reputable hearing aid dispensers.

The board's objectives are:

1. To protect consumers by investigating and examining applicants for hearing aid dispensers licenses and compliance with all occupational licensing requirements.

2. Discipline those licensed who fail in their public trust.

Legislation will be considered during 1976 in order to provide additional resources to their fund.

Output

1. Number of applicants for licenses who are screened out by the examination process and are denied their license until they can successfully demonstrate they possess the required skills and knowledge.

2. Number of complaints investigated that result in disciplinary actions.

PHYSICAL THERAPY EXAMINING COMMITTEE

Physical therapists in independent practice treat patients who have disabilities resulting from accidents, congenital defects or illnesses. In order to ensure proper patient evaluation and treatment, those persons skilled in the profession of physical therapy must meet the minimum standards established according to law.

This is accomplished by licensing those who possess the necessary qualifications and enforcing standards of ethical conduct established for such licensees and policing against unlicensed practice.

Output

1. The number of applicants who do not successfully complete the examination, and therefore denied a license.
2. The number of investigated complaints which result in license suspensions and revocations which put the unethical, incompetent therapists out of reach of the consumer.

PHYSICIAN'S ASSISTANT EXAMINING COMMITTEE^a

Due to growing shortages and geographic maldistributions of health care services, the state has encouraged the more effective utilization of the skills of physicians by enabling them to delegate health care tasks to qualified physician's assistants. An examining committee was empowered to establish and enforce regulations controlling this category of health care providers. An initial staff level of 2 positions is being added in the current year. In the budget year, 2.2 positions are proposed for ongoing program requirements.

Output

Numbers of qualified applicants approved by the committee for certification, and those disqualified who do not meet minimum standards.
Numbers of complaints and inquiries processed, investigations conducted and disciplinary actions rendered.

SPEECH PATHOLOGY AND AUDIOLOGY EXAMINING COMMITTEE

Many thousands of California citizens are afflicted with serious hearing and disabilities occasioned by congenital disorders, occupational injuries and diction-related dysfunctions. Recognizing the dimensions of their need for professional services, licensure requirements were instituted to ensure that only those possessing the necessary qualifications are licensed.

Output

To guarantee protection of consumers of the state through rigorous, disciplined interpretation of the provisions contained in enabling legislation.

BOARD OF EXAMINERS OF NURSING HOME ADMINISTRATORS

Patients in nursing homes pay for and must be provided with quality patient care which includes a sanitary environment, safeguards against misuse of their funds, a nutritional diet, and quality medical treatment; thus, individuals functioning as administrators must be required to meet minimum standards of competency as established according to the law. The board's objectives are to:

1. Develop, impose and enforce standards that shall be met by individuals in order to receive a license as a nursing home administrator.
2. Receive, investigate and take appropriate action with respect to any charge or complaint filed with the board to the effect that an individual licensed as a nursing home administrator has failed to comply with the requirements of such standards.

Output

The number of applications which are denied due to the lack of good moral character or other basic qualification requirements.

BOARD OF OPTOMETRY

The public needs competent, professional optometric care. To meet this need, the Board of Optometry, licenses individuals and professional corporations in accordance with recognized standards of knowledge and practice; accredits optometric schools and colleges; sets standards for continuing education; receives complaints and investigates possible violations of the Optometry Practice Act. *An increase in revenue or a reduction in expenditures will be necessary to alleviate a projected deficiency in this agency's fund in the current and budget year.*

Output

Thorough examinations, and inspection investigation activities identify incompetent or unprofessional persons. The board denies, suspends or revokes licensure of such persons.

BOARD OF PHARMACY

The distribution and handling of pharmaceuticals, including restricted substances, must be carefully regulated to prevent improper or hazardous usage. To accomplish this, the Board of Pharmacy sets standards for licensure according to recognized standards; approves professional schools and continuing education programs; receives complaints and investigates possible violations; polices unlicensed practice and inspects regularly for compliance with board rules and regulations.

Output

Evidence that the board meets its objectives includes the denial of licenses to those unable to satisfy requirements and the number of suspensions or revocations which result from the investigative process.

BOARD OF REGISTERED NURSING

Registered nurses are responsible for the safe nursing care of the patient as well as the directing of the ancillary nursing team. It is essential for public health and safety that the registered nurse meet high standards of education and training. The board ensures those licensed possess the education and training to provide the consumer with the highest standards of care possible and protects the consumer from the unlicensed or unethical practitioner.

Chapter 923, Statutes of 1974, delegated partial responsibilities of the A.C.C.E.S.S. unit directly to the board. Therefore, 3.7 positions are transferred from the unit to the board in the current and budget years.

Output

The board licenses only those who successfully complete an examination. It reviews courses of instruction and clinical facilities in schools of nursing and accredits such schools. The board also investigates all complaints received, which may result in revocation or suspension of a license.

BOARD OF EXAMINERS IN VETERINARY MEDICINE

Veterinarians protect the health and welfare of animals as well as the public through prevention, control and eradication of animal diseases, and inspection of food products of animal origin. In 1974, the growing need for animal health care necessitated the certification of animal health technicians to assist veterinarians in certain areas. Examinations assure minimum competence. Through licensure and inspections, professional standards of competence are enforced and premises maintained in a sanitary manner. The Board of Examiners in Veterinary Medicine also handles complaints, investigates alleged violations, and polices unlicensed practice.

An increase in revenue or a reduction in expenditures will be necessary to alleviate a projected deficiency in the Veterinary Examiners Contingent Fund in the budget year.

Output

Exacting standards in examinations eliminate unskilled or poorly trained persons. Inspections and investigations generate disciplinary actions, suspending or revoking practice rights of persons who do not comply with board rules and regulations.

BOARD OF VOCATIONAL NURSE AND PSYCHIATRIC TECHNICIAN EXAMINERS

Inadequately trained personnel may render patients poor quality health care services. Through licensure of vocational nurses and psychiatric technicians, the board identifies persons who demonstrate the necessary competence. The development and enforcement of standards of conduct helps to meet the need to protect those receiving care. Educational and training program approval by the board is required. Nursing education consultants assist schools in meeting and maintaining standards. *Chapter 923, Statutes of 1974, delegated partial responsibilities of the A.C.C.E.S.S. unit directly to the board. Therefore, 4 positions are transferred from the unit to the board in the current and budget years.*

An increase in revenue or a reduction in expenditures will be necessary to alleviate a projected deficiency in this agency's Fund in the budget year.

Output

Effective screening and investigative activities reduce opportunities for harmful or unlawful conduct by licentiates. Disciplinary proceedings revoke or suspend privileges of persons performing unprofessionally.

DEPARTMENT OF CONSUMER AFFAIRS—Continued

BOARD OF ACCOUNTANCY

The complexity of laws affecting business operations and taxation often requires the services of certified public accountants and public accountants. When that service is called upon the consumer must be assured that his accounting needs will be carried out in an ethical and lawful manner. To accomplish this task the board establishes and enforces ethical standards created by board regulations and qualifications for licensure and polices against unlicensed practice. *One clerk typist and two auditor positions are proposed for increased workload in 1976-77.*

Output

1. The board requires that certain benchmarks be observed to make certain that the written examination effectively screens out those applicants who are not qualified.

2. The number of complaints which result in license revocation or suspension, conviction, reduction of unlicensed activity.

CEMETERY BOARD

The public needs protection from possible fraud, misrepresentation, or negligence by cemeteries and their representatives. The Cemetery Board's objectives are to ensure that only qualified applicants receive licenses to operate cemeteries or act as cemetery brokers or salesmen; to ensure that those so licensed comply with applicable rules and regulations; to ensure that all trust funds (revocable or irrevocable) are properly placed in trust, invested, and income used for the purpose intended; and to ensure permanence of mausoleums and columbariums. *An increase in revenue or a reduction in expenditures will be necessary to alleviate a projected deficiency in this agency's Fund in the budget year.*

Output

Audit investigations and disciplinary proceedings ensure compliance with legislative intent and protection of consumer investments through formal hearings and license actions.

BUREAU OF COLLECTION AND INVESTIGATIVE SERVICES

Debtors and users of collection agency services require that collection agencies and their employees be scrupulously honest in the handling of collected moneys, accountable for actions, and fair in their dealings as required by law.

The board's objectives are then to:

1. Guarantee only those possessing the necessary qualifications be licensed, certified and registered.
2. Enforce standards of conduct required of licensees, certificate holders and registrants by law and by regulation.
3. Police against unlicensed collection activity.

An increase in revenue or a reduction in expenditures will be necessary to alleviate a projected deficiency in the Collection Agency Fund in the budget year.

Output

1. Evidence of performance is shown by the number of applicants for examination who were unsuccessful in securing qualification certificates.
2. The extensive auditing program conducted and the number of investigations result in the suspension or revocation of licenses.

PRIVATE INVESTIGATORS AND ADJUSTERS

The public must have the assurance that those persons who offer services as private investigators, insurance adjusters, repossessioners, uniformed security guards and private patrol operators are competent, scrupulous and fair in their dealings with their clients and with members of the public; the public also has a right to know that uniformed security guards employed by security companies do not present a hazard to public safety when carrying firearms. The bureau ensures that only those persons who can meet the prescribed qualifications be licensed to perform private investigations, insurance adjusting, repossession and private patrol operations; enforces standards of ethical conduct established for such licensees; polices against unlicensed activity in these occupations; and provides mandatory firearms training and testing for guards and patrolmen who carry firearms.

DEPARTMENT OF CONSUMER AFFAIRS—Continued

Output

The bureau licenses only those who successfully complete an examination, and takes action against violators of its rules and regulations and unlicensed activities.

TAX PREPARERS PROGRAM

In order to protect the public from potential abuses found in the commercial tax preparation industry, the Tax Preparers Program develops registration standards for the regulation of the business practices and advertising of commercial tax preparers. *One clerical position is added in 1975-76 and proposed for 1976-77 for the increased workload of registering tax preparers.*

Output

The registration of a tax preparer may be denied, suspended, or revoked, temporarily or permanently.

BOARD OF ARCHITECTURAL EXAMINERS

The public is subject to serious injury or death should a structure collapse due to faulty design. In order to prevent these occurrences, the Board of Architectural Examiners licenses only those possessing the necessary qualifications, maintains high standards of competence, compliance and ethical conduct, and attempts to prevent unlicensed and incompetent practitioners.

Legislation will be considered during 1976 in order to provide additional resources to their fund.

Output

1. The number of applicants denied licensure due to lack of knowledge and skills.
2. The number of complaints which result in license suspension or revocation, conviction, reduction of unlicensed activity and/or subsequent compliance.

DEPARTMENT OF CONSUMER AFFAIRS—Continued

BOARD OF REGISTERED CONSTRUCTION INSPECTORS

Faulty workmanship, materials and manner of construction of structures seriously affect the health and safety of the consuming public. In order to assure the public of structures meeting the highest of standards of construction, the board registered only those persons who possessed the necessary qualifications as established by the board according to law. *Historically, the board has not received adequate revenue to support its operations. As it does not appear that it will be able to obtain sufficient revenue to meet its objectives, the board is not funded for the remainder of 1975-76 and for 1976-77.*

Legislation will be introduced to repeal the Registered Construction Inspectors Law, fund the costs of the board's closure, refund application and certification fees collected and for the remission of an outstanding \$100,000 General Fund loan. The appropriation amount required is estimated to be \$161,219.

Output

The board, which was organized in 1973-74, had formulated rules, regulations and administrative procedures.

CONTRACTORS STATE LICENSE BOARD

The consuming public is subject to personal and financial injury resulting from (1) unsafe construction and poor workmanship (2) financially irresponsible contractors and (3) fraudulent representation relating to home improvement contracts.

The board's objectives are:

1. To establish construction standards which ensure safe building methods and quality workmanship.
2. To qualify contractors by examination, to establish their construction knowledge and experience and through an independent statement of financial condition and through the bonding process.
3. To establish ethical sales standards to preclude misrepresentation by persons licensed to "sell" home improvements, and to seek injunctive action against fraud when deemed necessary.

Establish five clerical positions with a corresponding reduction in temporary help to meet the increase in workload and to increase efficiency by reducing the required training of temporary employees.

Legislation will be considered during 1976 in order to provide additional resources to their fund.

Output

The Board qualifies contractors by examination for 39 license classifications and suspends licensees when bonding firms cancel or rescind bonds. Resolution of complaints, through conciliation, is indicated by the savings to the public while enforcement activity statistics indicate the results of the Board's compliance efforts.

BOARD OF REGISTRATION FOR GEOLOGISTS AND GEOPHYSICISTS

Geological and geophysical investigations relating to (1) landslides, active faults, earthquakes and land subsidence, (2) ground water and mineral exploration, and (3) planning, design, construction and maintenance of civil engineering projects require degrees of skill and proficiency to avoid death, injury and destruction of property.

The board:

1. Licenses qualified geologists and geophysicists; 2. develops policies, rules, regulations and standards for practice, education and administration of the act, and 3. acts on complaints and violations of the law by licensees and nonlicensees.

Output

Application screening procedures eliminate candidates who lack the necessary qualifications for licensure. Investigations limit the hazard posed by unlicensed persons who attempt to render geologic or geophysical services.

BOARD OF LANDSCAPE ARCHITECTS

Improper location, arrangement and design of development, including the preservation of natural land features, endangers the social, environmental and economic quality of life. In order to assure the consuming public that landscape architects carry on business in a proper manner, the board's objectives are to establish and enforce levels of professional competence, eliminate unlicensed activity and provide consumer/industry education.

Output

1. Only those applicants completing all of the eight-part examination have been admitted to practice.
2. Investigations are conducted as a result of illegal and unethical practices among licensees, and unlicensed activity.
3. Key local and government officials have been apprised of the laws and their application.

BOARD OF REGISTRATION FOR PROFESSIONAL ENGINEERS

Faulty design of structures such as bridges, schools, and skyscrapers, and of mechanical devices and electrical equipment can cause serious injury and death. It is necessary for the board to establish and enforce standards of licensure and conduct and eliminate unlicensed activity.

Five clerk typist II positions are being added in the current year and proposed in the budget year to meet workload increases.

Output

1. Pass-fail rate for licensure.
2. License suspensions, and criminal actions.

STRUCTURAL PEST CONTROL BOARD

The consuming public is subject to serious injury or death through the improper use of pesticides.

The objectives of the Structural Pest Control Board are to establish and enforce standards of competence and integrity, license only those possessing the necessary qualifications and police against unlicensed practice. *An increase in revenue or a reduction in expenditures will be necessary to alleviate a projected deficiency in this agency's Fund in the budget year.*

DEPARTMENT OF CONSUMER AFFAIRS—Continued

Output

The board has established examination criteria which effectively measures the knowledge and skills of the applicants. Complaints against both licensed and unlicensed practitioners are thoroughly investigated and acted upon.

ATHLETIC COMMISSION

Contestants in boxing and wrestling matches are subject to serious injury and death through mismatches and lack of proper medical examinations. The public and State Government suffer monetary losses due to fraudulent promotional practices and improper collection and verification of attendance and revenue. The Commission sets standards and enforces them through examinations, inspections and attendance by Commission representatives at all matches, exhibitions and closed circuit events.

Output

A continuing inspection program discourages fraudulent practices, while medical screening eliminates the participation of unfit contestants. Stated revenues are properly received and audited. Violations result in warnings, suspensions or revocations of licenses.

BUREAU OF AUTOMOTIVE REPAIR

The technical complexity and advanced engineering of the modern automobile has diminished the public's ability to discern honesty, competent workmanship and fair treatment in the automotive servicing and repair market place. The objectives of the Bureau of Automotive Repair are:

1. To make available to the public a forum possessing skill and expertise equal to that of industry to mediate consumer and industry complaints.
2. Establish and enforce full disclosure regulations.
3. Establish accepted trade standards for good and workmanlike repairs.
4. Enforce standards of proficiency and ethical conduct.
5. Police against unlicensed and unregistered activity.

Output

1. Resolution of complaints resulting in cash refunds and work redone satisfactorily.
2. Inspections of official stations resulting in detection, correction of equipment, and calibration defects.
3. Development of comprehensive proficiency examinations.
4. Elimination of incompetent and unethical practitioners.

A pilot program for mandatory vehicle emission inspections added 52 positions commencing September 1975. A second phase, scheduled for late 1976 is proposed and will include 25 stations and 519 proposed positions. The program will be fully operational in the 1977-78 fiscal year. Funding is provided by interagency agreement with the Air Resources Board, to be repaid from the Automotive Repair Fund as revenues materialize.

BOARD OF BARBER EXAMINERS

Persons receiving barber services are subject to physical injury, disease, mental distress and marring of physical appearance from unskilled and improperly trained barbers. The objectives of the board are to: (1) ensure that shops, tools and equipment are safe and sanitary, (2) establish and enforce standards of skill and knowledge for licensees, (3) establish continuing education criteria for instructors, and (4) resolve consumer/industry complaints and eliminate their causes. *A reduction of 0.3 man-year temporary help is proposed in the budget year to reflect reduced workload in a non-renewal license period.*

Output

Workload statistics indicate the examination pass/fail ratio, violations issued against shops and practitioners, and complaint dispositions.

BOARD OF COSMETOLOGY

Improper use of chemicals, instruments and techniques causes permanent physical damage and the spread of contagious and infectious diseases to persons using cosmetology services. The objectives of the Board of Cosmetology are: (1) Establish and enforce standards of skill and sanitation. (2) Identify to the public, through licensure, those who have demonstrated the necessary knowledge and skills. (3) Prevent unsafe and dishonest practices. An increase of 0.9 man-year temporary help is proposed in the budget year to reflect increased workload during a biennial license period.

Output

Fifteen percent of all examinees are not admitted as licensees due to lack of demonstrated skills. Inspections and investigations have been effective in eliminating unsanitary conditions and reducing the incidence of unsafe and dishonest practices.

BUREAU OF EMPLOYMENT AGENCIES

The unemployed, or those seeking reemployment are subject to considerable financial loss when fees are paid and services are not rendered. The objectives of the Bureau are to (1) Establish and enforce standards of ethical conduct and qualifications for licensure, and (2) Eliminate unlicensed practices.

2.5 positions are added in the current year and are proposed in the budget year to implement Chapter 1236, Statutes of 1975, which mandates licensure of musician booking agencies.

An increase in revenue or a reduction in expenditure will be necessary to alleviate a projected deficiency in this agency's Fund in the current and budget year.

Output

The Bureau licenses only those who successfully complete an examination, and polices against both unlicensed activity and against licensed violators of its rules and regulations.

BOARD OF FABRIC CARE

The public is subject to monetary loss from faulty workmanship or incompetence in cleaning or renovating items of personal use, and to physical injury through the misuse of flammable and toxic solvents.

The objectives of the Board are to develop and enforce standards for licensure, eliminate unlicensed practices, educate consumers and industry and resolve complaints.

Output

1. Denial of license to examinees who do not demonstrate necessary knowledge and skills.
2. Numbers of violations issued which result in compliance.

BOARD OF FUNERAL DIRECTORS AND EMBALMERS

Proper handling of human remains is necessary in the interest of public health. The public is also subject to financial loss through fraud or mismanagement of preneed trust accounts. In order to correct potentially hazardous conditions or unlawful practices, the Board licenses only those who demonstrate the necessary skills and knowledge, polices unlicensed activity, inspects premises and accounts, audits trust funds, approves schools, investigates complaints, and imposes sanctions on those violating code provisions and Board regulations.

Output

A preneed audit program was implemented in September 1974. During the 1975-76 fiscal year, the Board will be responsible for the recovery of preneed funeral trust moneys. It will secure convictions and hold disciplinary hearings. Corrections of hazardous and unsanitary conditions are made via the inspection process, and criminal and disciplinary actions are initiated in response to investigations of complaints.

BUREAU OF HOME FURNISHINGS

The sale of upholstered furniture, bedding or waterbeds made with defective, substandard or highly flammable materials poses an unacceptable hazard. Consumers are also subject to fraud from misrepresentation, misleading product claims or false advertising in the purchase of goods. The Bureau's objectives are to ensure that fair and reasonable standards are developed, and that those standards are enforced through laboratory testing, on-site inspections and investigations.

Three positions are added in the current year and are proposed in the budget year to implement Chapter 1183, Statutes of 1972, which requires testing and inspection of upholstered furniture for flammability levels.

Output

Evidence that the Bureau is meeting its objectives includes the number of articles removed from sale, recalled, seized and destroyed, relabeled, or ordered removed from California. Voluntary compliance by industry in response to warning letters and the satisfactory resolution of complaints demonstrate program effectiveness. Disciplinary or civil proceedings further reduce hazardous or unethical practices.

NURSES REGISTRY

Those seeking private nursing care need the assurance of service from properly licensed registries and competent assignees of the registries, and the protection of proper contractual and assignment records. The Nurses Registry sets and enforces standards for the operation of private nursing services, polices unlicensed operation and investigates the fitness of those applying for licenses to operate such services.

DEPARTMENT OF CONSUMER AFFAIRS—*Continued*

Output

Evidence that the Registry is meeting its objectives includes the number of applicants rejected as unqualified or unfit for licensure, and the results of investigations and inspections of both licensed and unlicensed operations.

BUREAU OF REPAIR SERVICES

The increasing complexity of electronic technology, and significant changes in the appliance and electronic repair industry subject the consuming public to fraudulent and deceitful practices.

The objectives of the Bureau of Repair Services are to register all persons engaged in appliance and electronic equipment repair, police false and misleading advertising, enforce rules of full and fair disclosure, resolve consumer/industry disputes and reduce their recurrence and rid the repair industry of unscrupulous dealers.

Output

1. Reduced incidences of false and misleading advertising, and fraud.
2. Better use of informal complaint adjustment method.
3. Development and distribution of consumer/dealer educational material.

CERTIFIED SHORTHAND REPORTERS BOARD

Accurate shorthand reporting aids the Judicial Branch in administering justice. Certification enables those seeking service to identify individuals of demonstrated competence.

Output

The Board sets standards for performance of reporters, reviews training programs in schools and examines applicants in accordance with recognized standards. Criteria for school inspections were developed during 1974/75, and 15 of the 31 "recognized" schools were inspected. This function is now a continuing program component and will be displayed when historical data is available.

DIVISION OF ADMINISTRATION

The department could not function as a cohesive and effective unit without executive leadership and staff support. Decentralization of administrative specialties to the constituent agencies is not economically feasible. Therefore, a management and administrative program has been developed which is an integral feature of the total program activity and is designed to meet the overall goals of the department.

Output

The Directorate is presently implementing a participatory approach to its executive responsibilities. Assisting the executive branch are various ad hoc committees, composed of departmental employees at all levels, which have been charged with appraising existing policies and practices and making recommendations. The Division also provides legal, personnel, budgetary, accounting, auditing, data processing, systems and business services.

The transfer of 3 positions to the Division of Consumer Services and of 3 positions from building maintenance in the budget year will reflect proper organization.

Addition of 14.1 man-years in the current year and 10.6 man-years proposed in the budget year for workload.

General Description

With the augmentation of a Training Officer and an Affirmative Action coordinator during 1975/76, decisions concerning personnel organization and responsibilities will be made. Management studies of several constituent agencies will result in decisions to improve their effectiveness. Continuous reviews of investigative productivity within the Division of Investigation are providing insight for more efficient operational management. The addition of a team of computer programmers in July 1975 and the efforts to improve data processing coordination will be an item of concern throughout the year.

The costs of administration are distributed to all of the Department's constituent agencies by a pro-rata formula based on a ratio of each agency's total expenditures to the total expended by all agencies.

Input			
Expenditures	\$1,598,425	\$1,924,219	\$1,963,882
Personnel man-years	81.5	99.7	100.2

DEPARTMENT OF CONSUMER AFFAIRS—Continued

DIVISION OF INVESTIGATION

Objective and independent investigation and inspection by skilled personnel are required to afford the public maximum protection from incompetent and unethical business practices. The Division provides impartial investigative and preventive inspection services and reduces the cost of these services by (1) proper staff training, (2) better use of manpower, and (3) utilization of sound management principles. *The addition of 18 positions in the current year and proposed in the budget year will fulfill the requirements of AB 1XX for the new Board of Medical Quality Assurance.*

Output

Competency and completeness of investigations are borne out by administrative action taken.

	1974-75	1975-76	1976-77
Investigations:			
Cases opened.....	8,903	9,462	9,935
Cases closed	9,286	9,529	10,005
Cases pending	4,153	4,086	4,016
Citations	122	126	130
Accusations	460	473	487
Statements of issues	31	32	33
Criminal complaints	242	257	265
Found not guilty	59	61	63
Inspections	63,858	64,000	64,000
Notice of violation	10,040	10,050	10,050

General Description

The Division conducts investigations and inspections in accordance with the laws, regulations and policies of the constituent agencies. Based on the Division's findings, agencies may request preparation of documents for administrative or criminal action. The Division is compensated by each using agency for its share of the total hours expended by means of an established rate which encompasses all of the Division's operational costs.

Input

	1974-75	1975-76	1976-77
Expenditures	\$3,438,557	\$4,454,235	\$4,714,957
Personnel man-years	154.7	189.7	189.7

DIVISION OF CONSUMER SERVICES

California consumers are paying close to a billion dollars per year due to (1) shady and illegal business practices, (2) inadequate representation of consumer interests in administrative, legislative and judicial proceedings, and (3) lack of information necessary for protection in today's inflation plagued marketplace. The Division's objectives are:

1. Represent consumer interests at local, state and federal levels in administrative, legislative and judicial proceedings.
2. Institute consumer protection services at local and state levels.
3. Service consumer complaints and reduce complaints at the State level.
4. Educate consumers to protect themselves.
5. Research, analyze and develop systematic solutions to consumer problems.
6. Prevent fraudulent and misleading advertising.
7. Disseminate information to the public regarding departmental activities.
8. Cooperate with consumer groups.

Output

1. Closer, more effective relations with other consumer protection entities will be forged, as well as a program of encouraging and facilitating the establishment of local, state and private consumer service and protection units.
2. During 1974/75, 5,394 complaints were received. 2,545 were referred elsewhere, and 2,549 resolved to the satisfaction of the consumer. A system of referral to the most appropriate jurisdiction will result in a substantial reduction during 1975/76.
3. In-depth research and development of solutions to serious consumer problems will be manifested in the substance and quality of administrative, legislative and educational proposals and problems.
4. The developing ad-substantiation unit's effectiveness will be measured by the number of fraudulent and deceptive ads it is able to terminate, and by the reduction of consumer complaints regarding deceptive ads.
5. The measurement of the public information unit will be the print and electronic media coverage given the department, the visibility of the department as the consumer arm of the State, and the public's awareness of its activities.

General Description

A \$400,000 budget augmentation, in the current and budget year will enable the Division to embark upon its program as highlighted above. Of the augmentation amount in the budget year, \$50,000 is from the General Fund, making this the initial support from the General Fund for this program. The balance of the funding is provided by available surpluses in the Consumer Affairs Fund. The balance of the Division's appropriation will be funded through a pro rata distribution to the Department's constituent agencies based on a ratio of each agency's total expenditures to the total expended by all agencies. *The revision includes the addition of 19 positions in the current year and 16 in the budget year. To more properly reflect actual duties, 3 positions are being transferred in the budget year from the Division of Administration to the Division of Consumer Services.*

DEPARTMENT OF CONSUMER AFFAIRS—Continued

BUILDING MAINTENANCE AND OPERATION

The occupants of the department-owned Consumer Affairs Building are subject to serious injury should the 46-year-old structure be allowed to deteriorate. The purpose of the maintenance and operational program element is to ensure the safety and welfare of the building's occupants and the visiting public.

Output

1. Offices and hallways are painted and renovated on an established schedule.
2. Repairs are made in a timely manner and preventive maintenance is a regular practice.
3. Capital outlay projects include:
 - (1) installation of an air-conditioning system which will be completed during 1975/76, and
 - (2) renovation and re-modification of the building's two (2) elevator systems, which will commence during 1975/76.

General Description

The building is currently occupied by 31 of the Department's Constituent Agencies and by the State Board of Equalization. During 1975/76, outside space will be secured as needed to provide for expansion within the tenant agencies. The costs of the program element are offset by rents collected from the occupants. *The transfer of 3 positions in the budget year to the Division of Administration and the elimination of 0.1 man-year of temporary help will reflect the proper distribution of personnel.*

OFFICE OF THE STATE FIRE MARSHAL

The fundamental objectives of the State Fire Marshal are to prevent the loss of life and property by fire, and to foster, promote and develop ways and means of protecting life and property against fire and panic.

To accomplish these objectives, the State Fire Marshal aids local authorities in the enforcement of all laws and ordinances; prepares, adopts and enforces minimum statewide fire and panic safety standards applicable to statutorially designated occupancies; prepares, adopts and enforces standards for the use and control of hazardous materials; and disseminates information and material relative to new technological developments in the field of public fire safety.

I. PUBLIC FIRE SAFETY

Program Objectives and Description

The primary responsibility of the State Fire Marshal is the protection of life and property from fire. This responsibility is met through the development, maintenance and enforcement of fire safety standards for all educational and institutional occupancies, public assembly facilities, organized camps, buildings over 75 feet in height and in all state-owned/occupied structures. Provisions relative to the control of portable fire extinguishers, explosives, fireworks, cargo tanks used in the transportation of flammable liquids, decorative materials and fabrics, and wearing apparel are also developed, maintained and enforced on a statewide basis.

The State Fire Marshal also conducts investigations to approve and list products found to be in compliance with the adopted standards; conducts arson investigations; and assembles, tabulates and analyzes reports of all fires occurring within the State.

For education and state-owned/occupied facilities for which the State Fire Marshal is responsible, the estimated value is in excess of \$50 billion dollars. Of greater importance than property loss, however, is the life loss potential. Annually, the deaths of approximately 12,000 persons in this country are attributed to fire.

Although most life and property losses attributable to fire involve singular and minor incidences respectively, the potential of a catastrophic occurrence is always present.

It is the lack of these major occurrences which principally mark the effectiveness of the efforts expended.

Authority

Parts 1 and 2, Division 11; Part 2, Division 12; and Part 2.3, Division 13, of the Health and Safety Code.

b. Analysis and development	26.5	24	24	632,180	660,697	716,101

a. Enforcement

Enforcement of adopted standards is conducted through plan reviews of new construction and field or on-site inspections. Basically, the prime responsibility for enforcement rests with local fire authorities. Where there are no such authorities, in all state-owned/occupied buildings, and with regard to cargo tanks used in the transportation of flammable liquids, the State Fire Marshal is charged with direct enforcement responsibilities. In addition, the Department of Health has contracted with the State Fire Marshal for special fire safety inspections and surveys of health care facilities which have entered into provider agreements in conjunction with MEDICARE/MEDICAL programs.

The State Board of Fire Services, a segment within the Office of the State Fire Marshal, is required to conduct studies and make recommendations and reports on such matters as physical requirements, education, and training for fire protection personnel; make recommendations on fire apparatus, equipment, etc.; and recommend basic minimum courses, training and education for fire protection personnel.

Included in *Changes in Authorized Positions* is a decrease in 2.5 man-years in F.Y. 75-76 and 5 man-years in F.Y. 76-77, to reflect a decrease in the reimbursable contract with Department of Health (MEDICAL/MEDICARE). One additional clerk-typist II, administratively approved in F.Y. 1975-76, is requested in support of the Arson and Bomb Investigation Unit.

The State Fire Marshal has provided fire and life safety expertise to the Department of Industrial Relations through Fiscal Year 1975-76. The State Fire Marshal's participation in the Cal/OSHA Plan has been discontinued and a reduction of thirteen (13) positions and their related funds have been reduced in Fiscal Year 1976-77.

Output

During the 1974-75 fiscal year, a total of 7,435 plan reviews and 20,409 field inspections were conducted by the State Fire Marshal.

OFFICE OF THE STATE FIRE MARSHAL—Continued

b. Analysis and Development

This element is divided into four components. These components are: approval and listing services, consumer protection, public information and training and fire statistics. A major portion of the activities conducted within these components are direct support functions to the enforcement element of this program.

Output

Output consists mainly of evaluations, licensing, registrations and tests. In total, these activities numbered 150,908 during the 1974-75 fiscal year. During 1975-76, this number, due to biannual cargo tank registrations, will rise to nearly 180,000. In Fiscal Year 1976-77, this number is expected to drop to approximately 155,000.

II. ADMINISTRATION

Program Objectives and Description

This program consists of executive and support services. These elements are structured and designed to provide executive leadership and to assure that the planning, coordination and application of appropriate statistical, fiscal, legislative and technical information and data necessary to reach departmental objectives are defined and in effective operation.

FRANCHISE TAX BOARD

The objectives of the Franchise Tax Board are to administer the Personal Income Tax Law and the Bank and Corporation Tax Law in a manner which will assure equity for the taxpayers and maximize the State's revenue potential within the framework of these laws; administer the Senior Citizens' Property Tax Law as authorized by the statutes providing partial repayment for real property taxes paid by qualified senior citizens; administer the audits and field investigations with respect to campaign statements and lobbyist reports as authorized by the Political Reform Act of 1974.

I. PERSONAL INCOME TAX

Program Objectives and Description

To administer the income tax withholding law with particular attention toward encouraging voluntary and timely remittance of the taxes which are held in trust by employers; to accelerate the collection of individual income tax; to improve taxpayer compliance; to administer the Personal Income Tax Law in an equitable manner to encourage accurate self-assessments, and to maximize the State's revenue potential within the framework of the laws and available resources.

The Personal Income Tax Law provides the second largest source of General Fund revenue to the State. The use of a withholding-at-source method of collection is equitable to taxpayers and provides revenue receipts to the State evenly distributed throughout the tax year as well as maximum interest to the State. Tax return requirements are imposed on approximately 8.7 million individuals, partnerships, trusts, and estates. Self-assessed taxes will exceed \$2.9 billion annually. Department audit, filing enforcement, and collection activities are designed to protect the tax base and to provide additional revenues of approximately \$80 million annually.

Authority

Government Code Sections 15700-15702.1.
Revenue and Taxation Code Sections 17001-19500.

a. Self-Assessment and Prepayment Activities

The department designs, prepares, and distributes personal income tax forms and provides advisory services to taxpayers regarding the tax laws in order to promote a high level of timely filed returns. As a result of this activity, approximately 8.7 million returns are received, categorized, processed and filed for subsequent reference. The Department of Benefit Payments administers the employer-related aspects of the personal income tax withholding program.

Based on 1974/75 experience and a projected 3% workload growth, an increase of 3.8 man-years and \$30,216 is proposed to process returns and estimate payments.

Also, an increase of \$117,350 in the employer withholding contracts with the Department of Benefit Payments is proposed.

b. Audit Activities

The audit programs are carried out to assure equity for the taxpayer and to maximize the state's revenue potential within the provisions of the Personal Income Tax Law. The mathematical verification of the returns, various desk audit programs, and field audit of selected returns will generate in excess of \$65 million in revenue each year.

A 1.5 man-year and \$26,216 increase in clerical support is proposed to process additional workload resulting from the 1975/76 budget augmentation in personal income tax audit functions.

c. Filing Enforcement Activities

The filing enforcement programs are designed to identify and secure returns from all persons subject to the Personal Income Tax Law filing requirements. Information from various sources is used to identify the nonfiler. Field audits are performed to determine proper residency and special investigations are made when it appears that there has been fraud or other criminal violations of the Personal Income Tax Law. These programs will produce additional revenue of approximately \$15 million.

Output

d. Collections

The collection policy of the Franchise Tax Board is to pursue a reasonable course of action which will protect the revenue base of the State of California, encourage maximum self-compliance of our income tax laws and accomplish this in a manner which will extend to each taxpayer due process of law, equitable treatment and consideration for the individual's dignity.

An increase of 2.1 man-years and \$34,641 is proposed to provide steno and legal services to support expanded collection efforts as a result of the 1975/76 budget augmentation.

II. BANK AND CORPORATION TAX

Program Objectives and Description

To administer the Bank and Corporation Tax Law in a manner to assure equity, to encourage accurate self-assessments, to maximize the state's revenue potential and to protect the tax base, all within the framework of the laws and available resources.

The Bank and Corporation Tax Law provides the third largest source of General Fund revenue to the state. It imposes a franchise tax on businesses in California. An estimated 250,000 banks and corporations are subject to taxes in 1975/76, increasing to an estimated 255,000 in the 1976/77 fiscal year. Self-assessed taxes of about \$1.2 billion are anticipated in each fiscal year. Audit, filing enforcement, and collection activities are conducted to enforce the provisions of the law and will generate additional revenue of approximately \$95 million annually.

Authority

Revenue and Taxation Code Sections 23001-26481.
Government Code Sections 15700-15702.

a. Self-Assessment Activities

The department designs, prepares, and distributes corporation estimate and return forms and performs publicity and advisory services which are aimed toward a high level of timely filing and accurate assessment by corporate taxpayers. The department receives, processes and accounts for about 300,000 tax estimates and 255,000 tax returns and associated remittances. In cases of returns not accompanied by full payment, accounts receivable are established and billings are made to collect the total tax due. Returns are classified into various categories and filed for reference, checking, compliance, and audit activities.

Based on 1974/75 experience and a projected 2% workload growth, a 0.9 man-year and \$8,037 increase is proposed to process returns and estimates.

Totals	144.7	146.1	147	\$2,287,091	\$2,677,321	\$2,736,315

b. Audit Activities

The audit programs are designed to assure equity for the taxpayer and to maximize the state's revenue potential within the provisions of the Bank and Corporation Tax Law. Mathematical verification of the returns, various desk audit programs, and field audit programs generate additional revenue in excess of \$90 million annually.

The field audit programs are administered by two Eastern Offices (New York City and Chicago) and sixteen California district offices.

This proposed increase of 6 man-years (5 auditors and 1 clerk typist) and \$148,246 represents the second phase of a three-year plan to add 15 audit positions to the out-of-state field audit program.

These out-of-state audits typically produce substantial revenues for each dollar of audit cost. The five audit positions should generate about \$2 million of additional revenue for the General Fund.

c. Exempt Corporations

Approximately 4,400 applications for exemption are received and processed annually to determine whether the exemption should be granted or denied. The majority of applications require correspondence to make a proper determination. About 13,000 exempt corporations are audited annually to make sure that they are not engaging in activities that may jeopardize their exempt status. In most of these audits, correspondence is required.

* Program is not intended to be revenue producing, but is a check to see that exempt corporations are entitled to that status.

d. Filing Enforcement

This element represents a new dimension in the corporation collection program—an expansion of the collections effort to capture taxes due from corporations operating under suspension by the Franchise Tax Board. Additional revenue of about \$1 million annually will be generated by this program.

e. Collections

The department's goal is to pursue a reasonable course of action which will protect the revenue base of the State of California and encourage maximum self-compliance of our corporation tax laws. About \$30 million will be collected annually.

This proposal provides a 0.4 man-year and \$7,309 increase in steno services and legal support for the expanded effort resulting from the 1975/76 budget augmentation.

III. SENIOR CITIZENS PROPERTY TAX ASSISTANCE LAW

Program Objectives and Descriptions

To administer the Senior Citizens Property Tax Assistance Law in such a manner as to assure proper payment of assistance claims as authorized in Sections 19501 through 19540 of the Revenue and Taxation Code. The principal program activity is the receiving, processing, perfecting and validating of claims for property tax assistance. The law requires the submission of tax assistance claims after May 15 each year and before August 31. The major portion of program activity is performed between May and October of each year. In addition, the law requires that assistance be granted to claimants filing incomplete claims. This results in substantial correspondence or contacts with the claimants to obtain the missing data.

IV. CONTRACT WORK

Program Objectives and Description

To service contracts entered into with all other entities. The availability of sophisticated EDP equipment and skilled personnel is enabling the department to meet the growing demand for services. All contractual costs relating to these services are entirely reimbursable to the department. In addition, the increased work reduces the hourly charges for the computer time in all of the department's program.

An increase of 14.7 man-years and \$209,526 is proposed to provide the necessary workforce to service the anticipated contracts. Reimbursements are estimated to increase by \$422,000; therefore, resulting in a net decrease of \$212,474 to the department's General Fund support.

FRANCHISE TAX BOARD—Continued

V. POLITICAL REFORM AUDIT

Program Objectives and Description

To conduct the audits and field investigations required by Sections 90000 through 90006 of the Government Code in an unbiased objective manner and to report, in detail, the results to the Fair Political Practices Commission.

The Political Reform Act of 1974 requires the staff to make audits and field investigations of campaign statements and lobbyist reports filed with the Secretary of State. The department is *not* required to audit campaign statements for federal or local offices or statements by candidates for Controller and members of the Board of Equalization.

The department must also audit statements filed by: committees supporting or opposing the above candidates; committees supporting or opposing statewide measures; any state or county central committee or independent committee which spends \$10,000 or more; and lobbyists.

A \$713,091 increase is proposed to provide for the full year costs of those positions approved in the 1975/76 budget.

Authority

VI. LEGISLATIVE MANDATES

Program Objectives and Description

Section 2231 of the Revenue and Taxation Code requires the state to pay local governmental units the cost of any new program or increased level of service of a program mandated by legislation enacted after January 1, 1973. The department has one legislative mandated program which requires local agencies to report owners of substandard rental dwellings to the Franchise Tax Board if violations have not been corrected within the allowed time. The department will disallow certain expenses derived from rental of defined substandard housing, for purposes of determining the liability pursuant to the Personal Income Tax Law and the Bank and Corporation Tax Law.

Program Requirements	1974-75	1975-76	1976-77
Continuing program costs (<i>General Fund</i>)	\$10,454	\$35,000	\$52,946

VII. ADMINISTRATION

Program Objectives and Descriptions

To provide that the Personal Income Tax Law, the Bank and Corporation Tax Law, the Senior Citizens Property Tax Assistance Law and the Political Reform Act of 1974 (Chapter 10), including recent statutory changes to these laws, are administered in an equitable and effective manner.

Management and staff services provide overall planning and administrative support to the programs in the form of executive management, fiscal and personnel administration, statistical research and reporting, program planning (management and technical analysis, training assistance, budget and cost information), supply and maintenance services, and investigations.

An additional one man-year and \$5,563 is proposed to provide support for the expanded contract work program.

DEPARTMENT OF GENERAL SERVICES

The objectives of the Department of General Services are to: a. Meet the varied responsibilities for management review, control and support assigned to it by the Governor and by statute; b. Provide supportive services to operating departments with greater efficiency and economy than they can individually provide for themselves; c. Increase effectiveness and economy in the administration of state government by establishing and improving statewide standards and guidelines and by innovating and implementing constructive changes in governmental policies and procedures.

I. PROPERTY MANAGEMENT SERVICES

Program Objectives and Description

With a multimillion dollar investment in facilities for state offices and employees, centralized responsibilities for planning, acquisition, design, construction, maintenance and operation are needed to avoid duplication of effort and uncontrolled investment in office space. This is achieved in the following ways: (a) Providing adequate space for state operations at a cost below that which each agency could provide for itself; (b) Assuring protection of lives and property in public buildings and hospitals through design and construction supervision; (c) Insuring that facilities constructed with state funds are accessible to the physically handicapped; (d) Establishing uniform public health and safety regulations for building construction; (e) Providing impartial hearings for the general public and construction industry in their interactions with state agencies; (f) Acquiring, managing and disposing of real property (except leases) for state agencies, and providing public service facilities with economy of operations and uniform practices for protecting the public's interests and insuring equitable treatment of private property owners; (g) Preserving the state's capital investments in buildings, grounds, and equipment through an efficient and effective centralized maintenance and operation program.

a. Architectural Consulting and Construction Services

Architectural and Engineering Services are in support of the state building construction program. Related services include advertising and administration of contracts, and supervision and inspection of construction projects. It also involves review of plans and specifications on all projects which utilize state funds to determine compliance with the Physically Handicapped Law and review of plans developed by local school districts for public school construction to assure compliance with the Field Act for safety of school children. Similar services are provided for hospital construction through contract with the Department of Health. Also included is field inspection to ensure compliance with the plans and specifications.

The Office of Architecture and Construction, as renamed "Office of the State Architect," is embarking on the use of new concepts for buildings. Starting with the State Office Building Program proposed in this budget, the state Architect will begin to reverse the existing high cost, privately owned, State-leased office building program.

The design of new State office buildings must be responsive to at least five concerns: human, environmental, cost, social and community.

To be humanly responsive, facilities will be smaller scale, less institutional, using softer and warmer materials and integrated with usable and inviting open spaces.

To be environmentally responsive, architects must recognize that the era of cheap energy is over and use common sense designs for local conditions and climate which would minimize the need for energy intensive, polluting systems. For example, designs should use recessed shaped and operable windows, sheltered arcades and breezeways, shaped courtyards and extensive landscaping.

To be cost responsive, careful architectural design can realize up to 80% reduction in energy operating costs by using less monolithic materials and avoiding glass and steel towers.

To be socially responsive, smaller increments of construction means more adaptability to future uses, greater participation by smaller contractors through unit bidding, and more state encouragement of affirmative action in the building process.

To be community responsive, state offices in downtown locations would intermix state and private uses in single buildings and promote diversity of use through time.

Design can be kept direct, personal, and small scale so it is responsive to change and correction, because now, both humanity and nature have become victims of institutionalized bigness. Many systems are best designed around the most coherent, smallest, and most independent components possible.

Applying these concerns, the design of State office buildings and facilities will reflect an emergence of an adaptive, small-scale technology, methods and equipment that are: (1) cheap enough to be accessible to nearly everyone, (2) simple enough to be easily maintained and repaired, (3) suitable for small-scale application, (4) compatible with individual needs for creativity, and (5) self educative in environmental awareness.

Four positions are added in the current year and 3.5 in the budget year to handle increased workload relating to Handicapped Law Conformance and Construction Inspection programs. Chapter 906, Statutes of 1975, created the State Historical Building Code Advisory Board which is located organizationally within the Office of the State Architect.

Output

1. Architectural and Engineering Services:			
Basic architectural and consulting services:	1974-75	1975-76	1976-77
Construction value of projects	\$33,737,130	\$33,068,000	\$37,036,000

Expenditures	\$2,525,795	\$3,682,451	\$3,802,702
Man-years	84.2	125.3	124.8

b. Buildings and Grounds

The Buildings and Grounds Division maintains and operates State office buildings, grounds, and surplus property. The Division also performs building alterations, utilizing either its own staff or private contractors.

Nine positions are added in the current year in response to requests for service by various state agencies. An additional 13 positions are included in the budget year for assuming maintenance and operations responsibility for the Santa Ana State building.

Output

c. Long Range Facilities Planning

The Long Range Facilities Planning Office develops and maintains long range plans for the major and minor metropolitan areas within the state to determine future agency space requirements in those areas. In conjunction with these plans, the office also plans and develops, to the point of implementation, state office facilities in response to requirements set out in the respective long range facilities plans and performs location feasibility studies and economic analyses. Long Range Facilities Planning also is responsible for the review of space requests to insure their compliance with long range plans in effect in a given area. Other responsibilities include the review and maintenance of the Capitol area plan, performance of parking studies, and development of the five-year capital outlay program. In addition, many special projects and studies on related subjects are undertaken for the legislative and executive branches of government. This office provides staff to the Departmental Environmental Review Committee, provides environmental review services to all departments and performs environmental studies and reports as required by the California Environmental Quality Act.

One additional professional position is included in the current year for contractual services to state agencies involving environmental impact studies.

	1974-75	1975-76	1976-77

Man-years.....	9	10.7	9.7

d. Real Estate Services

The Real Estate Services Division performs three major real estate services for State Government: acquisition, property management and sales. The acquisition function consists of the following specific activities: site selection, appraisal, appraisal review, negotiation and relocation services. Site selection involves providing real estate expertise to agencies in helping select the best site available. Appraisal involves collecting and analyzing data required to estimate market value. Appraisal reviews are made to insure that the State pays, and the property owner receives, fair market value. Negotiations are conducted with property owners on the basis of the approved appraised value. Relocation services are provided to owners and tenants to ensure they receive the advice and/or funds to relocate as provided under law. Property management involves the management of State-owned properties acquired but not yet occupied by the purchasing agency, and evaluating the leasing of State-owned property not under the jurisdiction of the Department of General Services. Real estate sales is responsible for the disposal or transfer of State property no longer needed for State use.

Nineteen positions are added in the current year and nine positions are proposed for 1976-77 to handle work increases for this unit.

Chapter 1489, Statutes of 1969 requires public agencies, including the state, to provide relocation assistance when acquiring real property for public use. In some instances, those relocated have been unaware of available assistance and must be located. The time involved in finding those persons may exceed the availability of the original acquisition funding. This has occurred with persons relocated as a result of land acquisition associated with the State Capital plan.

To provide funding for such relocation assistance, legislation will be sought to authorize use of the Surplus Property Account (Gov. Code 15863). This legislation will also provide for an appropriation of \$44,846 to repay an emergency fund loan made to the Department of General Services to pay existing relocation assistance claims.

DEPARTMENT OF GENERAL SERVICES—*Continued*

e. Space Management

The Space Management Division provides centralized and economic statewide managerial services for assignment, coordination and management for all state-owned and leased non-institutional office and warehouse space.

Seven positions are added in 1975-76 and 9 positions in 1976-77 for increased space planning and lease negotiation workload.

Output	1974-75	1975-76	1976-77
Space managed (square feet)	28,951,600	30,000,000	31,200,000
Space planned (square feet)	1,742,600	2,047,594	2,125,676
Leased space (in dollar value)	\$32,346,946	\$34,000,000	\$37,000,000
Alterations (in dollar value)	\$2,477,604	\$2,429,477	\$2,648,501
Input			
Expenditures	\$1,528,556	\$2,005,301	\$1,925,777
Man-years	58.6	65.2	67.2

f. Building Standards Commission

The State Building Standards Commission reviews building regulations promulgated by various state agencies for conflict, overlap, duplication, nomenclature and arrangement. It also assures conformance to nationally accepted performance standards, publishes and maintains such regulations in Title 24 of the California Administrative Code and interprets such regulations upon request.

Input	1974-75	1975-76	1976-77
Expenditures	\$39,211	\$57,706	\$60,014

g. Rented Buildings

This element provides funds for rental of buildings to the Department of General Services and for subleasing to state agencies. The standard rental rate for 1976-77 is 50 cents per square foot for office space and 13 cents per square foot for storage space. Included in this element are funds for amortizing loans of Public Building Construction Fund buildings, building insurance premiums, and building maintenance services.

Input	1974-75	1975-76	1976-77
Expenditures	\$15,783,895	\$16,737,196	\$17,499,745

h. Minor Capital Outlay

Input	1974-75	1975-76	1976-77
Minor capital outlay expenditures	\$99,303	\$249,145	\$249,145

i. Property Acquisition Act

Government Code Sections 15350-15865 provide that the Department of General Services has jurisdiction over acquired property under the Property Acquisition Law and land declared surplus to the state's needs. It also provides that the proceeds from the sale and rentals of such properties shall be deposited in the General Fund for appropriation to the Department of General Services to provide maintenance and improvements to acquired property.

Input	1974-75	1975-76	1976-77
Expenditures	\$1,628,421	\$1,481,526	\$1,506,526

j. Physically Handicapped Plan Checking

All plans and specifications for any building or facility purchased by state funds are reviewed for the purpose of ensuring compliance with the American Standards Association Specifications A117.1-1961 minimum standards relating to the accessibility and functional use of such facilities by the physically handicapped. Funding is provided by a filing fee which is established by the Department of General Services, deposited in the General Fund and continuously appropriated (Government Code Section 4454) without regard to fiscal year.

Input	1974-75	1975-76	1976-77
Expenditures	\$128,311	\$122,146	\$122,146

II. STATEWIDE SUPPORT SERVICES

Program Objectives and Description

To fulfill their program responsibilities, state agencies require support services for business transactions and activities which are basic to their organizational functions. These operational requirements include procurement of materials, data processing services, communication, transportation, printing, security, and related business and office services.

Other state agency support requirements, on a periodic basis, include consulting services for legal contracts and insurance management. Additionally, licensing agencies require services of hearing officers for alleged violations by license holders, and school districts and local government need assurance of adequate funding for public works projects.

These diverse services are more effectively and economically provided under a consolidated program which centralizes resources, capabilities, talents, and facilities for efficient response to support requirements of client state agencies.

Authority

- Administrative hearings: Administrative Procedure Act, and Government Code Sections 11380, 11409, 11502, 13370-13370.5, 13371-13374, 11500-11528, and 27727.
- Communications: Government Code Section 14931.
- Fleet administration: Government Code Sections 13950-13956, 14615, 14621, 14669, and 14675-14678; Board of Control Rules and Regulations Articles 8 and 15; and State Administrative Manual, Sections 4100-4300.
- Insurance services: Government Code Sections 11007.5, 11007.7, 14848, and 18310; State Administrative Manual Sections 2500-2520, 2530, 2541, 2560, 2581-2582.1, 8576, and 8776-77.
- Legal services: Government Code Sections 14610 and 14780.
- Local assistance: Government Code Section 15500; Education Code Sections 19551-19689.
- Management services office: Government Code Sections 11152, 14600, 14607, 14615, 14740-14768 and State Administrative Manual Sections 1600-1653.
- Office services: State Administrative Manual Sections 1252, 1253, 2121-2122.26 and 2880-2883.

DEPARTMENT OF GENERAL SERVICES—Continued

- i. Procurement: Government Code Sections 14780-14814, 14860, and 14880-14922.
 j. Security and protection: Government Code Section 14613 and Penal Code Sections 830.2 and 830.4.
 k. State printing: Government Code Sections 9700-9768, and 14850-14877 and State Administrative Manual Sections 2802-2840 and 3122.2.
 l. Small business procurements and contracts: Government Code Sections 14835-14842.
 m. Motor vehicle parking facility: Government Code Section 14678.

a. Administrative Hearings

The Office of Administrative Hearings conducts quasi-judicial hearings for various state or public agencies in connection with the issuance, renewal, suspension or revocation of licenses under the Administrative Procedure Act. The office also compiles and publishes the California Administrative Code which consists of state agencies' rules and regulations, and conducts studies in administrative law and procedure.

Since January 1972, the office has conducted categorical aid hearings for the Department of Benefit Payments. A contract to continue this program through 1975-76 has been executed. An addition of 35 positions is included in 1975-76 to perform the fair hearing function for the Department of Benefit Payments.

Two positions are added in the current and budget years to handle additional workload resulting from an increase in cases filed and longer hearings.

One man-year of temporary help is added in 1975-76 and 1976-77 as a result of increased workload associated with revising and indexing the California Administrative Code.

Output

	1974-75	1975-76	1976-77
Hearings completed (excluding categorical aid hearings)	2,918	3,213	3,213
Folios of transcript.....	161,054	160,000	160,000
Pages of regulations published	11,313	11,900	12,400

Input

Expenditures	\$2,223,120	\$2,708,480	\$2,004,883
Man-years	91.3	99.1	64.1

b. Communications

The Communications Division is responsible for providing telecommunications services to all state agencies to meet their operational requirements. Services are provided for radio, telephone, teletype, closed circuit TV, emergency (911) telephone, data transmission facilities, and any special telecommunications facilities. Service includes consulting, engineering, installation, maintenance, specifications, Federal Communications Commission license applications, equipment reviews, special studies and management of state telecommunications facilities and equipment.

Output

	1974-75	1975-76	1976-77
Radio Management:			
Total units serviced	26,050	26,337	29,004
Units per engineer	617	617	617

Man-years	289.7	315.7	315.7

c. Fleet Administration

The Fleet Administration Division establishes policies and procedures on all aspects of state-owned vehicles. Inspectors of automotive equipment are available for consultation to all agencies for determination of required repairs, periodic safety checks, replacement reviews, considerations of agency vehicles needs, proper utilization and other automotive management problems.

Garage operations at 10 locations provide some or all of the following services in support of state agencies: tripper pools for short-term assignment of passenger cars to state employees, long-term rental of vehicles to agencies, preventive maintenance, gas, oil and car wash, auction of used vehicles and air flight services. Parking services for state employees and the public in major urban areas are also administered by the division.

d. Insurance Services

The Insurance Office provides centralized economical management of State insurance requirements. Services include analyzing insurance needs of State and local agencies as well as negotiating for insurance procurement necessitated by such analysis. Services also include consulting and advising agencies on risk management problems, administering a comprehensive program for recovery of damages to State owned vehicles, administering the Governor's Driver Accident Prevention Program and the Deferred Compensation Plan for State Employees.

One position is added in current and budget years to handle increased workload in the Deferred Compensation Program.

Man-years	10.1	12.1	12.1

e. Legal Services

The Legal Office provides legal services to the Department of General Services, the Department of Finance, and various boards and commissions. The function of the office is that of house counsel which includes giving legal advice on new and ongoing programs, the advocacy of the department's position in a wide variety of situations, the publishing of opinions, and the drafting and review of legal documents. The Legal Office also provides centralized review of a variety of transactions arising out of the operations of State agencies which by law are subject to the approval of the Department of General Services. The review is for the purpose of assuring legality, statewide uniformity, and compliance with the policies of the Department of General Services in regard to its business management of State affairs. A major objective in recommending appropriate courses of action is to avoid involving the State in unnecessary litigation.

Output

	1974-75	1975-76	1976-77

Expenditures	\$424,457	\$535,325	\$569,037
Man-years	16.6	18.7	18.7

f. Local Assistance

The Office of Local Assistance administers the State School Building Aid Law, under which financial assistance is made available to school districts for acquisition and development of school sites, construction or reconstruction of school buildings, and purchase of school furniture and equipment. This assistance is provided to districts experiencing significant growth as well as those having buildings which do not meet earthquake safety requirements.

Other activities include: (1) partial reimbursement to counties for expenditures made in providing legal counsel for indigents, (2) investigation of unused school sites to determine whether a district will make payments to the state for nonuse, and (3) administration of other programs of financial assistance to local agencies as assigned.

An additional 2.5 positions is included in 1975-76 to handle increased workload in the State School Building Aid program and Unused Site Investigation Program.

A reduction of 7.5 positions is made in 1976-77 to reflect a decrease in the workload in the State School Building Aid, Emergency Flood Relief, and Unused Site Investigation programs.

Output

g. Management Services

The Management Services Office provides a variety of support services as follows:

1. Accounting and financial services to the department, smaller state organizations, and various boards and commissions.
2. Data processing services including a full-range of personnel and data entry services related to electronic data processing support.
3. EDP education including courses for both EDP technical and "user" operations and management personnel.
4. State records service including directing the statewide paperwork management program, and providing assistance in forms control and design, microfilm utilization, records storage and disposition.
5. Consulting services which provides analytical skills to supplement other organizations.

One position is added in 1976-77 to meet increased consulting services workload.

h. Office Services

The Office Services Division provides state agencies with supportive services, office machine repair, reproduction, and business equipment management services. Supportive services include: (a) Mail centers in office buildings Nos. 1 and 9 which distribute U.S. and interagency mail to the building tenants, provide for external building messenger service, prepare freight and mail for shipment, and also receive and deliver supplies, materials, and equipment; (b) The interagency mail and messenger unit distributes mail between state agencies; and (c) Automatic typing and dialing dictation services are provided by the word processing center.

The Office Machine Repair Unit provides for the rental, maintenance, and repair of office machines and also advises and aids in evaluations provided by the Office of Procurement. The reproduction unit provides "job-shop printing", addressograph and reproduction services to client agencies. It also advises agencies on reproduction equipment and methods.

The Business Equipment Management Unit is giving full time attention to the reduction of the State's total copying and business communication costs.

An addition of 11.5 positions in 1975-76 and 17.5 positions in 1976-77 is made to handle increased office machine repair, reproduction, and interagency mail workload.

Output

i. Procurement

The procurement element includes three components: direct purchasing, central stores, and traffic management.

Purchasing processes requisitions of state and local agencies including developing and circulating bid invitations, awarding bids, and issuing purchase orders. It also provides overall direction and review of purchasing methods and techniques, establishes product standards, tests for compliance with standards, coordinates consolidated purchase projects and programs, and conducts training programs for agency receiving personnel.

Central stores buys operating supplies in large quantities at maximum discounts for resale to state agencies, provides for sale and distribution of state publications, and reviews equipment disposed of by state agencies and selectively obtains, refurbishes, and resells such used equipment to other state agencies. In addition, this component provides for the centralized purchase, storage, and distribution of canned fruits and vegetables to support the institutional feeding programs of the Departments of Health, Corrections, and Youth Authority.

Traffic management provides traffic services and reviews state shipping and freight receipt practices.

One position is added in 1975-76 and 1976-77 to render traffic assistance in Southern California and to negotiate master service contracts for commercial moving services.

An additional 0.8 position is included in the current year to maintain the existing level of service, while a position is temporarily loaned to the Department of Finance, EDP Control and Development.

Output

1. Direct Purchasing:

Purchasing:	1974-75	1975-76	1976-77
Cost of purchasing as percent to total purchasing.....	1.3%	1.3%	1.3%
Purchasing process interval (in days)	30	27	26
Quality Control:			
Product evaluations	816	930	950
Quality control actions	637	728	750
Cost recovery percentage.....	100%	100%	100%
2. Warehouse—Resale:			
Central Stores:			
Service level—items in stock when requested.....	90%	92%	93%
Ordering processing interval (in days)	5.6	5	5
Documents:			
Services level (in days)	4.6	4	4
Property Reutilization:			
Savings achieved.....	\$380,000	\$400,000	\$450,000
Cost recovery percentage.....	100%	100%	100%
Traffic Management:			
Freight bill audits.....	16,300	16,500	17,300
Adjustments received for audits	150,000	150,000	158,000
Traffic assistance requests	1,593	1,700	1,800
Loss and damage claims filed.....	62	65	68
Cost recovery percentage.....	100%	100%	100%

j. Security and Protection

The State Police Division provides police and security service to State facilities and occupants. Police service is normally provided when the use or occupancy of property is at its maximum. Police service is oriented towards the control and protection of individuals using state property. Security service is normally provided when the use or occupancy of property is at a minimum. The division provides a full range of police services including basic criminal and noncriminal investigation, protection of constitutional officers, crowd control, motor and foot patrol, air surveillance, explosive ordnance disposal and administration of the employee protection program.

Twelve additional positions are included in 1975-76 and 10.8 positions in 1976-77 for additional security contracts with various state agencies.

Output

	1974-75	1975-76	1976-77
Employees protected (pro rata)	57,200	63,738	63,738
Parking square footage protected (pro rata)	12,200,000	11,988,661	11,988,661

DEPARTMENT OF GENERAL SERVICES—Continued

k. State Printing

The Office of State Printing provides printing services for the Legislature and for all State agencies except the University of California that include: 1) Legislative printing—printing of bills, records, documents and reports necessary to conduct the business of the Legislature; 2) Operation of the Legislative Bill Room which distributes legislative printed material to the Legislature and the general public; 3) State agency printing—printing of forms, records, reports and publications necessary to agency operations, including distribution of State materials printed under the Library Distribution Act; 4) Elementary school textbook printing—textbooks ordered by the Department of Education for distribution to local school districts; 5) Hand bound library and legislative publications; and 6) EDP tab card production.

Output	1974-75	1975-76	1976-77
Legislative printing (number of measures and resolutions printed)	5,000	5,500	5,500
Publication printing (number of orders)	1,650	1,700	1,700
Job work printing (number of orders)	24,100	24,500	24,500
Textbook printing (number of books)	3,387,007	4,000,000	4,000,000
Hand binding (number of books)	100,000	105,100	105,100
EDP tab cards (number of cards)	3,100,000	3,000,000	3,000,000
Input			
Expenditures	\$22,357,472	\$27,018,744	\$28,443,074
Man-years	691	696.4	696.4

l. Small Business Procurements and Contracts

The Office of Small Business helps facilitate small business participation in state procurements and state construction contracts. This goal is accomplished through seminars in prequalification, bidding, and financing; coordination with federal, state, and private organizations; and the compilation of prequalification listings.

Three previously federally funded positions are continued to conduct prequalification assistance seminars for small businesses. Two clerical positions are added to handle increased workload related to pre-screening small business prequalification applications.

Output	1974-75	1975-76	1976-77
Number of additional small business prequalifications	1,500	2,000	3,000
Dollar value of small business participations	\$18,500,000	\$35,000,000	\$45,000,000
Input			
Expenditures	\$116,423	\$200,217	\$263,588

m. Motor Vehicle Parking Facilities

Government Code Section 14678 provides for the acquisition by lease or other means of real property and the construction, operation and maintenance of motor vehicle parking facilities thereon for state officers and employees. This section provides that revenue received may be used to finance construction and maintenance of parking lots. This program covers 6,800 spaces in lots throughout the state.

Input	1974-75	1975-76	1976-77
Expenditures	\$665,040	\$645,460	\$753,508

DEPARTMENT OF GENERAL SERVICES—Continued

III. ADMINISTRATION

The department's administrative program consists of executive and staff support elements that include the Executive Office and the Administrative Services Division. Together, these elements provide fiscal, personnel, training and management advice and services to the department's line programs. In addition, the administration is responsible for implementation of the department's Equal Employment Opportunity and Affirmative Action Programs.

Six positions are added in 1975-76 to develop business and technical assistance resources with emphasis on procurement opportunities for minority and small businesses. Funding for this program will be provided by the Federal Office of Minority Business Enterprise.

Need

The overloaded condition of the courts and the increasing number of claims filed against the state make it essential that as many claims as possible be settled by administrative action.

The size and increasing complexity of state government requires that uniform rules and regulations concerning fiscal matters be established to provide equitable treatment of claims against the state.

Effective utilization of the innovative resources of state employees for achieving greater economy and efficiency in conducting state business requires an organized system for soliciting and evaluating employee suggestions.

Objectives

To consider and settle claims against the state in an orderly and impartial manner and reduce the number of matters requiring legislative review or judicial adjudication.

To provide equitable allowances to state employees for travel and movement of household goods.

To protect the public against arbitrary or capricious acts of state agencies in the procurement of supplies and equipment.

To reduce state expenditures and increase operating efficiency through utilization of state employee suggestions, by recognizing those employees for acts exceeding normal job responsibilities.

Authority

Government Code Sections 905.2, 912.8, 11031, 11270, 13920, 13940, Penal Code, Revenue and Taxation Code, Code of Civil Procedure, Welfare and Institutions Code, Education Code, Health and Welfare Code, Military and Veterans Code, and others.

General Description

The Board of Control receives, processes, and investigates all claims for money or damages against the state. Tort liability claims, claims of citizens benefiting the public, and aid to victims of crimes of violence claims approved by the board are paid from funds appropriated for that purpose. All other claims approved by the board are referred to the Legislature for payment under a quarterly omnibus claims bill.

The Board of Control also reviews numerous fiscal and related transactions including discharge of accounts receivable of the state; refunds, credits, and cancellations of taxes; sale and disposal of unclaimed property; transfer of funds between state agencies; and cash merit awards. The board is also charged with determining the pro rata share of statewide administrative costs payable by each state agency, determining location of headquarters for purposes of travel claims, holding hearings on purchase protests, and other matters.

The statewide suggestion system is administered by a five-member Merit Award Board appointed by the Board of Control. Activities include coordinating and promoting the program; giving guidance and assistance to all departments; reviewing suggestion evaluations to assure complete, accurate and objective reports; notifying employees when their suggestions are not adopted; and developing improved standards and policies for the conduct of the program.

In the 1975-76 Governor's Budget the Board of Control was included within the budget for the Department of General Services. For fiscal year 1976-77 this budget is being shown separately. Further, direct support for the Victims of Crimes of Violence program is now included in the budget for Indemnification of Private Citizens. The Board of Control will continue to administer the program on a reimbursable basis.

To meet increased non-victim claims workload, 1.3 positions have been included in the 1976-77 Budget.

CALIFORNIA PUBLIC BROADCASTING COMMISSION

The California Public Broadcasting Commission was created by Chapter 1227, Statutes of 1975, known as the Public Broadcasting Act of 1975. The 11-member commission, with assistance from radio, television, and instructional advisory committees established by the commission, is charged with the development and support of a statewide policy, including grants to public broadcasting stations, to encourage the orderly growth and development of public broadcasting service responsive to the informational, cultural, and educational needs of the people of California. The commission is required to submit an annual report to the Legislature before December 31, covering the commission's activities, financial condition and accomplishments. *An executive secretary, a staff analyst and a stenographer are proposed for administrative support to the commission.* This budget plan is based on existing similar commissions, and may be subject to change upon appointment of the Commission and Executive Secretary.

INTERGOVERNMENTAL PERSONNEL ACT ADVISORY COUNCIL

The Intergovernmental Personnel Act Advisory Council was created June 16, 1975, by executive order B4-75, which assigned administration for the 1970 Federal act in California under the Secretary of the Agriculture and Services Agency, effective July 1, 1975. It is the successor to the Advisory Coordinating Council on Public Personnel Management formerly administered by the Office of Planning and Research.

The five-member council, including the chairperson, is appointed by the Governor. The council members volunteer their time and serve without compensation. The council reviews and makes recommendations to the secretary on proposed programs and projects to be included in the California statewide plan, which is composed of all approved grant applications. An I.P.A. administrative unit performs the necessary activities to administer the federal grant funds as required under the act, and carries out appropriate non-grant provisions.

The programs of I.P.A. are intended to improve personnel administration, provide training and education, and improve the quality of manpower in the public service. Grantees include state departments and county and city governments.

To implement the program in 1975-76, 5.5 positions are established administratively and are proposed for continuance in 1976-77 as new positions.

DEPARTMENT OF INDUSTRIAL RELATIONS

Program Objectives

The objective of the department is to foster, promote, and develop the welfare of the wage earners of California, improve their working conditions, and advance their opportunities for profitable employment. The department is continually working toward the realization of this objective by enforcing the compulsory Workers' Compensation Insurance Law and adjudicating workers' compensation insurance claims, by preventing industrial injuries and deaths; by promulgating and enforcing laws relating to wages, hours and conditions of employment; by promoting apprenticeship and other on-the-job training; by preventing discrimination in employment and housing; by assisting in negotiations with parties in dispute when a work stoppage is threatened; and by analyzing and disseminating statistics which measure the condition of labor in the state.

SUMMARY OF PROGRAM REQUIREMENTS

	1974-75	1975-76	1976-77
I. Regulation of workers compensation self-insurance plans	\$283,700	\$310,341	\$376,861

V.b	ENFORCEMENT OF MINIMUM WAGES AND STANDARDS FOR HOURS AND WORKING CONDITIONS—INCREASED WORKLOAD	8	\$142,463
V.f	CAL/OSHA ANTI-DISCRIMINATION ENFORCEMENT	9	\$178,400

I. REGULATION OF WORKERS' COMPENSATION SELF-INSURANCE PLANS

Program Objectives and Description

An employer may meet the statutory requirement of providing workers' compensation benefits for his employees by obtaining a certificate of consent to self-insure. A certificate is issued after the employer has proved to the satisfaction of the Director of Industrial Relations his ability to self-insure and pay all benefits. A security deposit is required and the amount of the deposit is revised periodically. The benefit delivery systems of self-insurers are audited on a three-year cycle to make certain all benefits are paid promptly and in full. A part of this three-year audit is a reevaluation of the self-insurer's financial strength. Program advice and education are provided to self-insurance plan administrators.

Authority

Labor Code, Sections 129, 3700 through 3705 inclusive.

Program Requirements	74-75	75-76	76-77	1974-75	1975-76	1976-77

b. The determination of ability to self-insure and the maintenance of security deposits	5.2	4.5	7.4	\$105,088	\$102,686	\$159,860

a. The Review and Analysis of Self-Insurance Plans

The Labor Code requires that all self-insured employers be audited within a three-year cycle. The present goal is 85 percent of indemnity cases and 98 percent of medical-only cases be paid without benefit error per adjusting location.

Each year there is an increasing number of agencies competing for the business of adjusting claims as well as a large turnover in the approximately 450 persons administering self-insurance. Each change requires a determination by written test as to competency of the administrator. Instruction in workers' compensation laws and procedures is given to these individuals to raise the standard of quality of self-insurance plans.

b. The Determination of Ability to Self-Insure and the Maintenance of Security Deposits

When an employer applies for permission to self-insure, special emphasis is placed on the solvency of the employer and his ability to fulfill his obligations under the workers' compensation law. If the application is approved, the applicant is required to post a deposit which can be called in the event of insolvency. Revisions of deposits are, for the most part, based on the annual reports which the self-insurers are required to submit. *One additional field representative, one consultant and one clerk-typist are proposed in the budget year for increased workload.*

	1974-75	1975-76	1976-77
Output			
Number of self-insurers as of December 31	729	810	900
Number of financial failures	0	1	0
Certificates issued	142	105	100
Applications denied	34	26	30
Applications pending	27	29	55
Certificates revoked	34	25	30
Annual reports	680	715	750
Security deposits (beginning of fiscal year)	\$88,934,600	\$115,807,300	\$143,807,300
Additions	\$37,908,800	\$40,000,000	\$45,000,000
Reductions	\$11,036,100	\$12,000,000	\$15,000,000
Security deposits (end of fiscal year)	\$115,807,300	\$143,807,300	\$173,807,300
Financial reevaluations	102	120	120

II. CONCILIATION OF EMPLOYER-EMPLOYEE DISPUTES

Program Objectives and Description

The objectives of the program are to protect the entire economy of the State and the well-being of employees in all categories by preventing or minimizing work stoppages, business interruptions, or the interruption of public services. It is the objective of the Conciliation Service to accomplish this on a voluntary basis by making skilled professionals available to disputing parties with the objective of achieving settlements that are within the means of those concerned and that prevent an adverse effect on the economy.

Authority

The program is authorized by Section 65 of the California Labor Code, the labor provisions of the various transit District Acts of the Public Utilities Code, the Meyers-Miliias-Brown Act, the Winton Act, and local legislation deriving from these acts and the Agricultural Labor Relations Act of 1975.

III. PREVENTING, SETTLING, ADJUDICATING AND ADMINISTERING DISPUTES UNDER WORKERS' COMPENSATION LAWS

Program Objectives and Description

The Division of Industrial Accidents is a court of limited jurisdiction with exclusive constitutional and statutory powers to settle disputes between workers and employers or insurance carriers arising from work injuries. Referees hear and decide disputed claims on the basis of oral and written evidence. Notices issued by employers to injured workers concerning claimed benefits are monitored to forestall disputes, if possible. Establishment of minimum fees for physicians avoids other disputes. Rehabilitation plans for industrially injured employees are approved and enforced.

Objectives of the program are to: 1) prevent, settle, or adjudicate expeditiously, inexpensively and without encumbrance of any kind, work-connected injury claims; 2) approve, coordinate and enforce plans designed to rehabilitate injured workers to their most effective level of employment.

Authority

Article XX, Section 21 of the Constitution of the State of California and Divisions 4 and 5 of the Labor Code.

Program Requirements	74-75	75-76	76-77	1974-75	1975-76	1976-77

d. Supervising the rehabilitation of disabled workers.....	—	12	12	—	222,938	226,938

a. Preventing, Settling and Adjudicating Disputes Under Workers' Compensation Laws

Special calendars such as pre-trial, settlement and conference are used to expedite the resolution of issues; disputes involving more complicated and complex legal matters are adjudicated by a formal hearing. Referee teams assisted by medical examiners and permanent disability rating specialists are assigned throughout 23 district offices to accomplish these procedures. *Thirty-five additional positions are proposed in the budget year: Five referees, five hearing reporters, five senior legal stenographers, five clerk typists, one consultant and medical examiner, one permanent disability specialist I and one stenographer B for increased workload; three referees, three permanent disability specialist II, three senior legal stenographers and three clerk typists to form an administrative unit to reduce the number of cases referred for formal disposition.*

Output				1974-75	1975-76	1976-77

b. Monitoring Promptness and Adequacy of Benefit Notices and Payments

The program promotes prompt payment or notice to injured workers regarding the status of their cases and, when they are in doubt, directs them

DEPARTMENT OF INDUSTRIAL RELATIONS—Continued

to sources of information. Copies of notices involving benefit payments and of letters concerning nonpayment or reasonable delay are monitored. Promptness and accuracy of payment are promoted by publishing the comparative ranking of performance of first payment of claims by employers and insurance companies; this stimulates competition between employers and insurance carriers in improving performance.

Output		1974-75	1975-76	1976-77
Benefit notice forms and letters processed		443,699	435,000	427,000
Clarification requests		34,610	33,740	33,120
Input		74-75	75-76	76-77
Expenditures		4.6	5	5
		\$133,539	\$122,795	\$125,595

c. Collection of Nondependency Death Benefits

Under this program the division collects the industrial death benefit from the employer or insurance carrier where the deceased employee leaves no surviving dependents. Emphasis is placed upon encouraging voluntary payment by the employer or carrier when the death is clearly industrial and reasonable search discloses no surviving dependents. Where questions of industrial causation or dependency exists, proceedings may be initiated by the division before the Workers' Compensation Appeals Board to obtain a decision on the division's possible entitlement to the benefit. Labor Code Section 4706.5(c) provides that revenue received is for support of the Subsequent Injuries Program.

Output		1974-75	1975-76	1976-77
Notices of employee death received		490	750	910
Actual payments received		59	68	80
Amount of death benefits received		\$1,482,305	\$1,710,000	\$2,009,000
Input		74-75	75-76	76-77
Expenditures		1.4	2	2
		\$23,501	\$49,118	\$50,238

d. Supervising the Rehabilitation of Disabled Workers

The Division of Industrial Accidents is required to maintain a rehabilitation unit to ensure the provision of rehabilitation benefits for injured workers. The Rehabilitation Bureau administers a reporting system for identification and referral of injured workers for rehabilitation services, approves rehabilitation plans and resolves disputes involving issues of rehabilitation and related benefits.

Output		1974-75	1975-76	1976-77
Identification forms processed		—	25,000	27,500
Rehabilitation plan decisions		—	7,000	7,700
Enforcement orders on rehabilitation plans		—	2,500	2,750
Input		74-75	75-76	76-77
Expenditures		—	12	12
		—	\$222,938	\$226,938

IV. THE PREVENTION OF INDUSTRIAL INJURIES AND DEATHS TO CALIFORNIA WORKERS

Program Objectives and Description

To ensure safe and healthful working conditions for all California working men and women, this program enforces safety and health standards, investigates the causes of occupational deaths and injuries and assists in encouraging employers to maintain safe and healthful working conditions by providing research, information, education and training in the field of occupational safety and health.

Authority

Labor Code: Division 1, Chapter 6 and 6.5, and Division 5, Part 1 through Part 8, inclusive.

Program Requirements		74-75	75-76	76-77	1974-75	1975-76	1976-77
Continuing program costs		510.2	551	539.6	\$14,769,769	\$17,622,236	\$17,825,318
Workload adjustments		—	-11	8.5	—	-116,667	-16,470

e. Safety of employees from pressure vessel failure or malfunction	88.1	89	89	1,964,040	2,185,255	2,360,273
f. Occupational Safety and Health Appeals Board	16.1	24.3	25.3	539,516	734,826	775,744
g. Occupational Safety and Health Standards Board	7.8	7.8	8.8	300,405	360,285	402,766

^a Federal Funds and expenditures therefrom are not included in overall budget totals.

a. Implementation of California Occupational Safety and Health Compliance

This element involves conducting safety compliance inspections under the California Occupational Safety and Health Act by engineers for the purpose of bringing about corrections of unsafe practices in all places of employment through the enforcement of state health and safety laws, rules, regulations and standards.

DEPARTMENT OF INDUSTRIAL RELATIONS—*Continued*

This element also includes the investigation of complaints and accidents; extensive cross-training of professional personnel in the disciplines of construction, industrial, and electrical safety, and the development of proposed safety standards.

A consultation unit, composed of specialists in the above-cited disciplines, is established under this element and reports to each assistant chief for the purpose of aiding management and labor to comply with the standards required by the California Occupational Safety and Health Act. *One additional safety engineer is proposed in the budget year for increased workload. Three additional safety engineer positions are being established by program redirection through eliminating a contract with the Fire Marshal.*

Output				1974-75	1975-76	1976-77
Catastrophes/fatalities investigated				1,016	1,100	1,100
Scheduled inspections				10,288	14,000	15,000
Follow-up inspections				1,451	2,000	2,500
Complaints investigated and inspections				5,210	6,500	7,000
Violations cited				71,844	75,000	76,000
Consultations/talks				2,331	2,500	2,600
Input	74-75	75-76	76-77	1974-75	1975-76	1976-77
Expenditures	326.8	345.3	349	\$10,377,632	\$12,418,071	\$12,247,523

b. Safety of Employees in Mining and Tunneling

This element primarily involves the conducting of compliance inspections and reinspections for the purpose of correcting unsafe conditions and work methods in the mining and tunnel construction industries. The tunnel safety and health requirements are covered by CAL/OSHA.

Pre-job conferences, answering complaints and requests, investigation of accidents, licensing of blasters, certification of safety representatives and gas testers, classification of underground operations, environmental surveys and the development of proposed safety orders must also be accomplished by the unit. This element also includes on-going training in engineering and accident prevention for the mine and tunnel safety engineers.

Output				1974-75	1975-76	1976-77
Original inspections				1,486	1,700	1,700
Reinspections				642	750	750
Requirements written				3,736	4,000	4,000
Unsafe instances				7,334	8,100	8,200
Licensing of blasters				180	150	150
Certification of safety representatives				40	50	50
Certification of gas testers				25	50	50
Pre-job conferences				90	130	130
Input	74-75	75-76	76-77	1974-75	1975-76	1976-77
Expenditures	12.1	13.6	13.6	\$275,076	\$333,927	\$360,671

c. Safety of Employees While Using or Repairing Elevators, Escalators, Aerial Passenger Tramways

This element involves conducting inspections of elevators, aerial tramway (ski lifts) equipment, movable amusement rides and construction personnel hoists by safety engineers specializing in this work. This program also calls for related consultation, equipment approval, plan review, accident and complaint investigation, education and safety code revision. Fees are charged for inspection work and go into the General Fund. *One and a half additional safety engineer positions and one clerk typist are proposed in the budget year for increased workload.*

Output				1974-75	1975-76	1976-77
Elevators inspected				19,757	23,000	30,000
Aerial passenger tramways (ski lifts) inspected				404	450	450
Amusement rides inspected				612	600	600
Construction personnel hoists inspected				115	125	130
Consultation, complaints, accident investigations and other special calls				6,290	6,300	6,400
Input	74-75	75-76	76-77	1974-75	1975-76	1976-77
Expenditures	51.4	52	54.4	\$1,149,384	\$1,276,778	\$1,449,713

d. Safety of Employees From Radiation

This element involves conducting safety compliance inspections under the California Occupational Safety and Health Act and the Atomic Energy Act of 1964 (as amended).

These inspections are performed to cover preclicensing inspections of radiation users, follow-up inspections, complaints, accident investigations, the development of proposed standards and the monitoring of contract county programs.

The industrial hygiene activities are now being performed by the Department of Health under an interagency agreement, whereby the Department of Health will provide assistance upon request in this field.

e. Safety of Employees From Pressure Vessel Failure or Malfunction

This element involves conducting field inspections of pressure vessels by safety engineers specializing in this work. The program also entails the shop inspection of new pressure vessels.

Related to this field inspection program are the section's permit-issuing activities along with consultation, plan review, accident investigation, education and code revision (boiler and fired pressure vessel safety orders, unfired pressure vessel safety orders). Fees are charged for inspection work and placed in the General Fund.

Output

f. Occupational Safety and Health Appeals Board

The Occupational Safety and Health Appeals Board is a quasi-judicial body empowered to settle disputes arising from citations and notices issued to California employers following inspections by compliance safety engineers. Appeals from citations or notices are heard by the three-member appeals board or by hearing officers of the board and written decisions are issued within 30 days after the case is submitted. Decisions of the board must carry the signatures of at least two members of the board. Appellants who are dissatisfied with the initial decision of the board or its hearing officers may petition for reconsideration within 30 days after the decision. After exhausting all avenues for remedy with the board, appellants may then seek redress in the superior court.

One hearing officer is proposed in the budget year for increased workload.

g. Occupational Safety and Health Standards Board

The Occupational Safety and Health Standards Board has responsibility to adopt, amend, and repeal occupational safety and health standards, assuring as much as possible safe and healthful working conditions for California workers. The board's objectives are to adopt reasonable and enforceable standards at least as effective as those promulgated by federal OSHA.

The board also has the responsibility to grant or deny variances from adopted standards. Permanent variances requested by employees are granted by the board if it determines that the methods used by the employer will provide equivalent health and safety to his employees as if he complied with the standard. Any employer or other person adversely affected by the granting or denial of a temporary variance may appeal to the board within 15 working days from the receipt of the notice from the Division of Industrial Safety. Also any interested person may propose new or revised standards or any other item concerning occupational safety and health to the board.

One additional hearing officer I is proposed in the budget year for increased workload.

DEPARTMENT OF INDUSTRIAL RELATIONS—Continued

V. ENFORCEMENT AND PROMULGATION OF LAWS RELATING TO WAGES, HOURS AND CONDITIONS OF EMPLOYMENT, AND LICENSING AND ADJUDICATION

Program Objectives and Description

This program is designed to promote, foster and develop the economic well-being of approximately 9,000,000 California workers. The absence of fair and reasonable labor standards in the law results in inequitable and adverse working conditions for employees. The objectives of this program are (1) the promulgation of Industrial Welfare Commission Orders which establish minimum wages and standards for hours and working conditions; and (2) the enforcement of the Industrial Welfare Commission Orders, and Labor Code sections relating to the prompt payment of wages including overtime pay, the elimination of unfair labor practices, the Equal Pay Law, and the Industrial Homework Act, and the application of basic regulations to employers through the enforcement of more than 200 laws which are not specifically delegated to other agencies.

The Governor's Reorganization Plan No. 2 of 1975 consolidated the Divisions of Industrial Welfare and Labor Law Enforcement into a new Division of Labor Standards Enforcement. The new division will carry out all of the functions, responsibilities and authorities previously vested in the two separate divisions. The consolidation will result in better service and more effective labor law protection for all of California's work force.

Authority

State Constitution, Section 17.5, Article XX; Labor Code: Division 1, Chapter 2; Chapter 4, Section 95; Division 2, Part 4, Chapter 1; and Chapter 3, Article 1; and Division 2, Part 10.

f. CAL/OSHA anti-discrimination enforcement	3.3	3.9	9	64,514	67,935	179,087

^a Federal funds and expenditures therefrom are not included in overall budget totals.

a. Promulgation of Minimum Wages and Standards for Hours and Working Conditions

The Industrial Welfare Commission has the authority and the responsibility for establishing minimum wages and standards for hours and working conditions. During 1975-76, the commission will be reviewing and revising the 15 Industrial Welfare Commission Orders, with a planned effective date of the new orders for early in 1976-77. The new orders will include, for the first time, coverage for approximately 3,500,000 men and 90,000 household technicians in the areas of standards for hours (including overtime pay requirements) and working conditions.

Input	74-75	75-76	76-77	1974-75	1975-76	1976-77
Expenditures	0.2	2	0.2	\$7,034	\$110,000	\$4,527

b. Enforcement of Minimum Wages and Standards for Hours and Working Conditions

This element of the program enforces the provisions of the Industrial Welfare Commission Orders, which establish minimum wages and standards for hours and working conditions, and also enforces sections of the Labor Code, including the Equal Pay Law and the Industrial Homework Act. Compliance with the law is accomplished by investigations, citations and hearings, with criminal prosecutions as a last resort. The new Industrial Welfare Commission Orders will have an impact on workload, due primarily to a higher minimum wage and extension of overtime pay requirements to men and household technicians. *Four additional industrial welfare agents, two payroll auditors and two clerk typists are proposed in the budget year for increased workload.*

Output	1974-75	1975-76	1976-77
Beginning backlog	6,350	7,032	6,337
New cases opened	20,235	20,235	26,305
Total caseload	26,585	27,267	32,642
Cases completed	19,411	20,930	20,930
Ending backlog	7,032	6,337	11,712
Permits and licenses issued (exemption permits; homework licenses and permits; special minimum wage permits for handicapped workers; sheltered workshop permits)	1,099	1,100	1,100

Input	74-75	75-76	76-77	1974-75	1975-76	1976-77
Expenditures	78.6	87.5	96.2	\$1,767,040	\$2,041,652	\$2,153,587

DEPARTMENT OF INDUSTRIAL RELATIONS—Continued

c. Determination of Wage Claims

As wage claims are filed and assigned to this element of the program their validity is tested by means of correspondence, examination of documents, premise inspections, and by conducting fact finding hearings where testimony is received under oath. If the claim is determined to be valid, a demand for payment is made. If the demand for payment is not met, the Labor Commissioner may take civil action if the worker is financially unable to employ counsel. During 1974-75, 26,206 hearings were conducted.

Output				1974-75	1975-76	1976-77			
Total original wage complaints received				50,878	53,000	55,000			
Total original wage complaints disposed of				47,633	52,000	52,000			
Input				74-75	75-76	76-77	1974-75	1975-76	1976-77
Expenditures				124.8	133.7	133.7	\$2,634,005	\$2,941,255	\$3,026,277

d. Labor Law Enforcement

All labor law violation allegations and complaints are investigated through the use of correspondence, interview discussion, field investigations and investigatory hearings. Criminal prosecutions are initiated when facts and evidence indicate a violation of the law and a warning would not satisfy the purpose of the statute.

The Labor Code requires compulsory Workers' Compensation Insurance. Every employer must secure the payment of workers' compensation by insuring himself as provided in Labor Code Section 3700. Increased enforcement in this field will materially reduce claims against the Uninsured Employers Fund.

Output				1974-75	1975-76	1976-77
Nonwage complaints received.....				13,219	15,000	15,000
Nonwage complaints disposed of.....				8,822	10,000	10,000
Theatrical permits issued.....				6,926	8,000	8,000
Inspections made.....				8,464	9,500	9,500
Workers' Compensation Insurance complaints.....				20,273	22,500	22,500
New employers investigations.....				74,586	76,000	76,000
Input	74-75	75-76	76-77	1974-75	1975-76	1976-77
Expenditures.....	66.1	67.9	69.4	\$1,395,113	\$1,493,727	\$1,566,905

e. Licensing and Adjudication

Through the review of applications, contracts and fee schedules, the Labor Commissioner as the regulatory authority may issue licenses to artists' managers and farm labor contractors. Formal hearings are held if a license is denied. He may issue rules and regulations to safeguard the public interest and can deny, suspend or revoke a license for causes set forth in the Labor Code. Routine inspections of premises, farm labor buses and agriculture fields are made continuously to insure adequate health and sanitation facilities and to protect minors from hazardous employment.

Output				1974-75	1975-76	1976-77			
Controversies settled				23	25	25			
Licenses issued:									
Farm Labor Contractor.....				900	1,000	1,000			
Artists' Managers.....				490	500	500			
Input				74-75	75-76	76-77	1974-75	1975-76	1976-77
Expenditures.....				4.9	5	5	\$87,583	\$109,995	\$113,174

f. CAL/OSHA Anti-Discrimination Enforcement

Labor Code Sections 6310, 6311 and 6312 mandate that no person shall in any way be discriminated against for attempting to maintain or improve safe working conditions in any place of employment, and further, that the Labor Commissioner shall enforce the anti-discrimination provision set forth therein. *Nine additional positions are proposed in the budget year consisting of two staff counsels I, one deputy labor commissioner, two special investigators, two legal stenographers and two stenographers B for increased workload. Of these nine, four have been provided for administratively in the current year.*

Output				1974-75	1975-76	1976-77

DEPARTMENT OF INDUSTRIAL RELATIONS—Continued

VI. PROMOTION, DEVELOPMENT AND ADMINISTRATION OF APPRENTICESHIP AND OTHER ON-THE-JOB TRAINING

Program Objectives and Description

To develop a maximum number of job training opportunities in the state's industrial economy through apprenticeship and other on-the-job training programs. The state's youth, minorities, women and veterans require an increasing number of job training opportunities in order to enter the skilled labor market.

The Division of Apprenticeship Standards develops apprenticeship and other on-the-job training programs in the private and public sectors (including correctional institutions) in an effort to meet industries' needs for skilled manpower, and also ensures equality of opportunity in apprenticeship and other on-the-job training.

The division monitors and enforces state and federal regulations that cover the employment of apprentices (California Plan for Equal Opportunity in Apprenticeship) and also enforces state and federal codes dealing with apprentices on public works. The division also inspects, develops, and approves training establishments under contract with the U.S. Veterans Administration as authorized by Labor Code Section 3090.

Authority

Labor Code: Chapter 4, Division 5, and Chapter 1, Division 2, Sections 1777.5 and 1777.6.

b. Veterans' benefits training	29	35.5	34.5	625,951	768,422	743,422

^a Federal funds and expenditures therefrom are not included in overall budget totals.

a. Promotion, Development and Administration of Apprenticeship and Other On-the-Job Training

The division, as the staff for the Administrator of Apprenticeship and the California Apprenticeship Council (CAC), carries out the requirements of the Labor Code and the rules and regulations established by the CAC. These activities include the development and expansion of job-training programs with both the public and private employers; the enforcement of Section 1777.5 of the Labor Code requiring contractors to employ one apprentice for every five journeymen on public works contracts; the administration of the California Plan for Equal Opportunity in Apprenticeship to ensure that employers adopt affirmative action programs; and cooperation with other state agencies such as, Corrections, Youth Authority, and Vocational Rehabilitation. *Two additional associate research analyst positions are proposed in the budget year to develop information necessary to improve program effectiveness. An assistant chief is being transferred in 1976-77 to the Administration Division and reclassified to a training officer II. This shift in resources will help to improve overall departmental efficiency.*

Output	1974-75	1975-76	1976-77
Promotion, Development and Administration of Apprenticeship:			
Number of active apprentices	31,382	32,000	34,000

Expenditures	103.3	96	95.7	\$2,270,589	\$2,380,289	\$2,440,365

b. Veterans' Benefits Training

The Division of Apprenticeship Standards under a continuing contract with the U.S. Veterans Administration promotes, inspects, approves, and monitors for compliance in accordance with V.A. regulations those training sponsors offering job training to Vietnam veterans. Through the Division's inspection and approval of training establishments, eligible Vietnam veterans receive supplemental training allowances.

Currently, there are over 3,300 training establishments approved with more than 8,500 veterans enrolled and receiving supplemental training benefits.

DEPARTMENT OF INDUSTRIAL RELATIONS—*Continued*

VII. LABOR FORCE RESEARCH AND DATA DISSEMINATION

Program Objectives and Description

With the continuing yearly expansion in the California work force, there is an urgent ongoing necessity for statistical and research information which might affect on-the-job safety and the economic health and development of both the private and public sectors.

The objectives of the program are to provide data for use in planning and executing safety programs; to measure the effectiveness of accident prevention efforts; to provide accurate information pertaining to industrial relations from an impartial source on short notice; and to guide legislative and administrative decisions by state and local government. These objectives are met through the work injuries statistics and industrial relations research programs which provide facts and analyses concerning wage rates, working conditions, fringe benefits, work injuries, industrial disputes, industrial relations practices, cost of living, and other studies related to labor.

Authority

This program is required by the Labor Code: Division 1, Chapter 7, Sections 150–156; Division 2, Part 4, Chapter 1, Section 1202; Division 2, Part 7, Chapter 1, Article 2, Sections 1773.1–1773.8; Division 5, Part 1, Chapter 2, Sections 6409–6413.5.

b. Industrial relations research	7.2	8.3	11.3	155,418	215,840	257,407

^a Federal funds and expenditures therefrom are not included in overall budget totals.

a. Work Injury Statistics

To provide data on the incidence and severity of occupational injuries and illnesses, the Division of Labor Statistics and Research entered into an agreement with the U. S. Bureau of Labor Statistics to become a cooperating State agency in the conduct of the annual nationwide *Occupational Injuries and Illnesses Survey*. The division conducts this survey in California. Participation in the annual survey is mandatory of any State with an approved State Plan under the Federal Occupational Safety and Health Act.

Following passage of the California Occupational Safety and Health Act, the Division of Labor Statistics and Research assumed full jurisdiction over employer occupational injury and illness recordkeeping required by the Act. This responsibility includes promulgation of regulations, printing and distribution of recordkeeping forms and instructional materials, education of employers as to recordkeeping requirements, and responding to employer queries.

Participation in the annual survey is supplemented by California's work accident cause statistics program which is based upon individual injury reports required to be filed with the division by employers and doctors and which are completed for workers' compensation claims administration. The program provides analyses of such accident factors as accident type, agency involved, nature of injury, part of body affected, age and sex of injured worker, county of occurrence, occupation and activity involved. Injury reports are used to pinpoint where hazards exist and as a source of information on emerging hazards. Particular attention is given to developing accident cause data for industries with a high incidence of occupational injury or illness.

The California Occupational Safety and Health Act mandates the division to prepare quarterly and annual summaries of accident causes based on employers reports for use by the division of Industrial Safety in program planning and for the general public.

The grant agreement with the federal government provides for continuing 50 percent federal funding by the U. S. Bureau of Labor Statistics for the entire work injury statistics program, including California's participation in the annual survey, administration of employer recordkeeping requirements, and compilation of accident cause statistics.

Output

Quantifiable output of the work injury statistics activity are shown below. The statistics the division compiles, which serve to pinpoint accident factors and to measure accident prevention progress within various industries, are used by individuals responsible for giving direction to and implementation of occupational accident prevention programs, both in government and private industry. Statistics alone cannot prevent accidents, but prevention efforts are successful only if based upon knowledge of past experience, and the work injury statistics represent a source of such knowledge.

b. Industrial Relations Research

The industrial relations research element carries out the following activities: maintains on a current basis a reference file of about 5,200 collective bargaining agreements in the private sector; and, in the public sector (for about 500 political jurisdictions) memoranda of understanding, salary ordinances, and rules of personnel boards and civil service commissions; analyzes and codes on a continuing basis selected provisions of collective bargaining agreements and public sector documents, and publishes reports on subjects covered; compiles and publishes building trades wage rates for use in prevailing wage determinations and data on negotiated wage settlements in major union agreements; conducts a biennial census of union membership, and publishes an annual report on strikes and lockouts. *One additional associate research analyst, one statistical clerk and one clerk typist are proposed in the budget year for increased workload.*

Output

Output consists of information on provisions of collective bargaining agreements, wage rates, and other industrial relations subjects. This information is summarized in the form of published reports and in unpublished compilations of data used to answer information requests.

VIII. THE PREVENTION AND ELIMINATION OF DISCRIMINATION IN EMPLOYMENT AND HOUSING

Program Objectives and Description

The Division of Fair Employment Practices seeks to provide equal opportunity for employment and housing and ameliorate social tensions by preventing and eliminating discrimination based on race, religion, creed, color, national origin, physical handicap, sex and age 40 to 64.

Authority

Labor Code, Section 1410 et seq. and Health and Safety Code, Part 5.

IX. LEGISLATIVE MANDATES

Program Objectives and Description

Section 2231 (a) of the Revenue and Taxation Code requires the state to pay local governmental units the costs of any new program or increased level of service of a program mandated by legislation enacted after January 1, 1973. Within the program area of the Department of Industrial Relations, there are four legislative mandates, all relating to workers' compensation. These mandates affect counties, cities, school districts and special districts. These entities, as employers, are required to pay a higher amount for workers' compensation because of the four legislative mandates.

Authority

Chapters 1021, 1022, 1023 and 1147, Statutes of 1973, Chapter 1494, Statutes of 1974, and Chapters 1084 and 1086, Statutes of 1975.

Program Requirements

	1974-75	1975-76	1976-77
Continuing program costs (General Fund)	\$9,669,271	\$19,401,942	\$14,700,937

X. ADMINISTRATIVE SUPPORTING SERVICES

Program Objectives and Description

Administration, under the guidance of the director, formulates departmental policies and provides administrative services for the eight departmental programs through management analysis, fiscal management, personnel and training, reproduction services and data processing. Legal and public information services are provided to the programs by staff in the director's office.

Responsibility for administration of the CAL/OSHA plan rests with the Department of Industrial Relations as provided by statutes. The CAL/OSHA program office functions as liaison between the federal government and participants in the state plan. Its activities include overseeing progress on the developmental aspects of the plan, providing reports for federal evaluation of the plan's implementation, and coordinating state standards and activities with federal requirements.

A deputy director is proposed for the budget year as authorized by Chapter 993, Statutes of 1973; one senior stenographer is included for clerical support to the deputy. A staff counsel II is proposed to handle increased legal workload in the OSHA program. An auditor II is proposed to provide internal audit capability for the department's many licensing, permit and penalty revenues. One key data operator position is being abolished as a result of increased efficiency in the data processing operation.

Authority

Labor Code: Division 1, Chapter 1.

UNINSURED EMPLOYERS' FUND

This program provides for payment of workers' compensation benefits to employees whose employers have failed to make benefit payments required under the Labor Code. This program is authorized under the provisions of Sections 3715-3727 of the Labor Code which established the Uninsured Employers' Fund for the purpose of making such workers' compensation benefit payments.

Program Requirements	1974-75	1975-76	1976-77

INDUSTRIAL RELATIONS UNPAID WAGE FUND

This program permits the Labor Commissioner to collect any unpaid wages or monetary benefits due and unpaid to any worker in this state without an assignment from such worker. After seven years, if the Labor Commissioner has been unable to locate any worker for whom he has collected unpaid wages or benefits, the wages escheat to the state for deposit pursuant to the Unclaimed Property Law. This program is authorized under the provisions of Sections 96.6 and 96.7 of the Labor Code, which were added by Chapter 714, Statutes of 1975.

WORKERS' COMPENSATION BENEFITS

Compensation Insurance Fund

The California State Compensation Insurance Fund is a self-supporting enterprise created to offer insurance protection to employers at the lowest possible cost. This fund operates in competition with other insurance carriers, acting as a yardstick for the securing of fair premium rates for employers and fair treatment for injured employees. The fund is required by law to use the same rates and classifications established by the State Insurance Commissioner for insurers generally, and provides that the rates shall be only those sufficient to carry out the specific purposes stated in law.

Expenditure estimates for the budget year are based on the level of activity anticipated by the fund's management. Changes in economic conditions may result in corresponding changes in the various items of expense.

The budget data presented is information available as an annual operations report. As a public enterprise fund authorized by statutes, no budget detail is presented.

Subsequent Injuries

This program, authorized by Sections 4750-4755 of the Labor Code, provides benefits for permanent disabilities which arise from industrial injury to an employee who has suffered from a previous permanent disability.

Section 4706.5(e), Labor Code, added by Chapter 1334, Statutes of 1972, provides that where there are no heirs of a deceased employee, or persons entitled to death benefit payment, such payment will be made to the state. These funds are continuously available for payment of benefits and partially offset the need for direct General Fund support.

STATE PERSONNEL BOARD

The State Personnel Board is responsible for serving the personnel needs of State agencies in improvement of personnel practices and procedures. The Board's authority to conduct central personnel management functions for State Government derives from Article XXIV of the State Constitution and from provisions of the Government Code.

The State Personnel Board, within the framework of a merit system, conducts the majority of the State's recruitment efforts, develops examining techniques to select and rank qualified applicants, sets compensation rates and standards within funds authorized by the Legislature, provides departmental consultation on employee development and conducts training for management employees, and provides leadership in personnel management practices and procedures. The Board also provides, under contract and on a fully reimbursable basis, technical personnel services to political subdivisions on request and administers a federally required merit system for local governmental employees.

Through the Welfare Reform Act of 1971, the State Personnel Board was assigned the responsibility of the Career Opportunities Development Program including the development, implementation, and operation of Jobs Program for welfare recipients; grants to cities and counties for local career opportunities development projects; and technical assistance to the State and local jurisdictions.

The State Personnel Board also has the responsibility for coordination and guidance of affirmative action/equal employment opportunity efforts within State departments and local agencies as required by State policy, Federal law and in conjunction with the Jobs Program.

I. EMPLOYMENT SERVICES

Program Objectives and Description

The Employment Services Program includes responsibility for recruiting, selecting, and placing job candidates through a competitive process in order to meet the personnel requirements of State agencies on a timely basis.

This program includes all State civil service employment functions conducted by the State Personnel Board. These functions include: program planning and development, list establishment, certification and placement, investigation and medical evaluation, employment information and recruitment, and program evaluation.

Program Requirements	74-75	75-76	76-77	1974-75	1975-76	1976-77
Continuing program costs.....	298.4	277.2	277.6	\$5,032,345	\$5,678,065	\$5,755,736
General Fund				4,966,449	5,354,178	5,481,503
Reimbursements				65,896	323,887	274,233

Program Elements

	74-75	75-76	76-77	1974-75	1975-76	1976-77
a. Program planning and development.....	25	23.1	23.1	422,063	473,892	480,374
b. List establishment	189.9	177.1	177.7	3,202,584	3,627,432	3,677,052
c. Certification and placement	33.6	30.7	30.6	565,837	628,959	637,563
d. Investigations and medical evaluations	2.6	2.3	2.3	44,083	46,787	47,427
e. Employment information and recruitment....	34.7	32.1	32.1	584,407	658,201	667,205
f. Program evaluation	12.6	11.9	11.8	213,371	242,794	246,115

a. Program Planning and Development

This element concentrates on planning improvements for the Employment Services Program. The work is accomplished through project assignments in the major areas of list establishment, employment information and recruitment, certification and placement, and investigative and medical evaluations. Planning and development activities must insure that the program remains practical and feasible, the selection devices used in the program are relevant to jobs, that the program meets legal requirements, and is nondiscriminatory.

Project activity centers around the development of complete recruitment, selection, and placement plans for major classes or class series with emphasis on planning, recruitment, processing efficiency, timeliness, job relevancy, and affirmative action.

Output	1974-75	1975-76	1976-77
Program planning and development projects	125	130	130
Numbers of medical consultations with SPB staff.....	722	750	750

STATE PERSONNEL BOARD—Continued

Input	74-75	75-76	76-77	1974-75	1975-76	1976-77
Expenditures.....	25	23.1	23.1	\$422,063	\$473,892	\$480,374

b. List Establishment

List establishment includes all activities directly connected with placing persons on eligible lists for both regular civil service and career executive assignment exams. This begins with the analysis of the need for an examination and continues until the eligible list is actually established. This element provides for the planning of individual selection efforts to meet departmental needs. It also involves the application of selection techniques and research developments to specific examining situations. The major activities of this element are: test planning and management, recruitment and publicity, test construction, test administration, conducting qualifications appraisal panels and employee development appraisals, and test appeal and review.

Output	1974-75	1975-76	1976-77
Exams calendared.....	1,958	1,950	1,950
Exams constructed.....	1,460	1,460	1,460
Written test items constructed.....	3,624	3,600	3,600
Advertisements placed.....	3,002	3,045	3,045
Recruitment tours.....	4	4	4
SSEE and continuous and/or delegated testing classes.....	373	373	373
Applications received for centralized testing.....	281,279	320,000	320,000
Applications filed—field office testing.....	24,586	25,200	25,200
Delegated testing applications.....	21,290	21,340	21,340
Written test notice cards—centralized.....	81,900	75,000	75,000
Number of QAP/EDA competitors.....	59,149	60,000	60,000
QAP and EDA appeal correspondence.....	2,980	3,000	3,000
QAP and EDA Board appeals.....	678	700	700
C.E.A. exams completed.....	45	45	45

Input	74-75	75-76	76-77	1974-75	1975-76	1976-77
Expenditures.....	189.9	177.1	177.7	\$3,202,584	\$3,627,432	\$3,677,052

c. Certification and Placement

The objectives of this element are: (1) to provide and maintain ranked lists of eligibles; (2) to provide names of eligibles to appointing powers; (3) to screen and refer "reachable" eligibles in clerical and auditor classes for placement in metropolitan areas; and (4) to assist in placing employees displaced by layoff.

Output	1974-75	1975-76	1976-77
Field office hires.....	8,946	9,150	9,150
Certifications requested.....	24,480	25,000	25,000
Establish reemployment eligibility requests.....	252	250	250

Input	74-75	75-76	76-77	1974-75	1975-76	1976-77
Expenditures.....	33.6	30.7	30.6	\$565,837	\$628,959	\$637,563

d. Investigations and Medical Evaluations

The objective of this element is to screen applicants with questionable medical and criminal records for applicability for specific jobs.

Output	1974-75	1975-76	1976-77
Investigations.....	6,000	6,000	6,000
Medical evaluation reviewed.....	3,423	3,500	3,500
Medical appeals heard by SPB.....	8	10	10

Input	74-75	75-76	76-77	1974-75	1975-76	1976-77
Expenditures.....	2.6	2.3	2.3	\$44,083	\$46,787	\$47,427

e. Employment Information and Recruitment

Large numbers of citizens, employees, students, counselors, and various organizations request information about State employment and State civil service. Program information is also supplied in response to inquiries from State officials, other public jurisdictions and employee organizations.

Output	1974-75	1975-76	1976-77
Information counter contacts.....	541,292	560,000	560,000
Testing office information contacts.....	155,866	160,000	160,000
Employment information correspondence.....	22,770	24,000	24,000

Input	74-75	75-76	76-77	1974-75	1975-76	1976-77
Expenditures.....	34.7	32.1	32.1	\$584,407	\$658,201	\$667,205

f. Program Evaluation

The program evaluation element consists of various studies and projects directed to determining the effectiveness of the major areas of the Employment Services Program. Frequently, an evaluation project will subsequently result in a program planning and development project.

Much of the effort within this element is directed to the evaluation of the list establishment element, the goals of which are: (1) to increase the job relatedness of an employee selection activity with emphasis on cultural fairness, elimination of unnecessary requirements and obstacles; (2) to plan and encourage affirmative action within selection plans; (3) to reduce repetitive testing; and (4) to be responsive to State management's employee selection needs. Projects are established to evaluate the effectiveness of individual exam plans and meeting stated goals, and evaluation results are channeled to upcoming planning efforts. In addition, the stated objective of this element is to evaluate the programs through receiving, investigating, and resolving Fair Employment Practices Commission complaints. A further objective is to visit and audit delegated testing and delegated certification locations to insure legal compliance and concur program improvements.

STATE PERSONNEL BOARD—Continued

II. PERSONNEL MANAGEMENT SERVICES

Program Objectives and Description

The Personnel Management Services Program is responsible for maintenance of the State position classification and pay plan. Included in this responsibility is the establishment, revision and abolishment of classes, development of allocation standards for individual classes, job audits, special salary studies, and salary adjustment recommendations.

The Personnel Management Services Program provides direct consultation and service in personnel matters to departments. The emphasis within the division is on increased involvement with departments to provide maximum service and meet personnel management needs of State service.

The division staff will intensify its efforts to improve the effectiveness of the State's classification plan. These activities include movement toward a simpler classification structure, more comprehensible to both management and employees, and implementation of an improved classification control system based upon criteria other than individual position measurement and review.

The Personnel Management Services Program has responsibility for all personnel transactions review, employee status system development, and seniority computation.

Through an Inter-agency agreement, the Personnel Management Services Division will be reimbursed \$55,000 in fiscal year 1975-76 for expenditures incurred as a result of the conversion to the Employment History system in the Personnel Services Division in the Controller's Office.

Program Requirements	74-75	75-76	76-77	1974-75	1975-76	1976-77

e. Total Compensation Administration.....	6	4.3	4.2	101,694	97,394	99,820

a. Personnel Management

This element encompasses activities identified as general consultation and nonclassification and pay issues.

General consultation includes advice given to departments, employees and employee associations on problems such as employee morale, discipline, grievances, and organization and employee utilization. Particular attention is devoted to consultation with small departments. It also includes responses to information requests about civil service from outside sources.

Nonclassification and pay issues include coordination of miscellaneous matters between departments and the State Personnel Board. For instance, the assignment of new work week group categories to a particular classification or the authorization to pay night-shift differentials or overtime payment.

Output	1974-75	1975-76	1976-77
Number of overtime authorizations.....	140	140	140
Number of one-year probationary periods established.....	33	30	30
Number of work week group actions.....	124	120	100
Number of night-shift differentials established.....	20	20	20

Input	74-75	75-76	76-77	1974-75	1975-76	1976-77
Expenditures.....	23.7	16.7	17.6	\$402,548	\$383,082	\$392,623

b. Classification and Pay

Activities included in this element are review of the classification plan, position allocation, classification and pay issues, and general consultation for classification and pay matters.

Review of the classification plan includes time devoted to surveys of the use of the State classification plan by departments. For example, time spent in discussions, audits, and analysis involved in the review of the use of engineer classes in State service is attributed to classification review.

Classification and pay issues include establishment, revision and abolishment of classes and specifications, title changes, preparation and presentation of Board memoranda, and preparation and distribution of the Pay Letter.

General consultation in this area includes advice given to departments on the classification and pay aspects of organizational changes, negotiations with departments and employee groups, analysis of requests for transfer, demotion and reinstatement determinations, and establishment of policies and procedures for maintenance of the class history file.

STATE PERSONNEL BOARD—Continued

Output

Classification and Pay Issues:

	1974-75	1975-76	1976-77
Request for Certification	3,500	4,000	3,500
Number of Abolished Classes	230	250	250
Number of New Classes	165	205	205
Number of Revised Specifications	310	310	310
Number of Title Changes	165	190	190

Input

	74-75	75-76	76-77	1974-75	1975-76	1976-77
Expenditures	41.8	29.5	29.2	\$709,748	\$675,265	\$692,084

c. Salary Administration

Salary administration consists of participation in salary surveys, benefit surveys, special salary studies, and support of the annual Salary Program. Special salary studies include studies done on particular classes, the development of salary relationships and analysis of salary inequities. Projects are conducted for the Legislature, the Governor's Office, agencies and departments.

There are also self-initiated projects such as determinations for overtime practices and alternate salary range criteria.

General salary program includes analysis of salary, benefit data in terms of prevailing rates, internal relationships and recruitment, and other problems to identify occupational groups having support for special salary increases.

Output

	1974-75	1975-76	1976-77
Special Salary Studies and Projects	70	86	86

Input

	74-75	75-76	76-77	1974-75	1975-76	1976-77
Expenditures	32.7	23.1	22.9	\$555,101	\$529,174	\$542,354

d. Personnel Transactions

The major activities of this element include the employee status system development, personnel transactions review, seniority computation, and personnel transactions consultation. The activities of the employee status system development are to evaluate the personnel transactions system, implement changes in policies, laws and rules, make recommendations for policy, law and rule changes. This includes working with the State Controller's Office, Public Employees' Retirement System, and departments to identify major problems affecting employee status, payroll, etc., and to develop improved methods for documenting and reporting personnel transactions.

Personnel transactions consultation provides assistance to departmental personnel offices, employees, employee organizations, and State Personnel Board staff. Personnel transactions such as appointments, separations, salary, fringe benefits and payroll have become more complex, requiring more assistance in interpreting laws, rules and standards.

With the conversion of employee history records and document processing to the automated PIMS system, scheduled for completion during 1975-76, the transactions staff will intensify consultative activities for State departments and State Personnel Board staff.

	74-75	75-76	76-77	1974-75	1975-76	1976-77
Expenditures	26.9	24.3	18.8	\$457,638	\$490,027	\$445,862

e. Total Compensation Administration

Total compensation administration consists of salary and employee benefit surveys, special salary and employee benefit studies, and the annual salary and employee benefit adjustment program.

Salary and benefit surveys are conducted on a semiannual basis throughout California including major surveys in the Los Angeles and San Francisco metropolitan areas. Data is collected by personal visit, by telephone and by mail.

Special salary and benefit studies include studies on particular classes, analysis of salary inequities, and development of employee benefit plans. Projects are conducted for the Legislature, Governor's Office, Executive Office, departments, and some are self-initiated.

The annual salary and employee benefit adjustment program includes the analysis of survey data in terms of prevailing levels of compensation, internal salary relationships and recruitment problems, the development of salary adjustment and benefit improvement recommendations, and the preparation of the salary and benefit recommendation report to the Governor and the Legislature.

Output

Expenditures	6	4.3	4.2	\$101,694	\$97,394	\$99,820

III. PERSONNEL DEVELOPMENT

The Personnel Development Division was established in the State Personnel Board in June 1975 to provide positive effective leadership in assisting departments in developing the State Government's human resources. The Division assumed the functions (and personnel) previously performed by the Management Development Institute, Management Development Services, and Secretarial Development Institute which are responsible for providing effective, high quality, centralized employee development programs and consultation services when determined to be the most economical to meet departmental needs. The program relies primarily on reimbursable funds from State departments. *To adequately provide clerical support to the growing demand for training programs, two positions (\$24,629) are being added to this program. These positions are to be fully reimbursed positions.*

IV. PUBLIC EMPLOYMENT AND AFFIRMATIVE ACTION

Program Objective and Description

The Public Employment and Affirmative Action Program provides centralized leadership, direction and technical assistance in creating increased job opportunities for disadvantaged and minority persons within the State civil service system. Consistent with the goals of the Welfare Reform Act, the State Personnel Board has accelerated its activities to develop Affirmative Action/Equal Employment Opportunity Programs. To better describe and more fully recognize both the Career Opportunities Development (COD) and Affirmative Action Programs, the State Personnel Board established the Public Employment and Affirmative Action Division which includes the COD Program and the Office of Equal Employment Opportunity Review. The objectives of the Public Employment and Affirmative Action Division are to: (1) assume a leadership role in providing policy guidelines to assist State departments in achieving a fully integrated State work force, (2) assist in identifying and removing artificial barriers to employment of disadvantaged and/or minority persons, and (3) assist in developing, reviewing and analyzing Affirmative Action Plans.

The Welfare Reform Act of 1971 assigned to the COD Program the additional responsibilities of developing, implementing and operating: (1) a Jobs Program for welfare recipients, (2) a program of grants to cities and counties for local COD projects, (3) a technical assistance service to aid interested jurisdictions, and (4) an increased level and scope of program in the State civil service.

Thirty-two (32) temporarily funded positions are being administratively established as permanent positions during Fiscal Year 1975-76. These positions have been paid through temporary help funds for several years. No program implications exist in this transaction as this change reflects only how the positions appear in the budget and does not represent a change in the program level.

In addition, 12 new positions are being established in order for the Public Employment and Affirmative Action Program to continue to implement the Jobs for Welfare Recipients Program mandated by the Welfare Reform Act of 1971, and the Affirmative Action Program initiated in conjunction with that program. Funds for these positions will come from the \$1.5 million used to provide administrative support to the Jobs for Welfare Recipients and COD programs; none of the funds appropriated to fund positions under the Jobs for Welfare Recipients Program will be used for these 12 positions. The funding represents a redirection in currently appropriated administrative support funds, and does not require an additional appropriation.

The Governors Executive Order B-1-75 mandated the State's involvement in the Comprehensive Employment and Training Act (CETA) in fiscal year 1974-75. The SPB's budget was reimbursed by \$121,619 under CETA Title II in fiscal year 1974-75. For fiscal year 1975-76, it is estimated that \$192,577 in reimbursements will be added to the State Personnel Board's budget.

Program Requirements	74-75	75-76	76-77	1974-75	1975-76	1976-77

Program Elements

a. Coordination and program development	64.6	39.8	32.4	2,216,338	1,821,402	1,462,065
b. Welfare recipients jobs	7.8	9	8.9	2,321,484	6,127,650	6,381,999
c. Affirmative action	15.4	25.8	25.5	307,927	697,393	751,854

a. Coordination and Program Development

The COD Program operates on the basis that primary responsibility for and capacity to achieve program objectives rests with the departments that make the organizational, staffing and hiring decisions. To facilitate participation of departments, the COD Program provides: (1) consultative and technical assistance to departments, (2) direct financial resources and intensive staff support to larger departments to provide for full-time departmental COD coordinators.

Output	1974-75	1975-76	1976-77
Number of city projects (cumulative).....	10	15	20
Number of county projects funded (cumulative)	15	16	20
Number of State agencies with full-time COD coordinators	16	14	8
Number of State COD classes	70	77	80
Number of State COD incumbents	2,800	2,800	3,000
Prior COD incumbents advanced into non-COD classes (cumulative)	2,400	2,700	3,000

Input	74-75	75-76	76-77	1974-75	1975-76	1976-77
Expenditures.....	64.6	39.8	32.4	\$2,216,338	\$1,821,402	\$1,462,065

b. Welfare Recipients Jobs

The Jobs for Welfare Recipients Program enables the full reimbursement of employer payroll costs during the training period. The Jobs for Welfare Recipients Program provides: (1) inducements to employing agencies and jurisdictions to hire recipients who complete training and (2) facilitates the amount and quality of training by hiring groups of trainees at one time. In an effort to achieve this goal and measure program results, COD has designed a comprehensive evaluation model to provide specific and reliable indicators of program costs, results and benefits which enable the Legislature, State administration and program administrators to measure the Jobs Program's results in relation to its cost.

STATE PERSONNEL BOARD—Continued

Output

	1974-75	1975-76	1976-77
Number of recipients contracted for each year	1,195	2,460	2,844

Expenditures	7.8	9	8.9	\$2,321,484	\$6,127,650	\$6,381,999

c. Affirmative Action

The State Personnel Board established an Affirmative Action Unit in recognition that a comprehensive Affirmative Action Program was required to achieve a fully balanced work force. The information developed by this unit enables the COD Program and Jobs for Welfare Recipients Program to concentrate on removing the underlying causes of low representation of minorities in State and local agency work force. The Affirmative Action Unit consults with departments preparing Affirmative Action Plans and reviews and approves those plans. The Unit also monitors the departments' progress toward the Affirmative Action Plan goals. Included in the Unit is a Women's Program to develop methods to assure that women obtain a balanced representation throughout the work force.

Output

	1974-75	1975-76	1976-77

V. LOCAL GOVERNMENTAL SERVICES

Program Objectives and Description

The State Personnel Board helps provide a high quality of personnel management in local governmental agencies because many of these agencies are not able to independently meet certain of their personnel management needs at a desired level of economy and efficiency. Such jurisdictions need to be able to get expert, readily available, outside assistance at a reasonable cost. This is accomplished through contracting personnel services.

Federal statutes require local agency employees engaged in the administration of federally funded welfare, health and emergency services programs have merit system coverage. Government Code Section 19800 et. seq. assigns responsibility to see that this is done to the State Personnel Board. The Board's Merit System Services accommodates to this requirement by providing for comprehensive merit system programming in city, county and district welfare, health and emergency services departments through fully reimbursed contract agreements with the State Department of Benefit Payments, State Department of Health and State Office of Emergency Services. By July 1, 1976, about 54,000 employees in approximately 175 city, county and district welfare, health and emergency services departments will be under such merit system coverage. Approximately 60 percent of this total group are professional or skilled technical personnel.

a. Contract Personnel Services—Selection Services

Complete recruitment and selection services are provided upon request to local agencies. Written and performance-type examinations are provided, interviews are conducted, and advice and assistance are given on any phase of recruitment and selection. Developmental projects are conducted to improve selection systems and techniques. Selection training is available to improve local agency technical expertise.

Services provided to merit system services include: (a) clerical support in the recruitment, examination, and establishment of lists of persons qualified for employment in city and county agencies receiving certain grant-in-aid funds, and (b) technical services in the development and validation of employment tests.

Continuing emphasis is being given to the improvement of written test materials, especially with regard to establishing validity and developing test methods to provide fairness to candidates from all cultural groups and backgrounds.

b. Contract Personnel Services—Survey Services

At the request of local governmental agencies, a variety of technical personnel services are provided. These include the development, revision or review of position classification plans, pay plans, and employee benefit programs. Consultation and assistance is provided for the development of personnel ordinances, rules, and procedures. Similarly, consultation and training on a variety of personnel management subjects is available.

Increased emphasis is being given to improving affirmative action efforts in local agencies by providing assistance in personnel systems review, establishment of positive affirmative action policies and procedures, and job restructuring to increase upward mobility of ethnic minorities and women.

Output	1974-75	1975-76	1976-77
Agencies served	81	95	81
Positions studied	12,100	14,190	12,100

Expenditures	26	24.8	24.8	\$540,583	\$494,296	\$519,971

c. Merit System Services—Approved Local Merit Systems

Upon request, Merit System Services reviews and approves merit systems and personnel standards established by local agencies for their welfare, health and emergency services departments when such systems and standards meet established Federal-State merit system standards. Advice and consultation on a variety of personnel management subjects is available to assist local agencies to meet the established standards.

This program requires the development and maintenance of standards; review and approval of relevant civil service charters, ordinances, rules, classification plans, pay plans, employee-management agreements, and affirmative action policies designed to achieve equal employment opportunity; regular audit of the administration of approved local merit systems to assure compliance in operation; and advice and consultation service associated with the development of merit system programs in local agencies.

Output	1974-75	1975-76	1976-77

d. Merit System Services—Interagency Merit System

The Board directly administers a complete Interagency Merit System operation for 40 county welfare departments, plus a somewhat smaller number of city, county and district health and emergency services departments. In administering this single statewide system, the Board develops and maintains personnel regulations and classification plans; recruits, examines, establishes eligible lists and certifies names of persons qualified for employment in city, county and district welfare, health and emergency services departments; delegates responsibility to some local agency personnel departments for administration of locally established classification, examination, other parts of personnel plans and audits such local agency performance; hears and decides appeals from disqualification on examination, alleged discrimination due to nonmerit factors, and disciplinary action by local agencies; reviews, analyzes and processes personnel transactions from the Interagency Merit System jurisdictions; and maintains applicable personnel records.

e. Selection Consulting Center

The Selection Consulting Center provides consultative, research and training services in the area of public personnel selection. This program is fully reimbursed through IPA grants and anticipated reimbursements from local jurisdictions. The center will become a joint powers organization in the 1975-76 Fiscal Year. Therefore, 12 authorized positions have been abolished at the end of the 1974-75 Fiscal Year. In preparation for the abolishment of the center only 6 positions were filled in 1974-75.

VI. MANAGEMENT SERVICES

Program Objectives and Description

A five-member board is appointed by the Governor for 10 year terms. The board provides policy direction of the State civil service system through its authority to review and modify recommended actions of the staff. Public hearings are held by the board for the purpose of maintaining an efficient and up-to-date merit system, responsive to the needs of State managers. The board provides an appeal process for all employees and applicants who believe they are arbitrarily or unjustly treated by the Personnel Board staff.

Program management is provided through the executive office.

A variety of support activities are centralized in the Management Services Division to give the economies which result from such centralization. Included are staff in business services, data processing, accounting and budgeting, management audit, personnel, training, roster maintenance, word processing, mail and duplicating, affirmative action, and files.

Management Services Division provides administrative support for all State Personnel Board programs. Two of these programs, Local Government Services and Personnel Development, recover their costs through reimbursements from client agencies. Consequently, these programs pay for administrative services on an "actual services rendered" basis related to revenues. To meet the need for administrative services performed for these two programs, 10 reimbursable positions are being established during the Fiscal Year 1975-76 as it has become evident that the level of revenues for the two reimbursable SPB divisions consistently requires these 10 positions.

For Fiscal Year 1976-77, the equivalent of one position in temporary help is being established in the Hearing Office to handle increased work load in the number of hearing cases. The funds for this position will be transferred from the SPB's Operating Expense and Equipment category of the budget, and therefore does not require any new funds.

The State Personnel Board has established a contract with the Agency for International Development (AID) to provide technical personnel services to the Liberian government. This contract was approved by the Joint Legislative Budget Committee and is funded entirely by reimbursements.

^a Temporary positions to administer the Comprehensive Employment and Training Act as mandated by Governor's Executive Order B-1-75. These positions are totally reimbursable and the contract is due to expire June 30, 1976.

^b Temporary positions are required for the conversion of civil service employee records to Personnel Information Management Systems (PIMS). Funding is for 5.3 staff years and is totally reimbursable from the State Controller. Funding for these positions are due to expire June 30, 1976.

^c Temporary contract totally funded by reimbursements from Agency for International Development. This project has been approved by the Joint Legislative Budget Committee and the contract is due to expire in August, 1978.

PUBLIC EMPLOYEES' RETIREMENT SYSTEM

The System administers a group of separate, but related, benefits for over half a million public employees within the State of California. This grouping consists of retirement and death benefits; the extension of social security coverage to public employees, and the development, negotiation and operation of a number of group hospital and medical insurance plans.

The System's programs include the constitutional officers of the State, the Members of the Legislature, Legislative employees, State employees, most school employees who are not teachers, and any other public employees whose employer elects to contract for the benefits the System offers.

I. RETIREMENT

Program Objectives and Description

To provide a retirement and death benefit program for public employers, and their employees, of the State of California which will provide for the orderly and systematic retirement of employees and encourage career employment in the public service.

Beginning in 1932, the State provided a series of retirement and death benefits for its employees, other than teachers. In 1939, coverage was extended to employees of those political subdivisions of the State who wished to contract with the State retirement system. Benefits have been expanded and increased. Today the system offers to all covered employees retirement benefits based on service or disability; death benefits for employees and annuitants; survivors benefits to members not covered by social security; and special benefits, to members in certain occupations, based on death or disability incurred in the line of duty.

The Legislators' Retirement System is also administered by the Public Employees' Retirement System.

Staffing for the retirement program has been increased by 4 man-years in the current year and 5 man-years in the budget year to meet increased workload resulting from growth in the membership of the system.

II. SOCIAL SECURITY

Program Objectives and Description

This activity provides a means whereby employees of public agencies may obtain coverage under the Old-Age, Survivors, Disability and Health Insurance provisions of the Federal Social Security Act. The function administers the coverage and reporting phases of the Social Security Program for California Public Agencies.

With the continuing increase in the costs of Social Security coverage to public agencies and to the employees, there is interest and activity in the requests for termination of coverage by agencies. In Fiscal Year 1974-75, 30 public agencies terminated coverage and 70 agencies are in the process of termination.

III. HEALTH BENEFITS**Program Objectives and Description**

This program provides medical and hospital insurance plans with private carriers for State and public agency employees, annuitants and their families. Primary activities are to negotiate contracts and to provide standards for basic, major medical, and supplemental to Medicare Health Plans; to conduct open enrollment periods, providing information to employees and annuitants; and to mediate service and claim disputes.

Total premium costs of 1974-75 fiscal year were \$79,859,406.

IV. PERS SYSTEM REDESIGN PROJECT**Program Objectives and Description**

Today's systems are characterized by patchwork revisions and inadequate, inefficient products. Nearly 300 programs and 200 data manipulating operations used in active/inactive member, retired member, investments, health benefits and actuarial activities, have not been changed substantially since development, but many have been modified for numerous legislative changes, growth, and hardware/software upgrades.

Numerous studies have demonstrated the need for the redesign to alleviate the problems associated with the present system.

The project is planned for three years and is composed of the following systems:

1.1 Retirement Roster, State

The purpose of this system is to create an automated "roster" system which will consolidate employment history data and summary financial data. It will be an automatically updating, on-line system.

1.2 Health Benefits Roster, State

This system will create an automated health benefits reference system, which will replace a large, hard copy file system. State data only will be automated in system 1.2.

2.1 Retirement Roster, PA

This system will add Public Agency data to a system similar to that described in 1.1. There are some differences in data parameters, but the primary difference will be in storage and maintenance requirements. System 1.1 will be stored and maintained by PIMS in the State Controller's Office; System 2.1 by PERS.

2.2 Health Benefits Roster, PA

This system will duplicate system 1.2 for Public Agency Health Benefits data. Storage and maintenance will be by PERS.

2.3 Employer Roster

This system will automate contract coverage data, employer accounting data, and actuarial data for Public Agency employers. It will serve as a contract file for daily PERS processing, and as an employer information system.

3.1 Benefits System Redesign

This system will automate as far as possible retirement and death benefits processing. It will include such features as automated determination of eligibility, calculation, control, adjustment, transfer of reserves, warrant and information printing, address systems, etc.

This system will redesign the current payroll reporting system in order to solve numerous delinquency and inaccuracy problems. It will also automate related accounting functions including audits, adjustments, refunds, and employer billing.

3.3 PA Membership Reporting and Determination System

This system will redesign PA membership reporting (appointments, changes, and separations) in a manner similar to PIMS phase I work for the State. It will include a system of universal PA reporting, automatic determination of membership and coverage, membership eligibility and audit, and a member information system.

3.4 Management Information System

This system will provide an automated means for cost accounting and effective management, including unit function statistical reports, materials usage reports, cost pro-ration and charge back at the Division level, and budget forecast reports.

3.5 Member Service Adjustment System

This system will automate the data gathering, computation, and control features for various types of member service which may be purchased or claimed by the member.

3.6 Accounting System

This system will redesign and/or automate various internal accounting systems.

3.7 Annual Member Statement System

This system will replace the current, limited member information system PERS now maintains. It will expand the annual statement format to include beneficiary of record, current address, eligibility for service credit, estimate of retirement allowance, health benefits coverage, explanation of rights and benefits, etc.

PUBLIC EMPLOYEES' RETIREMENT SYSTEM—Continued

- 3.8 Investments System
This system will redesign current automated system for bonds, equities, and mortgages.
- 3.9 Social Security System
This system will automate, as far as possible, features of the PERS Social Security operation. Slow manual systems of accounting and disbursement will be replaced by automated systems.
- 3.10 Files Management System
This system will develop the most effective method of files management related to the overall PERS redesign project. It will include microfilm usage. *Twelve positions are being added in the current year and 17 in the budget year. These positions will provide PERS with the capability of formulating various planning documents needed to determine the number of positions and level of funding required for the project.*

V. ADMINISTRATION

Program Objectives and Description

To provide effective leadership, policy and guidance to achieve the objectives of the system's programs and provide the necessary facilities, resources and support services required to achieve the objectives of the system's programs.

The activities include the actuarial investigation into mortality and experience factors to establish appropriate benefit discounts, premiums and rates of contribution; development of costs of proposed benefit changes; development of legislation desired by the system or other interested parties; analyses of all legislative bills affecting the system; prediction of future market trends; analysis, comparison and selection of current offerings; purchase and/or sale of securities and the provisions of data processing services for the system.

The staff of the administration program has been increased by 8 man-years in the current and budget years to meet workload increases caused by growth in the membership of the system.

VI. LEGISLATIVE MANDATE (Local Assistance)

Program Objectives and Description

Section 2231(a) of the Revenue and Taxation Code requires the state to pay local governmental units the costs of any new program or increased level of service of a program mandated by legislation enacted after January 1, 1973. Within the program area of the Public Employees' Retirement System there is one legislative mandate. It is Chapter 1322, Statutes of 1974 (SB 1775). This mandate provides that the definition of dependent children, for purposes of special death benefits for safety members, includes full time students under the age of 22.

Authority

STATE TEACHERS' RETIREMENT SYSTEM

The system was established 63 years ago as the Public School Teachers' Retirement Salary Fund and Permanent Fund. It became the State Teachers' Retirement System in 1944. The Teachers' Retirement Board was formed in 1963 when the system was made independent of the Department of Education.

The board manages the system and has exclusive control over the moneys of the system, makes rules, sets policies, controls investments, and has the power and authority to hear and determine all facts pertaining to application for benefits under the retirement system. The staff and the Teachers' Retirement Board manage the largest teachers' retirement system in the United States having 329,000 members on June 30, 1975 and 62,000 members on the retirement roll for a total membership of 391,000.

a. Service to Members and Employers

Program Objectives and Description

In 1975, the board redefined the objectives of the Teachers' Retirement Program as follows:

1. To provide a financially sound plan for the funding of all approved benefits.
2. To provide adequate benefits on a timely basis for members of the State Teachers' Retirement System and their beneficiaries.
3. To develop and maintain a system, structured to aid in the maintenance of a qualified body of career teachers in the California public schools who intend to retire from the system.
4. To develop and maintain a comprehensive information program that will fully inform members, retirants, beneficiaries, the administration, the Legislature, and employers about the plan and meet federal standards.
5. Provide progressive leadership, management, program development and support to insure that the other objectives are reached at the lowest possible cost at the approved level of service.

Historically, the system had operated on a pay-as-you-go basis. Chapter 1305, Statutes of 1971, for the first time, placed the system on a reserve funding program. Currently all teachers, regardless of age or sex, contribute a uniform percentage (8%) of compensation to the fund. The local school districts will also contribute up to 8 percent of payroll by July 1978 to pay for the employers' share of the cost of current retirement service credit. The state is currently contributing 135 million dollars annually. This contribution is reflected in the budget "Contributions to Teachers' Retirement Fund" which is located in the education section.

The system is responsible for the determination and computation of benefits to members and beneficiaries, and for the distribution of information to all members, employers and other interested groups. Generally, payment of an estimated retirement allowance is made 45 days after date of retirement or receipt of application, whichever is later. Every effort is made to pay refunds 30 days following receipt of application. Family and death benefits are paid 60 days after report of death. Disability benefits are paid approximately 90 days after receipt of application.

This budget reflects a net reduction of 32 positions. This includes reductions of 25 positions in the phase out of the Verification Project and 9 limited term positions; and additions of 1 professional for the legal office, 1 professional for the Records and Statistics Division for field contact with employers, and 1 professional for the continuing qualification program for benefit recipients. Also reflected are augmentations for disability reexaminations, prorata costs, attorney general services and investment services.

STATE TEACHERS' RETIREMENT SYSTEM—Continued

b. Administration

Management of the program is carried on under this element. Included are policy and planning direction, legal services, investment services, service to the Teachers' Retirement Board, and management support to the operating divisions.

One attorney is being added to handle the increased workload of administrative hearings, court cases and other legal activities.

DEPARTMENT OF VETERANS AFFAIRS

The Department of Veterans Affairs has a threefold overall objective: (1) provide comprehensive assistance to veterans and dependents of veterans in obtaining benefits and rights to which they may be entitled under state and federal laws; (2) afford California veterans the opportunity of becoming homeowners through the medium of long-term low interest loans available to them under the Cal-Vet farm and home loan program; and (3) provide support for the Veterans Home of California where eligible veterans may live in a retirement community and where complete nursing care and hospitalization is provided.

I. FARM AND HOME LOANS TO VETERANS

Program Objectives and Description

Since 1921, the Cal-Vet loan program has successfully served the needs of nearly 300,000 World War I, World War II, Korean and Vietnam veterans for long-term housing and farm loans at low interest rates. Veterans Bonds voted on and approved by the people have been sold at intervals to provide funding for the program.

California veterans, except those who were wounded or are disabled from war service or were prisoners of war, have 25 years following their release from active military service to qualify and apply for loan benefits. Thus, lending will be directed to the Korean and Vietnam veterans. Maximum home loans are \$30,000 except when a veteran's assets are less than \$5,000, then the maximum becomes \$35,000. Maximum loans for farms are \$80,000.

Veteran purchasers are charged interest on their loans at the lowest rate which will cover all costs of the program. The interest rates charged have provided for redemption of the bonds, debt service and all program administrative charges, without any cost to the California taxpayer.

Authority

Article 4, Section 31 of the California Constitution. Article 3, Chapter 6, Division 4 of the California Military and Veterans Code.

Program Requirements	74-75	75-76	76-77	1974-75	1975-76	1976-77
Farm and Home Loans to Veterans (Veterans Farm and Home Building Fund of 1943)	182.4	191.6	192.2	\$375,016,134	\$420,618,855	\$429,498,567

b. Loan service	134.5	140.5	137	50,533,251	62,055,521	66,418,052
c. Loan funding	2.3	2.3	2.3	147,034,398	160,811,494	158,925,300

a. Property Acquisition

This element encompasses the collection and evaluation of data regarding the applicant and his property selection. Loan decisions must protect the interest of both the veteran and the Cal-Vet loan program.

The military service documents of veterans, the records of veteran's widows, wives of prisoners of war, or persons missing in action, are inspected to determine the applicant's qualifications for a loan under the statute. This examination is integrated into the application process.

b. Loan Service

Four interrelated task efforts combine to assure fulfillment of the obligations of the contracting parties: mortgage loan accounting, insurance and property damage claims adjustment and services, loan contract alterations, and contract performance services.

Mortgage loan accounting consists of routine billing, cashing, account computation and recording of each borrower's payments.

Insurance services consist of determination and application of minimum coverages required and adjustment of fire and hazard insurance claims and disaster indemnity claims. When damage occurs, rapid restoration of the contract property is arranged to assure satisfaction of the borrower and to

DEPARTMENT OF VETERANS AFFAIRS—*Continued*

protect the department's interest. The adjustment of fire and hazard insurance claims is being phased out as this function is being assumed by the insurance company.

The contract enumerates certain contract alterations to which the department may consent. Among these are assignment of contract interest, rental, permission for secondary financing for home improvements, change in legal description of property, and installment changes.

Contract performance services are those functions which logically occur in the course of the contract. Loans are paid in full by installments or are prepaid in advance. On fulfillment of the contract, the property is deeded and the account record is closed. During the life of the contract certain breaches of terms or conditions may occur. There is an element of risk in any loan and not all borrowers perform as agreed. Should a borrower become unwilling or unable to comply with the contract terms, it may be necessary to cancel the contract and either force a sale of the property or to repossess it. Repossessed properties are rehabilitated and sold or rented, depending upon the housing market.

Output	1974-75	1975-76	1976-77

^b These figures represent the number of properties actually repossessed or estimated to be repossessed during the fiscal year.

c. Loan Funding

Funds for Cal-Vet loans are derived from the sale of bonds authorized by the Legislature and approved by the electorate. Activities related to loan funding include sale, payment of interest, and redemption of Veterans Bonds. They are performed by the Veterans Finance Committee and the State Treasurer's Office in accordance with statutory provisions. All costs of such services are paid by the program. Proceeds from bond sales accrue to the Farm and Home Building Fund. These funds, together with prepayment of outstanding loans, are invested until required for authorized purposes. The differential between the interest earned on outstanding Cal-Vet loans and the average net interest cost on all outstanding bonds provides the total operating costs of the program. Work involved is in projecting the program's financial status at points in time to enable economic fund management to meet four annual bond redemption payments and to schedule one or more bond sales annually at the most favorable interest rates.

The level of loan funding activity for 1976-77 is dependent upon the passage of the \$500 million bond act (Chapter 982, Statutes of 1975) by the electorate on June 8, 1976.

II. VETERANS CLAIMS AND RIGHTS

Program Objectives and Description

Over three million veterans now live in California; 800,000 of these are Vietnam war veterans. Federal and state laws relative to the well-being of veterans and their dependents are varied and complex and many new laws are enacted each year. The primary objectives of this program are to provide information to veterans and their dependents concerning the availability of these benefits and to assist eligible individuals in obtaining the benefits.

Types of benefits include hospital and out-patient medical and dental care, wheelchair homes, prosthetic devices, compensation, pensions, insurance, educational assistance, burial benefits, employment preference and others.

Authority

Military and Veteran's Code, Sections 699.5, 970-973; and California state civil service laws and rules, Article 4, paragraphs 18971-18976.

Program Requirements	74-75	75-76	76-77	1974-75	1975-76	1976-77
Totals, Veterans Claims and Rights	36.7	37.7	37.7	\$1,358,025	\$1,632,377	\$1,656,216

Program Elements

a. Claims representation	30.7	31.5	31.5	467,235	529,391	549,363
b. Employment preference	3	3.1	3.1	45,395	51,493	53,426
c. County subvention	3	3.1	3.1	845,395	1,051,493	1,053,427

a. Claims Representation

Veterans seeking benefits from the Federal Veterans Administration file claims with the Veterans Administration Regional Offices in San Francisco, Los Angeles and San Diego. Claims Representatives from the Department appear before the Veterans Administration Rating Boards on behalf of veterans and review Veterans Administration decisions on claims to insure that maximum benefits are obtained. The claims involve initial ratings of service-connected disabilities, increases in existing disabilities, pensions, burial expenses and the full range of other federal benefits.

The number of veterans turning to civilian life is still increasing. Increased workload is also attributable to the increasing age of World War II veterans, whose needs for medical care and pensions are increasing.

b. Employment Preference

Honorably discharged veterans meeting length of service requirements and widows of eligible veterans receive ten point preference on state civil service examinations. Veterans with a service-connected disability receive a 15 point preference. The Department processes applications for veterans preference, verifies eligibility and certifies eligible veterans to the State Personnel Board.

Expenditures	3	3.1	3.1	\$45,395	\$51,493	\$53,426

c. County Subvention

Fifty-five counties have established Veteran Service Offices to assist veterans and their dependents at the local level. This element includes reimbursement to the counties of a portion of the cost of operating Veteran Service Offices. These local offices provide information and assistance to veterans and dependents which they would be otherwise unable to obtain.

Many welfare applicants who are veterans or are veteran related are not aware of state or federal benefits to which they may be entitled. A system has been developed whereby welfare applicants identified as veterans or related to veterans are referred to County Veteran Service Offices for determination of veteran benefit eligibility. This program, developed jointly with the Department of Benefit Payments, is designed to obtain federal benefits for veterans in lieu of additional state welfare benefits.

Output	1974-75	1975-76	1976-77
Counties under contract	55	55	55

III. EDUCATIONAL ASSISTANCE TO VETERANS AND DEPENDENTS

Program Objectives and Description

Dependents of veterans killed or totally disabled as a result of active military service are eligible for counseling and financial assistance. Children of servicemen currently Prisoners of War or Missing in Action are also eligible. Full-time college students receive \$50 per month and high school students receive \$20 per month. Above high school level, additional payments are made for tuition and fees.

The Department accepts only those applicants most urgently in need of further education, taking into account both scholastic achievement and financial need.

The increased number of dependents resulting from Vietnam casualties is balanced by a decline in enrollments stemming from World War II and the Korean Conflict, keeping enrollment in the Dependents program fairly constant.

California veterans attending college full-time, who have exhausted their federal G.I. Bill educational benefits, are eligible for state benefits of \$100 per month up to a maximum of \$1,200. Recent federal legislation increasing G.I. Bill educational benefits has resulted in termination of this program for the budget year.

IV. CARE OF SICK AND DISABLED VETERANS

Program Objectives and Description

The Veterans Home maintains an 854-bed medical and nursing unit (which includes 66 acute care and intensive care beds) and domiciliary structures with a bed capacity of 1489. It is one of the largest geriatric facilities in the country and has full support facilities totaling more than one million square feet.

The program objectives include the provision of the following for war veterans who are California residents: medical care and services at several levels (acute hospital care, skilled nursing care, and intermediate care); rehabilitation care and services; and residential care and services. The Veterans Home is licensed by the State under Title 17 of the California Administrative Code.

The various programs and services for the residents of the Veterans Home are developed in cooperation with the VA hospitals, other state agencies, local government, private organizations and educational facilities.

Construction began during early 1975-76 on the water filtration plant for the Veterans Home water supply from Rector Reservoir. This facility will assure the Home of a continued source of water which meets all health standards.

Authority

The Veterans Home Post Fund, authorized by Section 1047, Military and Veterans Code, provides for the operation of the Veterans Home exchange, motion picture theater, library, and other recreation and entertainment activities for the benefit of the Home and its members. The primary sources of income are derived from interest on investments and from estates of deceased resident members.

b. Medical care and services	598.2	601.5	606.5	8,805,729	9,954,462	10,326,325
c. Rehabilitation care and services	27.5	27.7	27.7	510,066	576,203	594,202

a. Residential Care and Services

Residential services at the Veterans Home are provided through six domiciliaries for male residents and one domiciliary (of 53 rooms) for women residents. One additional building is used to provide state licensed residential care, a type of care requiring a slightly higher level of supervision and care than is provided for domiciliary members. The buildings contain sleeping quarters, a laundry room and recreational and administrative space. Daily supervision of members is carried out by both civil service personnel and member employees. Members in this level of care receive their meals in the 784-seat main dining room, except for a few whose medical problems require them to eat in special dining areas of the hospital complex. Members receive out-patient medical care at the Medical Treatment Center, as well as in-patient medical care in the hospital. All members are under the supervision of physicians and nursing personnel.

With the implementation of several variations in the three basic levels of care to provide more realistic continuing nursing care, the overall level of membership began an upward trend during 1973-74. It is anticipated that this trend will continue during 1975-76 and 1976-77.

Fees for residential care do not exceed \$80 per month at this time. The fee is determined after application of dependent exemptions and in consideration of the veteran's total income.

Eight new Geriatric Nursing Assistant positions are being added to provide medical supervision during nights and weekends. This will permit a number of residents to be moved from nursing care units to the domiciliary units. We anticipate that the addition of these personnel will result in an overall increase in population during the year, thus increasing federal funds and reimbursements by \$41,860 in 1976-77. Additional state funds required for the eight positions will be absorbed within existing resources.

DEPARTMENT OF VETERANS AFFAIRS—Continued

for the eight positions will be absorbed within existing resources.

Output	1974-75	1975-76	1976-77
Average residential membership.....	532	545	562
Input	74-75	75-76	76-77
Expenditures.....	125.3	126	134
	1974-75	1975-76	1976-77
	\$2,491,298	\$2,814,326	\$2,944,098

b. Medical Care and Services

Medical care and services are provided in a fully accredited unit comprised of 66 acute care beds, 249 nursing care beds, and 527 intermediate care beds. The complex includes hospital administration, medicine, surgery, pharmacy, radiology, pathology, dental, social service, and contract consultants. Accreditation is by the Joint Commission on Accreditation of Hospitals.

Specialized care which may not be available at the hospital is provided by temporarily transferring patients to one of the several Bay area Veterans Administration hospitals. Member fees do not exceed the rate of \$110 per month for nursing and hospital care. The Veterans Home participates in training programs, such as in-service training of students whose vocational objectives are registered nurse, licensed vocational nurse, geriatric nursing assistant, psychiatric technician, hospital aid, hospital worker, and other health care fields, particularly the social services.

In addition, the Veterans Home participates in providing clinical experiences for various medically related fields with students and residents sent to the Veterans Home both from local colleges and larger universities. These programs provide a valuable source of personnel with increased medical expertise in the care of the aged from which the Home draws future employees.

Review of the classification of residents and those on the waiting list is conducted as a continuing activity to permit veterans' acceptance and continued care at the levels in which they can best function.

Five respiratory therapy positions are being added to provide professional, qualified respiratory therapy to many residents in need of such care for pulmonary dysfunctions. It is anticipated that the provision of such highly professional therapy will result in an increase in population, particularly in the nursing care areas. Resulting increased federal funds and reimbursements are estimated to be \$45,160 in 1976-77, so that General Fund costs will total \$13,978 for the five new positions.

Output	1974-75	1975-76	1976-77

	1974-75	1975-76	1976-77
	\$8,805,729	\$9,954,462	\$10,326,325

c. Rehabilitation Care and Services

Rehabilitation services include: activities planning, occupational and physical therapy, sheltered workshops, arts and crafts, volunteer services and recreation. Members are interviewed, counseled and brought into an individually designed rehabilitation programs consistent with their abilities, medical diagnosis and personal desires.

Rehabilitation for members ranges from a walk of a few minutes duration or job assignment requiring minimal mental and physical demands, to activities requiring the skill of therapists and other medical personnel. Although the word "rehabilitation" carries many connotations, at the Veterans Home rehabilitation primarily concerns itself with the following:

a. Train or equip the patient who has several disabilities to function at his highest level, although total recovery may not be possible. As an example, this would include training a stroke patient to dress himself, feed himself and perform some or all of the other self-serving activities.

b. Assist in the total recovery of certain residents with temporary limiting disabilities.

The emphasis on this element is high, and the rehabilitation department has a physician as the department head.

In addition to the above services, an alcohol control program is underway on a modest basis. Through a realignment of authorized staffing, the Veterans Home has established a program to determine the problems of alcoholism among its members, methods of treating these problems, and evaluation of the effectiveness of these methods.

Output	1974-75	1975-76	1976-77

V. GENERAL ADMINISTRATION

Program Objectives and Description

The general administration program provides for implementation of policies by the California Veterans Board and the Director for all departmental operations. Fiscal, legal, personnel, and other administrative functions, not specifically assigned to the basic programs are included under this program to provide specialized staff services to management.

A part-time legal assistant is being abolished and a full-time legal counsel is being established to meet increased workload.

BUSINESS AND TRANSPORTATION

DEPARTMENT OF ALCOHOLIC BEVERAGE CONTROL

The principal objective of the Department of Alcoholic Beverage Control is to administer the provisions of the Alcoholic Beverage Control Act, which gives the department exclusive right and power to license and regulate the manufacture, sale, purchase, possession and transportation of alcoholic beverages within the State, and subject to certain laws of the United States, to regulate the importation and exportation of alcoholic beverages into and from the State.

The department functions through a headquarters office, and division, district, and branch offices. The workload is divided into three elements: licensing, compliance, and administration.

Proposals to revise the fee structures will be submitted to the Legislature to reflect current costs of providing services.

PROGRAM REQUIREMENTS	74-75	75-76	76-77	1974-75	1975-76	1976-77
Administration of the Alcoholic Beverage						
Control Act	440.6	438.3	-	\$8,611,043	\$9,436,014	-
Reimbursements				-136,155	-144,582	-
NET TOTALS, PROGRAM (General Fund)				\$8,474,888	\$9,291,432	-

SIGNIFICANT PROGRAM CHANGES

A Reorganization Plan will be submitted to merge this department's programs with the Office of Alcoholism within the Health and Welfare Agency. 1976-77 expenditures are reflected in the budget for Department of Alcohol Beverage Control within the Health and Welfare Agency. (See page 690.)

I. LICENSING ELEMENT

There are two basic objectives of the licensing element. One is to license only qualified persons who apply to engage in the sales, production or distribution of alcoholic beverages. The qualifications are set forth in the Constitution and statutes and are interpreted by regulations and policy statements. The second objective is to issue licenses at locations where they will not cause problems to the community.

Annual fees vary with the type of license and range from \$24 a year for an off-sale beer and wine license to \$580 a year for an on-sale general license. These fees are deposited in the Alcoholic Beverage Control Fund, 90% of the amount collected in the various cities and counties being returned to the respective jurisdictions. There are also original fees for new licenses; transfer fees for moving from one location to another or for transferring from one entity to another. In addition there are fees for the original issuance of a license. The latter named fees are placed in the State General Fund. Both types of general license are limited in number, one on-sale for each 2,000 inhabitants of a county and one off-sale for each 2,500 inhabitants.

Authority

Article XX, Section 22 of the California Constitution, and Division 9 of the Business and Professions Code.

Expenditures	\$3,908,714	\$4,285,313	-
Personnel man-years	205.1	204	-

II. COMPLIANCE ELEMENT

The objective of the compliance element is to insure adherence to the laws and regulations by persons licensed to sell, manufacture or otherwise deal in alcoholic beverages. Major attention is given to premises operated in a disorderly manner where vice conditions are permitted or encouraged. Other investigations are necessary following original issuance or transfer of a license to make certain that unqualified persons do not obtain control of the business through unreported changes in the ownership of licensed businesses.

Another type of investigation concerns the violation of business practices statutes which provide for fair trade contracts, price posting, tied-house restrictions, advertising limitations, and prohibitions against the giving of free goods in connection with sales of alcoholic beverages. Additional fees are assessed off-sale general, wholesale and manufacturing licenses for support of these investigations by the department.

III. ADMINISTRATION ELEMENT

General administration of the department's program is carried out through a line organization consisting of the director, chief deputy director, assistant directors and district administrators. A staff organization, quartered principally in Sacramento, performs legal and administrative duties for the department. For administrative purposes, the State is divided into two divisions with assistant directors in charge. The State is further subdivided into nineteen districts with four districts maintaining branch offices. A district administrator directs the work of the department in each district.

ALCOHOLIC BEVERAGE CONTROL APPEALS BOARD

Program Objectives and Description

The objective of the Alcoholic Beverage Control Appeals Board is to provide an inexpensive and expeditious remedy of appeal to persons aggrieved by a decision of the Department of Alcoholic Beverage Control ordering any penalty or issuing, denying, transferring, suspending or revoking any alcoholic beverage license. Following the filing of an appeal and the receipt of the transcript and record and submission of written briefs, the board conducts an open hearing to receive oral argument. Subsequent to this hearing, the board prepares, publishes and distributes formal written opinions on all cases. Parties seeking review of Appeals Board decisions go directly to the Courts of Appeal by filing a petition for a writ of review (Business and Professions Code, Sections 23090-23090.7). Judicial review of the board's decision was requested in only 27 cases.

Authority

Authority for the Alcoholic Beverage Control Appeals Board, which consists of three members appointed by the Governor, stems from Article XX, Section 22, of the California Constitution and Division 9, Business and Professions Code.

ADMINISTRATIVE REVIEW

Workload Factors

During fiscal year 1974-75 the Department of Alcoholic Beverage Control received 15,530 applications for liquor licenses and conducted 3,193 investigations on complaints and referrals. As a result of enforcement and investigatory actions taken by the department and other policing agencies, 3,039 accusations were filed. There were 906 administrative hearings held during this period. The department issued 581 decisions from which 114 appeals were filed with the Appeals Board. These appeals resulted in 107 decisions dealing primarily with minors, tied-house violations and license protests. Between its inception in 1954 and June 30, 1975 approximately 4,321 cases have been decided.

STATE BANKING DEPARTMENT

The State Banking Department is primarily concerned with protecting the public from economic loss resulting from bank and trust company failures. In addition to encouraging observance of sound banking practices, the Department regulates transmitters of money abroad and certifies securities as legal investments. Also, the Superintendent of Banks has the duty of functioning as the administrator of local agency securities. The programs of the State Banking Department are supported by the State Banking Fund which is replenished annually by assessment of banks and trust companies, license and application fees, and charges for specific services. Notwithstanding the need for additional staffing coupled with cost-of-living raises, the annual assessment rate has been reduced for the past four years.

SUMMARY OF PROGRAM REQUIREMENTS

	1974-75	1975-76	1976-77
I. Licensing and Supervision of Banks and Trust Companies	\$2,502,896	\$3,000,027	\$3,462,947

I. LICENSING AND SUPERVISION OF BANKS AND TRUST COMPANIES

Program Objectives and Description

To protect the public from widespread economic losses that often result from failure of banks and trust companies, without depriving the public of reasonably priced, convenient banking and trust services.

Authority

California Financial Code, Division 1, Chapters 3, 4, 12, 14, 16, 17, and 19 (Banking Laws)

Program Requirements	74-75	75-76	76-77	1974-75	1975-76	1976-77
Totals, Licensing and Supervision of Banks and Trust Companies	108.5	121.5	133.6	\$2,502,896	\$3,000,027	\$3,462,947
Banking Fund				2,467,720	2,949,052	3,409,122
Reimbursements				35,176	50,975	53,825

Program Elements

a. Investigation of Applications for New Facilities	5.8	4.9	4.4	\$125,149	\$99,522	\$92,234
b. Continuing Supervision of Existing Banking Facilities	95.1	108.9	121	2,210,053	2,715,678	3,168,950
c. Continuing Supervision of Trust Activities ..	7.6	7.7	8.2	167,694	184,827	201,763

a. Investigation of Applications for New Facilities

Because the establishment of new banks, new trust companies, branches of existing banks, trust departments of existing banks and title companies and other new facilities increases the potential risk of loss for the organization involved and therefore the public, the prior approval of the Superintendent of Banks is required. In each case, the application requesting the approval is investigated to determine whether statutory and administrative requirements are satisfied. The intensity of the investigation depends in large part on the degree of exposure to loss involved. The report and recommendations of a senior bank examiner are analyzed by the executive staff prior to submission to the Superintendent of Banks for his decision. Other types of investigations generally are less detailed and therefore are less costly.

Output	1974-75	1975-76	1976-77
Applications filed for new banks	21	15	10
Applications filed for new branches	89	98	113
Applications filed for new trust facilities	3	4	4

Expenditures	5.8	4.9	4.4	\$125,149	\$99,522	\$92,234

STATE BANKING DEPARTMENT—Continued

b. Continuing Supervision of Existing Banking Facilities

Periodic examinations of all banking institutions are necessary to protect depositors and assure the maintenance of a sound banking system. Each bank under State jurisdiction is required by statute to be examined at least annually with problem institutions subject to more frequent examinations. The examining procedure is complex and requires highly skilled examiners to appraise and evaluate the most difficult of large unsecured credits, including a verification of assets and liabilities, appraisal of asset quality, analysis of liquidity position, and a review of operations. Unsafe practices or statutory violations are brought to the attention of the bank for corrective action and assets of questionable value are written down or charged off from the assets of the bank. Institutions in serious financial condition may be placed in liquidation or under the control of a conservator.

An important part of the supervisory function is the investigation of complaints received from the general public and cooperation with law enforcement agencies in connection with crimes affecting banks. Confidential investigations are a necessary part of this supervision.

There were no State bank failures or closures during the year. Twenty-four banks required special regulatory attention of which three were considered serious problems. Prompt vigorous action by the Department prevented loss or inconvenience to the public.

Due to the continuous rapid increase in the number of banks and growth in assets, the Department had been unable since 1970 to meet its statutory requirement to examine every bank once each calendar year; however, in calendar year 1975, due to additional positions funded in prior budgets, the Department anticipates that all banks will be examined.

To respond to the continued increase in workload, stemming from both the regular examination schedule and a greater emphasis on monitoring of problem institutions, the department is requesting sixteen additional examiner positions and two clerk typist support positions.

Output	1974-75	1975-76	1976-77
Total assets (billions)	\$31.3	\$39.6	\$43.9
Banks	137	154	161

Input	74-75	75-76	76-77	1974-75	1975-76	1976-77
Expenditures	95.1	108.9	121	\$2,210,053	\$2,715,678	\$3,168,950

c. Continuing Supervision of Trust Facilities

Annual examinations of trust companies and trust departments of banks and title insurance companies form the basis of supervision of the trust business. Trust examining is highly specialized and includes the verification of trust assets, the reconciliation of accounts, a review of the legal aspects of transactions, a study of the administration of trust accounts, and an evaluation of the ability and capacity of the senior trust officers. Reports are rendered to the trust company or trust department with recommendations for corrective action.

As with the previous program element, due to the rapid growth in fiduciary assets the department had been unable since 1971 to meet its statutory examination requirements; however, with the additional personnel authorized in the prior budgets the department examined all trust facilities in 1975, and anticipates examining all trust facilities in 1976-77.

Output	1974-75	1975-76	1976-77
Total fiduciary assets (billions)	\$12.6	\$16.8	\$22.4

Expenditures	7.6	7.7	8.2	\$167,694	\$184,827	\$201,763

II. TRANSMITTERS OF MONEY ABROAD

Program Objectives and Description

To protect the public from economic loss resulting from the failure of a company engaging in the business of selling money orders and travelers checks and of transmitting money abroad. Periodic reports and examinations are utilized to ensure that these businesses are conducted in a financially sound manner.

Authority

California Financial Code, Division 1, Chapter 15 (Banking Law).

STATE BANKING DEPARTMENT—*Continued*

III. CERTIFICATION OF SECURITIES

Program Objectives and Description

As there are no longer any provisions for savings banks in California, certification of securities as legal investments for commercial and savings banks is anachronistic. However, many public retirement funds, employee benefit trust accounts, state credit unions and state savings and loan associations may invest in securities only if such securities are legal investments for savings banks.

Authority

California Financial Code, Division 1, Chapter 11 (Banking Law).

STATE BANKING DEPARTMENT—Continued

VI. ADMINISTRATION

Program Objectives and Description

To provide central leadership and services essential for successful administration of the department and its programs. This leadership must include the ability to delineate the jurisdiction of the Superintendent of Banks and to implement the intent of the Legislature.

Authority

California Financial Code, Division 1, Section 231, Chapter 2 (Banking Law).

Program Requirements	74-75	75-76	76-77	1974-75	1975-76	1976-77
Totals, Administration	17.5	20	22.5	\$411,892	\$614,127	\$761,386
Less Amounts Charged to Other Programs:

Program Elements						
a. Executive and Administrative Services.....	7	7	7	\$180,287	\$293,152	\$344,956
b. Legal and Legislative Services.....	6.5	9	9.5	141,648	223,279	240,220
c. Research and Information Services	4	4	6	89,957	97,696	176,210

a. Executive and Administrative Services

The cost of administrative services is reflected in this category. It includes support for the executive staff, staff personnel, and fiscal and clerical services.

b. Legal and Legislative Services

Proposed legislation, both at the state and federal level, on matters affecting the functions of the State Banking Department and financial institutions are analyzed to assist the superintendent and the Governor in making recommendations to legislative bodies. The drafting of proposed legislation, regulations, interpretive communications, and legal support for line personnel, supported by legal research, is conducted to respond to changing circumstances and public need.

The continuing rapid increase in the number of institutions has resulted in an increased legal workload and as a consequence, the Department is requesting the continued funding of one legal counsel established administratively in the 1975-76 budget year.

c. Research and Information Services

This element includes preparation and publication of the weekly bulletin and annual report of the Department, both of which are required by statute, and the development of statistics and information regarding banking practices and economics for the internal use of the State Banking Department and for dissemination to the public.

The addition of two research positions and \$20,000 in consultant services is requested to initiate a market analysis function for evaluating charter and branch applications, and to study several hitherto unaddressed issues, (i.e.: fair lending practices, the public service aspect of banking institutions, unclaimed property.)

CALIFORNIA JOB CREATION PROGRAM

The California Job Creation Program Board encourages and assists the formation of regional job creation corporations by the private sector for the purpose of providing financial assistance to small businesses located in economically disadvantaged areas and unable to obtain loans through normal channels.

The ultimate purpose of the programs administered by the board is to create employment opportunities for the economically disadvantaged, youth and the handicapped through the establishment and expansion of small businesses.

I. CALIFORNIA JOB CREATION PROGRAM

The State Loan Guarantee Fund, administered by the Board, permits banks and other financial institutions which have established regional corporations under the Act to make loans to businesses when the risk involved would preclude such loans through other available channels. The corporations make or approve bank loans to the small businesses relying on the reserve fund provided by the California State Job Creation Board to cover possible losses. Presently there are three corporations established in California: Opportunity Through Ownership in San Francisco serving the 9 Bay Area counties and Sacramento, San Joaquin and Yolo counties; Southern California Job Creation Corporation serving all of the counties in the Southern half of the state, with the exception of Kern and San Diego counties; and San Diego Job Development Corporation serving San Diego county.

The loan is made to establish or expand existing businesses operated by financially disadvantaged owners or to businesses willing to locate in economically depressed areas that will result in employment of 15 persons who are either handicapped, or residing in economically disadvantaged areas or youths residing in areas of high youth unemployment and delinquencies. The present program only allows for debt capital assistance. The need for more flexible types of financing has resulted in the Board considering new ways to provide capital that can be more productive.

The management and technical assistance program presently has three major elements. First, business development organizations, whose main purpose is to help new businesses or existing businesses seeking additional funding or support principally through existing private and federal financial sources. The second program, the on-call contractor, is available to provide in-depth technical assistance to existing businesses, subject to an agreement from the State Job Creation Program Board that such assistance is needed. The third element of the program involves the development of a directory of minority and disadvantaged firms throughout the state to serve as a source of information for federal, state, local government, and private purchasers in order to encourage more business with these disadvantaged firms. Other procurement support services are also provided whereby sellers and buyers are brought together.

During the second part of the 1975-1976 Legislative Session, the Governor will submit a formal plan of reorganization to transfer all existing Cal Job authorities and programs to the Department of General Services.

Authority

Corporations Code, Section 14000 et seq.

b. Office of Minority Business Enterprise

The State Office of Minority Business Enterprise (OMBE) is funded under a grant by the federal Office of Minority Business Enterprise to carry out three principal programs designed to (a) obtain an equitable amount of state procurement contracts for minority-owned business (b) work with the college and university systems to encourage and assist in the development of business education and training programs for minority-owned business and (c) assist state agencies to redirect existing programs and develop new programs to increase opportunities for minority-owned businesses. These activities will provide more opportunities for the minority-owned business to compete in the economic mainstream. Effective October 1, 1975, the Department of General Services became the prime contractor under the federal OMBE grant.

DEPARTMENT OF CORPORATIONS

Program Objectives

The principal objectives of the Department of Corporations are:

To provide, through the Investment Program, appropriate controls over the solicitation, marketing and sale of securities and franchises to California residents; to install and maintain adequate deterrents and safeguards against unfair or unscrupulous promotional schemes; to take suitable enforcement action when dishonest and questionable practices occur in such sales.

To fulfill, through the Lender-Fiduciary Program, statutory demands to provide regulatory surveillance over companies engaged in the business of lending money or receiving funds from the public in a fiduciary capacity.

To fulfill, through the Health Care Service Plan Program, statutory requirements to provide regulatory surveillance over companies engaged in the business of providing health care to plan enrollees.

To provide, through the Administration Program, service functions essential to the operation of the department and to furnish leadership and guidance to the staff and general public concerning matters under the jurisdiction of the Department of Corporations.

SUMMARY OF PROGRAM REQUIREMENTS

	1974-75	1975-76	1976-77
I. Investment Program	\$3,572,045	\$4,037,902	\$4,274,160
II. Lender-Fiduciary Program	2,255,648	2,459,122	2,531,815
III. Health Care Service Plans	-	200,000	1,321,221
IV. Legislative Mandates	-	-	11,300

I. Regulation & Enforcement workload increase		6	116,900
III. Health Care Service Plan—new program		48	1,321,221

I. INVESTMENT PROGRAM

Securities worth billions of dollars are sold and issued to residents of the State of California annually. The Corporate Securities Law requires that the commissioner find that the sale of securities is not unfair, unjust or inequitable. As an adjunct, full disclosure of relevant financial and legal information is generally considered essential in public offerings in order that all investors, especially those who are less sophisticated, may be apprised of the risks inherent in investments of this type. The Franchise Investment Law requires full disclosure to the would-be purchaser.

Over 30,000 broker-dealers, agents and investment advisers are licensed in the State of California. Persons aggrieved by the allegedly improper sale and issuance of securities or other violations of the Corporate Securities Law require an agency through which their complaints can be investigated and acted upon.

Authority

Corporations Code, Sections: 2500-25804; 29500 et seq.; 31000-31516.

California Administrative Code, Title 10, Sections: 250.1-250.25; 260.000-260.617; 310.505; 350.000-350.541.1.

d. Commodities	11.1	8.5	8.5	269,643	274,824	282,948

a. Qualifications

The sale and issuance of nonexempt securities in the State of California, must be qualified pursuant to the Corporate Securities Law through the filing of an application, including current financial statements and other relevant exhibits.

Specific conditions may be imposed on the qualification if it is found that otherwise the sale of securities could be unfair, unjust and inequitable. Qualification can be by coordination, notification or permit.

DEPARTMENT OF CORPORATIONS—Continued

b. Franchises

No franchise may be offered or sold in the State of California unless the offer has been registered or exempted from registration. In order to register, an application must be filed disclosing certain relevant information. Under certain circumstances defined in the Franchise Investment Law, the commissioner may summarily issue a stop order denying the effectiveness of or suspending or revoking the effectiveness of any registration.

c. Regulation and Enforcement

Prospective broker-dealers, agents, and investment advisers must file applications for certificates to operate in California. A review of the pertinent documents containing information concerning the applicant's background, business experience, reputation and financial condition enables a knowledgeable decision to be made as to whether or not the certificate should be issued.

Complaints filed by the general public, as well as possible and potential infractions of the Corporate Securities Law noted by the staff or members of other regulatory agencies are thoroughly investigated. As a result of the department's findings, one of the following steps is taken: no further action may be deemed necessary; punitive action including suspension or revocation of a certificate, license, or permit may be taken; and/or criminal proceedings may be instituted by other enforcement agencies. Two attorneys, two investigators and two examiners are requested to provide adequate enforcement of the California Corporate Securities Law.

II. LENDER-FIDUCIARY PROGRAM

Program Objectives and Description

Check sellers and cashers, credit unions, escrow agents, industrial loan companies, personal property brokers, retirement systems, small loan companies, and trading stamp companies render services to California residents, providing them with assistance in financial and fiduciary matters. Over 4,000 licensees serve Californians in this manner under the several laws covered by this program.

Many individuals dealing with these entities are persons whose financial situation is such that they can least afford to suffer losses. In regulating these classes of licensees, it is desirable to eliminate mismanagement and misrepresentation and to minimize the possibilities and probabilities of manipulative, deceptive, or other fraudulent schemes, devices, or contrivances.

Periodic regulatory examinations of the books and records of licensees are conducted for the purpose of discovering the correcting errors of interpretation and procedure; determining and evaluating the financial condition of certain licensees; and detecting breaches of financial trust and other violations of the various laws and regulations.

DEPARTMENT OF CORPORATIONS—*Continued*

a. Check Sellers and Cashers Law

Check sellers and cashers' major functions are to sell money orders and to accept money to be transmitted to others in payment of utility bills. Such services are utilized primarily by those unable or unwilling, for financial reasons, to maintain a checking account at a bank.

Proraters receive money from their debtor-clients and distribute it, according to a predetermined plan, to the creditors of the debtor-clients. Those individuals who find themselves seriously financially overextended may engage a prorater in an attempt to rectify their situation.

Authority

Financial Code: Sections 12000 et seq. California Administrative Code, Title 10: Sections 1760-1805, inclusive.

	1974-75	1975-76	1976-77
	\$843,639	\$927,775	\$955,200

c. Escrow Law

Escrow agents act as disinterested third parties to a transaction between two parties generally involving real property. They maintain possession of documents and money to be transferred in such a transaction until it is consummated or cancelled. All money received must be segregated and deposited into a trust fund; disbursements from this fund may be made only upon written instructions of the parties to the escrow.

Authority

Financial Code: Section 17000 et seq. California Administrative Code, Title 10: Sections 1700-1753

	\$392,604	\$455,696	\$468,871

d. Industrial Loan Law

Industrial loan companies make loans to individuals and other entities, normally taking as security real or personal property; they may also lend on an unsecured basis. A portion of their financing is normally derived from the public through the sale of thrift certificates.

The Industrial Loan Law imposes restrictions on the type of receivables that may be contained in the portfolio of such companies; this necessitates a diversification of risk among borrowers and among types of collateral.

Authority

Financial Code: Sections 18000 et seq. California Administrative Code, Title 10: Sections 1100-1299

e. Personal Property Brokers Law and California Small Loan Law

Personal property brokers and small loan companies are commonly referred to as finance companies. These companies lend money to members of the public with personal property such as automobiles and household goods as collateral, at a rate of charge not exceeding that set forth in the law.

The Personal Property Brokers Law and California Small Loan Law require full disclosure of the terms of the loan to the borrower including: the date of loan; the amount and maturity of the loan contract; how and when repayable; the nature of the security for the loan; and the agreed rate of charge.

f. Retirement Systems Disclosure Law

All pension plans, profit-sharing plans, stock bonus plans, and similar benefit plans in the State of California qualifying under Section 401 of the Internal Revenue Code are subject to this law. Retirement systems anticipate the payment of stated benefits and/or accumulated amounts to the participants or beneficiaries upon the occurrence of a certain contingency such as retirement or death.

Unless exempted, a report setting forth all investment transactions conducted during the preceding year must be filed with the commissioner and is to be made available for inspection by participants and beneficiaries of the retirement system.

III. HEALTH CARE SERVICE PLANS

Program Objectives and Description

With the enactment of AB 138, Chapter 941, Statutes of 1975, the regulatory responsibility for health care service plans is transferred to the Commissioner of Corporations from the Attorney General. The scope of the regulatory function has been significantly expanded to insure the delivery of medical and health care services to the people of the State of California who subscribe for services rendered by a health care service plan. This program is supported entirely by reimbursements and revenues collected pursuant to Chapter 941/75.

Authority: Health & Safety Code, Sections 1340-1399 inclusive.

DEPARTMENT OF CORPORATIONS—Continued

b. Financial Examinations

Each plan shall have the organizational and administrative capacity to provide marketed health care services to enrollees. The Commissioner must determine that each plan is financially stable and that medical decisions are made unhindered by fiscal and management constraints. This element will monitor the plans financial solvency through periodic examinations and review of required financial and statistic reports.

Output				1974-75	1975-76	1976-77

IV. LEGISLATIVE MANDATES

Section 2231 (a) of the Revenue and Taxation Code requires the state to pay local government units the costs of any new program or increased level of service of a program mandated by legislation enacted after January 1, 1973. Within the program area of the Department of Corporations there is one legislative mandate, Chapter 941/75 (AB138) Knox-Keene Health Care Service Plan Act of 1975.

Program Requirements	1974-75	1975-76	1976-77
Continuing Program Requirements (General Fund)	-	-	\$11,300

V. ADMINISTRATION

The Commissioner of Corporations, with the assistance of his executive staff, suggests needed legislation or amendments to current laws and regulations for the improved protection of the residents of California; establishes departmental policy; and directs the allocation of personnel between the programs and among the program elements.

The accounting and personnel office prepares the budget and supporting materials; negotiates leases and contracts; maintains the books, financial and attendance records and prepares appropriate payroll documents.

DEPARTMENT OF HOUSING AND COMMUNITY DEVELOPMENT

Program Objectives

To provide decent housing in suitable living environments for California citizens of all socioeconomic levels.
 To protect the public from inadequate construction, manufacture, repair or rehabilitation of buildings, particularly dwelling units, and from improper living environs through the establishment and enforcement of health and safety standards.
 To seek solutions to California's housing and community development problems through technical assistance, advice and research and to provide information to citizens, private businesses and governmental entities.

a. State Housing Law and Earthquake Protection Law

The State Housing Law and regulations establish minimum standards for the design and construction, maintenance, use and occupancy of buildings used for human habitation. The Earthquake Protection Law and regulations establish minimum requirements for the design and construction of buildings to resist lateral forces such as earthquakes.

Both laws designate local authorities as the enforcement agencies. The department is the enforcement agency in the event of nonenforcement by local authorities. Local jurisdictions may also contract with the department for enforcement. The department currently has enforcement responsibility in

DEPARTMENT OF HOUSING AND COMMUNITY DEVELOPMENT—Continued

Mariposa County.

The primary function of the department, in this program element, is the development of regulations. Under the provisions of the State Housing Law, the department is drafting two supplements to the regulations that will have statewide impact and are both expected to be in effect by the Spring of 1976:

(1) The development of less restrictive codes for an owner-built single-family dwelling unit to be built in rural areas. This development will amend existing building occupancy classifications and will provide for alternative designs and materials for dwellings in rural areas throughout the state.

(2) The development of rehabilitation guidelines that will encourage the rehabilitation of existing houses under the State Housing Law and regulations.

Input	74-75	75-76	76-77	1974-75	1975-76	1976-77
Expenditures.....	10.6	6.8	6.2	\$323,307	\$156,185	\$141,339

b. Employee Housing Act

Current statutes require the establishment and enforcement of construction, maintenance, use, and occupancy standards for labor camps, labor supply camps, and employee housing.

The department is the designated enforcement agency except where a city or county has assumed responsibility for enforcement. The department is mandated to annually evaluate the performance of a local enforcement agency and to determine the qualifications of the local agency's inspection personnel.

Currently, the department has enforcement responsibility in all parts of the state except in the counties of Fresno, Kern, Merced, Monterey, Napa, Orange, Riverside, Sacramento, San Bernardino, San Joaquin, San Mateo, Santa Cruz, Solano, and Stanislaus.

Operators of labor camps are required to obtain annual permits to operate from the enforcement agency. Prior to issuance of a permit to operate, labor camps are required to have preoccupancy inspection and to comply with maintenance, use, and occupancy requirements.

To provide adequate enforcement of the Employee Housing Act five additional inspectors and 8 man-years in temporary help are proposed.

Output	1974-75	1975-76	1976-77
Registered camps under state jurisdiction.....	966	888	900
Occupancies under state jurisdiction	33,937	29,123	29,600

Input	74-75	75-76	76-77	1974-75	1975-76	1976-77
Expenditures.....	12.3	26.7	32.6	\$245,266	\$618,359	\$792,573

c. Mobilehome Parks and Accessory Structures

The department has responsibility for administration and enforcement of the Mobilehome Parks Act, except where a city or county has assumed responsibility for enforcement. Uniform standards are necessary to permit moving mobilehomes and their accessory structures from one locality to another.

There are approximately 6,400 parks in California and approximately 28% are under the State's jurisdiction. The department also provides advisory assistance to local jurisdictions and monitors local enforcement activities to assure uniformity and compliance with State law.

Output	1974-75	1975-76	1976-77
Parks under state jurisdiction.....	1,761	1,780	1,800
Spaces in parks under state jurisdiction	86,704	87,500	90,000

Input	74-75	75-76	76-77	1974-75	1975-76	1976-77
Expenditures.....	64.4	67.7	68.3	\$1,295,242	\$1,482,637	\$1,569,103

d. Mobilehomes

Effective June, 1976, federal regulations will preempt the state requirements for construction of new mobilehomes. The state will continue to be the enforcement and inspection agency for the mobilehome industry. The state retains the responsibility for developing regulations regarding commercial coaches and recreational vehicles, as well as the enforcement and inspection responsibility.

The federal involvement in codes and standards development is not expected to reduce the enforcement effort of the state in the Mobilehome Program Element.

Output	1974-75	1975-76	1976-77
Number of units manufactured	74,072	74,200	75,000

Input	74-75	75-76	76-77	1974-75	1975-76	1976-77
Expenditures.....	53.6	64.9	65.1	\$1,164,764	\$1,359,497	\$1,429,037

e. Factory-Built Housing Law

The California Factory-Built Housing Law requires the department to regulate the design, manufacturing, and inspection of factory-built housing units. Upon departmental approval an insignia is affixed which allows a particular module or unit to be installed in any locality when in accordance with local use, zoning and other site requirements.

The department has developed regulations permitting a manufacturer to build a unit which may be either a mobilehome or factory-built housing unit. This is expected to increase the number of factory-built housing units manufactured and sold in California. Manufacturing of building components is increasing and is expected to gain momentum during the next few years as the industry refines this method of construction.

Output	1974-75	1975-76	1976-77
Dwellings manufactured	64	400	800
Building components	1,085	5,000	1,000

Input	74-75	75-76	76-77	1974-75	1975-76	1976-77
Expenditures.....	4.1	5.2	4.6	\$79,562	\$119,582	\$111,297

f. Special Projects

Special project activities of the department are varying and generally of limited duration. They involve aid to local communities upon request, participation with industry and local government officials in the development of new programs, participation with other state agencies in programs

DEPARTMENT OF HOUSING AND COMMUNITY DEVELOPMENT—Continued

during natural disasters and the time required to analyze, prepare and present testimony on proposed legislation within the purview of the Division of Codes and Standards.

Activities in this element include:

1. Membership in the National Conference of States on Building Codes and Standards.
2. Membership on the Coordinating Council consisting of state agencies concerned with building standards relating to all building occupancies.
3. State disaster response planning activities.
4. Consultative assistance to the State Energy Commission.
5. Participation in development of national standards with the National Fire Protection Association.

Input	74-75	75-76	76-77	1974-75	1975-76	1976-77
Expenditures.....	2.9	3.2	3.2	\$58,787	\$70,209	\$71,865

II. RESEARCH AND ASSISTANCE PROGRAM

Program Objectives and Description

The enactment of AB 1 (Chapter 1, Statutes of 1975) terminated the Division of Research and Assistance. In its place, two new divisions were created: The Division of Community Affairs and the Division of Research and Policy Development. The Division of Research and Assistance was largely engaged, in recent years, in the development of the Statewide Housing Element and technical assistance to local government and private entities in the areas of housing development, relocation plans and procedures, housing element development, housing preservation and Indian housing programs and urban renewal analysis and assistance.

Reimbursements				82,494	—	—

III. COMMUNITY AFFAIRS PROGRAM

Program Objectives and Description

To provide an opportunity for every citizen to have access to decent and safe shelter within a healthy community. The California Statewide Housing Element reports that: over 700,000 housing units in the state need rehabilitation; an additional 300,000 units are beyond repair; more than 500,000 households are over-crowded; and, more than one million state residents cannot afford the housing they need.

Within the division, the Economic Development Program seeks to strengthen the economic base of urban and rural areas through technical assistance, administration of a federal (EDA) loan/grant program, and economic research and data dissemination for local government. The Community Development and Housing Production element provides technical and project development assistance to local government in integrating various federal and state programs, primarily affecting housing, in a comprehensive manner. These programs include those of the California Housing Finance Agency, private lending institutions and the block grants available under the federal Housing and Community Development Act of 1974. The assistance provided also focuses on community redevelopment, citizen participation, urban homesteading, home owner and tenant counseling, and property management training (Special emphasis is placed on the development and rehabilitation of housing for low and moderate income families, including the elderly and disabled, in rural and urban areas.) The California Indian Assistance Program concentrates exclusively on the housing and related needs of Native Americans, utilizing all of the aforementioned program elements as well as developing low-rent housing through the formation of Indian housing authorities and assisting existing authorities to expand their housing resources.

Program Requirements	74-75	75-76	76-77	1974-75	1975-76	1976-77

a. California Indian Assistance

There are about 200,000 Indians in the State of which 65,000 are native California Indians. The department has authority to engage in a variety of assistance functions, among which is assistance to Indian housing authorities and governmental agencies on reservations (41173 GC). The department has been under contract to the Office of Planning and Research for three years to implement this program using HUD "701" funds which provide two-thirds of program expenditures.

Input	74-75	75-76	76-77	1974-75	1975-76	1976-77
Expenditures.....	—	4	4.2	—	\$201,000	\$203,404

b. Economic Development

During 1975, the economic development function of the Department of Commerce was transferred to The Department of Housing and Community Development. This program has three major responsibilities: (1) technical assistance to local government to help assess local economic needs, develop strategies, and implement economic plans; (2) research activities to analyze economic problems, identify trends and provision of a data base for planning functions; and (3) grant and loan administration involving the preparation of applications to the Economic Development Administration (EDA) for federal loan and grant funds, reviewing and awarding of grants to local public and private entities and monitoring and evaluating program results.

To provide staff for the administration of federal and state match EDA monies 3 positions are requested, in addition to \$255,250 for increased state match to generate a total of 2.5 million in pass through grant and loan funds.

Input	74-75	75-76	76-77	1974-75	1975-76	1976-77
Expenditures.....	—	5	8.5	—	\$353,446	\$668,076

DEPARTMENT OF HOUSING AND COMMUNITY DEVELOPMENT—Continued

c. Community Development and Housing Production

The work program in this element is divided equally between community development and housing production functions. The community development function includes among other activities the provision of technical assistance to local government to maximize use of available state and private housing rehabilitation funds in combination with federal block grants provided to local government under the federal Housing and Community Development Act of 1974. Strategies and program options will be provided to local government along with technical assistance. The division also plans to monitor the effectiveness of these activities and, generally, the use of Title I federal monies by local government throughout the state. In increasing the supply of housing through new construction and rehabilitation, one-fourth of this element's manpower will be devoted to rural areas, including the development of farmworker housing. Emphasis here is on utilizing federal financing and subsidy programs available through the Departments of Housing and Urban Development and the U. S. Department of Agriculture Farmers Home Administration. Related programs in both rural and urban areas include housing for the elderly and disabled, and implementation of the SB 49 (Chapter 112, Statutes of 1975), Aftercare Housing program.

IV. RESEARCH AND POLICY DEVELOPMENT PROGRAM

Program Objectives and Description

The objectives of the Research and Policy Development Program are to identify housing and community development needs and problems and to develop recommendations for ways to meet these needs. These objectives are carried out through the development and updating of the California Statewide Housing Plan; review and coordination with the plans of other state departments and local government, and the provision of data services.

Program Requirements	74-75	75-76	76-77	1974-75	1975-76	1976-77

General Fund	-	-	-	-	499,159	546,169
Reimbursements	-	-	-	-	70,000	70,000

Program Elements

a. California Statewide Housing Plan	-	17	17.4	-	424,422	459,508
b. Planning Coordination and Review	-	5.8	5.9	-	144,737	156,661

a. California Statewide Housing Plan

The department, pursuant to AB 1X of 1975, is required to prepare a California Statewide Housing Plan and to submit it to the Legislature for adoption. The department is further required to annually update the plan and submit the proposed revisions for adoption. The broad purpose of the plan is to meet the state goal, set by the Legislature, of a decent home and a suitable living environment for every Californian.

Health and Safety Code Section 41126 requires the plan to contain housing goals, policies, and objectives for California, as well as, an analysis of housing needs and conditions, market constraints, housing development, and housing assistance goals. A farm-workers housing assistance plan will also be included.

Input	74-75	75-76	76-77	1974-75	1975-76	1976-77
Expenditures	-	17	17.4	-	\$424,422	\$459,508

b. Planning Coordination and Review

This element encompasses activities relating to development of guidelines or regulations. It also reviews, for comment or approval, a variety of documents.

Guidelines or regulations which are adopted and periodically revised include:

(1) Guidelines for housing elements of local general plans. Local housing elements are reviewed for compliance with the Government Code and the guidelines.

(2) Guidelines for affirmative plans pursuant to Government Code Section 65008. These plans must be approved by the department before a city or county can treat governmentally assisted housing differently than other housing.

Certain regulations of the California Housing Finance Agency, specified in Health and Safety Code Section 41137, are developed or approved by the department.

Cities and counties desiring to qualify as local housing agents apply to the department for certification. If certified, the local government becomes authorized to disapprove applications to the California Housing Finance Agency for loans. Certifications are periodically reviewed.

The statutes require the department to periodically review the relocation plans and activities of redevelopment agencies.

This element will provide coordination with other state departments whose activities will have a significant impact on housing and community development.

Plans being prepared by other state departments are reviewed. If the plan will have a significant impact on housing and community development, input and coordination are provided throughout the course of development of the plan.

Documents which are received and commented upon, if they have a significant impact on housing and community development, include federal grant applications and environmental impact statements.

Input	74-75	75-76	76-77	1974-75	1975-76	1976-77
Expenditures	-	5.8	5.9	-	\$144,737	\$156,661

V. ADMINISTRATION PROGRAM

Program Objectives and Description

To provide direction, operating policy determination, interpretation of pertinent law and administrative services necessary for the statewide operation of departmental programs.

The program is administered by the director. Policy guidance for operating programs is provided by the Commission of Housing and Community Development, for which the director is secretary ex officio.

Three positions are proposed to establish a legal section to analyze proposed legislation and interpret departmental statutory authorities in addition, one accounting technician is requested due to increased workload.

CALIFORNIA HOUSING FINANCE AGENCY

Legislation establishing the California Housing Finance Agency became effective on September 26, 1975, with the enactment of Chapter 1, statutes of 1975, First Extraordinary Session.

The principle function of the agency is to sell tax-exempt bonds and use the proceeds to finance housing at below market level interest rates.

The agency is authorized to: (1) make direct loans to developers of multifamily rental housing; (2) purchase single family mortgages originated by qualified mortgage lenders; and (3) purchase loans and provide loan insurance in neighborhood preservation areas on mortgages originated and serviced by qualified mortgage lenders.

The agency functions as a source of mortgage capital, making funds available directly or through qualified mortgage lenders for new construction or the rehabilitation of existing housing. Construction financing as well as permanent financing are allowable under the Agency's statutory authority.

Specific priority considerations consonant with the agency's social role include providing assistance to low and moderate income persons and families, servicing the housing needs of the elderly and large families, stimulating the reinvestment of capital back to mortgage deficient areas, and achieving high design quality standards.

The current-year budget includes \$15.75 million in appropriations from the General Fund to provide the following:

1. \$10 million as a secondary security reserve for the revenue bonds authorized in Chapter 1, Statutes of 1975, First Extraordinary Session. This appropriation is in lieu of the so-called "moral obligation" clause and clearly limits the general taxpayers' liability for the bonds. Provision is included for repayment as surplus funds become available or upon passage and sale of General Obligation Bonds.

2. \$5 million as initial funding for a bond and loan insurance program for rehabilitation, refinancing or acquisition of residential structures. This appropriation is a loan and is to be repaid by January 1, 1986.

3. \$750,000 for the Agency's initial expenses. this appropriation is to be repaid by January 1, 1986.

As a public service enterprise fund, no budget detail is presented.

I. REGULATION OF INSURANCE COMPANIES

Program Objectives and Description

The objective of this program is to prevent losses to policyholders, beneficiaries or the public due to the insolvency of insurers and to prevent unlawful or unfair practices by insurers as defined in the Insurance Code. To accomplish the objectives of this program, the department conducts field examinations, regulates rates, maintains solvency surveillance, collects and audits taxes, regulates proxy solicitations, manages financially distressed companies, admits qualified companies, maintains surveillance of admitted companies, reviews policy forms and investigates consumer complaints.

Authority

The Insurance Code.

c. General regulation	124.1	145.3	146.8	2,818,713	3,457,172	3,742,479

a. Company Consumer Services

A staff of insurance officers and rate analysts process inquiries and complaints about insurance rates and the treatment of their claims. This service is a source of information for the department about insurance company rating practices and their manner of handling claims made under their policies. It also assists policyholders and beneficiaries to obtain a fair and equitable treatment in connection with disputed premium charges and claims.

Output

	1974-75	1975-76	1976-77
Rating complaints investigated and adjusted	413	450	500
Rating inquiries handled	6,505	6,000	6,500

Expenditures	56.3	65.8	65.8	\$1,277,230	\$1,566,531	\$1,597,042

b. Tax Collection

The department is responsible for the proper collection of more than \$200,000,000 in taxes from approximately 1,100 insurers and surplus line brokers who file over 6,000 tax returns annually covering quarterly prepayments and annual payments of premium taxes, retaliatory taxes and surplus line brokers taxes. To insure tax returns are processed and audited in a timely manner the addition of one clerk typist position is requested.

Output

	1974-75	1975-76	1976-77
Amount of taxes collected (million)	207	222	240
Number of deficiency assessments	100	210	270

Expenditures	13.6	15.9	16.9	\$308,297	\$378,128	\$394,101

DEPARTMENT OF INSURANCE—Continued

c. General Regulation

Functions included in this element are field examination of insurers triennially or more frequently if needed, rating and underwriting examination of insurers every five years or more frequently if needed, the collection and evaluation of information on insurers for advance detection of conditions that could lead to insolvency, determining that proper disclosures are made to the insurance investing public by reviewing proxy statements and other solicitations, management of financially distressed insurance companies, and review of policy forms for disability insurance, group life policies, variable annuity contracts, workmen's compensation policies, credit life and credit disability policies and all fraternal benefit society forms.

Due to increasing demands on professional actuarial staff stemming from the medical malpractice issue and reinsurance analysis associated with conservatorship cases, two additional examiner positions are requested for the actuarial bureau to permit more efficient use of professional actuarial staff time.

Output	1974-75	1975-76	1976-77

II. REGULATION OF INSURANCE PRODUCERS

Program Objectives and Description

The objective of this program is to protect the general public and insurance policyholders in this state from discriminatory, unlawful and fraudulent practices and acts of incompetence relating to the sale of insurance.

Authority

The Insurance Code.

b. Producer compliance.....	49.2	65.1	61.6	1,117,419	1,453,672	1,470,443

a. Producer Licensing

The department is responsible for insuring that applicants for producer licenses possess adequate knowledge of the business of insurance and of pertinent laws and regulations. Activities include review of an applicant's qualifications; preparing, administering and grading written examinations; license approval and issuance; and recordkeeping. To complete the transition to automated producer licensing files, the addition of six clerical positions is proposed to be funded from existing contract funds.

Expenditures.....	64.7	76.4	81.4	\$1,469,198	\$1,698,832	\$1,739,272

b. Producer Compliance

Investigations are made of complaints received from the general public or from other sources relating to acts of agents, brokers and other producers. If the investigation establishes that there has been a violation of the insurance law, the case is prepared together with a report and is referred to an attorney for further handling. In appropriate cases, qualifications of applicants for licenses are investigated.

Due to an increased caseload arising from consumer complaints and in-house market conduct surveillance activities, it is proposed that one legal counsel be added to the Los Angeles bureau, and 3 investigators and 1 clerk typist, administratively established in the current year as reimbursable, be reassigned to consumer protection activities requiring General Fund support.

^a Not reflected in this figure are refunds to prior year premium payments received in 1974-75 which totaled \$876,472. Similar refunded premium payments are anticipated in current and budget years.

DEPARTMENT OF REAL ESTATE

The Department of Real Estate's objective is to protect the public in offerings of subdivided property, real property securities, real estate syndicate securities, and in real estate transactions handled through agents. To accomplish this a minimum level of competence is established for the licensing of real estate agents, and disclosure and affirmative standards are set for subdivision offerings. A special unit assists homeowner associations to understand their duties and to assert their rights.

Prevention of fraud, deceit and misrepresentation in the real estate marketplace is a departmental responsibility. The Department of Real Estate takes disciplinary, civil and criminal action against licensees and others who have violated the real estate law and the Subdivided Lands Act.

In addition, the department assists in the advancement of education and research in the field of real estate to aid the consumer in understanding real estate and to encourage a professional orientation of those in the real estate business. Non-licensees constitute over 50% of those currently enrolled in college-level real estate courses. All activities of the department are supported by fees from licensees, subdividers and applicants for license or permit.

Ia. Licensing workload increase		1	\$9,104

I. TRANSACTION ACTIVITIES PROGRAM

Program Objectives and Description

The consumer is relatively uninformed of the technicalities of real estate law and the problems associated with real estate transactions. Because dealing in real property is often a once-in-a-lifetime activity for a large segment of the public, it is in the public interest that the state should license and regulate only qualified persons to competently and honestly transact real estate business between buyers, sellers, and renters of real estate and business opportunities.

Authority

Business and Professions Code, Division 4, Part 1.

DEPARTMENT OF REAL ESTATE—Continued

a. Licensing

The examination section prepares and submits suggested questions to a committee for review. The approved questions are placed in a questions library which contains approximately 2,500 questions and requires continual updating. The examination section draws on these questions to prepare examination booklets which are supplied to all offices where examinations are given throughout the state. Some other states have elected to administer to their applicants the uniform portion of the California examination. They fully reimburse the Department of Real Estate for this. *Due to increased workload one additional clerical position is proposed.*

Expenditures.....	86.1	86	87	\$1,344,559	\$1,598,261	\$1,653,758

b. Regulatory and Recovery

Investigations are made of complaints received from the public and by motion of the district offices. If the investigation shows that there has been a violation of Real Estate Law, formal action may be taken against the licensee. Normally, an accusation is issued and a formal or administrative hearing is held which can result in the suspension or revocation of the license. The hearing may also result in the issuance of a restricted license. Many of these investigations result in the issuance of Desist and Refrain Orders, Civil Injunctions and criminal prosecutions. Licensees involved in subdivision violations are subject to disciplinary action against their licenses.

When a member of the public suffers a financial loss and obtains a fraud judgment against a licensee who is unable to satisfy the judgment, he may file a claim against the Real Estate Recovery Fund. A court hearing is held to determine whether the claimant satisfied all of the requirements of law to justify the claim. Prior to the court hearing, the recovery fund staff investigates the transaction on which the claim is based. When a claim is held valid and paid, the license of the broker or salesman is suspended until the licensee repays the claim in full to the fund, together with 4 percent interest.

II. OFFERINGS AND SECURITIES PROGRAM

Program Objectives and Description

With the state's population increase, the sale of undeveloped land has become a major segment of real estate activity. Because of the manner in which subdivided land has been advertised, the public is sometimes unable to make a distinction between fair and fraudulent offerings, particularly when access to the offering is difficult.

An outgrowth of the rise of subdivided land and development was the second trust deed or 10 percent operation, which, when conducted fairly and honestly, provides additional capital for thousands of homeowners.

Real estate syndicate securities sold to the public and issued by real estate syndicates formed for the sole purpose of acquiring an interest in real property are also subject to fraud and misrepresentation. Public protection in these areas is provided by laws, enacted to regulate the land offerings and securities market, which is administered by this department. In an effort to halt the indiscriminate dividing of land, the department sponsored legislation to allow the sale of "undivided interests" in land.

Authority

Business and Professions Code, Division 4, Parts 1 and 2.

a. Subdivisions

Subdividers of in-state lands are required to obtain a public report before the subdivided land may be offered for sale. The public report discloses facts concerning each subdivision which are of fundamental interest to a prospective buyer. Before a public report is issued, the subdivider must file an application and documentation in proof of statements made therein, and in some cases, he must demonstrate that adequate financial arrangements have been made for the completion of improvements. The application and documents are reviewed, the subdivision is inspected, and a determination is made that the offering is not fraudulent before a final public report is issued. For subdivisions which have a common facility, a determination is made that the offering is reasonable. Common facility subdivisions, such as condominiums, are increasing on an accelerated basis. For land projects advertising is screened and purchasers have rescission rights for 14 days.

b. Real Property Securities

General Description

The regulation of subdivisions of land located outside of California is more rigorous. In addition to the in-state requirements, a determination must be made that the offering of the subdivided land is fair, just and equitable. To assist in this determination, an appraisal of the property is required before a public report and permit can be issued. The cost of appraisal, report and permit is paid by the subdivider.

Public reports and permits expire at the end of one year and generally are renewed for at least one more year. The file, public report and permit are then brought up-to-date. Approximately nine renewal permits are now issued each year for each original permit that has been issued, reflecting the continuing work generated by old but still active subdivisions that were first issued permits up to ten years earlier.

Anyone who sells notes secured by trust deeds to the public must make application for a permit when the notes are classed as real property securities. Applications for such securities are subject to similar screening and processing.

c. Syndicate Securities

Real estate syndicates of 100 or less investors (other than corporations) formed for the sole purpose of acquiring an interest in real property must make application for a permit before the real estate syndicate securities may be offered or sold to the public. Applications are screened, valuations are required, and a determination is made that the sale of securities will be fair, just and equitable.

III. EDUCATION AND RESEARCH PROGRAM

Program Objectives and Description

Knowledge of real estate law, principles and practices, real estate financial and construction markets and of other real estate problems such as population shifts, housing needs, and urban, suburban and rural development is essential to real estate agents and to related industries such as title insurance, escrow, savings and loan, mortgage and construction, as well as sections of the general public and government. A primary source of such knowledge is provided by the education and research program. Competent real estate agents are necessary to a growing and continued confidence in the real estate industry by the general public which in turn benefits from the improved quality of services rendered. Publications are needed to maintain the professional level of competence of licensees and to inform the consumer on real estate matters.

Authority

Business and Professions Code, Division 4, Part 1.

b. Publications	3.3	3.8	3.8	254,783	261,943	272,065

a. Education and Research

The education activity is directed toward developing and screening curriculum and education programs to improve the level of competence of license applicants and licensees and to provide real estate consumer education for the general public. The research portion is directed to all phases of real estate activity including study of the needs of real estate education, marketing, financing, land use, urban problems and other factors of real estate economics that benefit the general public as well as real estate licensees. In 1973-74 there was a one-time budget item of \$1,450,000 as a result of passage of SB 1158 (Chapter 1173/73). This bill provided for \$1,000,000 endowment to state universities and colleges, \$250,000 for consumer education in real estate, and \$200,000 for scholarships. In 1974-75 there was a one-time budget item of \$1,900,000 as a result of passage of AB 3692 (Chapter 1098/74). This bill provided for an endowment of \$1,500,000 to the community colleges and \$400,000 for scholarships at the community colleges. This \$1,900,000 is included in the 1974-75 education and research program. The 1975-76 education and research program includes \$160,067 which is the balance appropriated by Chapter 1173, Statutes of 1973 for consumer education.

b. Publications

Publications prepared and distributed by the department include the Real Estate Examination Study Manual and the Real Estate Reference Book. These are essential professional tools for licensees, subdividers, and fields closely related to real estate such as title insurance, escrow, savings and loan and mortgage companies. The Real Estate Bulletin published quarterly is furnished to each licensee to keep him abreast of changes in real estate law, the Real Estate Commissioner's policy, and educational opportunities and activities. Various pamphlets, reports and consumer oriented brochures are also published and distributed as sources of information regarding real estate.

IV. ADMINISTRATION PROGRAM

Program Objectives and Description

Central leadership and nontechnical support is provided by the Real Estate Commissioner, chief executive of the department. He is charged with conducting the affairs of the department, interpreting and applying the policies of the Governor, making policy, controlling the operations of the department's offices, and the activities of the staff and acting as official spokesman for the department. In carrying out his responsibilities, the commissioner must rely on his staff for legal and administrative assistance. The central services provided include central personnel, business, administrative, accounting, and publications.

b. Appraisal

The purpose of this element is to provide the Commissioner with information to determine whether statutory limits on loan to value ratios have been exceeded, whether assets have been overvalued and whether imprudent or unsafe appraisal practices exist. The information is obtained by valuation of property or investments of an association and of any property which constitutes security for a loan held by an association. The test appraisal, which is an estimate of current market value of a security, is the principal method of revaluation. This element is also responsible for

DEPARTMENT OF SAVINGS AND LOAN

The principal objectives of the Department of Savings and Loan are to protect the funds of the savings and investing public held by state-licensed associations, to assure compliance by associations with consumer protection and anti-discrimination laws and regulations, and to assure the continued financial growth of these associations consistent with public need and convenience.

The Department program titled Supervision and Regulation consists of these elements: examination, appraisal, facilities licensing and legal assistance, economic and financial information, Boards of Inquiry, and administration. The Boards of Inquiry element is a new program element.

PROGRAM REQUIREMENTS

	1974-75	1975-76	1976-77

I. SUPERVISION AND REGULATION

Program Objectives and Description

There are approximately 6.25 million savings and share accounts in state-licensed associations which represents about a 300,000 increase in the number of these holdings over the prior year. The average amount in these accounts is \$4,009. Associations channel these public funds into loans for residential and commercial building development and construction.

To protect these funds and to assure that the saving and borrowing public are properly and legally served, the program of supervision and regulation is aimed at prevention of conditions and practices that threaten the safety and solvency of associations or are detrimental to public need and convenience.

Authority

California Financial Code, Sections 5000 through 11650.

f. Administration (distributed)	(35.5)	(38)	(40)	(605,604)	(692,446)	(743,616)

a. Examination

The purpose of this element is to provide information to the Commissioner that verifies compliance with law, regulations and directives, evaluates the soundness of operating policies and procedures, and ascertains the financial condition and solvency of the association. The information is obtained from examination of assets and activities as reflected in books and records, securities and papers of the association, its related holding company, service corporations, and other related entities. By law, associations must be examined at least once in a two-year period. However, most of them are examined with greater frequency. Usually, the holding company, service corporation and related entities are examined concurrently. *Seven additional examiners are proposed to compensate for increased work load due to anticipated new associations, examinations of associations for compliance with consumer protection and anti-discrimination laws and regulations (including redlining), and to give special attention to the problem of unclaimed property.*

Output

Expenditures	84.9	88	95	\$1,921,733	\$2,174,489	\$2,410,393

b. Appraisal

The purpose of this element is to provide the Commissioner with information to determine whether statutory limits on loan to value ratios have been exceeded, whether assets have been overvalued and whether imprudent or unsafe appraisal practices exist. The information is obtained by revaluation of property or investments of an association and of any property which constitutes security for a loan held by an association. The test appraisal, which is an estimate of current market value of a security, is the principal method of revaluation. This element is also responsible for ascertaining whether association appraisers are classified properly and perform in conformance with class requirements. For the appraisal element, the

c. Facilities Licensing and Legal Assistance

The purpose of this element is to enable the Commissioner to certify corporations to conduct a savings and loan business in California, to license association branches and service offices, to approve mergers and acquisitions of existing associations, to approve change of locations of association branches and to approve change of name of associations. It also is responsible for legal assistance in promulgating, amending, and revising administrative regulations, in proposing and drafting new legislation, in analyzing other proposed legislation and in providing interpretations of existing laws and regulations.

It also reviews and resolves consumer complaints for which an additional legal position is proposed.

d. Economic and Financial Information Division

The purpose of this element is to provide the Commissioner with economic, financial, and related information analyzing the financial condition and performance of associations and assisting in the analysis of merger, branch, and new association applications. It is responsible for departmental electronic data processing.

To provide resources to collect and analyze expanded loan data, to study the impact of probable changes in the competitive climate affecting savings and loans, to assist in market analysis, and to extend use of the Mark IV System retrieval capability, it is proposed that the resources of the division be expanded by adding a senior economist, a market analyst, a senior data processing technician, plus additional EDP funds.

Expenditures	16.2	17	20
	\$435,824	\$468,813	\$807,587

e. Boards of Inquiry

This is a new program element. Its purpose is to provide a mechanism to review individual complaints of violations of the Fair Lending (antiredlining) regulations and applicable provisions of law. The Boards shall determine whether a complaint has been substantiated and shall report all findings of violations to the Commissioner for possible enforcement action.

To assist the Boards of Inquiry in administering their responsibilities, it is proposed that staff support consist of one staff counsel, one senior property appraiser, one special investigator, one secretary, and six temporary positions. The six temporary positions are requested because the staff level and skills required are not precisely determinable until experience is developed relating to the volume and nature of complaints.

Input	74-75	75-76	76-77	1974-75	1975-76	1976-77

STATE TRANSPORTATION BOARD

The principal objective of the State Transportation Board is to advise and assist the Secretary of the Business and Transportation Agency and the Legislature in formulating and evaluating state policy and plans for transportation programs within the State. In addition, the Board will provide the Secretary and the Legislature with advice, recommendations and assistance concerning the effectiveness and compatibility of public and private transportation programs in relationship to Statewide objectives, policies and plans, such as, but not limited to the environment, energy, socio-economic, and land use matters. The Board exercises leadership through policy guidance to the Department of Transportation and to regional transportation planning agencies for the development of coordinated and comprehensive transportation plans.

---------------------------------------	--------

ADMINISTRATION OF STATE TRANSPORTATION BOARD

Program Objectives and Description

The State Transportation Board has been charged with the responsibility of maintaining a broad overview of the effectiveness and compatibility of public and private transportation programs so as to provide the Secretary of the Business and Transportation Agency and the Legislature with advice and assistance in formulating and evaluating state policy and plans for the state's transportation programs. This responsibility includes the board's adopting, amending, or disapproving the Department of Transportation's submitted California Transportation Plan and subsequent Plan updates. In the development of this plan the board provides financial assistance to the regional planning agencies and to the State Department of Transportation from the Transportation Planning and Research Account. Inconsistencies among the regions and conflicts between regional plans and the state plan are resolved by the State Transportation Board.

Concurrent with these responsibilities the State Transportation Board also (1) reviews the Department of Transportation budget to assure the conformance with the plans and policies adopted by the board; (2) provides recommendations in cooperation with affected public entities and utilities on transportation uses of railroad lines proposed to be abandoned; (3) provides findings, conclusions and recommendations on fulfillment of the legislative intent of the Transportation Development Act (Chapter 1400, Statutes of 1971); and (4) approves applications for funds for public mass transit guideways pursuant to Proposition 5, 1974 as being in conformance with Regional Transportation Plans and the California Transportation Plan.

The California Transportation Plan (CTP), prepared by Caltrans is directed at the achievement of a coordinated and balanced multimodal transportation system for the State that is consistent with the State's social, economic, and environmental needs and goals. Assembly Bill 69 (Chapter 1253/1972) required the Board, after holding public hearings, to adopt the CTP and transmit it to the Legislature not later than January 1, 1976. Two actions have precluded the Board from fulfilling the Plan adoption timetable. First, the Board cannot adopt a Plan until the Legislature has passed an act which "shall constitute a legislative declaration of statewide transportation goals, objectives, and policies"; second, Board review of the July 1975 Draft Plan, after holding public hearings, found that omissions and inadequacies were sufficiently serious to mandate deferral of Plan adoption until July 1976. Consequently, the Board requested the Secretary of the Business and Transportation Agency to form an Interdisciplinary Task Force to resolve problems with the Draft Plan. The Task Force will clearly define relationships and policies that were not sufficiently developed in the July Draft Plan prepared by Caltrans. This Task Force established under the authority of the Agency Secretary will be in operation on January 1, 1976 and is expected to complete its work early in the 1976-77 fiscal year.

Additional funds are budgeted for consultant services to help solve some of the issues necessary in developing policy and planning recommendations, including issues that should be addressed in the California Transportation Plan.

DEPARTMENT OF TRANSPORTATION

This budget marks the beginning of a new era in California Transportation. Although this year's budget is large by anyone's standards, accelerated inflation in past years has eroded the purchasing power of the transportation dollar to a point, where it will buy significantly less than it bought just a few years ago. In addition to an erosion in purchasing power, highway revenues are substantially lower than prior projections and an increasing amount of money is required to maintain an aging and expanding highway network.

These facts do not signal the end of a progressive transportation program in California. What they do signal, however, is the realization that there is a practical limit to the capital resources available for California's transportation program.

The overall goal of the Department of Transportation is to provide opportunities to all for access to such activities as jobs, education, shopping, recreation, and health services and for the movement of goods through a safe and efficient transportation system that is compatible with the social, economic, and environmental objectives of the State. In order to work toward the accomplishment of this seemingly simplistic goal, complicated past planning practices and program directions have had to be modified to cope with the realities of a limited revenue base.

This budget year is highlighted by a shift of emphasis away from constructing new highways to concentrating on making the fullest use of existing facilities. New construction will be limited to projects vital to the operational integrity of the existing transportation system. The capital outlay projects included in this budget are compatible with Regional Transportation Plans, but do not necessarily reflect the highest priority projects needed to best meet the needs of the public. This is necessary because of the size of the funding requirements of some projects and legal constraints placed upon available funds. Transportation projects will be examined not only from the traditional concerns for the environmentally sound movement of people and goods, but also for the impact upon the total community and its improvement in such broad areas as energy conservation; growth, land use and transportation relationships; the equalization of transportation opportunity; and housing.

This year's transportation budget is characterized by a commitment to new directions by:

- making the fullest use of the existing transportation systems;
- preserving and rehabilitating the existing system;
- redirecting and reducing the planning program with emphasis on optimizing the use of existing transportation resources;
- reevaluating the aeronautics programs in terms of the regulatory roles versus the roles in airport development and promotion; and
- expanding the State's role in technical assistance and policy guidance for California's public and private transportation services.

DEPARTMENT OF TRANSPORTATION—Continued

I. TRANSPORTATION PLANNING

Program Objectives and Description

The character, role and scale of the Transportation Planning Program for fiscal 1976-77 will represent a radical change. Since the inception of this program in 1973, the process has been geared toward the development of transportation policies, the identification of long-range transportation needs and, transportation systems plans to accommodate those needs.

Assembly Bill 69 of 1972 created the Department and its Division of Transportation Planning. AB 69 also mandated the development of regional and state transportation plans by January, 1976. Although local and state transportation planning had been going on for many years, the requirement and timetable imposed by AB 69 posed major challenges for all parties. The definition of institutional roles and relationships was difficult; the adoption of uniform criteria for achieving consistency between the various regional plans was virtually impossible; agreement among all the key participants on what a California Transportation Plan should contain was never achieved and; identification of the benefits and appropriate levels of transportation planning remains unresolved.

In spite of the many problems, regional transportation plans were adopted and transmitted to the State. Similarly, a draft California Transportation Plan and Environmental Impact Report were submitted to the State Transportation Board in July of 1975. First, the Board cannot adopt a Plan until the Legislature has passed an act which "shall constitute a legislative declaration of statewide transportation goals, objectives, and policies". The Legislature did not pass such an act. Second, Board review of the July 1975 Draft Plan, after holding public hearings, found that omissions and inadequacies were sufficiently serious to mandate deferral of Plan adoption until early in the 1976-77 fiscal year. Consequently, the Board requested the Secretary of the Business and Transportation Agency to form an Interdisciplinary Task Force to resolve problems with the Draft Plan. The Task Force will clearly define relationships and policies that were not sufficiently developed in the July Draft Plan prepared by Caltrans. This Task Force established under the authority of the Agency Secretary will be in operation on January 1, 1976 and is expected to complete its work by July 1, 1976 or soon thereafter.

These occurrences have led to a redirection of the planning effort. The amount requested for 1976-77 is \$4.2 million less than the amount appropriated for 1975-76. This reduction is based on the following findings:

- The capital improvements forecast for future years is down considerably from previous projections; as a result, the level of systems planning needs has been reduced.
- Considerable effort has been expended in the development of the regional transportation plans and the State's Draft Plan. Consequently, a wealth of information is already available. A major expansion of the information base is not necessary at this time.
- Developing an integrated transportation system which makes the fullest use of the resources and capacity of all existing elements of public and private transportation services;
- Identifying missing elements which are vital to the operational integrity and full utilization of our transportation resources; and
- Balancing transportation needs and resources within the overall objectives of the State and its communities.

a. Regional Planning

This program element provides the necessary funding for financial and technical assistance to the 43 regional transportation planning agencies in carrying out their transportation planning responsibilities. This effort is required for the state to fulfill its regional responsibilities in the cooperative transportation planning effort which means coordinating the development of balanced regional transportation systems tempered by consideration of statewide interests. The element includes the transportation planning agencies which are necessary for the preparation and update of the regional transportation plans. In addition, regional plan development involves subvention administration and those monitoring activities specifically related to the planning process outlined in the California Transportation Act of 1972, such as coordination and liaison with the local and regional agencies to ensure that timetables and requirements are met.

The regional process is primarily oriented toward systems decisions; i.e., facilities, operations, programming implementation, recommendations on State programs and interregional systems. The regions will deal with issues which require regional action and must assure that Federal and State requirements for the regional plans are met.

Regions will assist in identifying issues which require State actions. Each of the regions will be providing general technical support on local or interregional planning issues. These efforts and subsequent regional plans will provide recommendations on issues or facilities of statewide concerns. Also, this feedback will be the basis for the State to assess the need for new or changed State programs.

Output

	Completion Dates
• State support as requested in Regional Work programs and allocated by STB to produce 43 RTP updates.....	4/77
• Monitoring of RTPA and local government working relationships.....	Continuous
• 43 annual work programs and allocation recommendations.....	2/77—7/77
• Regional conformance and consistency with State and Federal requirements.....	Continuous
• Coordination and development of nonmotorized program.....	Continuous

Input

	1974-75	1975-76	1976-77
Expenditures.....	a	\$10,831,403	\$7,970,000
Personnel man-years.....	a	245	158

b. Statewide Systems Planning

Statewide Systems Planning is the process of collecting, analyzing and integrating information from State studies and liaison activities into a completed transportation plan and its updates. The process involves monitoring existing conditions and emerging trends and incorporating the information gained into State programs.

Additional information is obtained through public participation, hearings and regional plans; omissions and areas of conflict are located and dealt with; alternatives are formulated. A shortrange program of State legislative and administrative actions will be developed. Further steps will include development of means to implement decisions and monitor the effectiveness of actions taken. This program relies on the input generated through State Studies in order to develop new programs that respond to changing State concerns.

Output

	Completion Dates
• Program/Issues Analysis.....	Continuous
—Issue Reports.....	
—Monitor Assumptions.....	
—Functional Classification.....	
—Facilities/Vehicle Inventories.....	
• Financial Planning.....	10/76—4/77
—Revenue Assumptions/Projections/Alternatives.....	
—Develop financial element of updated transportation plans.....	6/77
• Environmental Analysis.....	
—Updated draft systems EIR.....	6/77
—Economic Impact Report.....	6/77
• Environmental Plan (Air Quality).....	10/77
• Program Implementation.....	Continuous
• Plan Product Preparation.....	6/77
• Maintenance and Updating of Planning Process.....	Continuous

Input

	1974-75	1975-76	1976-77
Expenditures.....	a	\$2,462,554	\$1,951,000
Personnel man-years.....	a	71	70

c. State Studies

This area of the work program will address specific projects dealing with unresolved issues or gaps identified in the draft California Transportation Plan and throughout the continual planning process. The focus will be on the development of State transportation issues. The purpose of these special studies will be to provide decisionmakers with the necessary information to arrive at objective conclusions on multiregional or statewide issues. This area of the work program will fit closely to the activities described in the Regional Planning Effort. Although capable of functioning autonomously, the studies themselves must receive incremental input from the various regional bodies in order to prepare a comprehensive implementation plan. Studies will also be designed to provide either policy decisions or general solutions leading to more specific policy studies.

DEPARTMENT OF TRANSPORTATION—Continued

Output

Reconnaissance Studies:

- Goods Movement
- San Diego/L.A. Corridor Study
- Minimizing Air Pollution
- Strategies to Improve Transportation Operations
- Private Capital to Provide Transportation Services
- Transportation Service to Special (low mobility) groups

Policy Studies:

- Minimize use of petroleum energy
- Mandated auto energy efficiency
- Benefits attributable to providing State service in high unemployment areas
- Statewide city/county road needs (Section 2156 Study)

Input

	1974-75	1975-76	1976-77
Expenditures	a	\$822,144	\$470,000
Personnel man-years	u	26	14

d. Liaison

The liaison area consists of the activities and related documentation which provides interaction with other planning efforts. The purpose is to become involved in legislation affecting planning for transportation in California; to keep informed about and respond to other governmental programs; to be involved in private sector plans and programs which impact statewide planning; and, to insure that the concerns of public groups, elected officials, government agencies and the private citizen become an intrinsic part of the decisionmaking process.

Output

	Completion Dates
• Position papers on proposed legislation.	Continuous
• Legislative testimony.	Continuous
• Resolution of conflicts between planning studies.	Continuous
• External involvement in transportation planning.	Continuous
• Information exchange.	Continuous
• Support for various advisory groups.	Monthly
• Transportation planning workshops.	Continuous
• Newsletter.	Monthly
• Annual public participation documentation report.	1/77

Input

	1974-75	1975-76	1976-77
Expenditures	a	\$401,470	\$301,000
Personnel man-years	a	14	11

e. Program Support

The area of support will involve a full range of technical, management and administrative activities necessary to support the mainline activities described in the other program areas. Administrative, clerical, and management services for the allocation of resources, personnel matters, and the monitoring of administrative charges in the eleven transportation districts will be provided on a routine basis. Provide data needed for transportation model operation, study area profiles and future socioeconomic conditions. Develop new methods to forecast the impact of policy issues.

Output

	Completion Dates
• Management of the Planning Effort, District and DOTP.	Continuous
• Provision of working space, equipment, and administrative services.	Continuous
• Work programs, program and organization budgets, accounting services.	Various
• Support services for ongoing technical planning activities.	Continuous
• Technical support programs.	Continuous
• Manuals and guides for detailed computer related activities.	8/76
• Development of an urban policy evaluation model.	12/76
• Development of a model for transit, car pool auto, etc., analysis within a smaller area or community.	2/77
• Provide planning data base information on request, data collection surveys as requested by RTPAs.	Continuous

Input

	1974-75	1975-76	1976-77
Expenditures	a	\$2,331,640	\$1,908,000
Personnel man-years	a	80	72

a Costs were accumulated in a four-element breakdown in 1974-75 and 1975-76. A five-element distribution of costs is shown for the 1975-76 year for information

II. MASS TRANSPORTATION

Program Objectives and Description

The need for improved public transit services is dramatically increasing due to rising traffic congestion; anticipated inadequate future energy resources; reaction to environmental concerns; increased private automobile operating costs; users' safety considerations; and the unmet transportation needs of the elderly, the young, the handicapped and underprivileged. California public transit's 50 major operators have a market of over 500 million revenue passengers per year using their scheduled services, and an even larger number of passengers are using unscheduled public transit such as taxicabs, jitney school buses, and dial-a-ride systems. As pressure to reduce auto use increase, all of these public transportation services must continue to improve

DEPARTMENT OF TRANSPORTATION—*Continued*

levels of service and develop innovative transit systems offering an attractive alternative to the automobile.

The existing gap between local and Federal efforts to improve public transit necessitates an increasing State involvement, both in terms of providing actual dollars for support, and determining statewide priorities for allocation of limited transportation funds.

The critically important issue of formally establishing the proper State role in public transportation in the areas of capital and operating assistance, research and development, technical assistance including improved marketing techniques, project development, and operations is still being addressed. The development of state legislation and programs based on recent Federal transit legislation is a top priority and is necessary to realize a maximum flow of Federal funds to California's benefit. The division has provided state government with its first tools for addressing the problems and needs public transit in California faces by establishing a base of technical expertise upon which future programs can be built and evaluated. As part of the division's advocacy role, it has encouraged and assisted CALTRANS' transportation districts to consider all modes of transportation when evaluating solutions to transportation problems and to ensure that full advantage is taken of the new flexibility in fund use which was previously restricted to highway purposes but now allows use for public transit-related activities (e.g., express busways, preferential lane treatments, bus purchases, etc.).

The Mass Transportation Program's short-run goal is to increase the use of existing public and private transportation systems through improved service—service which better meets the public needs and desires. The longer range goal is to improve the level of public transportation consistent with the goals, priorities, and objectives of the regional and statewide comprehensive transportation system plans.

This program is funded under the Transportation Planning and Research Account from monies collected by the Transportation Development Act of 1971.

Authority

- Chapter 1400, Statutes of 1971.
- Chapter 1253, Statutes of 1972.
- Chapter 1428, Statutes of 1974.
- Chapter 1470, Statutes of 1974.
- Chapter 1130, Statutes of 1975.
- Chapter 1139, Statutes of 1975.

Output

During fiscal year 1974-75, the Division of Mass Transportation:

- Evaluated and reported to the Legislature on the transportation system proposals for the Los Angeles, Orange County, and San Diego Areas.
- Administered the Transportation Development Act of 1971 funds for the Secretary of the Business and Transportation Agency.
- Produced the first Annual Report on the results of the Transportation Development Act program.
- Provided transit operators and local planning agencies with information and recommendations concerning, among other things:
 - Energy use of public transit system.
 - Loading and securement of wheelchairs in school buses.
 - Transit information systems to aid local operators in communicating route and fare information to potential riders.
 - An evaluation of large capacity buses demonstrated in California in 1974.
 - Dial-A-Ride transit service opportunities for low capital investment transit development.
- Compiled transit-related population and social characteristics by standard metropolitan statistical areas to develop a marketing opportunity information base.
- Administered the initial requests for funding of guideway system development as established through recent changes in Article XXVI of the Constitution to allow use of highway funds for this purpose.
- Developed and sponsored a major transit training course for CALTRANS personnel and employees of planning agencies and transit districts.
- Developed procedures for design of transit systems in small urban and rural areas.
- Provided local assistance for transit feasibility studies.
- Produced informational publications on transit development:
 - Trans Guide, a compendium of transit system and state-of-the-art information.
 - Transit Update, a compilation of newsworthy items in public transit.
 - Reports on specific subjects such as new transit technology.
- Encouraged university involvement in transit research, development and marketing.
- Assisted in the development of transit legislation at the State and Federal levels.
- Provided input to assure adequate consideration of public transportation in the California Transportation Plan.
- Provided administrative assistance to the Governor, metropolitan organizations and transit operators in the first phase of implementation of the National Mass Transportation Assistance Act of 1974, involving \$560 million of Federal operating and capital assistance grants through Fiscal Year 1980.
- Implemented the bus shelter and bicycle demonstration mandates of Chapter 1428, Statutes of 1974.
- Provided services to California transit operators in the preparation of articulated bus specifications.
- Implemented the initial phase of an Urban Mass Transportation Administration technical studies grant.

a. Market Development and Operations

Development and implementation of methods to improve the effective utilization of existing transit capacity is provided under this element. Activities to accomplish this objective include: publication of guidelines for improved passenger information systems to increase accessibility and utilization; transit market segmentation studies and application of findings to test markets to increase system utilization; development of transit market data bases to provide information on transit user demand characteristics needed for establishing and improving levels of service; coordination of development of bus preferential treatment facilities on streets and highways; identification of transit needs in presently unserved areas; identification and encouragement of services which can be provided by the private sector; prepare feasibility studies for improvements in transportation service for social service agencies and school districts; prepare transit educational material; provide technical assistance to regional planning agencies and transit operators; and monitor

DEPARTMENT OF TRANSPORTATION—Continued

performance characteristics of public transit.

Output

Carry out Urban Mass Transportation Grants for:

- Technical studies of public transit needs in rural and urban places of 5,000 to 50,000 population.
- Development of standards and criteria for transit service.
- Identification of private sector opportunities in public transit.
- Implementation of a technical study concerning feasibility of combined transportation service for social service agencies.
- Administer the programs established by Chapter 1130, Statutes of 1975 (SB 283) for the department including
 - Bus Demonstration Program fund
 - Rural Public Transportation Projects fund
 - Public Transportation Demonstration Projects

Input

	1974-75	1975-76	1976-77
Expenditures	\$395,471	\$1,314,878	\$2,881,081
Personnel man-years	14.7	20.1	14.6

b. Local Assistance

This element includes development of a federal-state-local institutional relationship which will assure a continuing and stable source of transit funding and the administration of the resulting programs. An important objective of this effort is to promote a statewide balance of development of transit service through allocation of transit capital grants and operating grants under Section 5 of the National Mass Transportation Act of 1974, and other assistance programs.

Administration of the Transportation Development Act of 1971 (SB 325) funds and the Urban Mass Transportation 16(b)(2) program are major parts of this element as is the review and processing of requests for use of gas tax funds for transit guideway purposes under Article XXVI, and the administration of contracts established under this program.

Technical assistance to transit districts, local and regional transportation planning agencies, CALTRANS' district staffs and other divisions is provided under this element. Such assistance includes: system planning, recommended institutional relationships, Federal grant preparation assistance, and system improvement recommendations.

Output

- Administration of funds to provide transportation assistance to the elderly and handicapped.
- Preliminary studies and discussions of the San Francisco-Stockton-Sacramento Corridor Study implementation, initially involving:
 - Coordination of services offered by Amtrak, BART, AC Transit, and other transit operators
- Planning, design, and construction of cross-platform transfer project at Richmond for passengers between Amtrak, BART, AC Transit, and other transit operators.
- Assist the TransBay Terminal Authority in the development of a transportation center in San Francisco on the site of the TransBay Terminal.
- Assist the Governor, metropolitan planning organizations and transit operators in administering the National Mass Transportation Assistance Act of 1974 Section 5 operating and capital grant program.
- Administer the programs established by Chapter 1130, Statutes of 1975 (SB 283) for the department, including:
 - The Abandoned Railroad Account
 - Improvement of Amtrak and Commuter Rail Services
 - Feasibility studies as listed in the legislation

Input

	1974-75	1975-76	1976-77
Expenditures	\$2,066,474	\$1,106,714	\$6,511,691
Personnel man-years	21.9	18.3	12.9

c. Program Administration

The element provides management, legal, fiscal, administrative support and legislative analyses for the Mass Transportation Program. It serves as the statewide clearinghouse for public transit information; to provide transit districts, operators, the public, local and regional transportation planning agencies, CALTRANS' staff, the Legislature and others, data upon request.

Output

- Administer the Transit Management Program under provisions of Chapter 1130, Statutes of 1975.
- Develop and conduct transportation courses for decision-makers, administrators and managers.
- Provide administrative services.
- Coordinate and conduct training.
- Administer contracts and agreements.
- Continue efforts to formulate a long-range state public transportation policy and program for the adoption by the Administration and Legislature.

Input

	1974-75	1975-76	1976-77
Expenditures	\$87,738	\$586,534	\$746,560
Personnel man-years	5.7	17.8	17.5

d. Research and Development

This element provides many of the activities necessary for attainment of the program's long-range goals. Activities include: development of long-range public transit planning criteria and standards; programs to improve energy utilization and effectiveness; environmental mitigation programs for public transit; improved equipment to serve the needs of the physically handicapped and elderly; equipment, such as high-capacity buses, needed to improve cost-benefit ratios of standard transit service; informational and research papers for decision makers on advanced systems and innovations; improved auxiliary facilities and programs for transit such as transit shelters, signal preempt systems and scheduling techniques, all designed to improve public transit service; programs to ensure local and regional consideration of transit's potential in meeting travel needs; and support, coordination and monitoring of federal, industry and university research and development programs.

Output

- Administer the program established by Chapter 1130, Statutes of 1975 (SB 283) including:
 - Nonmotorized transportation evaluation
- Develop lift equipment for wheelchairs on transit buses.
- Conduct University Research grant program.

DEPARTMENT OF TRANSPORTATION—Continued

- Conduct demonstration projects and evaluate demonstrations conducted by others.
- Respond to the transportation needs of the elderly and physically handicapped.

Input	1974-75	1975-76	1976-77
Expenditures	\$302,733	\$577,857	\$1,950,361
Personnel man-years	3.8	7.7	7.5

III. AERONAUTICS

Program Objectives and Description

California has six of the ten busiest airports in the U.S. One of every six planes and pilots in the U.S. is based in California, and the country's busiest air transportation corridor, Los Angeles/San Francisco, is in California. Such aviation activity creates problems of aircraft noise, potential hazards to fliers, and the need for a high-quality airport system.

The Aeronautics Program serves the air transportation community consistent with regional and Statewide comprehensive transportation plans by:

- Promoting aviation safety.
- Increasing and upholding standards for aircraft and airport/heliport operations.
- Assisting local governments in safe, well-planned aviation facility development.
- Developing an aviation master plan that is a part of the viable Statewide multimodal transportation plan and that integrates with the nationwide transportation plan.
- Reducing the nuisance of aviation noise.

Funding

Section 8352.3 of the Revenue and Taxation Code states that there shall be transferred to the Aeronautics Account in the State Transportation Fund all moneys deposited in the Motor Vehicle Fuel Account attributable to fuel consumed by general aviation aircraft for allocation as follows: (1) to pay refunds on aviation fuel taxes paid (8101.5); (2) to pay pro rata cost of Controller and board (8352.1); (3) to pay support of the Division of Aeronautics and transfers to the Transportation Planning and Research Account; (4) the remaining balance to be available for the California Aid to Airports Program.

Authority

Public Utilities Code, Division 9.

^c \$56,032 (1.2 man-years) transferred from Local Assistance Element in 1976-77 year

a. Safety and Regulation

Under this element, the Division of Aeronautics conducts safety and permit inspections of aviation facilities; issues and revokes airport, heliport, and parachute zone permits; organizes, sponsors, and participates in aviation safety seminars; monitors search and rescue activities; develops and administers emergency plans and services; analyzes and compiles aviation safety data and accident statistics, regulates sport parachuting activities, and reviews airspace utilization and obstruction case studies. The Office of Safety and Regulation is also responsible for the enforcement of aeronautical laws and regulations.

DEPARTMENT OF TRANSPORTATION—Continued

b. Local Assistance

Aviation consultants assist local governments in maintaining safe operating facilities; review land-use and zoning proposals; make recommendations regarding existing or proposed facilities; assist local and regional governments through consultation and financial aid to develop well-constructed and safe aviation facilities; and aid locals in developing airport zoning and land use.

The Aeronautics Board reviews local assistance applications, insuring that they conform to statewide plans and standards; they also set project priorities, and allocate moneys for airport facilities development.

Output	1974-75	1975-76	1976-77
Capital improvement subventions.....	50	60	60

Expenditures	\$224,800	\$312,372	\$359,823
Personnel man-years	11.4	12.5	12.7

d. Planning and Research

This element provides input to State and Federal comprehensive transportation plans and information designed to improve air transportation service while minimizing its impact on the environment. It is responsible for consideration of systems implementation between airports.

Output

Provide statewide criteria and considerations in developing compatible land use around airports, including airport land use commission activities and noise reduction endeavors. Also provides interpretation between P.U.C., airports and planning regions of the integration of planning processes developed for the California Aviation System Plan Study.

Input			
Expenditures	\$71,700	\$60,168	\$116,200
Personnel man-years	2.5	2.1	3.3

IV. HIGHWAY TRANSPORTATION

Program Objectives and Description

Roads, streets, and highways serve over 99 percent of all person-trips demanded by Californians. In terms of vehicle miles traveled, more than half are recorded on the State Highway System, which comprises less than 10 percent of the total roadway miles in the State. Highway facilities serve over three-fourths of California's commodity movement, and public transportation is overwhelmingly dependent upon buses using streets and highways.

The role of the Highway Transportation Program is changing. In the past the role has been to fulfill the mobility needs of safe, economical, and efficient travel by providing many new roadway miles. This program had been developed to insure that State highway and toll bridge location, design, construction, operation and maintenance kept pace with State growth and was consistent with statewide comprehensive transportation system plans.

Now reduced state growth, energy and environmental concerns, and continuing erosion of financing have caused a change of emphasis from new facilities to maintenance, operations and rehabilitation of the existing system. Without revision to current statutorily required fund allocations, it will make it difficult if not impossible to complete many sections of planned freeway around the State including some facilities which are needed to close gaps, make facilities usable and to enhance the safety of the system.

Seven major issues are exerting significant pressure on the Highway Transportation Program. These are:

- Spiraling inflation which eroded 55¢ from the highway construction dollar since 1967.
- Increasing cost of maintaining existing highway facilities.
- Increasing subventions to other entities such as cities and counties.
- Increasing costs of other State agencies which share common non-growth revenues.

DEPARTMENT OF TRANSPORTATION—Continued

- Continuing Federal redirection and fragmentation of transportation programs as well as reduction in the amount of revenue returned to California from Federal Highway User Taxes paid by California motorists.
- Increasing project development complexity and delays resulting from project clearance requirements and other external procedural matters.
- The use of Motor Vehicle Fuel revenues for "exclusive public mass transit guideways and related facilities".

The Department has been forced to offset these factors by proposing a vastly reduced program. Any capital funds available over our outstanding commitments will basically be directed at rehabilitating worn-out and damaged highways, protecting the existing highway from predictable damage, specific accident-reducing safety improvements corrections, and operational improvements in specific problem areas on the existing highway network.

Therefore, the prime objective of the Highway Program is to preserve the qualities of traffic service, comfort, safety and the structural integrity of the existing State Highway System through maintenance, rehabilitation and operational improvement work. Considering the declining revenues this work will be at a lower than desirable level. The secondary objective of the Highway Program is to respond to the public's need for additional safe, efficient, comfortable, and environmentally compatible highway transportation service through the construction of new facilities. A much reduced new facility construction program, which involves Interstate projects, is included in this budget.

The Highway Transportation Program also includes other related elements sensitive to public needs such as: reduction of noise pollution, construction of bicycle and hiking trails; exclusive bus and car pool lanes on freeways; fringe parking and reduction of environmental degradation. Some of these programs are reduced from past budgets and will continue to be reduced as financial capability reduces in the future.

d. Program Administration	1,629	1,347	1,456	50,371,199	41,322,900	41,672,400
e. New Facilities	5,234	4,484	2,087	377,093,366	650,191,214	336,494,277

a. Operations and Maintenance

This element covers the activities necessary to preserve the qualities of safety, traffic service, and the structural integrity of the State Highway System, and the qualities of aesthetic, ecological compatibility and comfort.

Operations

The operations component involves emergency road service, snow removal, traffic and lane control, signs and signals, special event traffic handling, operational analysis studies, and electrical power for the highway and toll bridge facilities.

Input

	1974-75	1975-76	1976-77
Expenditures	\$18,117,776	\$21,399,700	\$22,403,100
Personnel man-years	689	756	843

Maintenance

Over 15,000 miles of state highways and eight toll bridges are maintained under this component of the program. Expenditures are primarily for maintenance personnel, equipment and materials; however, capital outlay for constructing new maintenance facilities and truck weighing stations is included. Roadside rests and landscape maintenance are also a part of this component. The funding level governs the levels of service set by standards developed through a formal maintenance management system. The level of service has been reduced over the last several years to make more money available for other critical program areas.

Output

	1974-75	1975-76	1976-77
Lane miles highway maintained	46,665	47,524	48,000
Toll Bridge Maintenance:			
Steel Structure (million sq.ft.)	37.9	37.9	37.9
Bridge roadway lane-miles	271.5	271.5	271.5
Transportation permits issued	128,279	130,000	130,000
Encroachment permits issued	8,916	9,000	9,000
Ramps, turnouts, off-roadway parking facilities (lane-miles)	4,296	4,380	4,424

Input

Expenditures	\$138,408,733	\$161,630,300	\$171,913,600
Personnel man-years	6,333	6,064	5,983

DEPARTMENT OF TRANSPORTATION—Continued

b. Rehabilitation and Operating Improvements

The objectives under this element are to redesign, reconstruct, or restore unsound portions of the State highway system and to develop specific accident-reducing safety and operational improvements.

Safety Improvements

This component contains two activities.

- Spot improvements to correct problems identified at specific locations of accident concentration. Typically these improvements are signal installations, channelization, warning signs, lighting, curve and wet pavement corrections.
- Blanket improvements are designed to reduce incidence or severity of specific types of accidents. Typical are median barriers, protective fencing, off-ramp cleanup, guardrail, edgelines, raised pavement markers and improved sign standards.

Output	1974-75	1975-76	1976-77
Lives saved	325	375	410
Accidents prevented	32,500	37,440	40,800
Projects constructed	343	364	430
Input			
Expenditures	\$29,908,558	\$29,122,200	\$45,289,000
Personnel man-years	656	696	676

Reconstruction and Restoration

Reconstruction and restoration of bridges and roadways restore facilities which have been weakened by usage or weathering to safe standards. Major damage and disaster restoration projects correct damage caused by storms or other violence. Much of the highway system is approaching middle age with middle age problems resulting in increasing amounts of structural repair being required. Because of this, significant increases are anticipated over the next few years as the level of new facilities construction decreases.

Output	1974-75	1975-76	1976-77
Number of bridges rehabilitated.....	50	16	3
Number of bridges replaced	9	1	3
Lane miles reconstructed.....	174	145	744
Number of reconstruction projects.....	21	8	37
Major damage restoration projects.....	8	8	8
Input			
Expenditures	\$22,131,913	\$17,003,800	\$53,341,500
Personnel man-years	203	196	550

Resurfacing

Resurfacing projects preserve pavements through the application of thin layers of asphalt concrete to older sections of roadway. Project priority lists are established based on number of cracks, extent of wear, and roughness. These thin layers offer protection to roadway surface, reestablishes skid resistance for safety, and smoothness for driver comfort.

Output	1974-75	1975-76	1976-77
Lane miles resurfaced	1,830	207	1,500
Input			
Expenditures	\$9,877,960	\$3,071,300	\$15,424,500
Personnel man-years	58	39	71

Traffic Operational Improvements

Traffic operational improvements consist of two types of projects:

- Projects to reduce delay and increase safety potential at existing problem locations. Examples include passing lanes, auxiliary lanes, on-ramp volume control meters, and left-turn pockets.
 - Projects to improve traffic service. Examples include sign upgrading and widening narrow two-lane roads to provide wider lanes and shoulders.
- These improvements provide capability for reduced travel time, minimized driver frustration and provide safer travel.

Output	1974-75	1975-76	1976-77
Cumulative savings in full costs (20-year period)	\$26,000,000	\$38,000,000	\$58,000,000
Cumulative accidents cost savings (20-year period)	\$58,000,000	\$84,000,000	\$129,000,000
Input			
Expenditures	\$25,543,599	\$42,706,110	\$46,149,500
Personnel man-years	758	1,087	805

Protective Betterments

Protective betterments projects insure the long life of the highways by adding facilities such as rock slope protection, stabilization trenches, culverts, drainage channels, underdrains and slope corrections as the need for them develops. These facilities do not add new traffic services but rather protect the existing highway from damage.

Input	1974-75	1975-76	1976-77
Expenditures	\$8,044,721	\$7,826,500	\$9,427,600
Personnel man-years	145	59	116

High Occupancy Vehicles

The goal of this new component is to respond to the public need for lower transportation costs, conserving fuel, improving air quality, alleviating parking problems, and making more effective use of existing highways by encouraging the use of multi-occupancy vehicles.

DEPARTMENT OF TRANSPORTATION—Continued

Activities toward this goal include providing service to assist the public in forming car, van and bus pools; furnishing information on transit schedules; providing preferential treatment for high occupancy vehicles; and encouraging work schedules which are conducive to group transportation. Efforts are also directed at multimodal facility utilization through construction of exclusive bypass lanes for buses and carpools. Expenditures for this component are included in Traffic Operational Improvements for the 1974-75 and 1975-76 years.

	1974-75	1975-76	1976-77
Input			
Expenditures	—	—	\$26,307,700
Personnel man-years	—	—	457

Noise Attenuation

This component includes improvement projects to reduce state highway traffic noise in adjacent school buildings and residential areas.

	1974-75	1975-76	1976-77
Output			
School noise abatement projects (number)	5	9	8

Input

Expenditures	\$1,396,907	\$1,200,000	\$3,939,900
Personnel man-years	2	41	71

c. Local Assistance

This element contributes to public needs by helping local governments provide services and improvements on city and county streets and roads. The department coordinates disbursement of funds and provides technical assistance to cities and counties in conformance with state and federal laws.

Federal-Aid Secondary

This component covers a cooperative endeavor between federal, state and county governments to improve the 9,600-mile county federal-aid secondary system which provides feeder roads to the state highway system. Federal funds are made available to the counties through the State Highway Fund at levels based on area rural populations, and mileage of postal routes.

The department's role is to disburse federal and state funds to counties, provide statewide coordination, and assist in developing projects. Funding levels are based on the availability of federal revenues.

	1974-75	1975-76	1976-77
Output			
Projects processed	31	40	40

Input

Expenditures	\$16,411,076	\$59,618,700*	\$20,435,000
Personnel man-years	36	36	13

*Includes federal apportionment for projects which cities and counties were unable to obligate during the 1974-75 Fiscal year.

City and County Urban Extensions

This component has been canceled and the 1975-76 budget is for phase-out of the program. City and county urban extensions are now included in the federal aid urban system element.

	1974-75	1975-76	1976-77
Output			
Projects processed	20	—	—

Input

Expenditures	\$4,346,863	\$5,596,424	\$21,000
Personnel man-years	3	2	1

c. 1 Topics

This component was directed exclusively to projects on city streets and county roads in congested urban areas to increase their effectiveness.

The 1973 Federal Aid Highway Act did not provide funds for the continuation of the TOPICS Program. Effort will be entirely on projects submitted during prior fiscal years.

DEPARTMENT OF TRANSPORTATION—*Continued*

Output	1974-75	1975-76	1976-77
Projects processed	50	—	—
Input			
Expenditures	\$423,262	\$6,337,300	\$101,900
Personnel man-years	27	7	4

c. 2 Railroad Crossings

Train-vehicle collisions on city streets and county roads are reduced by constructing grade separation structures and installing and maintaining grade crossing protection devices. Under state legislation the program is developed primarily by the California Public Utilities Commission and financed jointly by the cities, counties, railroads and the state.

Output	1974-75	1975-76	1976-77
Grade separation projects processed	10	5	8
Grade crossing projects processed	102	145	145
Crossings maintained	2,600	2,500	2,500
Input			
Expenditures	\$22,630,114	\$24,132,000	\$20,080,900
Personnel man-years	9	9	3

c. 3 Unassigned Local Assistance

Miscellaneous services to cities and counties are provided under this component of the program. Maintaining records upon which apportionments are based, providing engineering assistance, coordinating storm damage programs, the Special Bridge Replacement Program, providing road system mapping, and providing other administrative services are included.

Input	1974-75	1975-76	1976-77
Expenditures	\$1,881,000	\$830,000	\$1,188,700
Personnel man-years	76	34	45

c. 4 Federal-Aid Urban System

This component provides for handling the financing of improvements on the federal-aid urban system, which includes both state highways and local streets and roads. Also eligible for financing are fringe parking facilities, transit system capital improvements, buses and rail rolling stock. Funds are allocated on the basis of population to urban (5,000 to 50,000 population) and urbanized (over 50,000 population) areas.

CALTRANS is assisted in administering the FAU program by an advisory committee which represents cities, counties, public owned transit lines, and organizations of public highway users in establishing policies and procedures.

To encourage orderly transportation improvement, local expenditure programs were directed to be developed which fully utilized the three years of funding under the 1973 Federal Highway Act. The three-year programs are processed through regional transportation planning agencies, CALTRANS and the State Transportation Board prior to their approval by the California Highway Commission. Ninety-six of the 98 programs expected were approved by October 1975. Construction is under way on many of the approved programs. These funds are appropriated by the Legislature in accordance with the provisions of Chapter 1470, Statutes of 1974.

Output	1974-75	1975-76	1976-77
Projects processed	275	300	300
Input			
Expenditures	\$34,786,639	\$245,609,200	\$91,066,400
Personnel man-years	80	173	55

c. 5 Local Bicycle Lanes

This component responds to the increased use of bicycles as a means of transportation and seeks to stimulate the use of local gas tax funds for increasing the capacity and safety of local streets and roads by providing bicycle lanes. The department administers this component which is funded entirely from the Bicycle Lane Account in the State Transportation fund.

Output	1974-75	1975-76	1976-77
Projects processed	73	30	30
Input			
Expenditures	\$403,616	\$460,000	\$386,900
Personnel man-years	1	1	3

DEPARTMENT OF TRANSPORTATION—Continued

c. 6 Highway Safety Improvements on Local Roads

This component provides projects to improve highway safety on local roads as specified in Section 205 and 230 of the Highway Safety Act of 1973.

Output	1974-75	1975-76	1976-77
Projects processed	177	250	250
Input			
Expenditures	\$2,393,336	\$33,436,300	\$10,425,500
Personnel man-years	4	16	16

c. 7 Federal-Aid for Off-System Roads

This is a new component resulting from the Federal-Aid Highway Amendments of 1974. It provides for the administration of the funds for the construction, reconstruction, and improvement of county rural roads or, by agreement, rural roads under other governmental jurisdiction which are not on any Federal-aid System. The improvements may include, but are not limited to, the replacement of bridges and the elimination of high hazard locations and roadside obstacles.

Output	1974-75	1975-76	1976-77
Projects processed	—	57	57
Input			
Expenditures	—	\$7,977,200	\$8,113,700
Personnel man-years	—	5	10

d. Program Administration

This component provides for the planning, research, and services necessary to decide what should be accomplished by the Highway Transportation Program.

This includes the following:

d. 1 Management and Management Services

This component provides the services needed by executive management to accomplish highway programs. Management information and management systems are provided under this component to assist executives in making appropriate decisions in carrying out the Highway Program.

Input	1974-75	1975-76	1976-77
Expenditures	\$3,730,386	\$7,410,000	\$6,419,800
Personnel man-years	178	314	243

d. 2 Highway Planning

This component covers the activities necessary to develop responses to the public need for highway transportation facilities.

Highway Planning, through the activities listed below, produces information that can be used by top management and the Legislature regarding the most beneficial arrangement for providing the citizens of California with a road, street and highway system.

Specific activities include: Administering the State-Federal Cooperative Highway Planning and Research Program; reviewing legal and administrative systems of highways and recommending as to classification, jurisdiction and priority for development, inventorying highways, monitoring and rating performance, recommending improvement or addition; geodetic control surveys, mapping; traffic counting, classifying, weighing, travel analysis; studies of motor vehicle registration, vehicle and motor fuel taxes; street and highway income, expenditures, and other fiscal data; advising on the highway work plans for all planning activities.

Input	1974-75	1975-76	1976-77
Expenditures	\$5,082,109	\$5,649,000	\$5,696,100
Personnel man-years	258	237	242

d. 3 Highway Research

The goal of this component is to provide knowledge which will enable a more effective response to the public need for safe, efficient and environmentally compatible highway transportation service.

Facility research is conducted to obtain more complete knowledge that will contribute to greater safety, improvement of traffic flow, and increased efficiency in planning, design, construction and maintenance of highways. It includes theoretical and applied research, development, test and evaluation, and demonstration projects.

Environmental research provides knowledge which will enable a positive response to the impacts of highway construction and operation on the physical and social environment. It focuses on such typical issues as: Air Pollution; Water Pollution; Noise; Landscape Preservation; Natural Environment; and Socioeconomic Environment.

Input	1974-75	1975-76	1976-77
Expenditures	\$6,604,719	\$6,033,500	\$5,229,300
Personnel man-years	66	226	183

DEPARTMENT OF TRANSPORTATION—Continued

Special Services

This component provides such special services as the multiple use of rights-of-way on or under constructed state highways through airspace leases. This component also provides for rentals or leases of rights-of-way being held for future construction of state highways or toll bridges.

Personnel man-years include those reimbursed by local agencies for providing requested engineering services beyond their capability (i.e., design, right-of-way services, construction engineering).

Input	1974-75	1975-76	1976-77
Expenditures	\$5,014,829	\$9,075,400	\$10,254,100
Personnel man-years	42	41	267

d. 4 Legal and Administrative Services

This component of the program provides legal and administrative services which support the entire Highway Transportation Program and are not assignable to specific programs; included are administrative services such as accounting, personnel, public information, training, safety, reproduction, communications, data processing, and automotive management.

Input	1974-75	1975-76	1976-77
Expenditures	\$29,939,156	\$13,155,000	\$14,073,100
Personnel man-years	1,085	529	521

e. New Facilities

The New Facilities element responds to the public's need for new, improved, safe and efficient highway transportation facilities.

Inflation, decreased revenues and federal funding reductions have resulted in much-reduced new facility construction program. A moratorium on the advertising of projects is presently in effect because of low cash flow forecasts. A staff reduction is under way to rebalance program and staffing levels.

e. 1 New Highway Construction

New highway construction consists of construction of new and upgrading of existing highway facilities, related landscaping and nonmotorized transportation facilities, such as:

- Constructing highways on new alignment to supplement or replace existing facilities.
- Adding new lanes to existing highways to accommodate growth and respond to the need for greater traffic volumes.
- Adding new connections such as ramps or interchanges.
- Constructing highways to serve new areas and assisting in the appropriate regional development of the state.
- Placing trees, shrubs, ground cover, and supporting irrigation systems to provide aesthetically pleasing and environmentally compatible roadway facilities.

Output

It is estimated, on the basis of past experience in providing these new facilities, that approximately 260 accidents, 4 deaths, 140 injuries, \$600,000 in property damage, and \$3 million in delay will be prevented or saved over a 20-year period for each \$1 million of construction funds expended.

Input	1974-75	1975-76	1976-77
Expenditures	\$372,063,736	\$614,069,914	\$298,252,277
Personnel man-years	5,055	4,302	1,980

e. 2 Nonmotorized Transportation Facilities

This component provides improved facilities for pedestrians, equestrians and/or bicyclists. By providing separate bicycle paths or shoulders on existing roadways for bicycle lanes, the safety and capacity of the highway is increased. These facilities also encourage use of bicycles as an energy conserving, healthful mode of transportation. Cooperative projects with local agencies have been encouraged.

Output	1974-75	1975-76	1976-77
Miles Bikeways	19.5	10	20
Input			
Expenditures	\$387,146	\$460,000	\$731,700
Personnel man-years	1	1	14

e. 3 New Construction-Toll Bridge

This program component includes all projects which provide new toll bridge service. It includes projects adding lanes to existing toll bridges, constructing new bridges, and converting non-toll bridges to toll facilities. The complete replacement of an existing toll bridge is a part of the component. It covers the following bridges:

- Richmond-San Rafael Bridge
- San Diego-Coronado Bay Bridge.
- San Francisco-Oakland Bay Bridge
- San Mateo-Hayward Bridge
- Dumbarton Bridge
- Carquinez Bridge
- Benicia-Martinez Bridge
- Vincent Thomas Bridge
- Antioch Bridge

Activities include all New Construction Toll Bridge work within the toll bridge limit. Typical examples of the work done are earthwork, paving, construction of structures, and placement of signs and appurtenances. Landscaping of areas within each toll bridge limit is also included.

DEPARTMENT OF TRANSPORTATION—*Continued*

Input	1974-75	1975-76	1976-77
Expenditures	\$754,119	\$24,339,500	\$33,093,500*
Personnel man-years	45	33	45

*Large increase in capital outlay for Dunbarton Bridge is included in this item.

e. 4 Roadside Services and Enhancement

Through this component, facilities are provided for motorists such as safety roadside rests and scenic view points where they may rest, use comfort facilities, obtain information, view panoramas of extraordinary scenic quality, and return to the highway a more alert and safe motorist. It also contributes to more pleasurable driving by enhancing views from highways through scenic highway development, screening or removal of junkyards and removal of billboard.

Output	1974-75	1975-76	1976-77
Roadside rests constructed	5	6	2
Input	1974-75	1975-76	1976-77
Expenditures	\$3,888,365	\$11,321,800	\$4,416,800
Personnel man-years	133	148	48

V. GENERAL SUPPORT

Program Objectives and Descriptions

Overall management is needed to provide direction to the total transportation program. The objectives to meet this need are:

- To assure and contribute to the accomplishment of the Transportation Program by providing general management and services for the Department as a whole.
- To provide services, materials, and equipment necessary to support the other programs. Specifically it is to provide general services of executive management, legal and administrative services, office buildings, and lease area management.

Authority

- Title 2 Division 3, Part 4.5, Chapter 1, Government Code.
- Title 2 Division 3, Part 5, Chapter 1, Article 2, Government Code.
- Title 2 Division 9, Chapter 2, Public Utilities Code.

Program Requirements	74-75	75-76	76-77	1974-75	1975-76	1976-77
Totals, General Support Program	465.3	443	437	\$14,033,614	\$13,935,900	\$14,481,400

Fund Sources

Aeronautics Account	21,349	18,089	16,700
State Highway Account	12,752,886	12,665,766	13,628,200
Transportation Planning and Research Account	371,079	695,145	310,400
Reimbursements	888,300	556,900	526,100

Program Elements

a. Management and Management Services	125	123	117	2,615,991	3,505,300	3,601,100
b. General Services	312.9	303	305	10,529,323	9,873,700	10,354,200
c. Support for Others	27.4	17	15	888,300	556,900	526,100

a. Management and Management Services

This element provides top management of the total transportation program, together with related staff services. It includes the services of the Director, his immediate staff, the District Directors, and some of the staff personnel performing services in the areas of management and policy planning, environmental and community affairs, financial management, operations security, and management audit and review.

Input	1974-75	1975-76	1976-77
Expenditures	\$2,615,991	\$3,505,300	\$3,601,100
Personnel man-years	125	123	117

b. General Services

Included in this element are support services, such as Legal Services, Fiscal Management and Accounting, Manpower Services, Management Analysis, Computer Data Processing, Material and Facility Management, Internal Communication, Non-Maintenance Land and Buildings, and Personnel Safety, which are directed toward all components of the Transportation Program. The level of service has decreased 5.8 man-years as a result of cost reduction measures to adjust this program in line with reductions in other programs.

Input	1974-75	1975-76	1976-77
Expenditures	\$10,529,323	\$9,873,700	\$10,354,200
Personnel man-years	312.9	303	305

c. Support for Others

This element provides miscellaneous services to assist outside agencies when CALTRANS has been requested to provide, and is reimbursed for such support. Examples of such support are data processing programming, reproduction work, and prequalification of contractors, for the Departments of Water Resources, General Services, Conservation, Health, Energy Commission, Parks and Recreation, and Criminal Justice. Also included is effort reimbursed by the San Diego Regional Transit District for consultation regarding transportation problems. This has resulted in reduced effort for both the 1975-76 and the 1976-77 years.

Input	1974-75	1975-76	1976-77
Expenditures	\$888,300	\$556,900	\$526,100
Personnel man-years	27.4	17	15

DEPARTMENT OF TRANSPORTATION—Continued

VI. LEGISLATIVE MANDATES

Section 2231(a) of the Revenue and Taxation Code requires the state to pay local governmental units the costs of any new program or increased level of service of a program mandated by legislation enacted after January 1, 1973. Within the program area of the Department of Transportation, there are two legislative mandates.

Program Requirements	1974-75	1975-76	1976-77
Continuing program costs (General Fund)	—	\$18,000	—
State Highway Account (STF)	—	—	\$15,000

Program Elements

a. Chapter 1086/75 (SB 181)—Late Claims for Chapter 521/73 (AB 24)	—	3,000	—
b. Chapter 1245/75 (SB 1066)—Department notification by county planning commissions	—	15,000	15,000

a. Chapter 1086/75 (SB 181) Late Claims for Chapter 521/73 (AB 24)

General Description

Chapter 1086 appropriated additional funds to cover late claims filed for reimbursement of Chapter 521/73 (AB 24) which required the San Francisco Bay Area Rapid Transit District to hold an election to fill the offices of its board of directors and to determine if directors were to be appointed or elected. The State Controller has appropriated \$43,200 from the General Fund for allocation to local agencies for the cost of adding to the ballot the question as to whether to have appointed or elected directors.

Fiscal Data

The State Controller was appropriated \$3,000 from the General Fund to provide reimbursements for late claims filed pursuant to Chapter 521.

Input	1974-75	1975-76	1976-77
Expenditures	—	\$3,000	—

b. Chapter 1245/75 (SB 1066) Department Notification by County Planning Commissions

General Description

Chapter 1245 required county planning commissions to notify the Department of Transportation of any application for a building permit for a building costing \$5,000 or more in sufficient time to give the department an opportunity to purchase the right-of-way from the applicant with respect to state highways in the county.

Fiscal Data

The State Controller was appropriated \$15,000 from the General Fund for the reimbursement of any local agency for costs incurred based on claims for direct or indirect costs filed as prescribed by the State Controller. The expenditure in 1976-77 is appropriated from the State Highway Account, State Transportation Fund

Input	1974-75	1975-76	1976-77
Expenditures	—	\$15,000	\$15,000

DEPARTMENTAL SUMMARY

SUMMARY BY OBJECT

	74-75	75-76	76-77	1974-75	1975-76	1976-77

Additional Statements of Expenditures and Obligations and Revenues

- Statement 1—Summary of expenditures and obligations.
- Statement 2—Revenues and receipts.
- Statement 3—Recapitulation of proposed expenditures and obligations for construction of state highways for 1976–77 fiscal year showing allocation of construction funds by county group, pursuant to Section 188, Streets and Highways Code as of November 1, 1975.
- Statement 4—Detail of major project allocations for construction of highways and bridges as recommended by the California Highway Commission for the 1976–77 fiscal year.
- Statement 5—Expenditures and obligations incurred for state highway purposes against the 1974–75 fiscal year state highway budget compared to budget allocations presented to the 1974 and 1975 sessions of the Legislature.
- Statement 6—Detail of major project allocations for construction of highways and bridges for the 1974–75 fiscal year, compared to budget allocations.
- Statement 7—Comparison of proposed expenditures and obligations to be incurred for the 1975–76 fiscal year in the current budget with proposed expenditures and obligations to be incurred for the 1975–76 fiscal year as shown in the budget submitted to the 1975 session of the Legislature.
- Statement 8—Detail of major project allocations for construction of highways and bridges for the 1975–76 fiscal year, compared to budget allocations.
- Statement 9—Comparison of revised revenue estimates for the 1975–76 fiscal year with budget estimates submitted to the 1975 session of the Legislature.
- Statement 10—Expenditures for maintenance by routes for the 1974–75 fiscal year.
- Statement 11—Total maintenance expenditures by descriptive categories.

Notes: The statements on this annual budget report, prepared in accordance with Sections 143.1 and 143.2 of the Streets and Highways Code, reflect the segregation of current expenditures from capital outlay to conform with similar format in the Governor's budget.

¹ Highway maintenance and general administration expenditures are limited by Section 186 of the Streets and Highways Code to an amount equal to revenue derived from 0.0125 per gallon on motor vehicle fuel and use fuel taxes. AB 3206 Statutes of 1974 amended Section 186 for the 1974-75 fiscal year by raising the limit to \$0.015, thus bringing the budget expenditures for the 1974-75 fiscal year within the statutory limit. AB 2034, Statutes of 1975 amended Section 186 for the 1975-76 fiscal year by raising the limit to \$0.01625 thus bringing the budget expenditures for the actual year within the statutory limit; also this statute excludes all research expenditures from Section 186 consideration. For the 1976-77 fiscal year, legislative changes are being proposed to bring the budgetary expenditures within the limits imposed by Section 186.

² AB 2034, Statutes of 1975, increases commencing with the 1975-76 fiscal year, from \$20,000,000 to \$25,000,000 the amount the department may expend annually for the maintenance of landscaping and functional planting on state highways.

Statement Number 3

Recapitulation of Proposed Expenditures and Obligations for Construction of State Highway for 1976-77 Fiscal Year
Showing Allocation of Construction Funds by County Group, Pursuant to Section 188, Streets and Highway Code, as
of November 1, 1975

<i>Expenditure Category On State Highways</i>	<i>Northern County Group</i>	<i>Southern County Group</i>	<i>Total</i>
Traffic engineering.....	\$5,345,000	\$5,680,000	\$11,025,000
Traffic safety projects	5,550,000	5,550,000	11,100,000
Rights-of-way—acquisition	6,000,000	20,000,000	26,000,000
Billboard removal	1,200,000	1,800,000	3,000,000
Statewide planning and programming.....	2,470,000	3,650,000	6,120,000
Project studies—management and control	2,100,000	3,130,000	5,230,000
Design engineering.....	15,925,000	18,910,000	34,835,000
Right-of-way—operations	7,350,000	11,890,000	19,240,000
Construction engineering	17,430,000	31,760,000	49,190,000
Major construction and improvements	91,984,000	140,200,000	232,184,000
Minor improvements and betterment	1,780,000	2,775,000	4,555,000
Thin blanket and deferred seal coat program	4,260,000	17,285,000	11,545,000
Emergency projects	300,000	300,000	600,000
Signs, delineation and traffic service	1,965,000	825,000	2,790,000
Land buildings	860,000	1,140,000	2,000,000
Highway planting.....	145,000	1,875,000	2,020,000
Functional or operational betterment	8,630,000	7,930,000	16,560,000
Safety roadside rests	—	—	—
Bikeways	110,000	260,000	370,000
School noise abatement	—	—	—
Freeway noise attenuation	600,000	1,520,000	2,120,000
Contingencies	19,399,071	33,979,606	53,378,677
Totals, on State Highways ¹	\$193,403,071	\$300,459,606	\$493,862,677
<i>Not on State Highways</i>			
Federal-aid secondary, matching (Section 2210.5, S. & H.C.) ²	\$3,400,000	\$1,300,000	\$4,700,000
Grade separation (Section 190, S. & H.C.) ³	4,370,000	—	4,370,000
Federal-aid secondary exchange (Section 2208, S. & H.C.) ⁴	800,000	1,200,000	2,000,000
Totals, Not on State Highways	\$8,570,000	\$2,500,000	\$11,070,000
Totals, Expenditures, Subject to Allocations Under Section 188 (S. & H.C.)	\$201,973,071	\$302,959,606	\$504,932,677
	(40%)	(60%)	(100%)

¹ Excludes convict labor construction which is not subject to Section 188.7, Streets and Highways Code.

² Included in county group allocation pursuant to Section 2210.5, Streets and Highways Code.

³ Budgeted for adoption to cities and counties pursuant to Section 190, Streets and Highways Code.

⁴ Included in county group allocation pursuant to Section 188, Streets and Highways Code.

Statement No. 4—Detail of Major Project Allocations for Construction of Highways and Bridges as Recommended by the California Highway Commission for the 1976-77 Fiscal Year

COUNTY	ROUTE & POST MI.	DESCRIPTION	APPROXIMATE MILEAGE	ESTIMATED COST
NORTHERN GROUP OF COUNTIES				
Alameda *	17	In San Leandro, at the Route 17/238 Interchange. Construct northbound to eastbound connection (0.5 mile) and auxiliary lane (0.2 mile).....	0.7	\$1,920,000
Alameda *	20.2/20.7 238			
Alameda *	16.4/16.7			
Alameda *	17	In Oakland, on the Chestnut Street Viaduct, from Chestnut Street to 34th Street. Install earthquake restrainers.....	1.9	560,000
Alameda *	32.3/34.2			
Alameda *	17	In Oakland, at the Routes 17/80/580 Interchange. Install earthquake restrainers.....	0.4	580,000
Alameda *	34.1/34.5			
Alameda *	61	From Route 112 to San Leandro to 98th Avenue in Oakland. Widen Doolittle Drive. (Total estimate \$1,820,000, FAU \$1,510,000, State's share.).....	1.1	310,000
Alameda *	14.8/15.9			
Alameda *	185	In Oakland, on East 14th Street from 80th Avenue to 101st Avenue. Reconstruct roadway.....	1.2	240,000
Alameda *	7.1/8.3			
Alameda *	580	Near Castro Valley from 0.3 mile west of Route 680 to 0.4 mile west of Eden Canyon Road; 8-lane freeway. (Total estimate \$34,000,000; \$24,000,000 1975-76 F.Y., \$5,000,000 1977-78 F.Y.).....	6.6	5,000,000
Alameda *	21.0/27.6			
Alameda *	580	In Oakland, from 0.17 mile west of Benedict Drive Connector to Oak Knoll Boulevard Overcrossing. Upgrade median barrier.....	3.2	530,000
Alameda *	33.6/36.8			
Alameda *	580	In Oakland, from Keller Avenue Overcrossing to Birdsall Avenue Pedestrian Overcrossing. Upgrade median barrier.....	2.1	380,000
Alameda *	37.8/39.9			
Calaveras.....	49	From 0.5 mile north to 1.4 miles north of San Antonio Creek, about 5 miles south of San Andreas. Construct passing lane.....	0.9	270,000
Calaveras.....	14.6/15.5			
Contra Costa.....	4	In and near Concord from 0.4 mile east of Route 242 to Willow Pass Road; 6-lane freeway. (Total estimate \$24,625,000, \$5,960,000 1974-75 F.Y., \$7,900,000 1975-76 F.Y.).....	1.9	10,765,000
Contra Costa.....	R15.1/R16.9			
Contra Costa.....	4	From Railroad Avenue Overcrossing in Pittsburg to A Street Undercrossing in Antioch. Pavement reconstruction and grinding.....	-	245,000
Contra Costa.....	23.0/27.8			
Contra Costa.....	4	From 0.5 mile east of O'Hara Avenue in Oakley to 0.3 mile south of Cypress Road. Realign roadway.....	1.2	900,000
Contra Costa.....	34.2/35.4			
Contra Costa.....	4	Near Brentwood, from Lone Tree Road to Balfour Road. Reconstruct roadway.....	3.1	600,000
Contra Costa.....	36.9/40.0			
Contra Costa.....	4	At Old River Bridge No. 29-45, about 15 miles west of Stockton. Reconstruct deck and fenders.....	0.4	350,000
Contra Costa.....	48.2/48.4			
San Jose.....	4			
San Jose.....	0.0/0.2			
Contra Costa.....	17	Near Richmond, at the Richmond-San Rafael Bridge. Repair expansion joint.....	0.3	290,000
Contra Costa.....	6.3/6.6			
Contra Costa.....	17	Near Richmond at Richmond-San Rafael Bridge. Install earthquake restrainers.....	-	750,000
Contra Costa.....	6.2/7.8			
Marin.....	17			
Marin.....	L0.0/L0.2			
Contra Costa.....	80	Near Crockett at the Carquinez Bridge. Install earthquake restrainers.....	-	430,000
Contra Costa.....	13.5/14.1			
Solano.....	80			
Solano.....	0.0/0.3			
Contra Costa.....	242	In and near Concord, on Route 242 from 0.5 mile south of Olivera Road to Route 4 and on Route 4 from 0.2 mile west of Solano Way to 0.3 mile west of Port Chicago Highway; construct interchange. (Total estimate \$14,520,000, State's Share \$12,120,000; \$2,000,000 1975-76 F.Y., \$3,000,000 1977-78 F.Y.).....	2.7	7,120,000
Contra Costa.....	R2.4/R5.8			
Contra Costa.....	4			
Contra Costa.....	13.5/R15.2			
El Dorado.....	50	About 14 miles east of Placerville, from 1.0 mile east of Sly Park Road Undercrossing to South Fork American River. Resurface.....	7.4	400,000
El Dorado.....	32.3/39.7			
El Dorado.....	50	Near South Lake Tahoe from 0.2 mile east of Pyramid Creek to 0.7 mile west of Route 89 (North). Reconstruct roadway and improve drainage.....	14.8	775,000
El Dorado.....	60.0/74.8			
El Dorado.....	50	In South Lake Tahoe from Route 89 (North) to Nevada State Line. Resurface and drainage.....	2.5	1,065,000
El Dorado.....	75.5/80.5			
Fresno.....	33	From Route 5 to 2 miles north of Mountain View Avenue. Reconstruct roadway.....	9.5	520,000
Fresno.....	39.9/49.4			
Fresno.....	41	On Route 41 from 0.1 mile west of Broadway to Dry Creek Canal and on Route 180 from Broadway to Chestnut Avenue. Resurface.....	5.6	300,000
Fresno.....	23.7/25.4			
Fresno.....	180			
Fresno.....	57.5/61.4			
Humboldt.....	36	From 0.8 mile to 0.5 mile west of Hydesville. Realign highway.....	0.3	270,000
Humboldt.....	1.9/2.2			
Humboldt.....	36	At 1.0 mile east of Van Duzen River Bridge No. 4-98, about 3 miles west of Bridgeville. Repair slipout.....	-	220,000
Humboldt.....	21.9			
Humboldt.....	96	At 1.9 miles north of Willow Creek Bridge No. 4-135, about 2 miles north of Route 299. Reconstruct 2-lane conventional road and place rock slope protection.....	-	270,000
Humboldt.....	2.1			
Humboldt.....	101	On Route 101 from 1.0 mile to 1.2 miles north of the Mendocino/Humboldt County line and on Route 254, 2.9 miles north of South Fork Eel River Bridge No. 4-10, about 4 miles north of Weott. Repair rock slope protection.....	0.3	330,000
Humboldt.....	1.0/1.2			
Humboldt.....	254			
Humboldt.....	23.2			
Humboldt.....	255	From 0.1 mile south to 0.1 mile north of Mad River Slough Bridge No. 4-257, about 3 miles south of Arcata. Replace bridge deck.....	-	635,000
Humboldt.....	5.0/5.4

COUNTY	ROUTE & POST MI.	DESCRIPTION	APPROXIMATE MILEAGE	ESTIMATED COST
NORTHERN GROUP OF COUNTIES—Continued				
Kings	41	From Kern County Line to 1.7 miles south of Utica Avenue (portions). Reconstruct roadway.	10.0	350,000
Lake	20	From 3.7 miles to 3.8 miles east of North Fork Cache Creek Bridge No. 14-12, about 9 miles east junction Route 53. Remove slide.	0.1	220,000
Lassen	395	From 10.5 miles north to 19.2 miles north of Litchfield Railroad Cross- ing. Reconstruct pavement.	8.7	1,920,000
Marin	17	Near San Rafael at the Richmond-San Rafael Bridge. Repair column (Stage 2), Pier 7-18.	—	575,000
Marin	37	Near Novato, from Route 101 to Atherton Avenue. Reconstruct pave- ment.	2.5	700,000
Marin	R11.4/13.8	In San Rafael from Route 17 to Lincoln Avenue. Construct exclusive bus lane.	2.2	1,000,000
Mendocino	1	On Route 1 from 1.6 miles north of Blue Slide Gulch Bridge No. 10-166 to 0.6 mile south of Hardy Creek Bridge No. 10-141 (portions) and on Route 208, 2.0 miles east of Route 1. Reconstruct 2-lane conventional highway.	6.9	270,000
Mendocino	208	From 2.7 miles to 4.3 miles north of Forsythe Creek Bridge No. 10-10, about 9 miles north of Ukiah. Construct truck passing lane.	1.5	480,000
Mendocino	101	From 1.1 miles to 0.1 mile south of Outlet Creek Bridge No. 10-16, about 2 miles north of Willits. Reconstruct highway.	1.0	260,000
Mendocino	101	From 8.0 miles north to 9.9 miles north of Route 208 near Leggett; 4-lane freeway (Stage 2). (Total estimate \$3,601,000, \$2,500,000 1975-76 F.Y.)	1.9	1,101,000
Mendocino	271	From 1.0 mile to 1.4 miles north of Squaw Creek, about 5 miles south of Leggett. Realign 2-lane conventional road to repair slipout.	0.4	310,000
Monterey	1	From 0.5 mile north of north entrance overcrossing at Ford Ord to Merritt Street in Castroville. (Stage 3.) Pave 4-lane freeway.	7.0	4,950,000
Monterey	1	About 2.6 miles south of Castroville, at Salinas River; construct bridges. (Total estimate \$2,538,000, \$1,200,000 1975-76 F.Y.)	0.2	1,338,000
Monterey	R89.2	Near Greenfield from 0.4 mile north of North Greenfield Overcrossing to 0.2 mile south of Arroyo Seco Overcrossing. Reconstruct northbound lanes.	5.0	1,000,000
Monterey	101	From 0.1 mile west of Clark Street in Salinas to Wood Street in Castro- ville. Reconstruct 2-lane highway.	7.1	3,100,000
Napa	29	From 0.1 mile south of Napa Junction Road to 0.1 mile north of Green Island Road. Construct railroad grade separation (Lombard Cross- ing). (Total estimate \$4,974,200 FAU \$4,374,300, State's share.)	0.9	600,000
Nevada	20	From the Yuba County line to 3.5 miles east. Reconstruct pavement.	3.5	210,000
Nevada	0.0/3.5	From Washington Road to Route 80. Reconstruct pavement.	13.7	570,000
Placer	31.9/45.6	Near Camptonville, from 2.3 miles north of Pleasant Valley Road to 1.1 miles north of Fiddle Creek (portions). Resurface.	17.5	460,000
Nevada	49	About 21.7 miles east of Colfax, at Putts Lake Undercrossing. Replace superstructure.	—	285,000
Yuba	29.8/32.7	Near Truckee, from 3.2 miles south of West River Street to Sierra County Line, Resurface.	12.2	360,000
Sierra	49	In Sacramento, at the El Camino Avenue Interchange. Modify inter- change. (Total estimate \$2,820,000, FAU \$2,336,000, City of Sacra- mento \$34,000, State's share.)	0.7	450,000
Placer	80	In San Francisco from Army Street Undercrossing to south end of Bay- shore Viaduct. Construct concrete median barrier.	1.2	650,000
Placer	54.6/55.1	From Walker Lane about 2.3 miles east of Stockton to 0.1 mile east of Jack Tone Road. Widen to 32-foot section and realign.	4.3	850,000
Nevada	89	On Route 5 from Hammer Lane to Route 12 and on Route 12 from Guard Road to 1.0 mile west of Ray Road. Pave 6-lane freeway on Route 5 and grade and pave Route 12. (Total estimate \$11,700,000, \$1,248,000 1977-78 F.Y.)	8.8	10,452,000
Sacramento	18.2/21.7	From west of Patterson Avenue to Jack Tone Road. Reconstruct road- way.	2.6	250,000
San Francisco *	89	In San Mateo from Ralston Avenue to West Hillsdale Boulevard. Con- struct median barrier.	1.5	430,000
San Jose	0.0/8.7	From Hebard Road to south city limit of Los Gatos (portions). Con- struct median barrier.	—	335,000
San Jose	R7.9/R9.3	At various locations from Saratoga Avenue to Route 101 in San Jose. Install ramp metering and construct 1.0 mile auxiliary lane.	—	1,100,000
Santa Clara *	17	From Camden Avenue in Campbell to the Alameda County line in Milpitas (portions). Pavement reconstruction.	—	1,050,000
Santa Clara	2.8/5.8			
Santa Clara	17			
Santa Clara	7.0/18.0			
Santa Clara	17			
Santa Clara	10.5/24.5

Santa Clara *	280	In San Jose on McLaughlin Avenue from Route 286 to Story Road. Reconstruct city street. (Total estimate \$480,000, City of San Jose \$195,000, State's share.)	—	285,000
Santa Clara *	R0.4			
Santa Clara *	280	In Cupertino at Tantau Avenue. Construct overcrossing. (Total estimate \$710,000, City of Cupertino \$455,000, State's share.)	—	255,000
Santa Clara *	7.9			
Santa Clara *	680	From Route 101 in San Jose to Corning Avenue in Milpitas. Resurface.	4.3	230,000
Santa Cruz	R0.1/R4.4			
Santa Cruz	9	From 1.6 miles south of San Lorenzo Avenue in Felton to 0.1 mile east of Pierce Road in Saratoga (portions). Install and modify culverts ..	—	380,000
Santa Clara	4.0/21.0			
Santa Clara	9			
Shasta	0.0/5.8			
Shasta	5	From 7.3 miles north of Riverview Drive at Lakehead to 0.6 mile north of Shotgun Creek. Structural repair	6.6	2,200,000
Shasta	49.6/56.2			
Shasta	299	From Red Bluff Road in Shasta to Walnut Avenue in Redding. Reconstruct existing 2-lane conventional highway for 3.5 miles, construct truck passing lane for 0.9 mile, widen 2-lane conventional highway for 1.1 miles to connect to existing 4-lane city street	4.6	2,150,000
Sonoma	18.6/23.2			
Sonoma	128	Near Calistoga at 0.7 mile west of Napa County line. Replace Bidwell Creek Bridge	—	220,000
Sonoma	24.0/24.2			
Sonoma	128	About 1.6 miles east of Geyserville at Rockaway Creek. Replace bridge and realign road	—	290,000
Stanislaus	6.5			
Stanislaus	4	From 1.1 miles to 3.0 miles east of the San Joaquin County Line. Realign roadway	1.9	770,000
Yolo	1.1/3.0			
Yolo	80	Near Davis, from Solano County Line to East Yolo Causeway (portions). Install cable median barrier	6.7	275,000
Yolo	0.0/7.3			
Yolo	505	Near Madison from 0.3 mile north of Route 16 to Route 5; 4-lane freeway. (Total estimate \$12,600,000; \$7,600,000 1975-76 F.Y.)	11.1	5,000,000
Yolo	10.9/22.0			
Yolo	505	Near Madison, from 0.5 mile south to 0.7 mile north of Cache Creek. Construct bridge and approaches	1.2	2,325,000
Various *	11.2/12.4			
Various *	Var	At various locations on Routes 17, 92 and 101. Install impact attenuators	—	270,000
Total, Northern Group of Counties				\$91,984,000
SOUTHERN GROUP OF COUNTIES				
Imperial	115	From 2.8 miles north of Route 78 to Route 111 in Calipatria. Reconstruct and resurface	11.3	\$930,000
Kern	23.4/34.7			
Kern	58	From 1.0 mile east of Mojave to 1.3 miles east of California City Boulevard. Resurface	14.9	1,500,000
Kern	114.0/128.9			
Kern	119	From 1.7 miles east of Route 5 to Route 99. Reconstruct roadway	9.8	440,000
Kern	21.5/31.3			
Kern	178	On Route 178 from Route 184 to Sidehill Viaduct Bridge and on Route 184 from Bear Mountain Boulevard to Route 178. Resurface	19.9	410,000
Kern	T9.6/13.7			
Kern	184			
Los Angeles *	L0.0/12.1			
Los Angeles *	1	In Santa Monica and Los Angeles on Route 1 from Route 10 to McClure Tunnel and on Route 10 from Route 1 to Vermont Street. Install median barrier	—	2,800,000
Los Angeles *	R34.6/35.3			
Los Angeles *	10			
Los Angeles *	R2.2/14.2			
Los Angeles *	1	In Los Angeles on Pacific Coast Highway at Bel Aire Club. Widen, construct retaining wall and modify signals	—	600,000
Los Angeles *	38.6/39.1

COUNTY	ROUTE & POST MI.	DESCRIPTION	APPROXIMATE MILEAGE	ESTIMATED COST
SOUTHERN GROUP OF COUNTIES—Continued				
Los Angeles *	2 R18.8/R22.2	In Los Angeles and Glendale from Route 134 to 0.6 mile north of Fern Lane. (Stage 2). Construct 8-lane freeway. (Total estimate \$19,500,000, City of Glendale \$450,000, State's share.)	3.4	19,050,000
Los Angeles *	5 18.4/20.4	In Los Angeles from Route 10 to Route 11. Install median barrier and restripe, Phase 1 of Preferential Treatment Program	—	875,000
Los Angeles *	5 26.6/29.8	In Los Angeles, Glendale and Burbank from Route 134 to Burbank Boulevard. Install concrete median barrier.	3.2	910,000
Los Angeles *	5 32.8/42.3	In Los Angeles, from 0.1 mile north of Fox Street to 0.4 mile south of Roxford Street. Modify median barrier and reconstruct median.	9.5	640,000
Los Angeles *	5 38.5/41.6	In Los Angeles, from Van Nuys Boulevard to Route 405. Install ramp controls	3.1	200,000
Los Angeles *	7 9.4/17.0	From Route 405, in Long Beach, to Imperial Highway in Lynwood. Construct median barrier and ramp bypass lanes. Install ramp control and restripe for HOV lane, Phase 1 of Preferential Treatment Program	7.6	550,000
Los Angeles *	7 17.0/26.5	From Imperial Highway, in South Gate, to Route 10 in Monterey Park. Construct median barrier and ramp bypass lanes. Install ramp control and restripe for HOV lane, Phase 1 of Preferential Treatment Program	—	560,000
Los Angeles *	10 R5.5/14.8	At various locations. Install 42-mile loop control center in District Office	—	240,000
Los Angeles *	11 8.8/21.4			
Los Angeles *	405 13.0/29.5			
Los Angeles *	11 22.3/23.9	In Los Angeles, from Ninth Street to Sunset Boulevard. Widen and install ramp control	—	270,000
Los Angeles *	47 0.9/2.0	In Los Angeles at Vincent Thomas Bridge. Install bridge earthquake restrainers.	—	210,000
Los Angeles *	91 R11.6/R20.7	From Route 7, in Long Beach, to Route 5 in Anaheim. Install ramp control and restripe for HOV lane, Phase 1 of Preferential Treatment Program	—	2,820,000
Orange	91 R0.0/R3.6			
Los Angeles *	126 1.4/4.1	Near Valverde on Henry Mayo Drive from 0.7 mile east of San Martinez Grande Bridge to 0.1 mile west of Castaic Creek Bridge. Construct passing lanes	2.7	350,000
Los Angeles	210 R11.1/R12.1	In Los Angeles from Sunland Boulevard to 1.0 mile east of Sunland Boulevard. Construct connection to Sunland Boulevard.	1.0	2,000,000
Los Angeles *	210 R15.6/R25.0	At various locations from Lowell Avenue in Glendale to Route 134 in Pasadena. Install ramp controls	9.4	350,000
Los Angeles *	210 R29.5/R44.3	At various locations from Rosemead Boulevard (Route 164) near Pasadena to Route 30 in Glendora. Install ramp controls	14.8	650,000
Los Angeles *	210 R31.9/R36.4	From Santa Anita Avenue in Arcadia to Route 605 in Irwindale. Construct concrete median barrier	4.5	650,000
Los Angeles *	405 10.4/24.3	From 0.2 mile south of Carson Street in Carson to La Tijera Boulevard in Los Angeles. Install ramp control and restripe for HOV lane, Phase 1 of Preferential Treatment Program	—	5,500,000
Los Angeles *	405 24.3/29.7	In and near Los Angeles from La Tijera Boulevard to 0.2 mile north of Route 10. Install ramp control and restripe for HOV lane, Phase 1 of Preferential Treatment Program	—	1,685,000
Los Angeles *	405 29.5/39.5	In and near Los Angeles from Route 10 to Route 101. Construct median barrier and ramp bypass lanes. Install ramp control and restripe for HOV lane, Phase 1 of Preferential Treatment Program	—	1,300,000
Los Angeles *	405 38.7/45.5	In Los Angeles from Sepulveda Boulevard to 0.2 mile south of Lassen Street. Upgrade median barrier	6.8	1,200,000
Los Angeles *	605 R9.6/R17.4	In and near Santa Fe Springs, Whittier and Pico Rivera at various locations from Route 5 to Route 60. Install ramp control	17.8	350,000
Los Angeles *	605 R10.1/R19.6	From 0.2 mile south of Telegraph Road in Santa Fe Springs to 0.2 mile north of Valley Boulevard in Baldwin Park. Upgrade median barrier	9.5	1,300,000
Los Angeles *	605 R0.0/R5.1	At various locations from Route 405 in Seal Beach to Route 91 in Cerritos. Install ramp controls	—	200,000
Orange *	605 R0.0/1.6			
Los Angeles, Orange, Ventura	Var	At various locations. Install earthquake restrainers.	—	700,000
Orange *	5 42.1/44.4	From Route 91 in Fullerton to Route 605 in Santa Fe Springs. Construct northbound auxiliary lane and install ramp control	9.2	400,000
Los Angeles *	5 0.0/6.9			
Orange *	5 43.1/44.4	At various locations from Stanton Avenue in Buena Park to 0.2 mile south of Rosecrans Avenue in Norwalk. Modify ramps, install ramp controls and replace planting	3.3	240,000
Los Angeles *	5 0.0/3.3

COUNTY	ROUTE & POST MI.	DESCRIPTION	APPROXIMATE MILEAGE	ESTIMATED COST
SOUTHERN GROUP OF COUNTIES—Continued				
Orange *	405	In Westminster and Seal Beach from 0.3 mile south of Bolsa Chica Road to 0.4 mile north of Seal Beach Boulevard. Upgrade median barrier	2.7	240,000
Riverside	20.3/23.0	Approximately 8 miles west of Blythe from 1.4 miles west to 0.3 mile west of Mesa Drive Overcrossing. Construct CHP platform scales and truck inspection facilities	1.1	460,000
	R143.8/R144.9			
Riverside	15	Near Murrieta on Route 15 from 0.2 mile south of Warm Springs Creek Bridge to 0.2 mile north of Los Alamos Road and on Route 194 (15E) from Route 15 to 0.5 mile north of Murrieta Hot Springs Road. Construct Route 15/194 (15E) Interchange	3.9	8,800,000
Riverside	7.6/10.5			
	194			
	R9.0/R10.0			
Riverside	15	On Route 15 from Route 60 to 1.1 miles south of Slover Avenue and on Route 60 from 0.9 mile west of Milliken Avenue to 0.3 mile east of Wineville Road. Construct 8-lane freeway and north portion of Route 15/60 Interchange	4.0	12,500,000
	R51.5/R52.3			
	R0.0/R1.0			
San Bernardino	60			
	R0.0/R1.3			
	R9.1/R10.0			
Riverside	60	Near Moreno, from Theodore Street Overcrossing to Route 10 in Beaumont. Reconstruct pavement	9.1	1,475,000
	21.4/30.5			
Riverside	79	About 10.0 miles south of Winchester from 0.9 mile south to 0.2 mile north of Benton Road. Realign highway	1.1	375,000
	R6.7/R7.9			
Riverside	111	In Coachella from Avenue 52 to Route 86. Reconstruct and resurface. (Total estimate \$515,000, City of Coachella \$125,000, State's share.)	1.5	390,000
	27.0/28.5			
San Bernardino	10	From the Etiwanda-San Sevaire Flood Control Channel to 0.2 mile west of Cherry Avenue Overcrossing about 1.0 mile west of Fontana. Construct median barrier	1.3	300,000
	11.7/13.0			
San Bernardino	15	1.1 miles south of Slover Avenue and the Southern Pacific Railroad. Construct south portion of Route 10/15 Interchange	1.2	7,200,000
	R1.0/R2.2			
San Diego *	8	In San Diego from 0.5 mile west to 1.2 miles east of Route 163. Construct 0.5 mile auxiliary lane and revise interchanges	1.6	5,400,000
	2.0/3.6			
San Diego	15	In and near Escondido from 0.2 mile north of Country Club Lane to 0.6 mile south of Deer Springs Road. Construct 8-lane freeway	2.1	9,000,000
	R33.9/R36.0			
San Diego	15	North of Escondido, from 0.6 mile south of Deer Springs Road to 1.0 mile north of Deer Springs Road. Construct 8-lane freeway	1.6	11,700,000
	R36.0/R37.6			
San Diego	15	From 1.1 miles south of West Lilac Road, about 10 miles north of Escondido, to 1.6 miles north of Route 76 (portions). Stage 1. Grading for 8-lane freeway	4.9	24,000,000
	R43.2/R48.1			
San Diego *	75	In San Diego at the east bay girder spans of the San Diego-Coronado Bridge. Construct movable scaffold for painting	-	350,000
	20.3/22.1			
San Diego	163	In San Diego from 0.2 mile north of Clairemont Mesa Boulevard to the Route 15/163 Separation. Widen freeway to 8 lanes	2.7	3,500,000
	8.5/11.2			
San Luis Obispo	46	From Route 101 to East Estrella River. Reconstruct roadway and construct truck passing lane	11.9	1,910,000
	29.7/41.6			
San Luis Obispo	46	West of Cholame from 1.6 miles east of Estrella River Bridge to Cholame Creek Bridge No. 49-29. Reconstruct roadway	9.1	1,200,000
	41.6/50.7			
San Luis Obispo	101	Near Pismo Beach from 0.2 mile south to 0.1 mile north of San Luis Obispo Creek Bridge. Revise northbound on-ramp and widen bridge	0.4	660,000
	R21.3/R21.7			
Tulare	43	From Kern County line to 2.1 miles north of Avenue 56. Reconstruct and resurface roadway	9.9	380,000
	0.0/9.9			
Tulare	99	From 0.2 mile north of Avenue 80 to Route 190 (portions). Reconstruct roadway	7.9	280,000
	10.5/18.4			
Ventura	126	In Ventura, at Victoria Avenue. Widen bridge. (Total estimate \$1,100,000, FAU \$900,000, State's share.)	-	200,000
	1.5			
Total, Southern Group of Counties				\$140,200,000
Total, Northern Group of Counties				\$91,984,000
Total, Southern Group of Counties				\$140,200,000
TOTAL, MAJOR CONSTRUCTION PROJECTS				\$232,184,000

* Project may be deferred to free funds for mass transit guideway purposes (Section 199 and 200, Streets and Highways Code and California Highway Commission Resolution M-40, July 1975).
